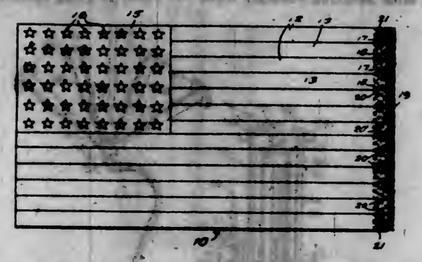
1. In a retaining device for gage and other instrument cases, the combination with a supporting board having an opening therethrough, and a case body to be inserted through said opening, of spring arms secured to that portion of said body which extends through said opening, said arms constructed to engage the inner wall or edge of the opening to retain the case body in position.

1,398,374. LATCH. John A. Gustus, Detroit, Mich. Filed Dec. 19, 1919. Serial No. 346,097. 9 Claims. (Cl. 292—143.)



1. The combination with a hinged door, of a bolt at the swinging edge of said door and extending transversely thereof, a lever pivoted at its inner end upon said door and having an upwardly extending arm connected to said bolt to move the same longitudinally, and a handle at its outer end, said lever normally retaining said bolt in its outer position, and a guide for said bolt provided with a projection adapted to overlap said lever and to be engaged thereby when the same is actuated to move said bolt inwardly and to move said door outwardly.

1,398,375. DUMP-CAR. Harry S. Hart, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed Sept. 12, 1918. Serial No. 253,704. 10 Claims. (Cl. 105—243.)

6. A dump car including sides, ends and a bottom, and side swinging door pivotally connected to the sides of the car for dividing the same into compartments.

1,398,376. FLAG. John H. Simmons, Norfolk, Va. Filed Mar. 25, 1921. Serial No. 455,638. 12 Claims. (Cl. 116—173.)

1. A flag of the character described having its free edge raw and provided near such raw edge with spaced retarding stitches arranged substantially parallel with said raw edge, said flag also having stitchings extending across the retarding stitches and serving to bind them to the flag.

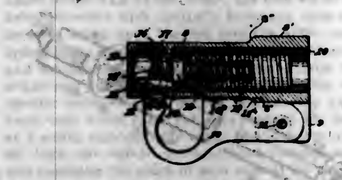
1,398,377. VALVE-GRINDING TOOL. Harry C. Hughes, Cincinnati, Ohio. Filed Apr. 2, 1920. Serial No. 370,849. 5 Claims. (Cl. 51—29.)

1. A valve grinding tool comprising a tapered bar, slots in the bar, pins in the slots and slidable endwise therein and adapted to be separated by the wedge action of the bar, retaining means for maintaining the pins slidably in the slots, said pins being adapted to enter the holes in a valve head for the purpose described.

1,398,378. COTTON PRODUCT AND PROCESS FOR MAKING THE SAME. Raymond W. Jacoby, Garnerville, N. Y., assignor to Rockland Finishing Co. Inc., a Corporation of New York. Filed Dec. 10, 1920. Serial No. 429,771. 8 Claims. (Cl. 8—2.)

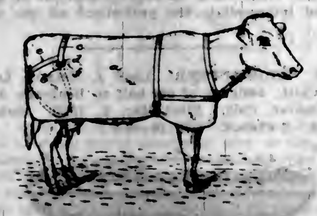
1. As a new product, an unbleached cotton yarn formed of fibers from which a substantial amount of the natural waxes and oily substances has been removed.

1,398,379. SAFETY-RAZOR. John L. King, New York, N. Y., assignor to Rotary King Safety Razor Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 13, 1920. Serial No. 409,871. 4 Claims. (Cl. 30—12.)



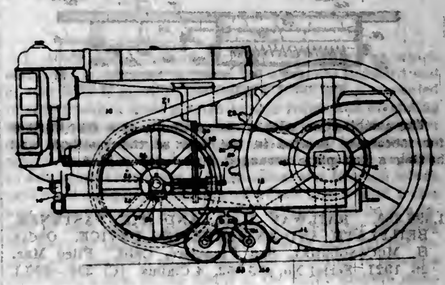
1. In a safety razor, the combination of a supporting member, a blade movably mounted thereon, a cam roller

mounted in bearings formed in said supporting member, an oscillating member pivotally secured at one end thereof to the rear edge of the supporting member, a projection on said oscillating member engaging the cam roller,



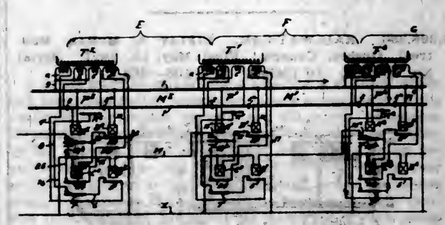
the free end of said oscillating member extending downwardly through an opening in the supporting member, a projecting head on the free end of said oscillating member engaging the blade and transmitting a reciprocating motion thereto.

1,398,380. PADLOCK. Wasyl Kuc, Winnipeg, Manitoba, Canada, assignor of one-half to Jack Sorewsky, Fisher Branch, Manitoba, Canada. Filed Jan. 19, 1920. Serial No. 352,418. 1 Claim. (Cl. 70—105.)



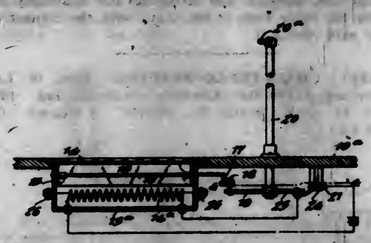
A lock of the class described comprising a circular casing having an enlarged rear end defining a beveled annular shoulder, spaced lugs formed on and extending laterally from the enlarged rear end of said casing, a shackle having one end pivoted between said lugs with an inner edge thereof offset to provide a beveled shoulder for engagement with the beveled casing shoulder, compensating for strains when the shackle is subjected to end thrusts, a keeper portion upon the offset end of said shackle projecting into the casing, and a sliding bolt within the casing adapted to engage the shackle keeper.

1,398,381. ANIMAL-COVER. Richard T. Laacke, Milwaukee, Wis. Filed June 26, 1920. Serial No. 392,468. 4 Claims. (Cl. 54—24.)



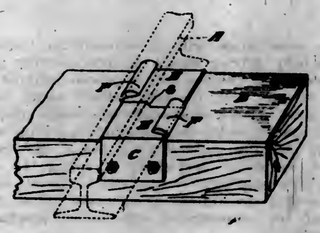
1. An animal cover comprising a blanket formed adjacent its longitudinal center and over the hips with openings, leg straps attached to the rear end of the blanket on each side of and adjacent the longitudinal center thereof and adapted to pass downwardly and forwardly inside of the hind legs of an animal and thence upwardly through said openings, and fastenings for detachably connecting the other ends of the straps with the blanket adjacent said openings.

1,398,382. CHAIN-TREAD TRACTOR. John W. Lambert and Alvin Ray Lambert, Anderson, Ind. Filed Dec. 14, 1918. Serial No. 266,760. 9 Claims. (Cl. 305—8.)



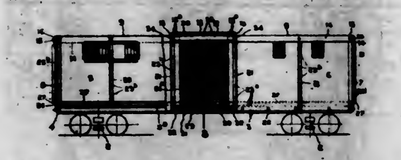
1. The combination with a conventional tractor including a body, driving wheels, an axle centrally pivoted to the body, and another pair of wheels adapted to be mounted on said axle, the latter wheels being removed from the axle, of an endless track attachment comprising a frame journaled on the mounting for the driving wheels, means for pivotally connecting the end of the frame to said axle, means for operatively mounting the wheels removed from said axle in the tractor frame, and an endless track device trained around each of the driving wheels and the corresponding other wheel, substantially as set forth.

1,398,383. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. Lloyd V. Lewis, Edgewood borough, Pa., assignor to Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Original application filed Mar. 12, 1915, Serial No. 13,853. Renewed as Serial No. 270,740, filed Jan. 11, 1919. Original application divided and this application filed Feb. 25, 1918. Serial No. 217,309. 9 Claims. (Cl. 246—38.)



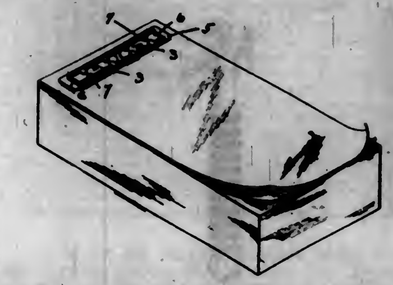
9. In combination, a block of railway track, a track-way impulse device for said block, a stick relay for controlling said device, a normally closed main circuit and a normally open stick circuit for said relay, means controlled by a train in said block for opening said main circuit, and means controlled by a train entering said block for closing said stick circuit before opening said main circuit and for keeping said stick circuit closed until the train has passed said impulse device.

1,398,384. FOOT-WARMER FOR CAR-PLATFORMS. Leo Lomma, Buffalo, N. Y. Filed Apr. 6, 1920. Serial No. 371,883. 1 Claim. (Cl. 219—34.)



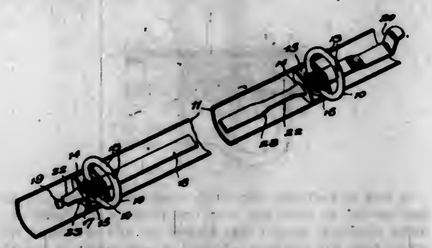
The combination with a car-vestibule, of a foot-warmer for motormen located in the floor of the vestibule and having a top plate arranged flush with said floor.

1,398,385. RAILWAY RAIL AND TIE FASTENER, BED-PLATE, AND ANTICREEPING DEVICE. Oscar H. McConoughey, San Francisco, Calif. Filed Mar. 26, 1921. Serial No. 455,952. 4 Claims. (Cl. 238—290.)



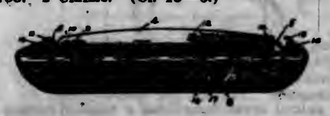
1. A combination rail and tie fastener and bed plate for railways, consisting of a pair of plates, each consisting of a single piece of metal L shaped in cross section, having one inner face adapted to be fastened to the side of a tie and the other inner face adapted to cover the top of the tie at the intersection of the rail and transversely therewith, forming one-half of a bed plate therefor and having an upwardly and inwardly bent member at one end to engage and grasp one rail base flange, said plates applied in pairs on opposite sides of a tie, substantially as described.

1,398,386. RAILWAY-CAR. Finlay A. McRae, Montreal, Quebec, Canada. Filed May 13, 1921. Serial No. 469,368. 10 Claims. (Cl. 105—363.)



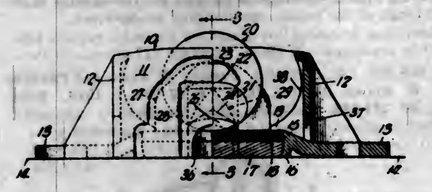
1. A railway car including a knock-down body having a door opening and roof detachably mounted thereon, said roof consisting of unitary sheet-metal end sections and an intermediate section the abutting edges of the sections being bent back in hook form and detachably interlocking, and the outer edges of the intermediate section being extended laterally to present portions overhanging the door opening.

1,398,387. BINDER FOR SHEETS, LEAVES, AND THE LIKE. Hubert M. Morris, San Francisco, Calif. Filed Apr. 26, 1920. Serial No. 376,450. 3 Claims. (Cl. 24—188.)



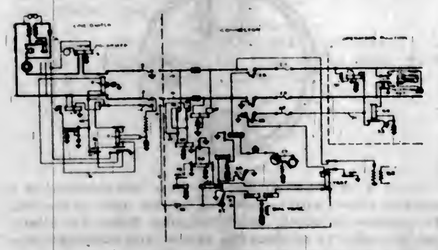
1. As an article of manufacture, a cap or locking plate for sheet binders consisting of a strip having transverse slots adjacent to its ends to receive binding tongues, and having upwardly projecting bendable lugs punched from the body of the strip and adapted to be folded down over binding tongues laid down on the strip.

1,398,388. LOOSE-LEAF BINDER. William Harold Murphy, Independence, Mo. Filed Feb. 5, 1920. Serial No. 356,365. 6 Claims. (Cl. 129—24.)



1. In a loose leaf binder, the combination with the back, of binding rings each comprising a pair of mating binding posts or prongs pivotally mounted on said back, transversely spaced projections on the binding posts, said projections being on the exterior of said posts and located below the binding surfaces of the posts, a locking bar below said posts and positioned between the projections of each of said binding rings, said bar being of reduced width adjacent each pair of binding posts to form cam surfaces on each of its sides, said cam surfaces being adapted to engage the projections on said posts to close the binding rings, and means independent of the bar for opening said rings when the reduced portions of the bar are moved intermediate the projections on the binding posts.

1,398,389. SHOE-BUFFER. Leon J. Nelson, Los Angeles, Calif., assignor of one-half to Benjamin A. Metcalf, Denver, Colo. Filed Mar. 2, 1920. Serial No. 362,733. 2 Claims. (Cl. 15—6.)

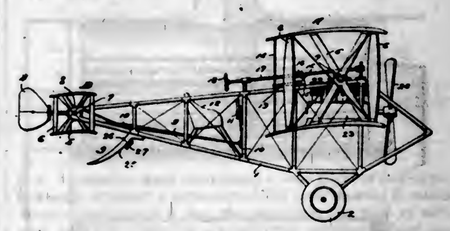


1. A shoe buffer comprising a handle-body, a hook swiveled to said body near one end thereof, a hook yieldingly connectible with said body near the other end thereof, clamp-members detachably engageable with said hooks, and facing-strips having the ends thereof held by said clamp-members and extending from end to end of the body across one face thereof.

1,398,390. ANTIFRICTION-BEARING. Hubert M. Perry, Chicago, Ill., assignor to Sophie L. Woods, Chicago, Ill. Filed June 3, 1920, Serial No. 386,184. Renewed Oct. 8, 1921. Serial No. 506,488. 3 Claims. (Cl. 64—64.)

3. In a side bearing, the combination of an open top casing having side and end walls, means providing a bearing plate at the bottom of said casing, a roller in said casing capable of a limited rolling movement on said bearing plate from the center toward either end of the casing, said roller having overbalance extensions at its ends on one peripheral side of the roller, lugs projecting outwardly from the ends of said overbalance extensions near the periphery thereof, said lugs being of flat, elliptical cross section arranged with the greatest diameter at a right angle to the axis of the roller, the side walls of the casing being provided with centrally arranged, larger and smaller recesses which open the one into the other, said larger recesses being adapted to receive the overbalance extensions and the smaller recesses being substantially triangular in shape and adapted to receive said lugs, the sides of said smaller recesses being curved downwardly and outwardly from each other from the apex toward the base, which is of a width substantially equal to the width of said elliptical lugs, the curved sides of said recesses coacting with and engaging the sides of said lugs at all times to prevent longitudinal displacement of said roller in any of its positions on said wear plate.

1,398,391. AUTOMATIC TELEPHONE SYSTEM. Winfred T. Powell, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed July 28, 1919. Serial No. 313,878. 11 Claims. (Cl. 179—9.)

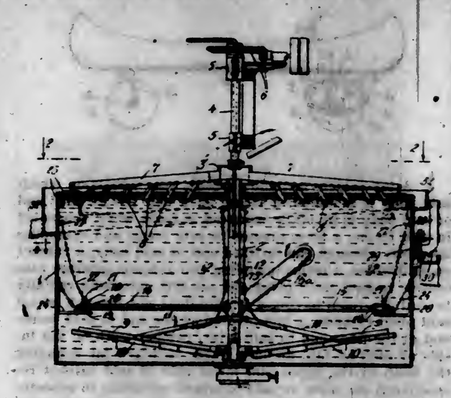


1. In a telephone system, a plurality of telephone lines, a service charging device associated with certain of said lines, means for extending any one of said lines to any other line, means operative during the extension of a call from a telephone line provided with a service charging device to certain lines for operating said service charging device, and means including an electromagnetic device having elements operating in different time intervals to disable said last mentioned means when no charge is to be made.

1,398,392. TOY VEHICLE. Frederick J. Reuter, Oakland, Calif. Filed Jan. 25, 1921. Serial No. 439,898. 2 Claims. (Cl. 208—37.)

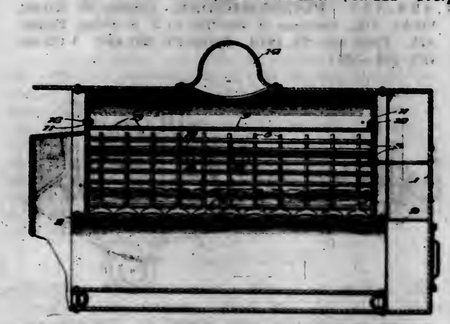
1. A toy vehicle including a body, rear wheels on which said body is mounted, a frame on which the forward end of said body is pivotally mounted, a front wheel journaled in said frame, a lever pivoted to said frame and extending upwardly through the forward end of said body, a ratchet on said wheel, a frame including two arcuate members concentric to said lever pivot and an arm extending radially to said pivot and having a longitudinal slot through which said pivot extends, a link pivoted at one end to said frame and at its other end to said lever, ratchet teeth on the inside of each of said arcuate frame members for engaging the teeth at the upper and lower side of said ratchet respectively, the teeth on said members extending in opposite directions, a cam on the inside of the upper arcuate member rearwardly of the teeth on said member for engaging said ratchet and lifting the teeth of the upper arcuate member out of engagement with the teeth of said ratchet and the teeth on the lower arcuate member into engagement with the ratchet teeth, and a cam on the inside of the lower arcuate frame member forwardly of the teeth on said member for engaging said ratchet and drawing said teeth out of engagement with the ratchet teeth and drawing the teeth on the upper arcuate member into engagement with the ratchet teeth.

1,398,393. FLYING-MACHINE. Georgs W. Riley, Fouke, Ark., assignor of one-fifth to J. J. Shipp, Fouke, Ark. Filed Apr. 21, 1919. Serial No. 291,440. 1 Claim. (Cl. 244—29.)



A flying machine comprising a fuselage, a group of upper and lower horizontal sustaining planes at each end of the fuselage, said groups mounted to tilt about transverse horizontal axes relatively offset in a vertical plane whereby the upper surfaces of the front group swing in an arc above the fuselage and the lower surfaces of the rear group swing in an arc below the fuselage, propelling means supported between the planes of the front group and movable therewith, and tilting means connected to each group and operable for effecting a change in the longitudinal inclination of the sustaining surfaces and a corresponding change in the inclination of the propeller, whereby the latter exerts a direct pulling force in the desired direction of movement.

1,398,394. METHOD OF CONCENTRATION OF ORES. Hallet Rich Robbins, Manchester, N. H. Filed Oct. 21, 1919. Serial No. 332,345. 13 Claims. (Cl. 83—85.)



1. In a flotation process the operations of maintaining throughout the entire horizontal cross-sectional area of a

body of freely-flowing ore pulp a substantially uniform ascending column of minute gaseous bubbles, maintaining throughout said area a substantially homogeneous descending column of pulp, elevating pulp from the lower part

of said body of pulp and discharging it substantially uniformly throughout the horizontal cross-sectional area of the upper part of said body of pulp thereby causing circulation of said pulp in a homogeneous column, and separating the floated mineral from the remainder of the pulp.

1,398,395. STEAM-BOILER AND STEAM-POWER GENERATION. George S. Roberts, Bend, Oreg. Filed Apr. 21, 1921. Serial No. 463,212. 5 Claims. (Cl. 122—408.)

1. In combination with a fire tube boiler having its normal water level at a point below a portion of the fire-tubes thereof, percolating means in the boiler for circulating the water, spaced superposed internal baffles extending throughout the boiler, one of said baffles being arranged to have jets of water from said percolating means impinged thereupon and distributed over the uppermost of said fire-tubes, and the other of said baffles having means for receiving the unconverted water from said jets and distributing the same by gravity over the remainder of the fire-tubes.

1,398,396. CLOTH-CUTTING AND PATTERN-MARKING MACHINE. Joseph A. Rosenfeld and Harry Rosenfeld, Cleveland, Ohio. Filed Mar. 29, 1921. Serial No. 456,291. 6 Claims. (Cl. 101—26.)

1. In a pattern marking machine, the combination of a needle for making perforations to mark a design, means for reciprocating the needle, a reservoir for a marking fluid, a tube leading from the reservoir, and the tube

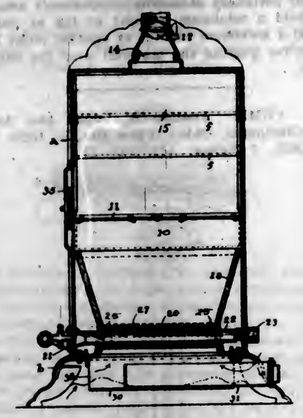
having alining openings in its wall for the passage therethrough of the needle, substantially as described.

1,398,397. OIL-BURNER. Parmly H. Ryder and Charles W. Moore, Bucyrus, Ohio. Filed Feb. 1, 1919. Serial No. 274,472. 1 Claim. (Cl. 158—76.)

An oil burner including a cylindrical chamber, one end of which is of a truncated cone shape, and the opposite end equipped with a screw threaded neck, a nozzle threaded in said neck, and provided with a reduced smooth body which extends concentrically through said chamber from one end to the other and terminating in the truncated end of said chamber, an air inlet elbow communicating with said chamber adjacent the outlet terminus of the nozzle, said air inlet supplying the air for atomizing the oil and the air necessary for combustion of the oil as the latter is dispensed through said nozzle.

1,398,398. CYLINDER-LAPPING TOOL. William A. Salter, Kansas City, Mo. Filed Nov. 2, 1920. Serial No. 421,355. 9 Claims. (Cl. 51—205.)

1. In a cylinder lapping tool, the combination of a metallic collar, with compression tension, split on one side throughout its length, internal flexible means for attaching the collar to an operative handle, and adjustable non-yielding means for expanding the collar.

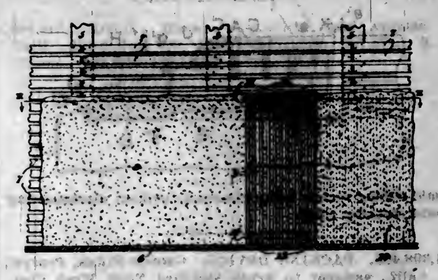


1,398,399. BUMPER-ACTUATED VEHICLE-CONTROL MECHANISM. Karl Ottmy Schafnar, San Francisco, Calif. Filed Apr. 5, 1920. Serial No. 371,894. 7 Claims. (Cl. 188—82.)

1. In combination with a motor driven vehicle provided with a brake for retarding the movement thereof, a brake lever associated therewith, a bumper carried by the vehicle, electrically controlled means connected therewith and with said brake lever and thrown into operation on

said bumper engaging an object for operating said brake lever to actuate the brake to retard the movement of the vehicle.

1,398,400. COMBINED COAL AND GAS STOVE. Nikolaus Schebesch and Stefan Schebesch, Cleveland, Ohio. Filed Oct. 17, 1919. Serial No. 331,227. 2 Claims. (Cl. 126—88.)



2. A combination stove for gas and solid fuel, comprising a chamber having fixed grate members in its bottom and sides for solid fuel and a middle tubular grate member having perforations to emit gas, and a rotatable gas supply pipe on which said tubular grate member is fixedly mounted and provided with perforations to emit gas into said tubular member.

1,398,401. AUTOMOBILE-LICENSE FASTENER. Ryland B. Shaw, Decatur, Ill. Filed Apr. 14, 1920. Serial No. 373,762. 4 Claims. (Cl. 40—125.)

1. In a device of the class described, a clamping bar, means for securing a display member to said bar, a second complementary clamping bar, a lug on and extending at an angle from said first mentioned clamping bar and having a plurality of spaced notches therein, said second mentioned clamping bar being adapted to be supported in any selected notch of said lug so as to vary the amplitude of the clamping movement of said bar and means for drawing together said bars to clamp a support.

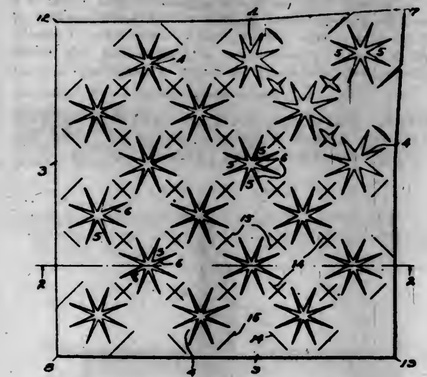
1,398,402. WALL CONSTRUCTION. Frank Semante, Grand Haven, Mich. Filed May 5, 1921. Serial No. 467,152. 5 Claims. (Cl. 72—16.)

1. In a wall construction, the combination with upright studding members having laths connecting the same, and a primary layer of plaster applied to said laths, of a sound deadening fabric applied to the outer surface of said primary layer of plaster, and a second layer of plaster applied to the primary layer of plaster and said sound deadening fabric whereby the latter is completely covered.

1,398,403. PAINT-PACKAGE AND METHOD OF MAKING IT. George W. Stahl, Chicago, Ill. Filed Nov. 3, 1920. Serial No. 421,481. 5 Claims. (Cl. 41—4.)

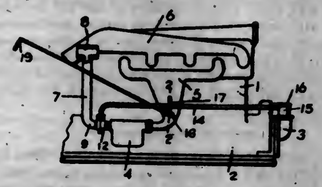
1. A paint package comprising a base adapted to receive a deposit of paint, a celluloid or like cover having a raised center portion and a flat rim overlying the face of said base, said rim extending a substantial distance beyond the edges of said base, a back member of fibrous material underlying said base and having its edges coextensive with the edges of said cover, a plurality of fasteners each securing together the edges of said cover and base along one side of the package, and a continuous rim of an impervious sealing compound or wax embracing the said edges of the cover and base.

1,398,404. DISK-SHAPED COMMUTATOR FOR GYROSCOPE-MOTORS. Hermann Sundhaussen, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Jan. 15, 1921. Serial No. 437,604. 5 Claims. (Cl. 171—220.)



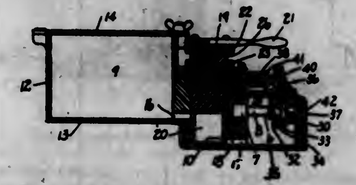
2. A disk-shaped commutator for motors of the class described comprising a supporting disk-shaped element provided with a hub portion, supporting sectors mounted upon said supporting element, each of said supporting sectors being provided with a ledge portion disposed adjacent the hub of said supporting element, sliding sectors secured to said supporting sector, a ring screwed upon

said hub and abutting said supporting sectors on said ledges, securing rings for retaining said sectors in place.



said sliding sectors being removable without disconnecting said securing rings.

1,398,405. PACKING DEVICE. GEORGE SYKES, Penryn, Calif., assignor to Sykes Standard Fruit Wrap Company, Penryn, Calif., a Corporation of California. Filed Apr. 22, 1919. Serial No. 291,996. 7 Claims. (Cl. 217—27.)



1. A separator for use in packing fruit comprising a sheet of conformable material having a series of slits therein whereby the sheet is deformable in any direction.

1,398,406. ATTACHMENT FOR HYDROCARBON-ENGINES. THOMAS ROBERT TURNER, Toronto, and JAMES ALEXANDER NESBITT, London, Ontario, Canada. Filed May 6, 1921. Serial No. 467,418. 4 Claims. (Cl. 123—119.)

1. In a hydro-carbon engine, the combination with the crank case having a breather port, inlet manifold, and carbureter, of an air supply tube leading to the carbureter, a pipe connected at one end of the air supply tube and to the breather port at the opposite end, a suction valve for controlling the passage of air through the pipe, a tube connecting the pipe with the inlet manifold, and manual means for controlling the passage of air from the pipe through the tube into the inlet manifold.

1,398,407. INKING-MACHINE. LOUIS J. VAN GUELPEN, Cincinnati, Ohio. Filed Mar. 17, 1919. Serial No. 283,224. 9 Claims. (Cl. 91—51.)

1. In an inking machine of the character described, an ink reservoir, a revolving wheel therein, means for revolving the same, and automatic spacing means for guiding the material as it is passed forward and backward over the surface of said wheel to ink the edge thereof.

6. In an inking machine of the character described, an ink reservoir, a revolving wheel therein, said wheel having an irregular periphery extending continuously around the same to hold a minimum amount of ink at one point thereof and a maximum amount at another point thereof, and means for guiding the material over the surface of said wheel.

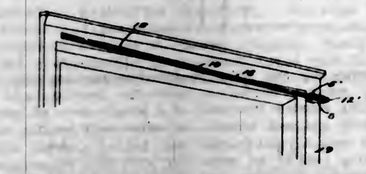
1,398,408. PUMP. AUGUST B. VOGES and ANTHONY VOGES, Cincinnati, Ohio. Filed Dec. 9, 1920. Serial No. 429,396. 7 Claims. (Cl. 230—27.)

1. In a pump, a cylinder having an inlet opening in one end, a plunger in said cylinder, means for actuating said plunger, an inlet valve at the other end of said cylinder, a rigid inlet-valve element at said one end, having fixed thereon a gasket face with an opening, means supporting said rigid element to move toward said one end to bear thereon with said gasket face across said inlet opening, or to move away from said end, and to move on said end to present its gasket face with the opening of said gasket face out of register or in register with said inlet opening, alternatively, and outlet valves at opposite ends of the cylinder.

1,398,409. SHEET-METAL BOX. FREDERICK WESTERBECK, St. Louis, Mo. Filed June 27, 1919. Serial No. 307,166. 1 Claim. (Cl. 220—73.)

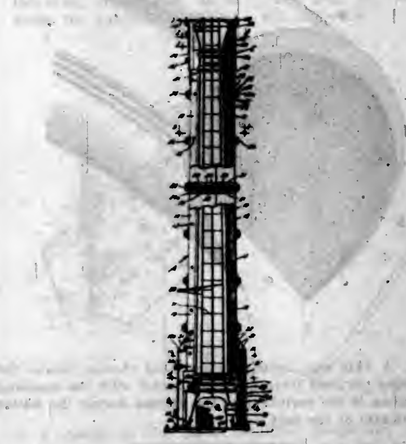
A sheet metal box body comprising a plurality of sheets of metal bent to form seamless corners, said sheets of metal being joined by seams located between the corners of the box body, and reinforcing means for the upper end

of said box body comprising a web extending inwardly from the upper marginal edge of each sheet, said web having a depending curl extending downwardly from the inner edge of the web and thence upwardly and outwardly so as to provide a stiffener-rod-receiving tubular



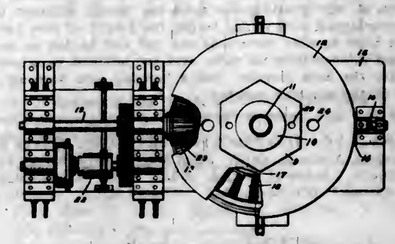
portion interiorly of the web, an open space being left between said depending curl and said upper marginal edge so as to permit flexure of said upper marginal edge, and a continuous stiffener rod in said tubular portion and spanning said seams.

1,398,410. EMBEDDING PROCESS. EDWIN L. WIEGAND, Pittsburgh, Pa. Filed June 21, 1920. Serial No. 390,892. 9 Claims. (Cl. 219—25.)



1. The process of producing an electrical heating element which contains the steps of first, introducing into a suitable receiver a uniformly impressionable mass of non-fluid embedding material, second, introducing into said mass a previously formed resistance element and simultaneously subjecting the mass to high pressure so as to compact the same and hold said resistance element in place, third introducing additional embedding material to cover said resistance element, next drying the mass, and finally bringing the same to a stable condition by the application of heat.

1,398,411. CURTAIN-ROD. JOSEPH BRADLEY AKERS, New York, N. Y. Filed July 17, 1920. Serial No. 396,997. 5 Claims. (Cl. 156—22.)

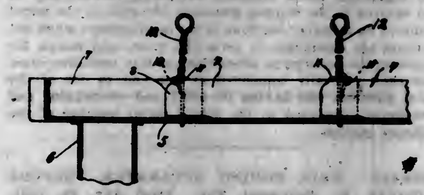


1. A curtain rod comprising an arm having a flattened side, an attaching bracket having a base portion and a vertical plate portion extending outwardly at right angles thereto, the free end of said plate portion being bifurcated and having said arm pivoted vertically for horisontal swinging movement therein near one end to provide a short projecting portion at the adjacent end of the arm, and a spring strip secured to the outside of the vertical plate portion and curved laterally and away from the same, then parallel thereto and having its free end bent inwardly substantially at right angles to form a stop to engage the short projecting end of the arm and hold the same at right angles to the plate limited against further movement in that direction but adapted to extend outwardly in alinement with the plate and held by the spring adjacent to the curved portion thereof.

1,398,412. MOLD. HENRY BARKSCHAT, Los Angeles, Calif. Filed June 30, 1919. Serial No. 307,571. 9 Claims. (Cl. 25—118.)

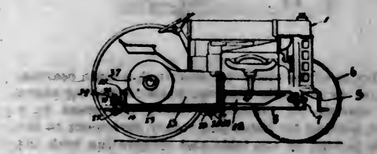
1. A mold comprising a plurality of separable sections, each including longitudinally extending wooden members and segmental metal members extending transversely of and secured to the wooden members, the ends of the metal members on adjacent sections being in alinement when the sections are assembled to form the mold, and means for retaining the sections in assembled relation including draw bars each pivotally connected at one end to one of the metal members and having its other end overlapping and detachably connected to the alined metal member of the adjacent section.

1,398,413. WELL-BORING APPARATUS. BURWELL BOYKIN, Jr., Beaumont, Tex. Filed Apr. 29, 1921. Serial No. 465,475. 3 Claims. (Cl. 255—23.)



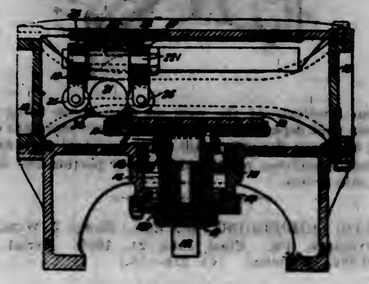
1. In a device of the character described, a main bearing, a table keyed to the main bearing, means operating above the main bearing for imparting rotary movement to a boring pipe, gearing for imparting rotary movement to the table, teeth carried by the table and coöperating with the gearing, said gearing operating above the teeth, and means for locking the bearing and table against rotary movement.

1,398,414. HALF-SOLE FOR PNEUMATIC TIRES. Ferdinand Francis Beecher, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 30, 1920. Serial No. 369,964. 6 Claims. (Cl. 152—17.)



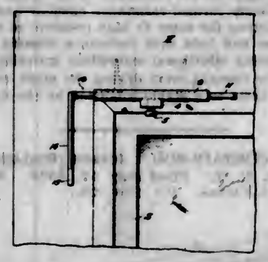
1. A half sole having incorporated therein means for holding portions thereof out of contact with the opposing portions of the periphery of the carcass during the initial applicatin of the half sole.

1,398,415. EAVES-TROUGH. Turner Byrd, Lansing, Mich. Filed Sept. 27, 1920. Serial No. 412,927. 1 Claim. (Cl. 108—28.)



In an eaves trough, strips of waterproofed material positioned within the trough, said strips having their adjacent ends overlapping, a securing member including a length of wire positioned around the trough adjacent to the overlapped ends of the strips, the length of wire having a hook member formed at one end and having an eye formed intermediate its ends, said eye adapted to accommodate the hook member, and a hanging arm forming a part of the securing member.

1,398,416. DRAWBAR FOR TRACTORS. Henry E. Carnes, Anaheim, Calif. Filed Mar. 3, 1919, Serial No. 280,459. Renewed Oct. 6, 1921. Serial No. 505,925. 7 Claims. (Cl. 213—67.)

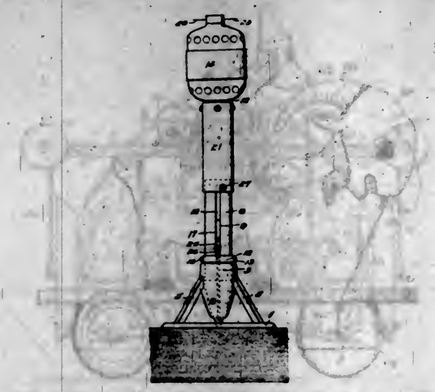


4. A draw bar construction for tractors comprising means for supporting a stud beneath the forward end of the tractor frame, a bar pivotally connected to the stud and extending backwardly beyond the rear axle.

1,398,417. VARIABLE-SPEED GEARING. Christopher Brunswick Chicken and George Scott, Newcastle-upon-Tyne, England, assignors to Sir W. G. Armstrong, Whitworth and Company, Limited, Newcastle-upon-Tyne, England. Filed Sept. 15, 1919. Serial No. 323,890. 7 Claims. (Cl. 74—28.)

1. In variable speed gearing, a disk, a carriage, a ball in the carriage and in contact with the disk, a roller in contact with the ball, a second roller in the carriage in contact with the ball opposite to the disk, a third roller in the carriage in contact with the ball opposite to the first roller, and means for traversing the carriage along the first roller.

1,398,418. COMBINED SHADE-BRACKET AND POLE-SUPPORT. Herbert E. Church, Oneonta, N. Y. Filed Jan. 20, 1921. Serial No. 438,719. 1 Claim. (Cl. 156—24.)

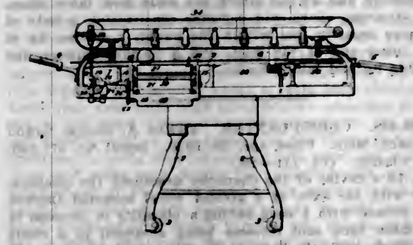


A device of the class described comprising an attaching member having a sleeve-like bearing, and a supporting member composed of a single piece of heavy wire with one end adapted to enter said bearing and bent to form a right-angular arm having a shade roller supporting loop at its outer end, said wire being folded down against the outer end of said loop and extended to form an oblique bracing arm having an upstanding member at its lower end for engaging a window frame, the said wire being extended above the said first mentioned arm and bowed outwardly and equipped at its upper end with a forwardly extending right angular arm having a pole receiving seat at its terminal.

1,398,419. PORTABLE PIERCING DEVICE. Grosen E. Conner, St. Louis, Mo. Filed Dec. 6, 1918. Serial No. 265,621. 11 Claims. (Cl. 77—6.)

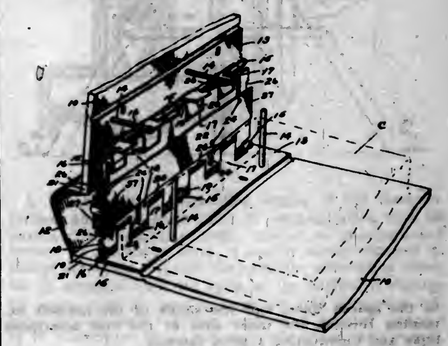
1. In a device of the class described, an electric motor including an armature shaft, piercing means revolubly

with the armature shaft, a support having a slight opening, and extensible means interposed between the motor



and said support, all of said elements being arranged in axial alignment, and said extensible means adapted to act as a handle for positioning the device.

1,398,420. RAILROAD-FROG. Nicola A. Cottese, Bovey, Minn. Filed May 31, 1921. Serial No. 474,024. 1 Claim. (Cl. 246—463.)



A separable frog of the character described comprising in combination a base portion having a Y-shaped upwardly extending central portion for coöperative engagement with the wing rails and point of a track frog, short pieces of rail like sections formed integral with said Y-shaped portion which form continuations of the wing rails, and means for firmly uniting the separable parts of the frog, substantially as described.

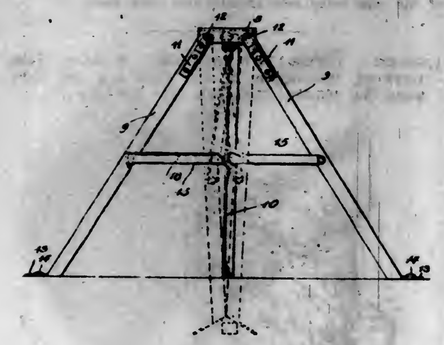
1,398,421. LABELING-MACHINE. Haywood Guion Dewey and Fundenick H. Knapp, Westminster, Md., assignors to Fred H. Knapp Company, Westminster, Md., a Corporation of Maryland. Filed Mar. 28, 1917. Serial No. 157,902. 18 Claims. (Cl. 216—44.)

4. In a labeling machine, the combination of a runway for cans having slip covers, a label support intermediate the ends of the runway, tap end paste applying means, and means for applying a limited circumferential strip of paste between the label and can at the extreme edges of the label, the body portion of the label between said strips and at the joint between the cover and body of the cans being substantially free from paste.

1,398,422. LOOSE-LEAF BINDER. William Fred Dunning, Washington, D. C. Filed Aug. 24, 1920. Serial No. 405,649. 7 Claims. (Cl. 129—8.)

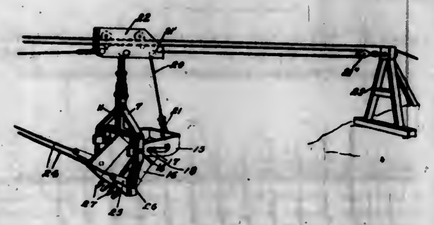
1. A device of the class described comprising side members, a back comprising relatively movable plates for opening and closing said device, post-carrying members hinged to said plates, and straight binding posts carried by said members, said post-carrying members and plates being adapted to coöperate to position said posts in spaced parallel relation when the device is in closed position.

1,398,423. FILM-CLIP AND ORDER TAB-HOLDER. Glen M. Dye, Minneapolis, Minn. Filed May 5, 1919. Serial No. 294,673. 5 Claims. (Cl. 95—100.)



1. A device of the kind described comprising a supporting bar and a plurality of combined film and order tab holders spaced thereon.

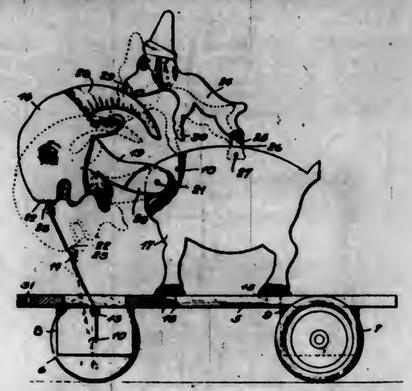
1,398,424. VISE-STAND. Morgan Evans, Pittston, Pa. Filed June 7, 1921. Serial No. 475,752. 1 Claim. (Cl. 218—41.)



A stand comprising a platform, a downwardly and forwardly disposed flange carried thereby, a second flange carried by the stand and extending at right angles to the first mentioned flange, a plurality of legs having their upper ends positioned against one face of the flanges, an off-set bearing carried by each of the links at its upper end and positioned against the opposite face of the flanges, pivots extending through the flanges, legs and bearings, a pair of links having their outer ends pivoted to one pair of the legs, a pair of spaced links

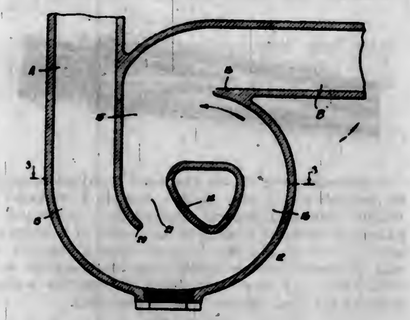
having their outer ends pivoted to the other leg, an eye-bolt having pivotal connection with the inner ends

of the spaced links, and the shank of the eye-bolt extending through the inner ends of the first mentioned links and constituting a pivot therefor.



1,398,425. CABLEWAY EXCAVATING-BUCKET. ERNEST H. FALLENSTEIN, Mankato, Minn., assignor of one-half to Vergil E. Gill, Boulder, Colo. Filed Mar. 2, 1921. Serial No. 449,177. 2 Claims. (Cl. 37—54.)

1. An excavating bucket including a support, a bucket section pivotally mounted within the support, rollers carried by the bucket section, a locking bail associated with the bucket section, said locking bail having slotted trackways to accommodate the rollers, said trackways having right angle portions to accommodate the rollers for holding the bucket section in a locked position.

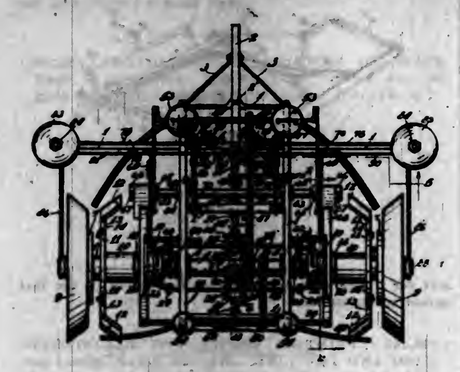


1,398,426. FIGURE WHEELED TOY. KATHERINE B. FULD, Baltimore, Md., assignor to William Fuld, Baltimore, Md. Filed Jan. 11, 1921. Serial No. 436,419. 2 Claims. (Cl. 46—45.)

1. A toy comprising, in combination, a wheel-equipped platform, a figure having a body portion, an oscillating member pivotally connected to said body portion and having a cam surface thereon, means connecting the wheel members and said oscillating member to actuate the latter in the movement of the former, and a second figure pivoted to the body portion of said first figure and

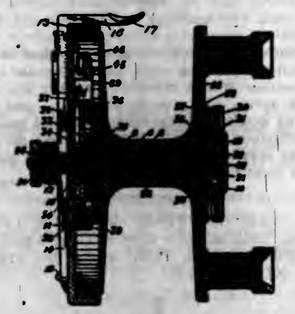
having its free forward end resting on the cam surface of said oscillating member to be rocked by the movements thereof.

1,398,427. NON-SIPHONABLE TRAP. DANIEL A. GILLEN, Flushing, N. Y. Filed Jan. 25, 1921. Serial No. 439,756. 1 Claim. (Cl. 182—12.)



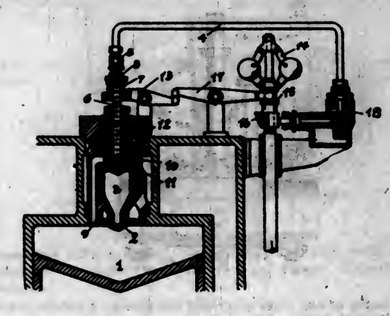
The herein described non-siphonable trap comprising a vertical inlet, a horisontal outlet, and a vertically arranged curved passageway communicating directly with the inlet and indirectly with the outlet and all in the same vertical plane, the width and capacity of the main curved passageway being less than that of the inlet or the outlet, a hollow transversely tubular deflector within the curved strocture and around which the main flow takes place, the structure above said deflector constituting a body of a large capacity just within the outlet, a sealing lip at the lower end of the inlet, and a by-pass between the sealing lip and said deflector.

1,398,428. CORN-PLANTER. EDWIN A. GOLLE, Grand Beach, Mich. Filed Apr. 29, 1920. Serial No. 377,595. 2 Claims. (Cl. 111—28.)



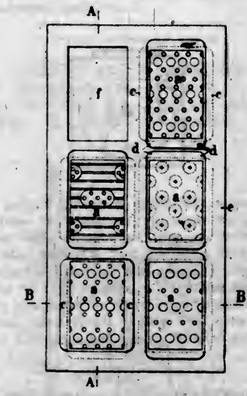
1. In a device of the character described, the combination with the axle, of a ground wheel mounted thereon and formed with a nave having a plurality of recesses in its inner face, said recesses being arranged in a circle concentric with the bore of the nave, a sleeve rotatably and slidably disposed on the axle adjacent to the inner face of the nave, and a disk rigidly mounted on the sleeve

at its outer end and formed with radially extending laterally inclined segmental rim portions, said disk having a diameter substantially equal to that of the ground wheel



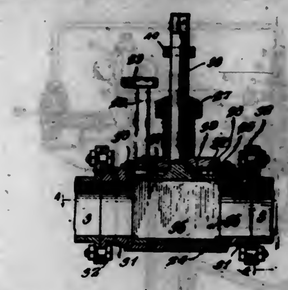
and being provided with a plurality of pins projecting laterally of the outer face of the disk in position to enter said recesses when the disk is moved contiguous to the wheel.

1,398,429. FISHING-REEL. ROBERT WILLIAM HARRADINE, Bondi, New South Wales, Australia. Filed Nov. 17, 1920. Serial No. 424,756. 2 Claims. (Cl. 242—84.5.)



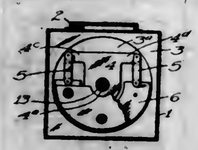
1. In a fishing reel, in combination, a cheek plate having an annular flange, a spider to which said plate is attached, a rod rest on one arm of said spider, a tubular spindle screwed into said cheek plate and spider, a cap-nut on the end of said spindle, a collar on said spindle bearing against the opposite face of said plate to said cap nut, a winding drum and a bushing therein rotating on said spindle, an extension of said bushing beyond the end of the drum toward said cheek plate, fixed on said extension a ratchet wheel having an annular boss, a brake ring rotating on said boss, said brake ring being between said ratchet wheel and drum, a spring controlled pawl on said ring engaging said ratchet wheel, a brake band about said brake ring, said brake band being flexibly connected at one end to the cheek plate, a tensioning screw at the other end of said band, a cam pivoted in the cheek plate and operating to press said brake band into frictional contact with said brake ring, means for actuating said cam, an enlargement of the other end of said bushing extending beyond the end of the spindle, a bore in said enlargement, a bolt passing axially through said spindle and cap nut, a spring underlying the head of said bolt, a nut on the other end of said bolt, and a crank handle on said enlargement for rotating the drum.

1,398,430. INTERNAL-COMBUSTION ENGINE. PAUL HENTSCHEL, Los Angeles, Calif. Filed Jan. 23, 1920. Serial No. 353,558. 3 Claims. (Cl. 123—33.)



1. In an internal combustion engine of the class described, an expansion cylinder in communication with an auxiliary combustion cylinder through a predetermined number of restricted holes; a supply means adapted to charge the liquid fuel into the auxiliary combustion chamber in sequence with the cycle of the engine; a passage for compressed air leading from the said expansion cylinder into the said auxiliary combustion chamber, adapted to be intercepted by an automatically timed valve means, a mechanical means, adapted to vary the resistance through the said passage to the flow of compressed air from the expansion cylinder into the auxiliary combustion chamber in reversed order to the amount of liquid fuel charged into the auxiliary combustion chamber for variable loads on the engine.

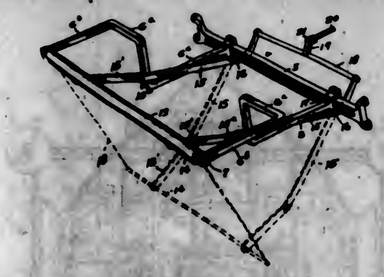
1,398,431. SAMPLE-CARD. EDWIN HIRTZ, Paris, France. Filed May 26, 1920. Serial No. 384,272. 1 Claim. (Cl. 211—34.)



A sample card, comprising a sheet provided with a plurality of rectangular openings, and a plurality of rectangular supports upon which samples are secured, said supports being provided with a tongue at each edge and of the same length as the edge, the tongues of two opposing edges lying on the inner face of the sheet and the tongues of the other two opposing edges lying on the outer face of the sheet.

1,398,432. VALVE. Wilfred Jaax, Lowell, Mass. Original application filed July 23, 1920, Serial No. 398,190. Divided and this application filed Apr. 23, 1920. Serial No. 376,113. 1 Claim. (Cl. 251—109.)

A valve of the class described comprising a substantially cylindrical vertical casing having a plug valve socket in its upper side, an inlet into said socket, and an outlet from said socket, a valve plug having a passage for controlling communication between said inlet and said outlet, a removable cover plate for said plug socket secured to the upper side of said casing, a stem rising from said plug to a point above said cover plate, a pair of posts rising from said cover plate at points spaced outwardly from said stem, an arcuate segment supported horizontally by said posts in concentric relation with said stem, the upper side of said segment being provided with spaced teeth, a handle extending laterally from said stem over said segment and a spring-depressed pin slidably carried by the outer end of said handle and engaging the teeth of said segment to hold the stem and plug in adjusted position, the upper end of said pin having a knob adapted to be raised to release the pin and to then serve as means to swing said handle to operate the valve stem.

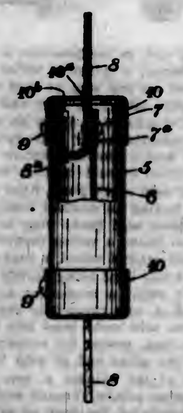


1,398,433. GRADOMETER. Clyde A. Johnson, San Diego, Calif. Filed Mar. 23, 1920. Serial No. 368,140. 4 Claims. (Cl. 33—220.)

1. A gradometer, including a casing having a circular recess, a support pivotally mounted in said recess, a weight suspended on said support in said recess on a parallel axis with said support whereby said weight is adapted for both revoluble and swinging movement in opposite directions against the curved wall of said circular recess in the plane of its normal rotation and gear, means in connection with said weight support for indicating the relative position of said weight support with said casing.

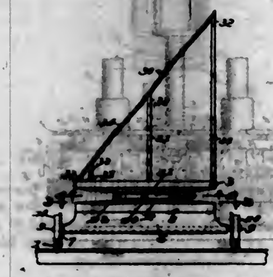
1,398,434. AUTOMATIC LIFE-SAVING FENDER FOR AUTOMOBILES. Edward S. Jones, Mobile, Ala., assignor of one-tenth to Fred A. Hixon, one-tenth to George Kilborn, and one-tenth to George S. Bowsmore, Mobile, Ala. Filed June 7, 1921. Serial No. 475,606. 6 Claims. (Cl. 293—41.)

1. The combination with a vehicle, of rigid supports carried thereby, a spring actuated roller carried by said supports, a web connected with said roller to be wound thereon, swinging arms engaged with the lower edge of said web, spring means normally tending to force said arms downwardly and means controllable from the driver's



seat for lifting said arms against the action of the last named spring means.

1,398,435. PRINTING DEVICE FOR REGISTERING CASH AND THE LIKE. Werner Kolbe, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Feb. 9, 1921. Serial No. 443,647. 5 Claims. (Cl. 101—19.)

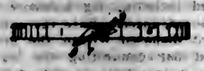


1. A printing device of the class described comprising a multiplicity of printing types, points disposed along the printing contour of said types for piercing the object to be printed during the printing operation, said printing points being arranged in parallel rows, said points being arranged differently for each type, a counter die provided with spaced parallel grooves coöperating with said points during the printing operation.

1,398,436. ELECTRIC FUSE. William B. La Pointe, Columbus, Ohio, assignor to Herman E. Vance, Powell, Ohio. Filed Aug. 12, 1919. Serial No. 317,088. 1 Claim. (Cl. 200—132.)

A safety fuse comprising, in combination, a shell, a fusible member and terminals, each terminal consisting of an integral strip of metal of U-form at one end, one leg of said end secured to the shell and the other leg receiving the fusible member and extending externally of the shell and constituting a knife blade.

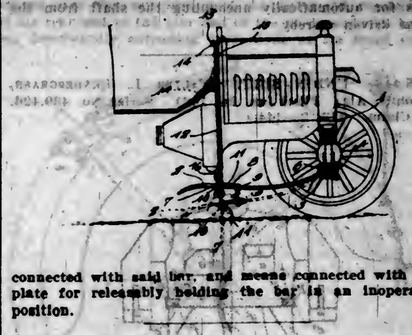
1,398,437. REVOLVING HAY STOWER OR SLIDE. Fred W. Leighton, Rockwood, Me. Filed Aug. 28, 1920. Serial No. 406,644. 5 Claims. (Cl. 214—5.)



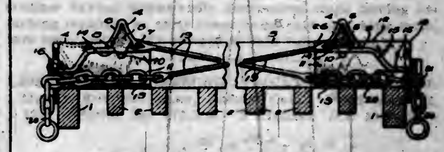
1. In a hay stower or guide for hay mows, a pair of track rails, a stower or hay guide operable thereon, said hay stower or guide comprising a base section having supporting wheels engaging the track rails, and an upper revoluble section mounted upon the base section to rotate in either direction, and an inclined hay guide mounted upon the revoluble section for guiding or chuting the hay into the sides and corners of the hay mow.

1,398,438. PROCESS FOR TREATING AND RECOVERY FOR REFUSE OILS, RESINS, GUMS, &c., WHICH HAVE BEEN HARDENED. Clay Littleton, Hopewell, Va. Filed Jan. 27, 1921. Serial No. 440,532. 4 Claims. (Cl. 134—26.)

1. The process of recovering, a hardened coating material for re-use, which comprises dispersing it in an alkaline solution, treating the solution with active chlorin, removing the coating material body from the solution and drying and air treating the precipitate.



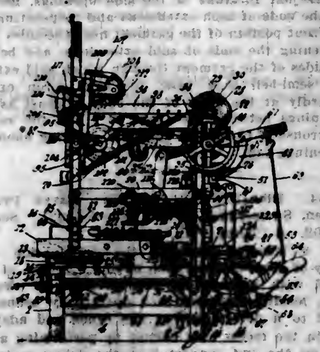
1,398,439. PISTON-RING. Frederick Keith McMaster, Birriwa, near Mudgee, New South Wales, Australia. Filed Jan. 18, 1921. Serial No. 438,153. 4 Claims. (Cl. 74—109.)



1. Improvement in piston rings comprising a joint wherein one of the ring ends is a beveled V-point and the other end a complementary beveled V-recess substantially as herein described and explained.

1,398,440. AUTOMOBILE-CHECK. William McNamer, Aberdeen, S. D. Filed Dec. 16, 1920. Serial No. 431,208. 2 Claims. (Cl. 188—6.)

1. A vehicle check comprising a bar having one end sharpened, a pivot head at the second end of said bar, means for loosely supporting the head of said bar in contacting relation with the inner face of an axle, a plate having an opening receiving said bar, in its movement by said plate and resting upon said bar and having ears and connected with said bar, and means connected with said plate for releasably holding the bar in an inoperative position.



1,398,441. STAKE FOR FLAT-CARS. Matt Markkula, Fort Bragg, Calif. Filed July 1, 1921. Serial No. 481,983. 4 Claims. (Cl. 105—385.)

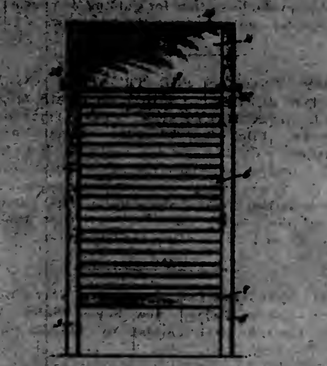
1. The combination with a flat car, of a guide arranged below the surface of the car, said guide comprising a substantially horisontal portion, a sloping portion connected thereto, and an offset end substantially parallel to said horisontal portion, a stake slidably mounted on said guide whereby the stake is retained in operative position when in engagement with a horisontal portion of the guide, and in inoperative position when in engagement with the offset end thereof, and means for retaining said stake in operative position.

1,398,442. CEMENT-BLOCK MACHINE. James H. Pearson, Bloomfield, Ind., assignor to Concrete Silo Company, Bloomfield, Ind. Filed Nov. 22, 1920. Serial No. 425,806. 12 Claims. (Cl. 25—41.)

1. In a cement block machine the combination with a mold having a removable pallet and separable walls, of

1,[illegible]. [illegible]. [illegible], Pa. [illegible]. Serial No. 499,[illegible]. 1 Claim. (Cl. 24—144.)

A union bathing garment, comprising a skirt and bathing panty, and a waist-band at the upper thereof, such waist-band adapted to encircle the body, the skirt opening at the front and being provided at the rear with an apron extending downwardly from the rear part of said waist-band, the portion of said waist-band above said apron carrying buttons, the trousers being split at the sides from the waist-band downwardly to provide a drop seat which is adapted to cover the said apron, the said drop-seat being provided with a semi-belt which has button-holes at the back thereof for engaging the buttons above mentioned, said semi-belt having elongated projecting beyond the edges of the drop-seat, said extending to points just in front of the side openings, means adjacent the ends of each extensions and cooperating means on the front portion of the garment near the sides thereof, for fastening the ends of said extensions, and belt loops at the sides of the garment through which said extensions of the semi-belt may pass, the said apron extending downwardly at the sides of the body at least as far as the openings between the front part and the rear part of the trousers, to furnish complete covering should such side openings sag.



1,[illegible]. BRAIDING-MACHINE. [illegible] Frauenknecht, Wehlen, Switzerland. Filed June 3, 1921. Serial No. 474,[illegible]. 9 Claims. (Cl. 87—4.)

1. In a braiding machine, the combination with a plurality of spool-holders each having a rocker, of drivers provided with notches for the movement of the spool-carriers, locking members each operatively connected at one end to a driver and at the other end adapted to engage in the recess of a carrier by pendulating a tilting motion on the end connected to the driver resting on a fulcrum, the locking member of one driver engaging with the locking member of the adjacent driver independent of the direction of rotation of a driver, the pendulating

preventing a turning motion of the carriers during the transfer of the latter from one driver to another.

1,[illegible]. WASHBOARD. [illegible] H. Rossnock, South Amboy, N. J. Filed June 27, 1921. Serial No. 4[illegible]. 1 Claim. (Cl. 68—33.)

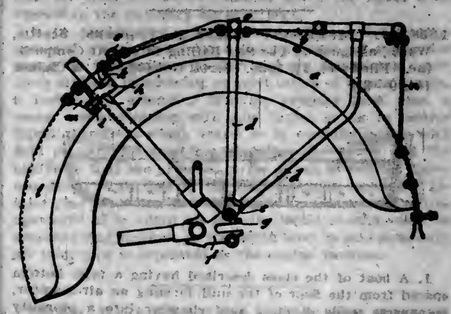
A wash board including leg members, said leg members having grooves, intermediate the side edges thereof, a rubbing board disposed within the grooves, a transversely disposed bar connecting the leg members and having a groove to receive one end of the rubbing surface, pins extending through the leg members and contacting with the upper edge of the rubbing surface for preventing movement of the rubbing surface with respect to the leg members.

1,[illegible]. NUT-LOCK. [illegible] A. Sayre, Munson, Pa. Filed June 4, 1921. Serial No. 474,[illegible]. 2 Claims. (Cl. 151—16.)

1. A nut lock of the character described comprising a bolt having an undercut slot of circular, a channel provided between the threads of the bolt, having a series of laterally spaced notches, a portion of said channel on one side of the notches being lower than the portion of the channel on the opposite side of the notches, a nut arranged

for engagement with the bolt, said nut having a conical opening extending through one face thereof, a conical pawl movable in said opening and arranged to project beyond the inner wall of the nut, a spring urging said

pawl toward the bolt and retaining means carried by the nut and adapted to extend over the outer end of the opening to prevent disengagement of the spring and pawl from said opening.



1,[illegible]. ANTIVIBRATION HANDLE-BAR FOR MOTORCYCLES, CYCLES, AND THE LIKE. [illegible] Walker Smith, Redditch, England. Filed June 30, 1920. Serial No. [illegible]. 2 Claims. (Cl. 280—125.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. An anti-vibration handlebar for motor cycles, cycles and the like, having the handle bar proper mounted to rotate in a hollow boss secured to and disposed in front of the upper part of the handlebar stem, the handlebar being furnished with a rearwardly projecting arm or member which extends into the interior of the handlebar stem and cooperates with a spring disposed below such arm and a rubber buffer disposed above the arm, and in which the hollow boss aforesaid is formed in two halves, one half being permanently combined with the handlebar stem and having a semi-circular bearing for the handlebar proper, and the other half being a separable member having a semi-circular bearing and being adapted to be secured in appropriate relationship to the first half by bolts or other suitable means, substantially as set forth and illustrated.

1,[illegible]. COMBINED MUDGUARD AND CARRIER MEMBER FOR USE ON MOTOR AND OTHER CYCLES. [illegible] Walker Smith, Redditch, England, assignor of one-half to The Enfield Cycle Company, Limited, Redditch, Worcester, England. Filed June 30, 1920. Serial No. [illegible]. 1 Claim. (Cl. 280—140.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

In combination with a cycle frame having oblique stays and bearing members for a rear wheel, a mudguard, supporting members attached to said stays and having forwardly and rearwardly extending lugs, said last named lugs having sockets, and to the forwardly extending lugs of which the mudguard is attached, a carrier member arranged over the rear portion of the mudguard, connected at its rear end to the rear end of the mudguard and having downwardly extending projections at its front end,

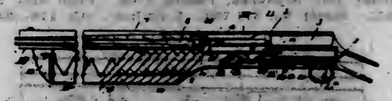
arranged in the sockets of said socketed lugs, attached at its front end to said supporting members, said carrier member having downwardly converging stays having attaching members at their lower ends, said attaching members being detachably secured to said bearing members.

1,[illegible]. TIRE-PRESSURE INDICATOR AND ALARM. [illegible] Roy Spangler, Pueblo, Colo. Filed May 23, 1921. Serial No. 471,[illegible]. 3 Claims. (Cl. 116—34.)

1. A tire pressure indicator and alarm comprising a base plate, a cartridge carrier carried by the base plate, a hammer pivotally connected with the base plate, a spring for swinging the hammer into operative engagement with a cartridge carried by the cartridge carrier, a resilient strip adapted to be acted upon by an inflated tire, a gage pin carried by the resilient strip for extending through the felly of a wheel and through the base plate into position to releasably hold the hammer in a set position, and a guard carried by the base plate for engaging the hammer and holding the hammer against movement out of engagement with the pin while engaged by the pin.

1,[illegible]. PUMP. [illegible] Robert Tinney, Phoenix, Ariz. Filed June 24, 1920. Serial No. [illegible]. 5 Claims. (Cl. 253—179.)

1. In a device of the character described, the combination with a well casing, of a shell arranged in said well



ending, means for supporting said shaft including a hanger rod adjusted to be caused to screw the shaft in the casing, a shaft in said wall casing extending through said shaft, a bearing for said shaft carried by said shaft and a propeller mounted upon said shaft within the shell.

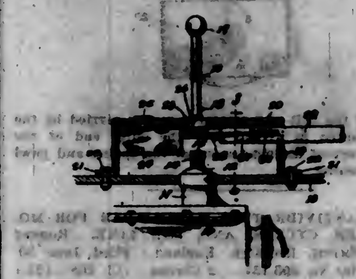
1,396,451. LIFEBOAT. Elmer B. Toomsen, Seattle, Wash., assignor of The Self Bailing Life Boat Company, Inc. Filed Dec. 21, 1920. Serial No. 432,269. 2 Claims. (Cl. 9—8.)

1. A boat of the class described having a false bottom spaced from the floor of the hull forming an air-chamber, transverse walls dividing said chamber into a plurality of individual air-tight compartments, and a partition wall above said false bottom dividing the boat longitudinally.

1,396,452. AUTOMATIC RIFLE. Ira W. Wagner, Casa Grande, Ariz., assignor of one-half to John P. Brown, Casa Grande, Ariz. Filed Sept. 30, 1919. Serial No. 327,494. 2 Claims. (Cl. 42—8.)

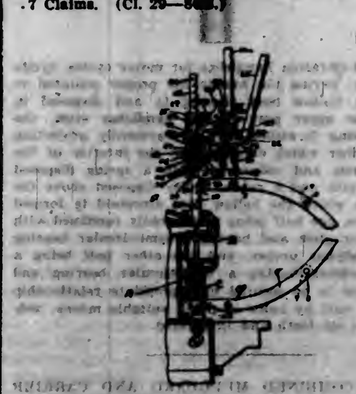
1. In combination, in an automatic rifle, a barrel having a compression chamber in alinement therewith, a bolt having a plunger working in the compression chamber and a portion extending into the barrel when in operative position and sealing the same, means controlled by the movement of the bolt for feeding cartridges in succession to the barrel, said bolt having a firing pin rigid therewith, and a spring held cartridge guard, extending beyond the firing pin for insuring the insertion of a cartridge before the firing pin engages the same.

1,396,453. PROCESS FOR PRODUCING FERROCYANIDS. Frank S. Washburn, Rye, N. Y., assignor to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed Feb. 7, 1920. Serial No. 357,041. 6 Claims. (Cl. 23—12.)



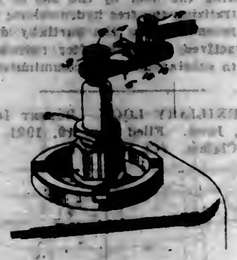
1. The process of producing ferrocyanid from a cyanid compound containing a substantial percentage of impurities which consists in reacting on said impure cyanid with a ferrous salt; removing any insoluble matter present; concentrating the solution thus obtained; and separating the ferrocyanid formed from the other constituents, substantially as described.

1,396,454. SNOW-REMOVER. Felix Fred Daniels, Jersey City, N. J. Filed June 10, 1920. Serial No. 387,840. 2 Claims. (Cl. 37—61.)



1. In a snow remover, the combination with a motor truck having a gasoline tank at its rear, and a driver's cab disposed at one side of the frame work; of a platform at the front end of the truck, a scoop hinged thereon, means for pivotally adjusting the scoop from the cab, an inclined loading from the rear end of the scoop upward alongside the cab, an upright hopper carried by the frame in rear of the cab, a chute leading from the upper end of the carrier into the hopper, and means for imparting heat to said hopper to melt the snow therein and for delivering the melted snow onto the road.

1,396,455. TRANSMISSION-LOCK FOR MOTOR-VEHICLES. Adolfo De Clairmont, Toledo, Ohio. Filed Sept. 21, 1920. Serial No. 411,600. 5 Claims. (Cl. 70—128.)

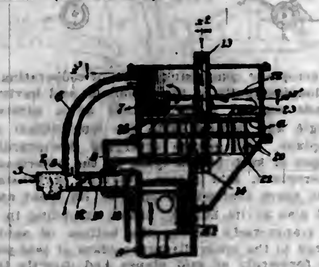


1. The combination with a gear set, and a casing therefor, of a control lever for the gear set, a ball joint supporting the lever upon the casing, the lever being provided above the joint with a detachable shank, a casing overlying the joint and having a door opening through which said shank may be inserted to coact with the joint, and a door upon the casing for closing said opening.

1,396,456. VALVE-GRINDER. William E. Dunstan, Modesto, Calif. Filed Nov. 10, 1920. Serial No. 423,114. 7 Claims. (Cl. 29—89.)

1. A device of the character described comprising a body member, a rod slidable in said body member, means engaged with the rod for moving said body member in one direction on the rod, means engaged with the rod for preventing accidental movement of the rod in the same direction through the body member, and means for disengaging the first mentioned and second mentioned means from the rod, to permit movement of the body member in either direction on the rod.

1,396,457. SPARK-GAP ATTACHMENT FOR SPARK-PLUGS. James S. Faulkner, Petersburg, Va. Filed Nov. 16, 1920. Serial No. 423,987. 2 Claims. (Cl. 175—183.)



1. A spark gap attachment for spark plugs comprising an insulating base having a perforation at one end to snugly receive a spark plug electrode and having at its other end a slot extending in the direction of the perforation, a terminal plate disposed upon the base and having at one end a finger slidably engaged with the slot and having its opposite end offset from the base and directed toward said perforation, and means engaged through the slot and the plate for clamping the plate to the base.

1,396,458. FILM-HOLDING DEVICE. Joseph F. Greyer, New York, and Thomas S. Fox, Brooklyn, N. Y. Filed Nov. 22, 1920. Serial No. 425,932. 3 Claims. (Cl. 41—4.5.)

1. In a device of the character described, a bearing housing, and means in combination therewith for securing the same upon a support, a slide bearing therein, and means for taking up the wear thereof, a transverse bar secured upon said slide bearing, a screw for shifting said slide bearing longitudinally and a resilient member for opposing the action of said screw.

1,396,459. CARBURETER. Walter G. Hemenway, Los Angeles, Calif. Filed Mar. 13, 1918. Serial No. 222,216. 8 Claims. (Cl. 123—26.)

1. In combination, a carbureting chamber having main and auxiliary air inlet ports and an outlet, a fuel nozzle terminating in the carbureting chamber, a chamber independent of the fuel nozzle adapted to hold a liquid body, means to admit air to the second chamber at different levels below the liquid level, a throttle valve between the auxiliary air inlet port and the outlet, and means to conduct air from the second chamber above the liquid level thereof to the auxiliary air inlet port.

8. In combination with an internal explosion engine, provided with a jacket for a cooling liquid, of means for supplying the engine with fuel and air, comprising a primary air inlet pipe having an inlet orifice of constant area, a fuel nozzle extending into the primary inlet pipe, a vessel communicating with said jacket so as to receive liquid therefrom which vessel is in communication with said primary air inlet pipe between the nozzle and the engine so that the pressure in the vessel is reduced correspondingly with that of the engine, and a secondary air inlet pipe extending into the liquid in said vessel and so apertured as to admit air into the liquid in said vessel in amounts that increase as the liquid level in said secondary air inlet pipe is depressed by the engine vacuum.

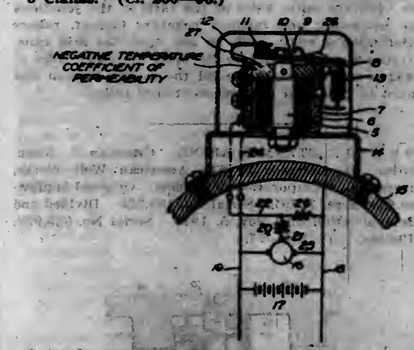
1,396,460. HAYRACK-LIFTER. Robert Kahn, Humboldt, Ill. Filed Mar. 5, 1921. Serial No. 449,663. 1 Claim. (Cl. 254—45.)

The combination of parallel supporting structures between which a vehicle may be driven, horizontal rails on said supporting structures, inclined rails leading downwardly from the horizontal rails and aligned therewith, rollers upon the outer sides of the rails at the junctions of the horizontal and inclined members thereof, rollers mounted upon a wagon body to run upon the said rails, and tracks secured longitudinally upon the outer sides of the wagon body laterally beyond the rollers thereon and arranged to ride upon the first-mentioned rollers.

1,396,461. STEAM-TURBINE. Charles V. Kerr, Aurora, Ill., assignor to The American Well Works, Aurora, Ill., a Corporation of Illinois. Original application filed Sept. 1, 1917, Serial No. 189,820. Divided and this application filed Nov. 5, 1919. Serial No. 335,988. 4 Claims. (Cl. 253—77.)

1. A turbine bucket adapted for stamping from flat sheet metal having a central concave portion, thin lateral edges on said central portion, rounded ends on said central portion, and rectangular projections beyond said rounded ends, said thin edges and said rectangular projections lying in the same plane.

1,396,462. FORTUNE-TELLING DEVICE. Frank Knowles, West Englewood, N. J., assignor to William Fuld, Baltimore, Md. Filed Sept. 1, 1920. Serial No. 407,230. 5 Claims. (Cl. 46—41.)

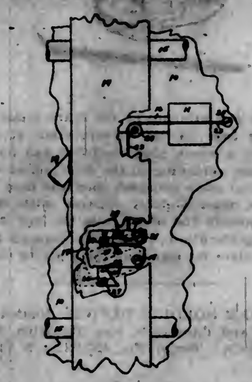


2. In a fortune telling device, the combination, of a back plate, a rotatable wheel thereon, said wheel having

characters on its face, a sprocket wheel integrally formed with said rotatable wheel, an apertured pendulum pivotally mounted on said back plate, and means to rotate

said rotatable wheel, upon the swinging of said pendulum, whereby to bring a character thereon opposite the aperture in the pendulum when the latter comes to rest.

1,398,463. ELECTROMAGNETIC INSTRUMENT. THOMAS L. LEE, Rochester, N. Y., assignor to North East Electric Company, Rochester, N. Y., a Corporation of New York. Filed Nov. 5, 1920. Serial No. 422,069. 3 Claims. (Cl. 200—96.)



1. An electromagnetic instrument comprising: an electromagnet; an armature coöperating with the magnet; contacts controlled by the armature; a spring controlling the armature and adjustable to yield to a definite magnetic force; and a magnetic shunt arranged in parallel with the armature and diverting a part of the magnetic flux from the armature, said shunt consisting of a material having a negative temperature coefficient of magnetic permeability such as to compensate substantially for the temperature coefficient of resistance of the magnet-winding.

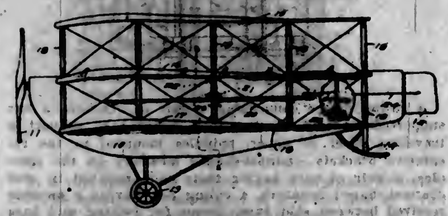
1,398,464. POWDERED MEAT PRODUCT. JOHN C. MACLACHLAN, St. Paul, Minn., assignor to Standard Food Products Company, St. Paul, Minn., a Corporation of Delaware. Filed Oct. 4, 1919. Serial No. 328,494. 6 Claims. (Cl. 99—5.)

2. A dry powdered meat product containing the original fiber and extractives, the fiber thereof being partially predigested but the extractives therein being in natural condition and having their natural flavor.

6. The process of producing a meat product containing the original fiber and extractives, which consists first in reducing the meat to a finely divided form, then temporarily separating the fiber from the extractives, then partially predigesting the fiber by the use of hydro-chloric acid, then neutralizing the free hydro-chloric acid to form a salt, then recombining the partially digested fiber with the extractives, and thereafter reducing the commingled mass to substantially dry comminuted form.

1,398,465. AUXILIARY LOCK. ROBERT D. PATTERSON, Fort Dodge, Iowa. Filed Jan. 19, 1921. Serial No. 438,242. 7 Claims. (Cl. 109—8.)

1. An auxiliary locking mechanism for doors having laterally movable boltwork, comprising a locking bar pivotally mounted on said door, a leg secured to said boltwork and adapted to be engaged at times by the free end of said locking bar, a supporting bar pivotally mounted on said door independently of said locking bar and normally engaging and supporting said locking bar in inoperative position, and frangible means for holding said supporting bar in supporting position.

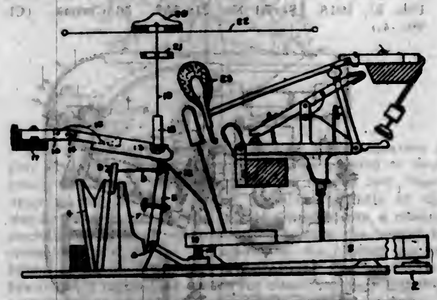


1,398,466. AEROPLANE. JONATHAN H. RHA, Omaha, Nebr. Filed Jan. 17, 1921. Serial No. 438,042. 2 Claims. (Cl. 244—15.)

1. An aeroplane comprising a pair of coöperating planes running longitudinally of the aeroplane and having their upper ends secured close together at a substantially acute angle and parallel with the longitudinal axis of the aeroplane, said planes diverging downwardly, the lower edges of such planes lying at the outermost sides of the aeroplane, said planes providing a substantially triangular space therewithin open at its front and rear ends and also at its bottom, braces extending in spaced relation transversely across the bottom of said space and secured to the lower divergent edges of said planes, a propeller forwardly of said planes and directly in front of the space between said planes, steering mechanism opposite of the space between said planes and directly in rear of such space to receive air currents passing

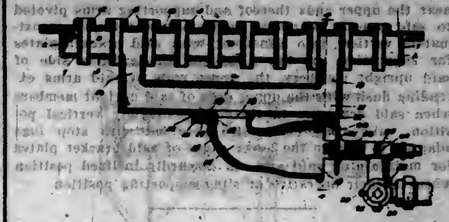
therethrough, and a horizontally turning helicopter propeller lying above the central portions of the planes and adapted to direct streams of air downwardly on the opposite divergent surfaces of the planes.

1,398,467. FLYING-BOAT. LUKE D. REED, Burnham, Ill. Filed Oct. 4, 1920. Serial No. 328,446. 4 Claims. (Cl. 244—14.)



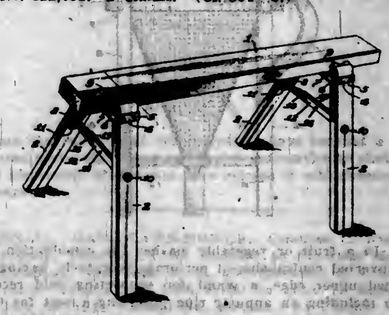
1. A flying machine comprising a body having a propeller at one end, a balance plane disposed above the body and operatively connected thereto and extending approximately the full length of the body, a plurality of planes disposed below the balance plane and extending laterally from the body, all of said planes having a length parallel to the axis of the body greater than the width of the planes transverse to the axis, and elevating planes extending longitudinally parallel to the axis of the body and disposed between a pair of main planes and having a length greater than the distance between the adjacent planes but less in length than the length of said planes, and means for controlling the position of said elevating planes.

1,398,468. PROCESS OF MANUFACTURE OF HYDROGEN PEROXID. ALBERT J. SCHUMACHER, San Francisco, Calif. Filed Nov. 9, 1920. Serial No. 422,942. 2 Claims. (Cl. 23—10.)



2. The step in the process of manufacturing hydrogen peroxid of continuously cooling sulfuric acid during hydration and admitting said cooled hydrated sulfuric acid to the process through cooled conduits as and for the purposes described.

1,398,469. PNEUMATIC ACTION. JUSTIN O. SCHWARZ, New York, N. Y., and GUSTAV BJORKLUND, West New York, N. J. Filed Oct. 6, 1917. Serial No. 195,193. 2 Claims. (Cl. 84—26.)



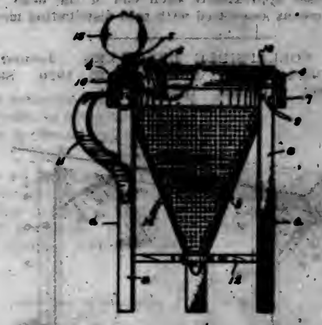
2. In a piano and player action of the class described, an actuating pneumatic and key in front of the same, a bell crank pivoted between said pneumatic and said key whereby said action may be operated by said key or by said pneumatic through said bell crank and said key, one leg of said bell crank substantially immediately under the inner end of said key, said pneumatic, key and bell-crank substantially in horizontal alinement.

1,398,470. GAS-BURNER. GEORGE E. SHARER, Steubenville, Ohio. Filed Oct. 18, 1920. Serial No. 417,668. 8 Claims. (Cl. 158—110.)

2. The combination in a gas burner, of a longitudinal head having burner openings, auxiliary air supply means centrally of these openings, means for distributing a combustible mixture uniformly to such openings and including a riser approximate each end of the head, and gas mixing means associated with said distributing means.

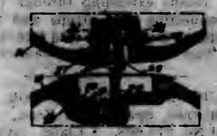
1,398,471. COLLAPSIBLE BENCH-LEG. JOSEPH S. SMART, Detroit, Mich. Filed Sept. 22, 1920. Serial No. 412,092. 2 Claims. (Cl. 304—5.)

1. Supporting means adapted to be clamped in engagement with a plank or the like, comprising wooden legs, metallic straps embracing said wooden legs adjacent the upper ends thereof, metallic connecting members having the ends thereof pivotally connected to said straps at the sides of said legs, combined reinforcing and gripping members on the inner walls of said legs of less length than said legs and having plank engaging teeth above the upper ends of said legs, apertured lugs at the lower ends of said combined reinforcing and gripping members, means extending through the upper ends of said legs connecting said straps and combined reinforcing and gripping members to said legs, and toggle arms connecting the lugs of said gripping members.



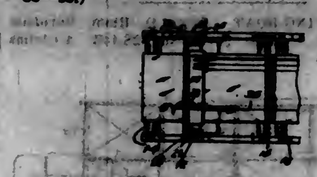
1,398,472. SUPPORTING MEANS FOR HAY-SLINGS. GEORGE S. SOWERS, Spring Hill, Kans. Filed Jan. 28, 1919. Serial No. 273,668. 1 Claim. (Cl. 296—9.)

Means for carrying hay slings on the outside of hay racks comprising, in combination, a rack bed having



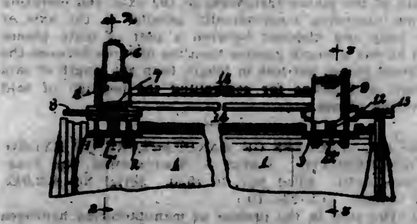
spring spotlights at one end of the bar, and pulling the sling supporting threads district of said upright members, said supporting members comprising bracket plates secured in inclined position to said upright members near the upper ends thereof and supporting arms pivoted to said bracket plates to swing substantially vertical into abutment with said bracket plates for supporting the bar clamps on the external side of said upright members, the upper ends of said arms extending flush with the upper ends of said upright members when said arms are in their approximately vertical position, said arms being also provided with stop lugs adapted to engage the lower edges of said bracket plates for maintaining said arms in upwardly inclined position when in their operative or sling-supporting position.

1,398,473. FRUIT OR VEGETABLE MASHER. ALEXANDER T. STEWART, Philadelphia, Pa., assignor to The Scientific Specialty Company, Pittsburgh, Pa. Filed July 30, 1921. Serial No. 488,621. 4 Claims. (Cl. 146—9.)



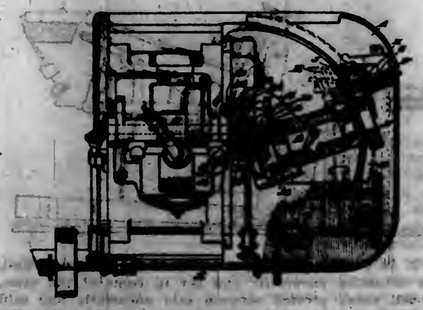
1. In a fruit or vegetable masher the combination of an inverted conical-shaped perforate receptacle having a molded upper edge, a stand for supporting said receptacle including an annular ring providing a seat for the aforesaid molded upper edge, spring gripe on said stand for clamping the perforate receptacle in position, and a conical crusher adapted for rolling movement therein.

1,398,474. PAPER-CUTTING DEVICE. ERVIN E. STRAWN, Des Moines, Iowa, assignor to The Omnigraph Company, Des Moines, Iowa, a Corporation. Filed Sept. 30, 1919. Serial No. 327,569. 2 Claims. (Cl. 164—86.)



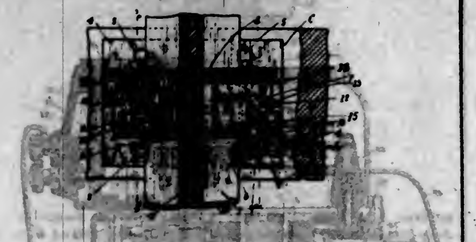
1. In a device of the class described, a pair of members mounted adjacent to each other for rotation, blade holding devices on said members, a blade mounted in one of said blade holding devices, having its cutting edge inclined radially and circumferentially from parallel with the axis of rotation of its holder, a blade mounted in the other of said blade holding devices, having one end fixed and the other end mounted for yielding movement, one of said blades having a beveled corner at its point of first engagement with the other of said blades, whereby in the rotation of the blade holding members, the blades will be brought to sliding shearing engagement beginning at the end of the blade having the beveled corner.

1,398,475. PRINTING AND RULING MACHINE. DAVID M. SAMUEL, Des Moines, Iowa, assignor to The Omnigraph Company, Des Moines, Iowa, a Corporation. Filed Oct. 23, 1918. Serial No. 258,679. 2 Claims. (Cl. 33—45.)



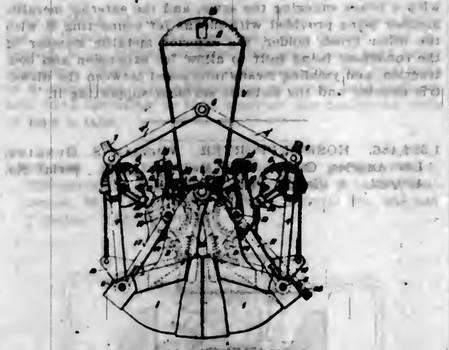
A ruling device comprising a pair of brackets, a bar supported by said brackets and adapted to support a traveling sheet of paper, spindles mounted in the respective brackets, channel-shaped members on the spindles, a pair of bars having their ends received in said channel-shaped members, a ruling pen having a member received between said bars, means for locking said bars together, and means for supplying ink to said pen.

1,398,476. PRESSURE-COOKER. ALBERT R. THOMPSON, San Jose, Calif., assignor to Anderson-Barngrover Mfg. Co., San Jose, Calif., a Corporation of California. Filed Dec. 6, 1920. Serial No. 428,666. 4 Claims. (Cl. 219—17.)



1. In a cooker, and in combination with its heating box, a can-feed valve and a can-discharge valve associated with said box, and means for conveying fluid heating-medium withdrawn from the box by the can-feed valve, into the can-discharge valve to be returned to the box by said last named valve.

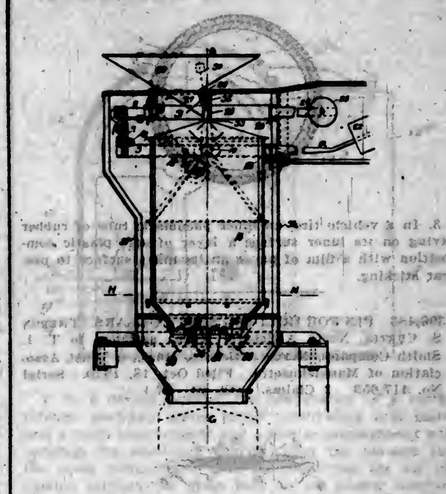
1,398,477. GEAR-CUTTING MACHINE. MILTON TIBBETTS, Detroit, Mich., assignor, by mesne assignments, to James E. Gleason, trustee, Rochester, N. Y. Filed Feb. 21, 1918. Serial No. 218,557. 36 Claims. (Cl. 90—4.)



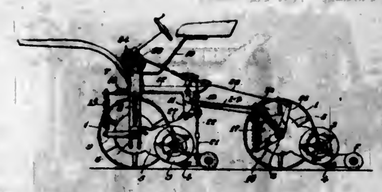
1. In a machine of the class described, in combination, a tool having a part formed with a roughing cutting edge and a part formed with a finishing cutting edge, one of said parts being mounted for movement to and from cutting position and means for effecting said movement.

1,398,478. TIE-PLATE RAIL-ANCHOR. ELMER T. VAN DUSEN, St. Paul, Minn. Filed July 27, 1921. Serial No. 487,879. 3 Claims. (Cl. 238—201.)

1. A rail anchor for railway rails, comprising relatively movable members each adapted to grip one side of a rail base and having a part extending underneath the rail base to abut beyond the other side thereof, the extending part of one member having positive slidable connection with the extending part of the other member beyond the rail, said sliding connection being disposed at an angle relative to the longitudinal axis of the rail, and openings in the anchor members adapted to receive, so that they will slide vertically therein, the shanks of spikes provided for holding the rail to the tie.



1,398,479. EXCAVATING-BUCKET. WILLIAM MARO VENABLE, Pittsburgh, Pa., assignor to Blaw-Knox Company, a Corporation of New Jersey. Filed June 23, 1920. Serial No. 391,147. 11 Claims. (Cl. 37—30.)



1. An excavating bucket comprising in combination a pair of scoops pivoted together, a frame pivoted to each scoop, the bucket being adapted to be opened and closed upon movement of the scoop pivot downwardly or upwardly to swing the scoops on said frame pivots, a closing mechanism for each scoop adapted to lock the bucket in closed position, means for operating the closing mechanisms acting to draw each scoop around its frame pivot toward said frame, and means for simultaneously tripping said closing mechanisms to permit the bucket to open.

1,398,480. WEIGHING-SCALE. RODOLPHE WOLTER, Buenos Aires, Argentinia. Filed Jan. 20, 1920. Serial No. 352,914. 5 Claims. (Cl. 249—52.)

1. A weighing apparatus, comprising, in combination, a balancing beam, a receptacle movable vertically relative to said beam, means for supplying material to be weighed to said receptacle, means for temporarily suspending said receptacle from the beam and automatically releasable when the contents of the receptacle have reached a predetermined weight, said means for automatically shutting off the supply of material upon release of said suspending means.

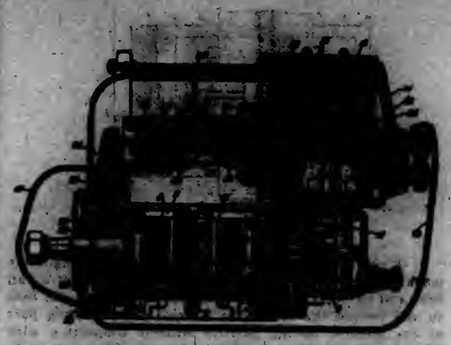
1,398,481. GANG LAWN-MOWER. CHARLES C. WORTHINGTON, Dunfield, N. J., assignor to Shawnee Mower Company, New York, N. Y., a Corporation of Pennsylvania. Filed Aug. 4, 1916, Serial No. 113,037. Renewed July 30, 1921. Serial No. 488,681. 31 Claims. (Cl. 56—7.)

1. A gang lawn mower comprising front and rear transverse rows respectively containing a plurality of lawn mower units, each unit having a cutter-driving rolling element or ground wheel, means for uniting and spacing said units comprising a main frame and unit-connecting members in non-supporting and relatively movable relation to said main frame serving to hold the units of the front row parallel to the transverse axis of the main frame and other unit connecting members serving to connect the units of the rear row to said frame, and all of said members being organized to permit the tilting of the units in the vertical planes of their respective wheel-axes.

1,398,482. PNEUMATIC TIRE. HARRISON H. ALLEN, Houston, Tex., assignor to Standard Rubber Company, Houston, Tex., a Corporation of Delaware. Filed July 15, 1921. Serial No. 485,072. 3 Claims. (Cl. 152—12.)

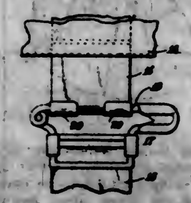
3. In a vehicle tire, an inner pneumatic tube of rubber having on its inner surface a layer of soft plastic composition with a film of paper on its inner surface to prevent sticking.

1,398,483. PIN FOR HOLDING SOFT COLLARS. THERON S. CURTIS, North Attleboro, Mass., assignor to T. I. Smith Company, North Attleboro, Mass., a Trust Association of Massachusetts. Filed Oct. 18, 1920. Serial No. 417,653. 3 Claims. (Cl. 24—67.)



1. A soft collar holder embracing in its construction a pair of telescopic longitudinal members, one arranged to slide inside the other, each being provided with an outwardly projecting lip adapted to be pinched between the fingers, a reversely bent pointed hook secured to the outer end of each member, and an interior tension spring connected to each member and acting to draw the hooks toward each other while permitting them to move farther apart when said lips are pinched together, substantially as described.

1,398,484. HOG-HOLDING DEVICE. CHESTER HOLDING, New Richmond, Wis. Filed Jan. 22, 1920, Serial No. 353,257. Renewed Apr. 15, 1921. Serial No. 461,652. 2 Claims. (Cl. 119—98.)

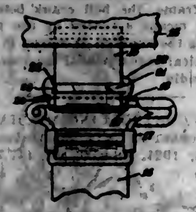


1. A device for holding hogs for the purposes stated, in the form of a tubular shell closed at one end and having a rounded rim at its other end, said shell being made up of telescoped sections making the same longitudinally adjustable.

1,398,485. MAGNETO. Stephen A. Sims, East Orange, N. J., assignor to The Simms Magneto Company, East Orange, N. J., a Corporation of New Jersey. Filed Apr. 26, 1920. Serial No. 377,169. 6 Claims. (Cl. 123—148.)

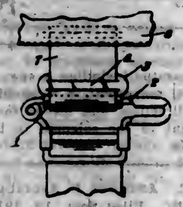
6. In a high tension magneto electric machine for multi spark ignition purposes, provided with an ungrounded secondary winding, each end of which is connected with the distributer by means of a slip ring, and separate brushes, a condenser for the secondary winding comprising a cup shaped metallic member supported by one of the brush holders, and electrically connected with the brush thereof, a cylindrical dielectric member surrounding said metallic member, and an exterior cylindrical metallic member surrounding said dielectric member, the rotary portion of the distributer being provided with a high tension conductor extending into said cup shaped member and provided with a brush engaging the same, and the exterior metallic member being provided with means for connecting it with the other brush holder, the exterior metallic member of the condenser being split to allow for expansion and contraction, and yielding means interposed between the dielectric member and the metallic surfaces supporting it.

1,398,486. HOSE-SUPPORTER. WILLIAM S. HUNKINS, Los Angeles, Calif. Filed Dec. 14, 1920. Serial No. 430,621. 4 Claims. (Cl. 24—76.)



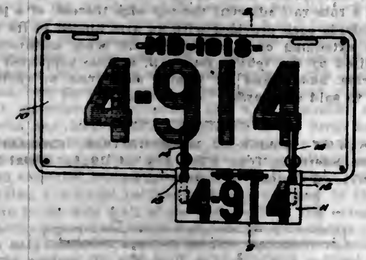
2. In a hose supporter construction, a bushing, a tape embracing said bushing, and end members connected to said bushing and embracing the outside of said tape.

1,398,487. HOSE-SUPPORTER. WILLIAM S. HUNKINS, Los Angeles, Calif. Filed Dec. 14, 1920. Serial No. 430,622. 4 Claims. (Cl. 24—76.)



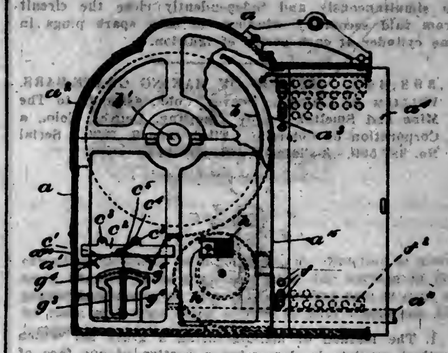
3. In a hose supporter, a bushing constituting a pin tube, a bar connected to only the opposite ends thereof

and forming a slot between the wall of said bushing and said bar of a size sufficient to receive only one



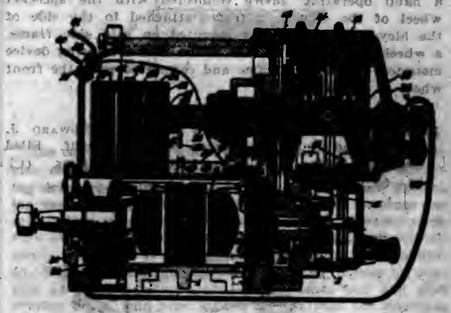
thickness of tape, and a tape embracing said bushing and having one fold thereof extending through said slot.

1,398,488. HOSE-SUPPORTER. WILLIAM S. HUNKINS, Los Angeles, Calif. Continuation of application Serial No. 430,622, filed Dec. 14, 1920. This application filed July 16, 1921. Serial No. 485,380. 1 Claim. (Cl. 24—76.)



In a device of the character described, a tubular bushing, a lateral extension from one side thereof, said extension being slitted to form two bars, said bars being oppositely offset to provide a passage for the two ends of a supporting tape arranged to surround said bushing, said bars operating to hold together the projecting ends of such a tape.

1,398,489. AUXILIARY AUTOMOBILE LICENSE-TAG. FREDERICK D. JOHNSON and HENRIETTA CULLENY, Baltimore, Md. Filed May 10, 1921. Serial No. 468,405. 1 Claim. (Cl. 40—128.)



The combination with an automobile license plate, of elements secured to said plate, hook-like elements supported to said elements, a comparatively small auxiliary license tag supported by said hook-like members to project below said plate in parallel relation thereto, and sleeves of relatively soft material carried by said elements and against which the auxiliary tag rests for the purpose specified.

1,398,490. LAUNDRY-DRIER. ARTHUR KENNEDY, Newton, Mass., assignor to International Equipment Company, Boston, Mass., a Trust Association of Massachusetts. Filed May 10, 1920. Serial No. 380,888. 12 Claims. (Cl. 34—8.)

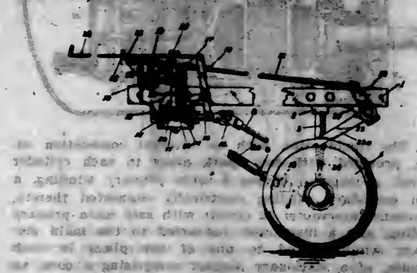
1. In a drying tumbler the combination of a casing, interior partition plates partly subdividing said casing into a drum compartment and a blower compartment with openings for admitting the air from the blowers into the drum compartment and for admitting the air circulated through the drum back to the blower compartment, an adjustable shutter arranged to partly or wholly close the opening from the drum compartment into the blower compartment, a discharge conduit leading from said drum compartment to a discharge port whereby the disharge of the air from the drum compartment into the blower compartment and the discharge passage may be controlled at will, substantially as described.

1,398,491. IGNITION APPARATUS FOR INTERNAL-COMBUSTION ENGINES. VICTOR W. KLIESRATH and FREDERICK A. HOTT, East Orange, N. J., assignors to The Simms Magneto Company, East Orange, N. J., a Corporation of New Jersey. Filed July 15, 1921. Serial No. 484,876. 13 Claims. (Cl. 123—148.)

1. The combination with an internal combustion engine, provided with two spark plugs in each cylinder thereof, a magneto having a main primary winding, a main secondary winding electrically connected thereto, a periodic interrupter in circuit with said main primary winding, and a distributer connected to the main secondary winding, and to one of the plugs in each cylinder, of a stationary magnet comprising a core, an auxiliary primary winding connected in series with the main primary winding, and an auxiliary secondary wind-

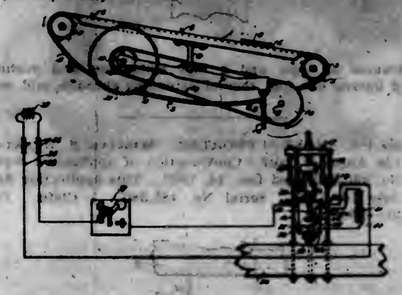
ing connected with the auxiliary primary winding, and a second distributer connected with the auxiliary secondary winding and with the other spark plugs of said cylinders, said distributers each comprising stationary contacts, and a rotary contact, said rotary contacts being insulated from each other and rotating in unison to simultaneously and independently close the circuit from said secondary windings to both spark plugs in one cylinder at each period of ignition.

1,398,492. METHOD OF MAKING GRATE-BARS. WILLIAM A. LEBOUIT, Denver, Colo., assignor to The Mine and Smelter Supply Company, Denver, Colo., a Corporation of Colorado. Filed June 9, 1920. Serial No. 387,599. 3 Claims. (Cl. 29—148.)



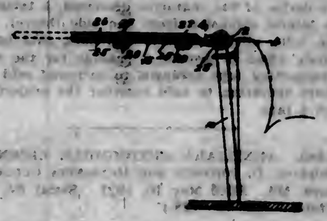
1. The method of manufacturing a grate bar which method consists in depressing a portion of one face of a blank out of the plane of that face to form a projection or pad on the opposite face.

1,398,493. CYCLE-CAR. LUTHER M. PAYNE, Bethany, Okla., and LEE A. MILLER, Greenville, and JOHN J. DOUGLAS, Dallas, Tex. Filed June 15, 1921. Serial No. 477,271. 6 Claims. (Cl. 206—45.)



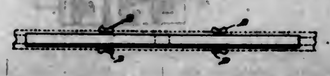
1. In a cycle car, the combination with a bicycle, of a hand operating device connected with the sprocket wheel of the bicycle, a frame attached to the side of the bicycle frame, a seat mounted on said side frame, a wheel supporting the side frame, and a steering device mounted on the side frame and connected with the front wheel of the bicycle.

1,398,494. POWER-LIFT FOR PLOWS. EDWARD J. KRAUSE and JOHN W. HOWARD, San Jose, Calif. Filed Sept. 23, 1920. Serial No. 412,479. 10 Claims. (Cl. 97—54.)



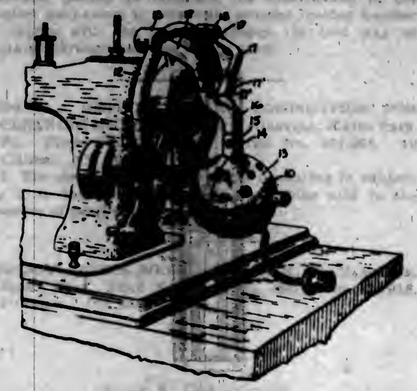
1. A power lift for wheeled plows comprising a frame, a shaft mounted thereon, an arm fixed on said shaft, a link pivotally mounted on the frame adjacent to the shaft and adapted to be connected to the plow, a vertical spindle supporting said wheel and arranged for vertical movement relative to the frame, the bell crank being connected to the spindle, and means actuated by the rotation of said wheel for causing the shaft to be moved in either direction to impart a vertical translational movement in a vertical plane to the spindle.

1,398,495. SAW-CONTROLLING MECHANISM. GUY L. ROGERS and ROBERT E. GRAY, Snoqualamie Falls, Wash. Filed Feb. 28, 1921. Serial No. 447,791. 5 Claims. (Cl. 143—41.)



1. A sawing apparatus including a saw carrying frame mounted for pivotal movement, a solenoid for operating the frame in one direction, and means for automatically reducing the current to the solenoid to hold the frame in operated position.

1,398,496. TABLE. ANTHONY P. SALTALAMACHIA, Huntington Park, Calif. Filed Sept. 10, 1919. Serial No. 322,936. 2 Claims. (Cl. 45—51.)



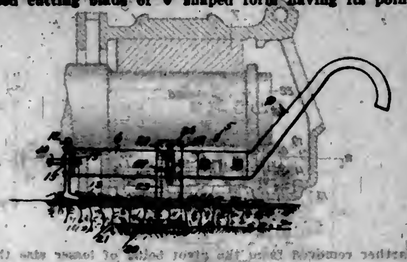
1. In combination with the back of a motor vehicle seat having a robe rail adjacent the top edge thereof, of a pair of standards each provided with an arm hinged to its upwardly extending end, said standards being maintained in position by the vehicle robe rail, a table supported on said arms, and means for locking said arms at various angles to said standards.

1,398,497. CAR-RAIL HOSE-BRIDGE. CHARLEY P. TYLER, Sherman, Tex. Filed Jan. 24, 1921. Serial No. 439,671. 2 Claims. (Cl. 104—275.)

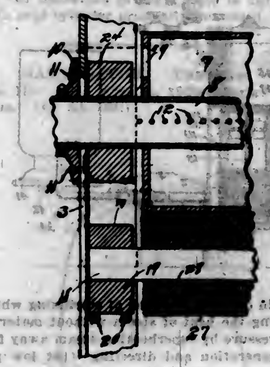
1. A hose-bridge for car-rails, comprising a body portion, an opening within said body portion, inclined ways or tracks over said body portion above said opening, a groove on one side of said inclined ways or tracks, flanges on each side of the body portion extending down on each side of the head of railway rail, and set screws fitting in the flanges of the hose-bridge having the screw end adapted to engage with the web of the railway rail.

1,398,498. SUSPENSION-DRIVE FOR SEWING-MACHINES. WILLIAM J. BROWN, Newark, N. J. Filed Jan. 29, 1920. Serial No. 355,449. 6 Claims. (Cl. 74—26.)

1. The combination with an axially supported rotatable machine element, of means for imparting rotary movement to said element by frictional contact therewith applied therebeneath, and means for supporting the first named means from said rotatable machine element.



1,398,499. COVER-LOCK. GEORGE A. BURNHAM, Saugus, Mass., assignor to Sears B. Condit, Jr., Brookline, Mass. Filed Mar. 31, 1919. Serial No. 286,352. 1 Claim. (Cl. 292—194.)

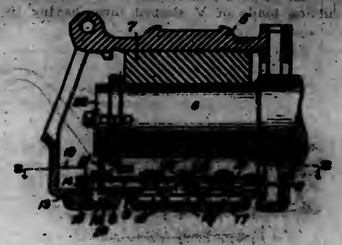


A receptacle having a body portion and a cover having a side-wall depending down over a side-wall of the body-portion, the cover side-wall having a circular lock-member receiving aperture therethrough and a slot having a width less than the diameter of said aperture extended from the lower edge of the side-wall to said aperture arranged to admit a lock-member within said aperture, the side-wall of said body-portion having a smaller aperture alined with the aperture in said cover, and a lock-member for said cover and body-portion comprising a flat strip having a width approximately equal to the diameter of the circular aperture and a thickness less than the width of said slot and extended beyond the side-wall of the cover, said strip having a reduced portion rotatably received in the aperture in the side wall of the body-portion and extended inwardly beyond said side-wall, and a spring-plate received on said extended reduced portion arranged to press said strip against the side wall, said extended reduced portion formed with an enlarged inner end-portion arranged to retain said spring-plate in place.

1,398,500. WEEDER. GEORGE M. CARKEY, Bloomington, Calif. Filed Nov. 18, 1919. Serial No. 338,850. 1 Claim. (Cl. 55—60.)

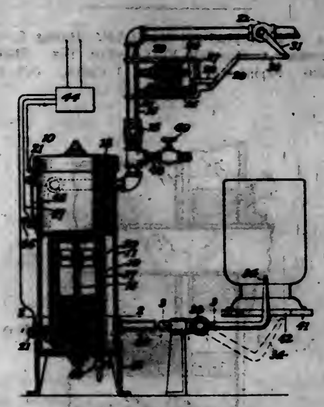
A weed cutting machine, comprising a substantially rectangular strap iron frame having handle bars secured to two oppositely disposed sides of said frame, a ground contact shoe adjustable in a vertical direction secured to the front end of said frame, and a flat horizontally disposed cutting blade of V shaped form having its point extending forwardly with respect to the direction of movement adapted to be projected under the surface of the ground and having an upwardly extending arm at each of its ends, said arms being pivoted to said frame and adjustable in a vertical direction.

1,398,501. DETACHABLE MANGLE. HARRY L. CARSON and ROSSIE A. HUNTER, Fort Worth, Tex. Filed Sept. 13, 1920. Serial No. 409,784. 1 Claim. (Cl. 68—9.)



The combination of a driving head and a mangle detachably connected to said head, said mangle having a revolving drum pad driven by said head, a hollow pipe extending through said mangle, vertically movable bearings for said hollow pipe, means for adjusting and applying pressure to said bearings to hold said pipe at different adjustments relative to said drum, a hollow ironing drum mounted loosely on said pipe and adapted to be driven by friction of goods passing between said drum pad and said ironing drum, said pipe having perforations for directing gas jets within said drum, and means for supplying gas and air through said hollow pipe for heating said drum.

1,398,502. JOURNAL-LUBRICATING DEVICE. IRA S. DEWEESE and EDWIN S. PEARCE, Indianapolis, Ind. Filed Nov. 10, 1914. Serial No. 871,602. 7 Claims. (Cl. 64—24.)

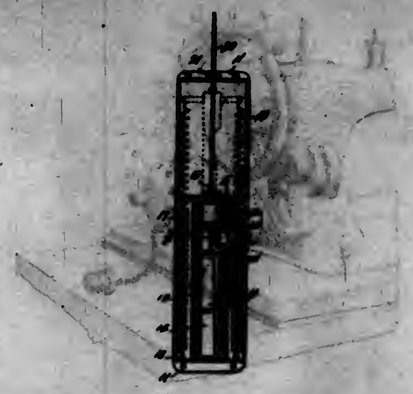


1. The combination with a journal box and its journal, of a plurality of oil pockets below the journal, an oil gap-

jecting device the cock pocket, and a pivoted support for the projecting device, the pockets and the rail fastener

farther removed from the pivot being of lesser size than those which are closer.

1,396,502. APPARATUS FOR AND METHOD OF STERILISING MILK-CANS AND OTHER CONTAINERS. ARTHUR L. DUNHAM, New York, N. Y. Filed Oct. 12, 1916. Serial No. 125,167. 7 Claims. (Cl. 167—8.)

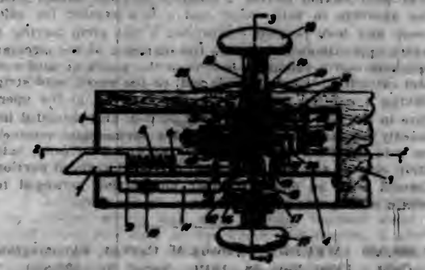


1. The herein described method of sterilising which comprises increasing the heat of steam without materially increasing its pressure by superheating steam away from the point of its generation and directing it at low pressure onto the article to be sterilised.

2. An apparatus for sterilising comprising a closed superheating chamber having a steam inlet and a steam outlet, means associated with said chamber for superheating steam delivered thereto without materially increasing its pressure, and means connected with said outlet for directing the superheated steam onto the surface of the article to be sterilised.

1,396,504. DOOR CLOSER AND CHECK. COCIU ENACHE, Dallas, Tex. Filed Apr. 11, 1921. Serial No. 460,303. 2 Claims. (Cl. 16—49.)

2. In a device of the character described, an elongated casing, partitions at the lower end of the casing arranged transversely and spaced to form a guideway therebetween, one of said partitions having a slot, a plunger arranged in the guideway between the partitions and having an inclined face terminating in a notch, a resilient detent extending through the slot of said partitions and normally projecting into the notch of the plunger and disposed in the path of the inclined face thereof, a cross bar in the upper end of the plunger normally resting on the upper ends of the partitions, coiled springs having their upper end attached to the plunger and extending down on each side of the partitions, the lower ends of the springs being

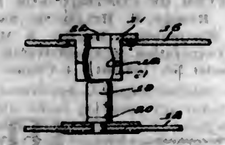


attached to the lower portion of the casing, and a flexible connection attached to the upper end of the plunger and extending to the upper end of the casing.

1,396,505. TREE-SPRAY. BAYLESS W. GERHART, San Bernardino, Calif., assignor to United States Spray Company, San Bernardino, Calif., a Corporation of California. Filed Jan. 12, 1920. Serial No. 351,077. 3 Claims. (Cl. 167—6.)

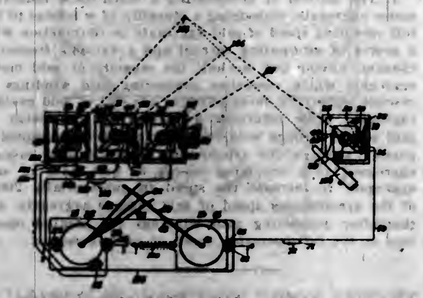
1. composition of matter comprising a major proportion of water, and a minor proportion of an oily saponaceous matter, crude carbolic acid emulsified, and sodium fluorid in substantially the proportions as specified.

1,396,506. COMBINATION-LOCK. CLARENCE H. GOUDLAY and WALTER B. GOUDLAY, Jamaica, N. Y. Filed Mar. 4, 1920. Serial No. 363,150. 12 Claims. (Cl. 70—53.)



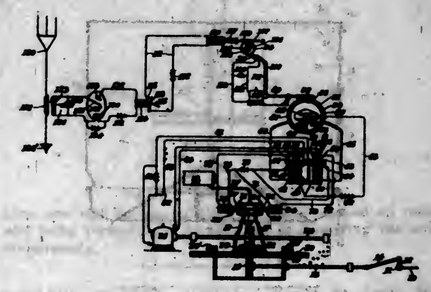
1. A combination lock embodying a bolt, a knob, an annular toothed member fixed for rotation with the knob and adapted to engage with the bolt, tumbler mechanism operable through rotation of the knob for normally maintaining the annular toothed member out of engagement with the bolt, and a dial associated with the knob and rotatable thereby to facilitate the conditioning of the tumbler mechanism to permit the annular toothed member to engage with the bolt, whereupon the bolt may be operated through rotation of the knob.

1,396,507. METHOD OF AND COMPOSITION FOR CLEANING METALS. JAMES H. GRAVELL, Elkins Park, Pa. Filed Feb. 27, 1920. Serial No. 361,606. 10 Claims. (Cl. 106—8.)



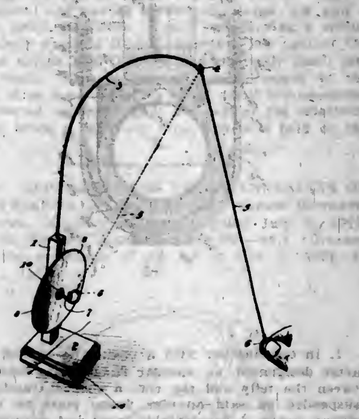
1. The method of cleaning metal consisting in subjecting it to the solvent action of an etching acid in the presence of fusel oil.

1,396,508. CHECK-BOOK. WILLIAM H. W. HAMILTON, Baker, Oreg. Filed Nov. 15, 1920. Serial No. 424,018. 7 Claims. (Cl. 281—29.)



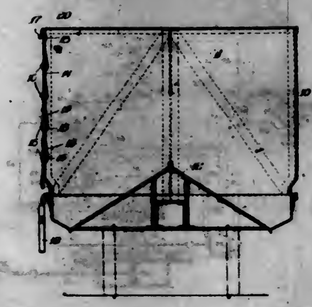
1. A check book comprising in combination a cover, a flap attached to one cover-member, and check punching means, said means consisting of a snap fastener having one element secured to said flap and the coöperating element thereof secured to the other cover member.

1,396,509. RANGE-FINDER. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed July 27, 1917, Serial No. 183,118. Renewed Dec. 20, 1920. Serial No. 432,138. 12 Claims. (Cl. 33—66.)



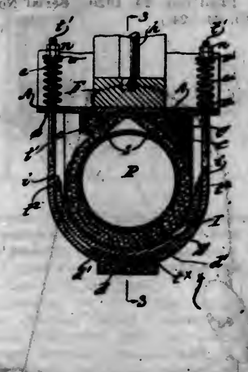
1. In a range finder, the combination with a main sighting unit, of a secondary sighting unit, an auxiliary sighting unit, a main indicating element controlled by said main sighting unit, and a plurality of separately movable secondary indicating elements separately controlled by said secondary sighting unit and said auxiliary sighting unit respectively, said secondary indicating elements being arranged to coöperate with said main indicating element to indicate a plurality of distances.

1,396,510. STEERING CONTROL. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed Mar. 30, 1916, Serial No. 226,534. Renewed Apr. 15, 1921. Serial No. 461,679. 13 Claims. (Cl. 114—21.)



11. In a steering mechanism, a cylinder provided with an inlet port and an exhaust port, a piston mounted in said cylinder for reciprocating movement, a rudder operatively connected to said piston, said ports being on the same side of said piston, controlled means for admitting pressure through said inlet port to shift said piston, and means to gradually close said exhaust port, whereby the escape of the operating pressure fluid is cut off and the pressure in said cylinder gradually increased.

1,396,511. GAME DEVICE. THEODORE W. HANRATH, Chicago, Ill. Filed Nov. 24, 1920. Serial No. 426,139. 2 Claims. (Cl. 64—24.)

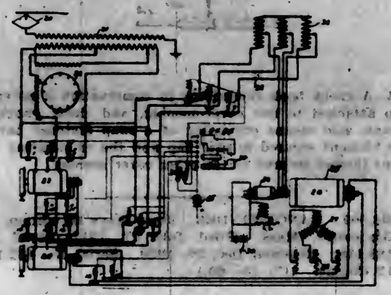


1. A game device having a platform, a post rising from it, a hook supported by the post and mounted a slight distance above the platform, a one piece metallic rod extending upward and forward from the hook, and a ring suspended from the upper end of the rod for swinging movement toward the hook and possible engagement therewith, the rod being freely resilient, whereby flexure and release of the same will cause the ring to travel in an irregular course during its swinging movement toward the hook.

1,398,512. RAILWAY-CAR CONSTRUCTION. Hagop S. Hann, Chicago, Ill. Filed Sept. 20, 1919. Serial No. 324,163. 5 Claims. (Cl. 105—368.)

3. A railway car having a body portion including a side with corrugations formed therein, and ladder rungs secured to said car side adjacent the deepest portion of said corrugations.

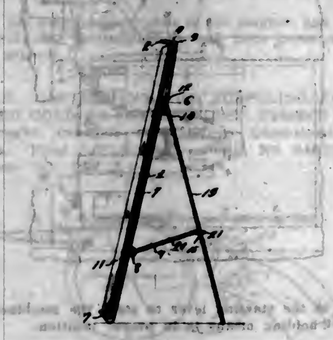
1,398,513. PNEUMATIC-TIRE TREAD. James A. Healy, Brooklyn, N. Y. Filed Apr. 14, 1921. Serial No. 461,253. 4 Claims. (Cl. 152—16.)



1. In combination with a pneumatic tire of the character designated, an annular flange plate interposed between the felly and the rim, a shaped traction stirrup suspended on said annular flange plate by elastic resilient means, a demountable tread pad mounted on said stirrup, and an intermediate metallic bearing plate interposed between said tread pad and the shoe of the tire, for the purpose described.

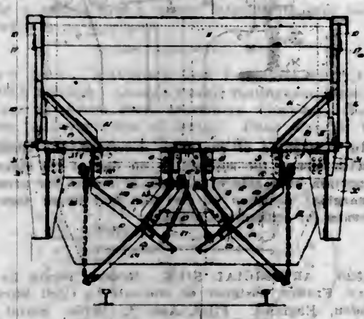
1,398,514. AMUSEMENT APPARATUS. James A. Healy, Brooklyn, N. Y. Filed May 6, 1921. Serial No. 467,794. 3 Claims. (Cl. 104—65.)

1. In amusement apparatus of the character designated, the combination of an endless channel runway comprising semi-circular curves and loops connected by straight stretches of channel the floors of which are reversely inclined, an endless string of cars spaced apart to said endless channel runway and coupled together by flexible connections, and means of propelling said cars around said endless channel runway, for the purpose described.



1,398,515. SYSTEM OF CONTROL FOR INDUCTION-MACHINES. Rudolf E. Hellmund, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 15, 1917. Serial No. 168,664. 4 Claims. (Cl. 174—274.)

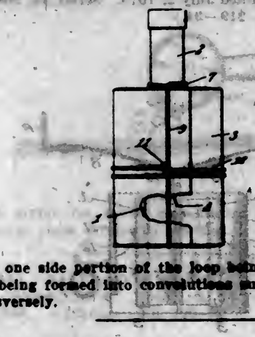
1. The method of accelerating a multi-speed induction motor aggregate, embodying a plurality of windings to the full operating speed of said aggregate in conjunction with a source of alternating current and a variable frequency changer, having but one-half the capacity of said motor aggregate which comprises connecting said windings in cascade, supplying energy first to one end of said cascade aggregate while returning a portion of the energy to said source through said frequency changer, subsequently passing through the synchronous speed of said cascade aggregate, then supplying energy to both ends of said aggregate to increase the speed to substantially 200% of the synchronous speed of said cascade aggregate, and thereafter connecting said windings for parallel operation at the full operating speed of said aggregate.



1,398,516. HASEL. Aaron Hermanson, Rockford, Ill. Filed Dec. 16, 1919. Serial No. 345,249. 1 Claim. (Cl. 40—151.)

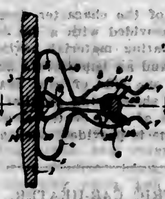
A wire easel formed from three substantially U-shaped members, one of said members having its central horizontal portions provided with a hook adapted to hook over the upper end of an article, said hook being formed by bending the wire forming the member so as to form vertically disposed adjacent parallel portions, said vertically disposed parallel portions adjacent the horizontal portions being provided with outwardly extending bends, a loop extending around the vertically disposed portions between the outwardly extending bends and the horizontally disposed portions for holding said vertically disposed portions against spreading, said bent out portions forming means for preventing longitudinal movement of the loop on the vertically disposed portions, the lower end of the arms of said U-shaped member being provided with hooks for hooking under the lower end of an article, one of said U-shaped wire members forming a supporting leg and having the ends of its arms pivotally connected

to the first mentioned U-shaped member, said arms being provided with offset portions, the other U-shaped wire member having its arms slidably mounted and connected to the arms of the supporting U-shaped member and at points above its offset portions which form limiting stops, said last named U-shaped member being pivotally connected to the downwardly extending arms of the first mentioned article receiving U-shaped member and forming means for bracing and holding the supporting member.



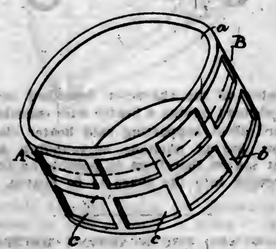
1,398,517. DUMP-CAR. David Hindahl, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed Dec. 11, 1920. Serial No. 430,074. 24 Claims. (Cl. 105—243.)

1. A car of the class described having a bottom comprising a longitudinally extending hopper, said hopper having an inclined stationary side and an inclined movable side, said movable side including means for directing the load discharged from the hopper to one side or to the other side of a rail.



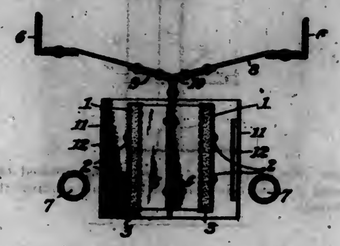
1,398,518. FLASHLIGHT-BATTERY. Harry H. Hipwell, Pittsburgh, Pa. Filed Nov. 16, 1920. Serial No. 424,525. 1 Claim. (Cl. 206—38.)

In a device of the class described, a flash light battery core including a stem; a cover surrounding the core; a rubber band formed into a plurality of convolutions surrounding the stem, the said convolutions being extended to fashion a loop disposed longitudinally of the



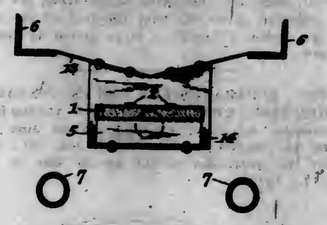
core, one side portion of the loop being crossed on itself and being formed into convolutions surrounding the core transversely.

1,398,519. HANGER. Greene C. Hosch, St. Louis, Mo. Filed Mar. 14, 1921. Serial No. 452,156. 5 Claims. (Cl. 24—259.)



1. A hanger for holding a relatively small object or a relatively large object, comprising a base to be attached to a support, and having a relatively large jaw and a relatively small jaw, each of said jaws having a spring for yieldingly pressing its corresponding jaw against the side of an article held thereby, said relatively small jaw being normally disposed inwardly with respect to the relatively large jaw, the spring of the small jaw operating to be deflected outwardly past the face of the relatively large jaw, when a relatively large article is held by the large jaw.

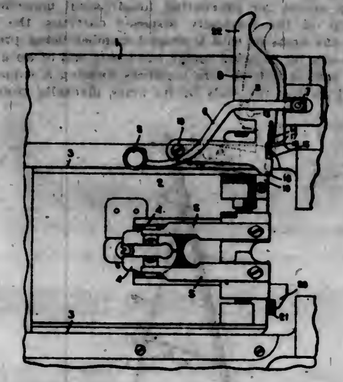
1,398,520. APPARATUS FOR USE IN ANNEALING OR OTHERWISE TREATING METALS. Alfred Howgate, Riddlesden, Keighley, England. Filed July 8, 1919. Serial No. 309,490. 2 Claims. (Cl. 263—49.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



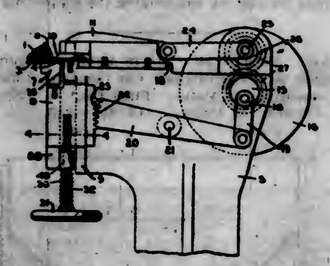
1. As a new article of manufacture an annealing pan provided with exterior projections shaped to form a dove tail or lock, and a layer of refractory material covering the surface of the annealing pan which material is held in position by said dove-tail or lock.

1,398,521. ELECTRIC CAR-HEATING SYSTEM. Lee P. Hynes, Albany, N. Y., assignor to Consolidated Car-Heating Company, Albany, N. Y., a Corporation of West Virginia. Filed July 2, 1919. Serial No. 308,150. 15 Claims. (Cl. 219—34.)

1. A car heater of the character described comprising a heater element provided with a flat body formed of a thin sheet of insulating material having a heater wire embedded therein, and an imperforate guard sheet inclosing the ends and one side of said heater element, the sides of the guard sheet being parallel with and spaced from the flat sides of said heater element, whereby an unobstructed air flue is provided, open at both ends.



1,398,522. ELECTRIC CAR-HEATER. Lee P. Hynes, Albany, N. Y., assignor to Consolidated Car-Heating Company, Albany, N. Y., a Corporation of West Virginia. Filed July 2, 1919. Serial No. 308,151. 9 Claims. (Cl. 219—34.)



1. A heater of the character described comprising a flat heater element having a heater wire embedded therein, and a guard sheet supporting said heater element, said guard sheet having portions surrounding said heater element but spaced therefrom to provide an unobstructed air flue opening into the space to be heated.

1,398,523. GUARD FOR STARTING MECHANISM OF SEWING-MACHINES. John Kenwick, Boston, Mass., assignor to The Reece Button Hole Machine Company, Boston, Mass., a Corporation of Maine. Filed Apr. 20, 1920. Serial No. 376,590. 8 Claims. (Cl. 112—67.)

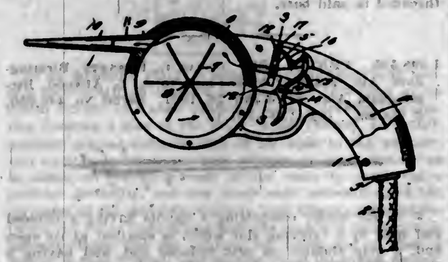
1. In a sewing machine, the combination with a base-frame, of work-holding means removable therefrom, a starting lever mounted on the base frame and by which the machine is started, and means to prevent the operation of the starting lever to start the machine until the work-holding means is in proper position.

1,398,524. MACHINE FOR ROUGH-ROUNDING AND LASTING STITCHED-DOWN SHOES. Benjamin S. La Fleur, Haverhill, Mass., assignor to The Reece Button Hole Machine Company, Boston, Mass., a Corporation of Maine. Filed Oct. 13, 1920. Serial No. 416,605. 14 Claims. (Cl. 12—2.)

1. In a machine of the class described, the combination with means for supporting on one of its sides an edge portion of a sole of a shoe, of means for pressing the marginal portions of the sole and upper together and means for trimming the sole.

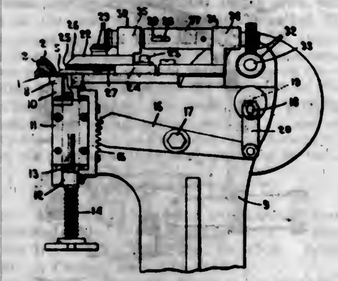
1,398,525. ARTIFICIAL SILK. Robert Denis Lance, Livry, France, assignor of one-half to Cécil Shrager, London, England. Filed Apr. 1, 1918. Serial No. 758,245. 2 Claims. (Cl. 106—40.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat L., 1313.)

1. An artificial silk comprising a cellulose ester having a metallic resinate with a high fusion point, said resinate not exceeding 20%.



1,398,526. ELECTROMAGNETIC APPARATUS INTENDED TO MAGNETIZE PERMANENT MAGNETS. Antoine Luby, Paris, France. Filed Nov. 22, 1919. Serial No. 340,069. 6 Claims. (Cl. 175—21.)

3. In an apparatus for magnetising monobloc permanent magnets having alternating poles, a base provided with diametral grooves radiating from the center thereof, electromagnets on said base having alternating polarities, cores in said electromagnets on which are simultaneously

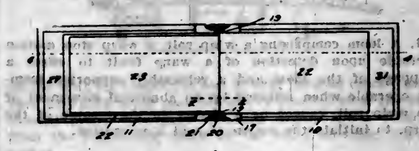


applied the corresponding ends of the magnet, and means for moving the electromagnets and their cores radially in said grooves.

1,398,527. INSTRUMENT FOR SUPPLYING COMMINUTED GOLD BY AIR-PRESSURE. Frederic James Murphatt, township of Woombye, Queensland, Australia. Filed Jan. 3, 1920. Serial No. 349,348. 4 Claims. (Cl. 32—25.)

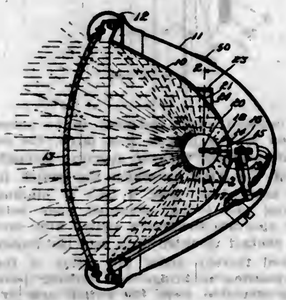
2. In a dental surgical instrument of the class described, the combination of a handle member having an air channel therethrough, a valve chamber in the path of the air channel, a valve slidably mounted in said chamber; a bell crank attached to said valve, a trigger operatively attached to the bell crank, a spring normally holding the trigger and valve in retracted position to close the air passage, a chamber for the particles of filling metal, into which said air channel opens, a paddle wheel rotatably mounted in said chamber, the chamber having a mouth, and a nozzle attached to said mouth, substantially as described.

1,398,528. MACHINE FOR LASTING STITCHED-DOWN SHOES. Angelo Pesri, Bellingham, Mass., assignor to Reece Shoe Machinery Company, Boston, Mass., a Corporation of Maine. Filed Mar. 3, 1921. Serial No. 449,414. 7 Claims. (Cl. 12—7.)



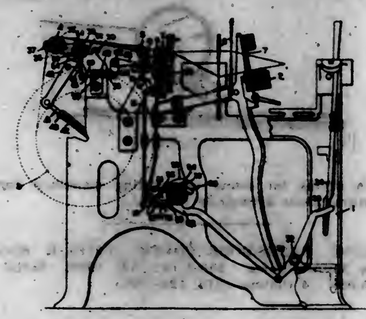
1. In a machine of the class described, the combination with a supporting member adapted to support the edge portion of the sole of a shoe, of means coöperating with said supporting member to beat together the marginal portions of the upper and sole of the shoe, and means to rotate said supporting member.

1,398,529. PHONOGRAPH-NEEDLE. Merton T. Straight, Adel, Iowa. Filed Mar. 31, 1919. Serial No. 286,584. 2 Claims. (Cl. 274—38.)



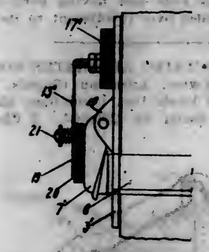
1. A stylus for sound reproducing machines, formed of natural shale artificially vitrified.

1,398,530. SALES-BOOK COVER. Ervin E. Strawn, Des Moines, Iowa. Filed Oct. 11, 1920. Serial No. 415,988. 4 Claims. (Cl. 129—38.)



1. A sales book cover comprising cover members having a flexible connecting means, said cover members having receiving parts for a resilient band, a resilient band received in said receiving parts, and a hinge member having heads at its ends and having portions of said resilient band extended over it adjacent to its heads.

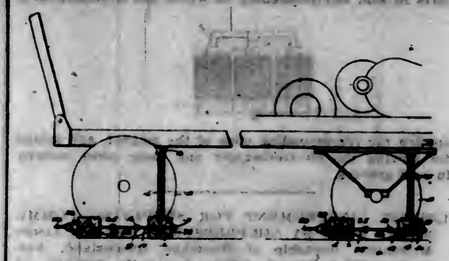
1,398,531. FOCUSING APPARATUS FOR LAMPS. Ernest F. Wackwitz, Arlington Heights, Mass., assignor to Gray & Davis Inc., Cambridge, Mass. Filed Apr. 17, 1919. Serial No. 290,803. 3 Claims. (Cl. 240—44.)



1. In a device of the character set forth, in combination, a reflector adapted to receive light rays from a focal region and to reflect said rays into a beam of light, an electric filament, means for adjustably supporting the filament in said reflector to bring it into proper position relatively to said reflector, and means comprising a perforation in said reflector, and a screen fixed on said reflector opposite said perforation and adapted to coöperate with light rays passing from said filament through said perforation to said screen to enable an operator to determine the position of said filament relatively to said reflector.

1,396,502. STOP MECHANISM FOR LOOMS. Elmer W. Youngquist, Manchester, N. H., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed July 2, 1921. Serial No. 482,086. 10 Claims. (Cl. 139—92.)

1. A loom comprising a whip roll, a warp stop motion operable upon detection of a warp fault to effect a stoppage of the loom and a releasably supported member operable when released by an abnormal movement of the whip roll, caused by a change in the tension of the warp, to initiate the action of said stop motion.

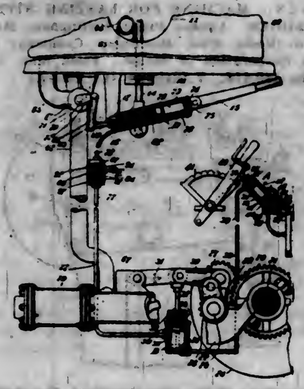


1,396,533. SWITCH. Edwin O. Anderson, Jersey City, N. J. Filed Jan. 15, 1918. Serial No. 211,914. 3 Claims. (Cl. 200—55.)

1. In an inclosed switch adapted to be actuated to closed position by the tongue of a latch, the combination of a plate provided with an aperture through which the tongue of the latch by which the switch is to be operated, is adapted to pass, a pair of binding posts insulated from each other, mounted upon said plate adjacent the aperture therein, a switch arm carried by said plate, a contact mounted upon said last-named member and moved thereby under the action of the latch tongue into position to bridge said binding posts, said contact being insulated from the switch arm by which it is sustained and from said plate, and movable automatically under the action of gravity to open position when the latch tongue is retracted.

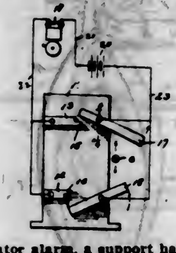
1,396,534. WHEEL BLOCKING AND JACKING DEVICE. Alexander M. Bellony, U. S. Army. Filed Apr. 26, 1919. Serial No. 293,660. 3 Claims. (Cl. 188—32.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

1. A combined wheel blocking and jacking mechanism, comprising complemental, slidable wheel engaging members disposable one on each side of a wheel, means for sliding said members toward each other and against the wheel, including a detachable coupling between the members, a screw jack barrel carried by one of said members and having a threaded bore and a screw jack threaded in said bore.



1,396,535. PENHOLDER. Oscar L. Bennett, Birmingham, Ala., assignor of one-half to A. L. Atwood, Birmingham, Ala. Filed Jan. 28, 1921. Serial No. 440,655. 2 Claims. (Cl. 120—101.)

2. A pen holder comprising a handle having a reduced end split by a tapering slot which is smallest at its open end, a grip slidable on said reduced end, and having a sleeve extension at its inner end and a cross pin at its outer end, the pin being adapted to work in the slot and expand the split handle end to clamp a pen between it and the grip, and said sleeve on the inner end of the grip being long enough to cover the reduced portion of the handle that would otherwise be exposed by the grip in its operation position.



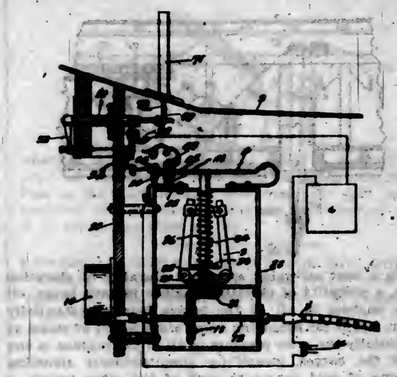
1,396,536. CONTROLLING MECHANISM FOR LOCOMOTIVE BOOSTER-MOTORS. Ray M. Brown, Yonkers, N. Y., assignor to Howard L. Ingersoll, White Plains, N. Y. Filed Apr. 28, 1920. Serial No. 377,144. 24 Claims. (Cl. 105—48.)

1. The combination with the main driving means of a locomotive and a booster motor for aiding the main driving means under predetermined operating conditions; of means for governing the application of motive power to the main driving means and booster motor comprising

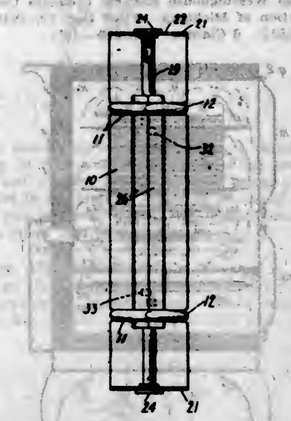
one controlling member for both; and means made effective under other operating conditions of the locomotive whereby the manipulation of the controlling member affects the control only of the main driving means.

1,396,537. INCUBATOR-ALARM. William H. Clarke, Sydney, New South Wales, Australia. Filed July 3, 1919. Serial No. 308,344. 1 Claim. (Cl. 200—61.)

In an incubator alarm, a support having immovable contact-members fixed thereon to constitute terminals of an alarm circuit and each provided with a terminal projection forming a stop at the inner corner thereof, a contact-member pivoted eccentrically of its ends to the support, and adjacent each immovable contact in such manner as to admit of the outer ends of the contacts occupying a position inwardly, and the inner ends outwardly, of the fulcrums of the movable contacts, and means operating between the outer ends of the movable members and movable against either one for causing its inner end to abut a stop of a fixed contact and thereby close the alarm circuit.



1,396,538. ANTISKID DEVICE FOR VEHICLE-WHEELS. William H. Crane, Davenport, Iowa. Filed Apr. 13, 1920. Serial No. 373,553. 7 Claims. (Cl. 152—14.)

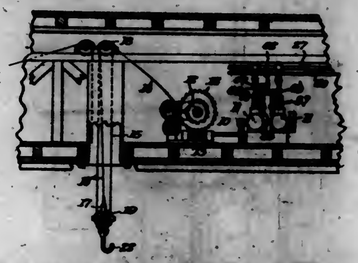


1. An anti-skid device for vehicle wheels comprising a clamp adapted to be fastened to the wheel spoke and consisting of opposing clamping jaws formed respectively with end portions bearing fixed relations to the jaws, said end portions of the jaws being pivotally connected directly together permanently in such manner that in their opening and closing movements the jaws will be confined in a common plane which extends transversely of the spoke, a clamping device acting on the opposite ends of the jaws to draw them together on the spoke, and a gripping element permanently connected at one end to one of said relatively fixed portions and adapted to be detachably connected at its opposite end to said clamping device.

1,396,539. AUTOMATIC SPEED CONTROL. Edgar J. Crawford, Seattle, Wash., assignor to J. Eugene Jordan, Seattle, Wash. Filed Aug. 26, 1919. Serial No. 319,991. 4 Claims. (Cl. 123—118.)

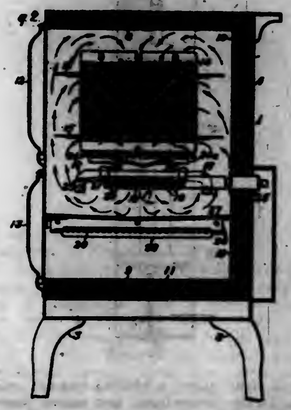
1. A speed control mechanism for gas engines comprising, in combination, an electric circuit adapted to produce a spark in the engine cylinders, a governor connected to the engine to be regulated by the speed thereof, a plurality of parallel circuit members, a selective switch adapted to throw any one of said parallel circuit members into the circuit and to exclude the remainder, an arm engageable by and movable by the governor, a fixed contact member, and a plurality of contact members carried by and movable with said arm out of contact with the fixed contact member, each of said movable contact members being connected with its respective one of said parallel circuit members, and each being movable out of contact with the fixed contact point at a predetermined engine speed differing from the controlling speed of the other movable contact points.

1,396,540. LOOSE-LEAF BINDER. Schuyler E. Day, New York, N. Y. Filed Aug. 30, 1917. Serial No. 188,207. 20 Claims. (Cl. 129—24.)



1. In a loose leaf binder, a binding element comprising arms having elastic connections, and means upon which said elastic connections are revolubly arranged, whereby said element may be moved to different operative positions.

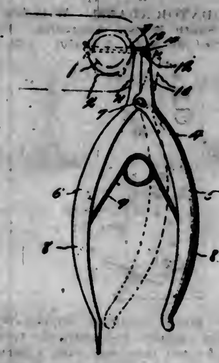
10. In a loose leaf binder, the combination of a frame, a plurality of binding elements provided with arms having elastic connections and adapted to be opened and closed, and a support for the binding elements reciprocably mounted in said frame.



14. In a loose leaf binder, a binding element comprising in combination, a pair of ring hooks adapted to hold loose leaves, a spring member connecting said hooks and tending normally to keep said hooks in closed position, and means operating to keep said hooks in open position when said hooks have been opened to a certain predetermined degree.

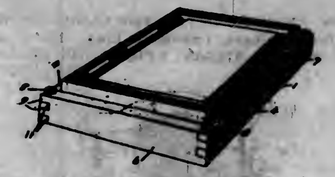
1,398,541. SHIP-SALVAGING APPARATUS. Henry D. Dean, Benton Harbor, Mich., assignor of one-half to Fred J. Petrovics, Chicago, Ill. Filed Dec. 12, 1919. Serial No. 344,574. 3 Claims. (Cl. 114—51.)

1. In a boat salvaging system, a plurality of elevating barges, a plurality of elevating engines in each barge, all of the engines in all of the barges being substantially similar, means for supplying a uniform amount of steam at substantially the same pressure to all of the engines in any one of the barges, means for simultaneously signaling from one of said barges to each of the other barges, a plurality of devices adapted to be connected to a sunken vessel, an elevating drum operatively connected with each of said engines to be rotated continuously as the engine is operated, and cables respectively connecting said devices with said drum, whereby said devices when connected to a sunken vessel may be pulled upwardly continuously and with uniform forces.



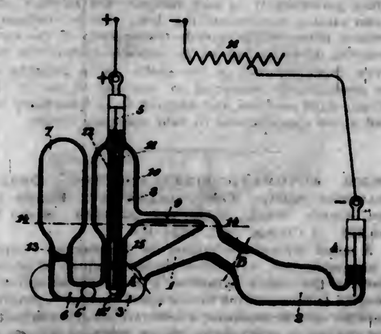
1,398,542. ARRANGEMENT OF HEATERS IN ELECTRIC OVENS. Frank F. Forshee, Flint, Mich., assignor to Westinghouse Electric Products Company, a Corporation of Michigan. Filed Dec. 13, 1919. Serial No. 344,511. 6 Claims. (Cl. 219—19.)

1. In an electric range, the combination with an oven having a chamber and means for dividing said oven into an upper and a lower compartment, of a single electric heating element mounted in the upper compartment, and means for causing said heating element to uniformly heat said upper compartment by convection.



1,398,543. COTTER-PIN EXTRACTOR. Edwin Roy Galbraich, Lebanon, Pa. Filed Jan. 18, 1921. Serial No. 436,916. 2 Claims. (Cl. 29—86.2.)

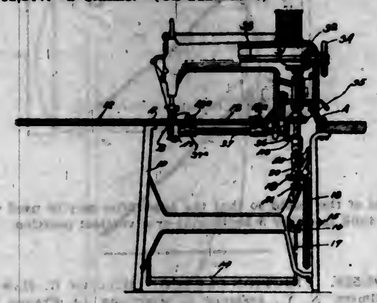
1. A cotter pin extractor comprising a pair of members pivoted together intermediate their ends, the ends at one side of the pivot extending away from each other and forming handles, a spring interposed between said handles, the other ends of said pivoted members forming jaws engaging each other and held in engagement by the spring between the handles, one of said jaws having an outwardly extending arm terminating in a hook adapted to engage in the eye of a cotter pin, the other jaw being



provided with a lug extending outwardly from its side and in the opposite direction to the hooked arm of the adjacent jaw, said last named lug forming a fulcruming point for the tool during a twisting operation of the tool, simultaneously with a pin extracting operation.

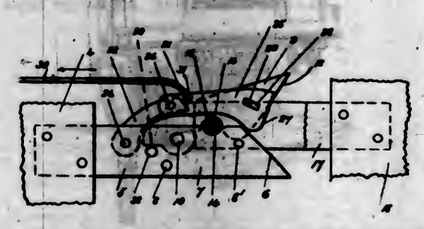
1,398,544. FRAME FOR PRINTERS' FORMS. Lester G. Garen, San Francisco, Calif. Filed June 30, 1921. Serial No. 481,618. 5 Claims. (Cl. 101—404.)

1. In combination with a printer's form of the character described, a rectangular frame comprising four frame members having registering tongues and grooves at either end and set screws for yieldingly joining the frame members at the corners.



1,398,545. MERCURY-LAMP. Henri Georges, Paris, France. Filed Apr. 4, 1919. Serial No. 287,554. 7 Claims. (Cl. 171—42.)

3. A mercury vapor lamp as claimed in claim 2 wherein a small tube is joined with the top of the gas containing



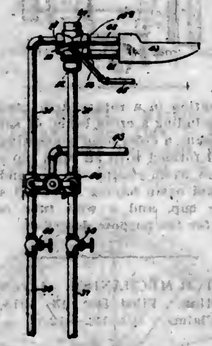
vessel and terminating short of the lower end thereof, and the lower portion of the positive terminal being in the form of a helical tungsten wire accommodated in the small tube and having the extreme lower end thereof immersed in the mercury.

1,398,546. SEWING-MACHINE. James E. Goforth, Des Moines, Iowa. Filed Jan. 31, 1921. Serial No. 441,307. 2 Claims. (Cl. 112—220.)

1. In a sewing machine, a frame, a sewing machine head having an operating shaft, a gearing device mounted on said frame, an upright shaft operatively connected with said gearing device, an upright shaft supported on said head, gearing devices for connecting said last upright shaft, and the operating shaft of the head, a rotary shuttle, a shaft for operating said rotary shuttle, gearing devices for connecting said second upright shaft and said shuttle operating shaft.

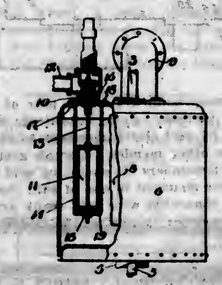
1,398,547. DRAFT ATTACHMENT. Joseph A. Graham, Alleman, Iowa. Filed Mar. 17, 1921. Serial No. 453,069. 4 Claims. (Cl. 213—67.)

2. In a draft attachment, a coupling member comprising a stationary jaw and a pivoted jaw, said jaws having beveled rear ends which form a V-shaped guide and having opposed notches, a coupling member having a coupling pin for engaging with the said guide and notches, means for locking the pivoted jaw in its closed position, and a push-plate operatively connected with the locking device and actuated by the said coupling pin before it engages with the beveled end of the said pivoted jaw.



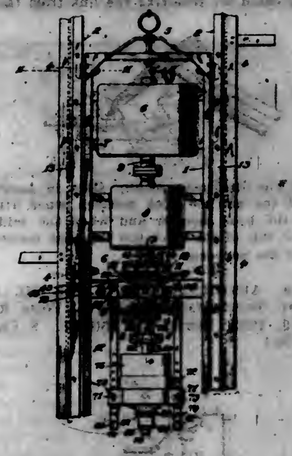
1,398,548. CHAIN TIGHTENING AND RELEASING DEVICE. Ellyson Green, Winterset, Iowa. Filed Apr. 9, 1920. Serial No. 372,734. 1 Claim. (Cl. 254—78.)

A device for attaching and releasing the link member at one end of an anti-skid tire chain from the notched hook member at the other end of an anti-skid chain, comprising a lever having on one of its sides, slightly spaced apart from its ends, a notch or recess having four sides and designed to receive in said notch or recess any one of the hooks of a notched hook member on an anti-skid chain and to hold said lever against movement laterally and longitudinally relative to said member when being used, the side of said lever opposite from the side in which the notch is formed being tapered down to a narrow edge at the end, thereby forming a wedge shaped member that may be freely inserted between a link and a hook of an anti-skid chain for removing the link from the hook, and



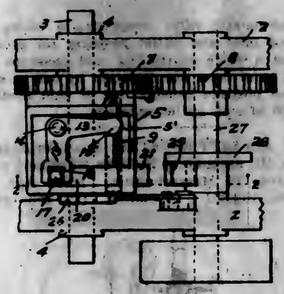
whereby the link may readily slide in position in the notch of the notched hook member, when attaching the link to the hook member and when the said recess on the other side of the lever has the hook member inserted in it, for the purposes stated.

1,398,549. AUTOMATIC VALVE FOR OIL-BURNERS. Ernest Grossenbacher, Fajardo, Porto Rico. Filed Mar. 9, 1921. Serial No. 450,847. 8 Claims. (Cl. 158—36.)



1. An automatic valve comprising a casing having a plurality of inlet and outlet passages for predetermined media, and a valve controlling said passages and itself controlled in at least one direction by one of said media, and in one position causing one of said media to pass through all of said outlet passages.

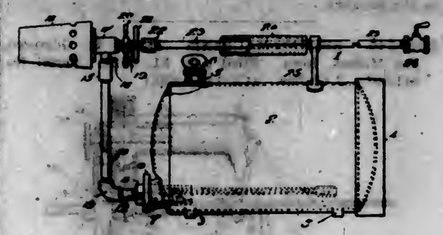
1,398,550. AIR-LIFT BOOSTER. Halbert B. Halvorsen, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 11, 1917. Serial No. 161,351. 16 Claims. (Cl. 103—84.)



10. In an air lift booster, a booster casing having inlet and discharge pipes therein, a relief valve, a diving bell float connected to said valve, and means for preventing surging in said float.

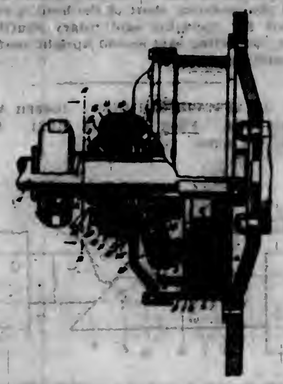
1,398,551. BORING-DRILL. Gustav W. Harmon, Wichita, Kans. Filed Aug. 5, 1920. Serial No. 400,712. 18 Claims. (Cl. 255—19.)

1. The combination in a rotary drill head and its suspending frame including a cross beam, of supporting arms pivoted on said beam, a cross head connecting the free ends of said arms and formed with an open top cup having an outlet, an overflow basin closing the cup and communicating therewith, said basin having a central sleeve projecting through the cup, and a well tube communicating with said sleeve for the purpose described.



1,398,552. CLUTCH MECHANISM. Arthur W. Harris, Sleepy Eye, Minn. Filed Dec. 13, 1918. Serial No. 266,604. 10 Claims. (Cl. 192—12.)

1. A clutch comprising a shaft, a pair of clutch members mounted thereon, a reciprocating bolt member mounted in one of said clutch members to engage and interlock with the other member, a crank arm mounted in one of said clutch members for operating said bolt member, and a clutch lever mounted in one of said clutch members and operatively connected with said crank arm and rotating said clutch member to control the clutch.

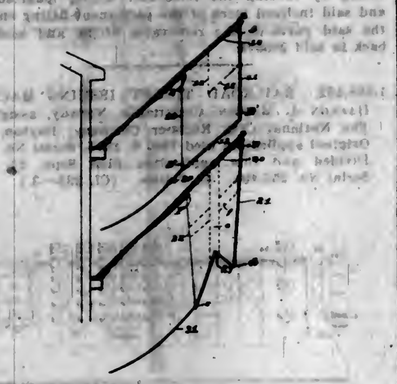


1,398,553. SUCTION-TORCH. Arthur E. Hauck, New York, N. Y.; Adolph H. Stein executor of said Arthur E. Hauck, deceased. Filed May 4, 1920. Serial No. 378,729. 5 Claims. (Cl. 158—33.)

1. In an apparatus of the class described, a suction burner, a tank and connections between the burner and tank with means therein for closing an opening above the

level of the liquid so that the apparatus may be used with the tank in either a horizontal or a vertical position.

1,398,554. FRICTION-CLUTCH. William G. Hawley, Elmira, N. Y., assignor to American La France Fire Engine Company, Inc., Elmira, N. Y., a Corporation of New York. Filed Feb. 6, 1919. Serial No. 275,427. 1 Claim. (Cl. 192—110.)

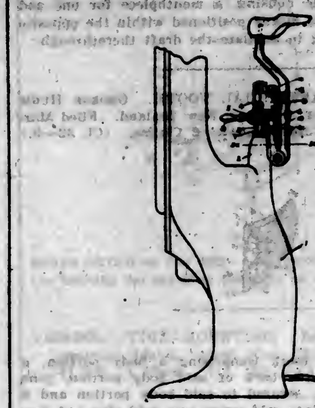


In a friction clutch, the combination of a driving member, a driven member, a clutch pack arranged between the driving and driven members, a floating abutment arranged to operate upon said clutch pack, a clutch housing carried by one of said members, said clutch housing having a cover provided with an inwardly presented threaded boss, an adjusting ring having threaded connection with said threaded boss for axial adjustment with respect to said driving and driven members, said floating abutment and adjusting ring being provided with bearing surfaces permitting angular adjustment of said floating abutment with respect to the axis of said driving and driven members, an axially movable clutch operating member, and rocker cams arranged between said clutch pack and said floating abutment and operatably connected to said clutch operating member.

1,398,555. FLAG. Gideon S. Hendrick, Hazleton, Pa. Filed May 12, 1920. Serial No. 380,650. 4 Claims. (Cl. 116—173.)

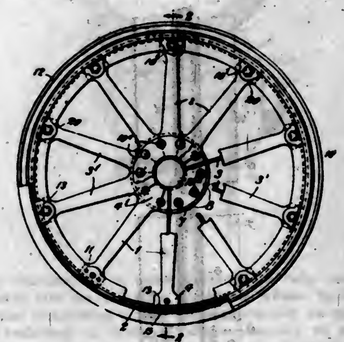
1. A flexible flag for display with its heading at an

angle between the vertical and horizontal and so constructed as to hang substantially in a plane when so displayed and having its two edges adjoining the heading making substantially the same angle with the vertical.



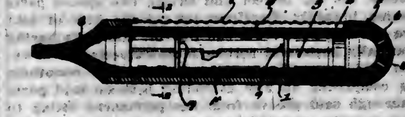
1,398,556. AUTOMATIC OPENING MECHANISM FOR CLOSET-SEAT LIDS. George Edward Kinch, Quirindi, New South Wales, Australia. Filed Apr. 13, 1917. Serial No. 161,919. 10 Claims. (Cl. 4—18.)

1. The combination with a closet seat of an automatically closing seat lid pivotally supported from said seat, said lid being so balanced that its upper side is brought forward in the open position, mechanism operable to open said lid, consisting of a press bar adjacent the front of the seat, side arms carrying said bar at their forward ends and pivoted to said seat at points intermediate their ends, and connecting members between the rear ends of said arms and said lid.



1,398,557. WORK-SUPPORT FOR SHOE-NAILING MACHINES. Robert Kontesky, Rochester, N. Y. Filed Oct. 27, 1920. Serial No. 420,040. 2 Claims. (Cl. 12—126.)

1. In a work support for nailing machines, the combination of a shank, a fork formed on the lower end of said shank, said fork having a concave back adapted to rest against a convex upright, a shaft mounted in said fork, a horn, a bearing provided in said horn adapted to have said shaft pass therethrough, said bearing having a narrow, circular throat in the middle thereof and being widened at each end, said horn being adapted to



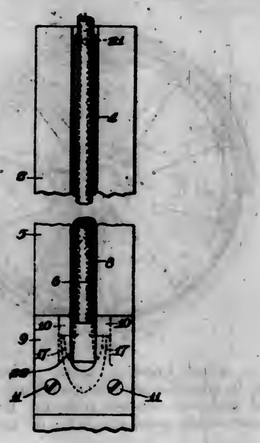
rock laterally and swing forward and backward on said shaft in said fork.

1,398,558. METAL WHEEL. Maurice Lachman and Laurence S. Lachman, New York, N. Y., assignors to Bethlehem Steel Company, Bethlehem, Pa., a Corporation of Pennsylvania. Filed Feb. 26, 1921. Serial No. 447,967. 9 Claims. (Cl. 301—79.)

1. In a metal wheel, a spoke consisting of a bar T-shaped in cross-section and having the outer edges of the head and web tapered from the hub part toward the rim part of the spoke as and for the purpose described.

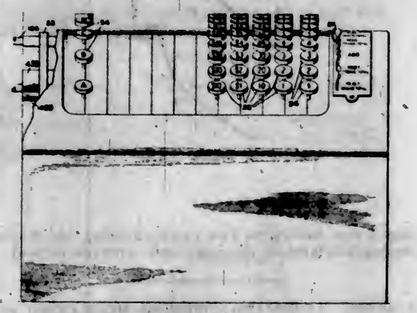
1,398,559. CIGAR AND CIGARETTE HOLDER. Gust Lampessis, Milwaukee, Wis. Filed Feb. 1, 1921. Serial No. 441,542. 5 Claims. (Cl. 131—51.)

5. A cigar or cigarette holder comprising a housing provided with an opening, a lining positioned within said



housing and provided with an opening adapted to register with the opening in said housing, means adapted to close the opening in the housing, a mouthpiece for one end of the housing, and means positioned within the opposite end of the housing to regulate the draft therethrough.

1,398,560. ARTIFICIAL TOOTH. GEORGE HUGH BEATTIE LOCKETT, Gisborne, New Zealand. Filed Mar. 5, 1921. Serial No. 449,647. 2 Claims. (Cl. 32—9.)

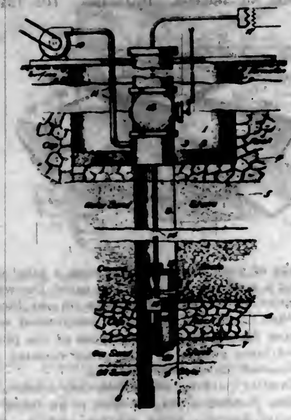


1. An artificial tooth comprising a body portion, a recess formed on the back of said body portion, pins within said recess, secured to said body portion and a cap adapted to fit into said recess over said pins and protrude from said body portion substantially as and for the purposes set forth.

1,398,561. SASH-CORD FASTENER. LOFTUS LOWNDES, Dublin, Ireland. Filed Nov. 4, 1919. Serial No. 335,734. 7 Claims. (Cl. 16—16.)

4. In a device of the character described, a window sash having a cord-receiving groove therein, a permanent fitting comprising a plate member secured to one side of the sash opposite to the base of the groove therein and below the top thereof and having two spaced parts projecting inwardly therefrom toward the base of said groove and above the lower end thereof, said parts having substantially horizontal bottom faces connected to downwardly and outwardly inclined faces, and a removable fitting comprising an arm extending between said parts and through said groove from the permanent fitting to a point near the top of the sash and two parts projecting from opposite sides of the lower portion of the arm beneath and engaging the horizontal faces of the said parts of the permanent fitting and preventing the withdrawal of the arm from the groove, said removable fitting having a cord attached to the lower portion thereof and being removable from the sash when the said parts of the removable fitting are lowered and moved from beneath the said parts of the permanent fitting by turning the removable fitting longitudinally, and said inclined faces of the permanent fitting engaging the said parts of the removable fitting and holding it back in said groove.

1,398,562. RAILROAD-TICKET-ISSUING MACHINE. HAAKON A. MARTIN, Christiania, Norway, assignor to The National Cash Register Company, Dayton, Ohio. Original application filed Feb. 6, 1915, Serial No. 6,490. Divided and this application filed Sept. 24, 1918. Serial No. 255,494. 48 Claims. (Cl. 235—3.)



1. In a machine of the class described, the combination of an insertible destination device, adapted to print on one style of ticket and employed only when a ticket of that style is to be issued, adjustable printing means for printing on another style of ticket and a record strip and controlled by the destination device when the latter is used to print tickets of the one style, an accounting device, controlled by said destination device when the latter is employed, and manipulative means for controlling said adjustable printing means and said accounting device when said printing means is employed to print on the second mentioned style of ticket.

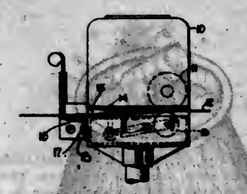
8. In a machine of the class described, the combination of an accounting mechanism, printing means, manipulative means, insertible destination devices, and operating means for the accounting and printing mechanisms so constructed that the manipulative means or a destination device are effective singly and each to the exclusion of the other to control the accounting and printing mechanisms upon each operation of the operating mechanism.

37. In a machine of the class described, the combination of a printing mechanism and a register, separate driving means therefor, common operating mechanism for the two driving means, comprising two normally ineffective clutch mechanisms one for each driving means, keys controlling the rendering of the clutch for the driving means of the printing mechanism effective, and means for automatically releasing the other clutch mechanism during the operation of the printing mechanism.

1,398,563. METHOD OF SEALING THE WALLS OF DEEP WELLS. WILLIAM E. NOLAN, Tulsa, Okla. Filed Apr. 28, 1920. Serial No. 377,326. 6 Claims. (Cl. 166—21.)

1. The method of lining the walls of the bores of deep wells, which walls are of crumbly nature, which consists in spreading a lining material over the walls, while such material is subjected to the action of heat,

and withdrawing the heat while the lining material hardens.



1,398,564. FRICTION-CLUTCH AND THE LIKE. PER ERIK NORDQVIST, Dufbo, Sundbyberg, Sweden. Filed Apr. 15, 1920. Serial No. 374,155. 1 Claim. (Cl. 192—75.)

In a clutch, an inner clutch element composed of a plurality of relatively movable parts, an outer clutch member engageable by the parts of the inner clutch element and constituting a dust-proof casing for the protection of said inner clutch member, pairs of links interposed between the parts of the inner clutch element and swivelly connected therewith, levers pivotally mounted between the parts of the inner clutch element and having certain extremeties thereof engaged between the links of the pairs whereby to move the latter into substantial alinement and effect separation and expansion of the inner clutch element parts, and actuating rods extending between the parts of the inner clutch element and connected with the levers for actuating the latter.

1,398,565. CLOTHOMETER-GAGE. JOHANNES TH. PEDERSEN, Flushing, N. Y., assignor, by mesne assignments, to The Measuregraph Company, a Corporation of Missouri. Filed Dec. 9, 1919. Serial No. 343,636. 5 Claims. (Cl. 33—130.)

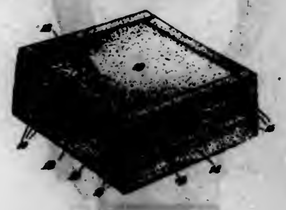
1. A housing for a measuring machine, having a guide slot through which the cloth is pulled when measuring the same, in combination with a ledge adjacent the slot, and projecting from the rear side of the housing, and

means carried on the ledge and removed from the side of the housing for marking the edge of the fabric.

1,398,566. TIRE-MOUNTING. LOUIS JAY PERKINS, Lewiston, Idaho. Filed Nov. 28, 1919. Serial No. 341,118. 1 Claim. (Cl. 152—21.)

In combination, a wheel including a felly and a removable rim for the tires of vehicle wheels having tire casings, comprising a base section arranged on said felly and including an inclined portion adapted to seat the tire casing, and a flat portion, a tire-retaining flange integral with the inclined portion of the base section, a tire retaining ring slidably mounted on the flat portion of the base section and adapted to engage the tire casing, and means for maintaining said ring in operative position on said flat portion comprising a series of clamping plates having offset ends fulcrumed on the felly of the wheel and engaged with the retaining ring, and nuts and bolts carried by the felly and urging said clamping plates into operative engagement with said retaining rings.

1,398,567. MOP. GEORGE L. PERKINS, Chicago, Ill., assignor to O-So-Esy Products Company, a Corporation of Illinois. Filed May 16, 1918. Serial No. 234,842. Renewed Apr. 27, 1921. Serial No. 464,907. 1 Claim. (Cl. 15—13.)

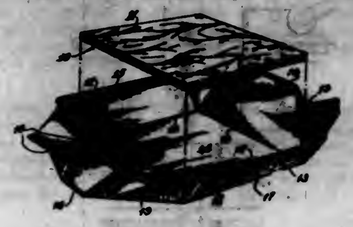


In a device of the character described, the combination of a circular mop head of sheet metal comprising a carrier plate provided with an upstanding portion extending therearound, said portion being integral with

said plate, and a depending flange integrally connected with the upper edge of said upstanding portion and a

mop extending around said portion and clamped between it and said flange.

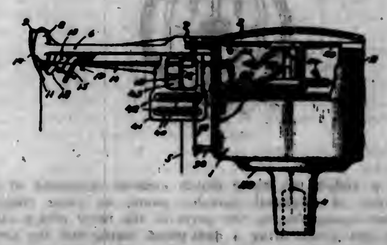
1,398,568. METHOD OF PACKING AND PRESERVING PLUG-TOBACCO. JONATHAN PETERSON, Brooklyn, N. Y., assignor to Combination Machine Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 11, 1921. Serial No. 460,601. 17 Claims. (Cl. 131—11.)



1. A package of plug tobacco comprising a plurality of layers of tobacco plugs or cakes alternating with a plurality of layers of wrappers therefor; the wrappers being provided with marginal portions forming laps overlying the sides of the plugs, the whole being compressed into a substantially solid block forming a laminated package.

9. A package of plug tobacco comprising a plurality of nested dish shaped wrappers or containers alternating with a plurality of layers of tobacco plugs or cakes, each wrapper being provided with a coating of paraffin or wax on the outer walls thereof, each wrapper adheringly inclosing a tobacco plug; a plug and its wrapper forming a detachable unit, a separating sheet between a plug of one unit and a wrapper of the next adjacent unit; said walls or laps of the wrapper being arranged in relative overlapping relationship, the joints between the overlapping wrapper walls being wax welded, the whole forming a laminated package.

16. The method of packing and preserving plug tobacco, which consists in assembling a plurality of pre-formed dish shaped wrapper sheets in nested relation and alternating with a plurality of layers of tobacco plugs or cakes, each wrapper sheet containing a plug; a plug and its wrapper forming a unit, in then folding and compacting the marginal laps of the wrapper in compacted and overlying relation on the side walls of the plugs, the marginal laps of adjacent wrappers being arranged in overlapping relationship, the joints between the laps being welded, whereby a sealed laminated plug package is provided.

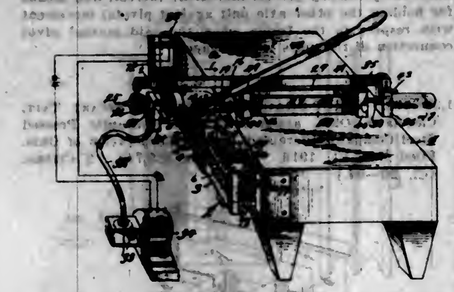


1,398,569. METHOD OF PACKING AND PRESERVING PLUG-TOBACCO. JONATHAN PETERSON, Brooklyn, N. Y., assignor to Combination Machine Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 11, 1921. Serial No. 460,602. 10 Claims. (Cl. 131—11.)

2. A package of plug tobacco comprising a plug or cake of tobacco and a wrapper inclosing the same, the wrapper having an impervious coating of paraffin on one face only and being folded about the plug and compressed so that interior wrapper faces adhere to the faces of the plug and opposed coated faces adhere to each other forming a substantially air-sealed closure for the plug.

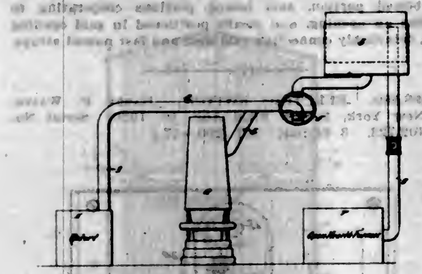
9. The method of packing and preserving tobacco plugs which comprises packing a plug or cake in an inner wrapper having an impervious outer coating such as wax or paraffin, enveloping the said plug and wrapper in an outer wrapper having a similar impervious inner coating, the impervious wrapper coatings being face to face, in then compressing the plug and wrappers into a compacted unit in such manner that the interior faces of the inner wrapper adheringly envelop the faces of the plug, and the opposed impervious wrapper coatings cohering to provide an hermetically sealed package.

1,398,570. ATTACHMENT FOR KNITTING-MACHINES. WILBUR C. POTTER and EDWARD H. STINES, New Brunswick, N. J. Filed June 29, 1918. Serial No. 242,528. 6 Claims. (Cl. 66—7.)



1. The combination of a casing for the step mechanism of a knitting machine, a plurality of arms mounted on the casing, a rock-shaft on each arm projecting to the inside of said casing, arms on the rock-shafts inside the casing projecting alternately in opposite directions, and tension devices for said shafts to hold them yieldably in the required position, said devices comprising a set of springs for engaging the arms on the rock-shafts extending in one direction around the casing, and a second set of springs for engaging the arms on the rock-shafts extending in the opposite direction around the casing.

1,398,571. MEAT-CUTTING MACHINE. JOHN B. REICH, Gary, Ind., assignor of one-half to John A. Baumgartner, South Bend, Ind. Filed May 28, 1921. Serial No. 473,284. 13 Claims. (Cl. 17—24.)



1. A meat severing machine comprising a base, a frame horizontally movable on said base, said frame having one

of its ends pivotally mounted, a reciprocating element carried by said frame, means carried by the frame for

reciprocating said reciprocating element and means for controlling the reciprocation of the reciprocating element by a movement of the frame.

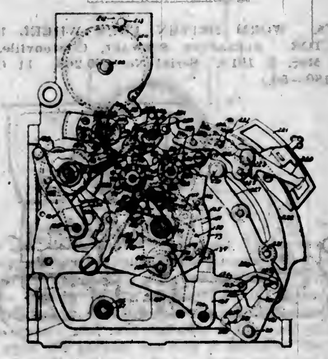
1,398,572. PROCESS OF AND MATERIAL FOR REDUCING ORE AND MAKING GAS. JAMES HENRY REID, Rondebero, Vt., assignor to Thomas I. Hogan, Boston, Mass. Filed July 16, 1920. Serial No. 396,762. 10 Claims. (Cl. 75—14.)

1. The process which comprises retorting a mixture of ore with cokable carbonaceous material and material capable of acting as a fluxing agent and of activating the evolution of gas, thereby to produce a coked aggregate without material conversion or alteration of the said agent, and smelting the said aggregate.

1,398,573. SASH-FASTENER. WILLIAM REINL, Secaucus, N. J. Filed May 25, 1921. Serial No. 472,485. 7 Claims. (Cl. 292—74.)

1. A sash fastener including a rack, and a spring pressed bolt having a face to coact with the rack and provided with a runner projecting from said face to ride over the rack.

1,398,574. TIRE. GUSTAVE RICE, Omaha, Nebr. Filed Mar. 15, 1920. Serial No. 365,179. 1 Claim. (Cl. 152—4.)

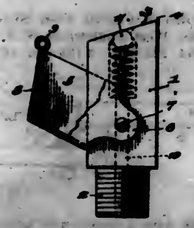


The combination with a wheel rim having spaced flanges of a tire body carried by said rim, said tire body comprising a pair of annular pliable members of equal diameter and disposed adjacent each other and between the spaced flanges of the rim, an annular pliable member surrounding the pair of pliable members and disposed equally spaced from the peripheries of the pair of pliable members, said pliable members being round in cross section, and a continuous lacing extending around the pliable members and binding them together, said lacing forming means for preventing circumferential creeping of the annular members in relation to each other.

1,398,575. TRACTOR-COUPLING FOR SUGAR-CARTS. HORACE F. RUGGLES, West Englewood, N. J. Filed Mar. 28, 1918. Serial No. 225,165. 4 Claims. (Cl. 213—67.)

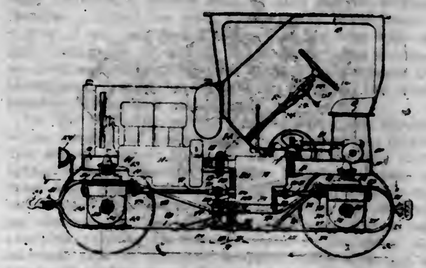
1. The combination with a drawn unit having a tongue, of a drawing member, a draft coupling between said tongue and member comprising a socket piece and projection on the tongue and member respectively, said projection and socket piece being movable into and out of engaging relation and taking the draft pull between said tongue and member when in engaging relation, and a winch and cable for drawing the projection into the socket.

1,398,576. CASH-REGISTER. BERNIS M. SHIPLEY, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio. Filed Dec. 19, 1919. Serial No. 346,183. 11 Claims. (Cl. 235—2.)



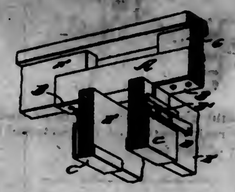
1. In a machine of the class described, the combination of three totalisers, actuating means for one totaliser,

actuating means common to the other two totalisers and operated by the first mentioned means, an auxiliary actuator for one of the last two totalisers and operated by the last mentioned means for adding upon said totaliser an amount different from the amount determined by said last mentioned means, and means for moving the other of the last two totalisers out of operative relation with any of the actuators.



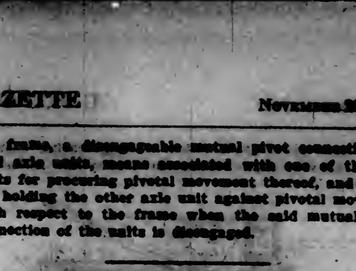
5. In a machine of the class described, the combination of two totalisers, normally positioned for simultaneous actuation, actuating means common thereto, and auxiliary actuator interposed between one of said totalisers and said actuating means for causing said totalisers to have added thereupon unlike amounts from the single amount upon said actuating means, a third totaliser, means for disabling one of the first two totalisers and engaging the third totaliser with the actuating means so that like amounts may be added upon said third totaliser and the totaliser of the first two which was not disabled.

1,398,577. DUST-CAP FOR LUBRICATING CUPS OR NIPPLES. Bernard H. Skelly, Bridgeport, Conn. Filed Sept. 24, 1920. Serial No. 412,467. 2 Claims. (Cl. 184—90.)



2. An oil cup of rectangular section threaded on its lower end and having its upper face upwardly and forwardly beveled with an oil duct opening therethrough, a seat in said duct slightly inset from said beveled face, a ball check valve engaged on said seat and lying substantially flush with the face, a dust cap conforming to the cup as to its back, side and top faces and open at its front whereby the cap may swing backwardly from off the cup, the sides of the cap having depending ears, means for pivotally connecting the ears to the sides of the cup, and a rolled lip depending from the front edge of the top wall of the cap for engaging over the forward, acute angular edge of the cup.

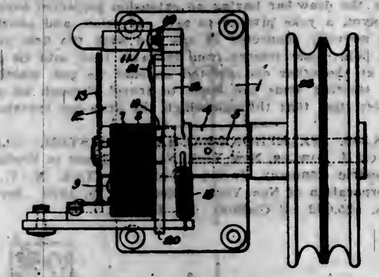
1,398,578. WORM-DRIVEN FOUR-WHEEL-DRIVE TRACTOR. Alexander Stewart, Clintonville, Wis. Filed Mar. 3, 1919. Serial No. 280,268. 11 Claims. (Cl. 180—50.)



1. A vehicle of the class described including a frame, front and rear axle units each pivotally connected with the frame, a disengagable mutual pivot connection for said axle units, means associated with one of the axle units for procuring pivotal movement thereof, and means for holding the other axle unit against pivotal movement with respect to the frame when the said mutual pivot connection of the units is disengaged.

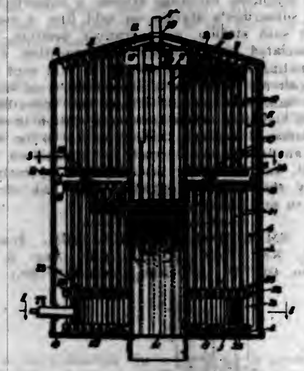
1,398,579. JOIST-BRACKET. William Stuart Tait, Cleveland, Ohio, assignor to The Hydraulic Pressed Steel Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 21, 1919. Serial No. 339,746. 2 Claims. (Cl. 20—94.)

1. In a device of the kind described, the combination with a joist receiving member, of straps depending therefrom and having each a bowed portion, and straps adapted to engage the under side of stringers and having each a bowed portion, said bowed portions coöperating to define an opening, and means positioned in said opening for detachably connecting said first and last named straps.



1,398,580. ELECTRIC SWITCH. Harry F. Waite, New York, N. Y. Filed Aug. 10, 1920. Serial No. 402,723. 3 Claims. (Cl. 200—17.)

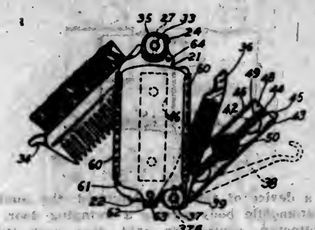
1. A switch with two sets of jaws and blades and means for mounting the blades to engage either set of jaws or neither set, but not both at once, a handle by means of which said blades may be shifted and slotted, oscillating means for limiting the throw of the handle so that the blades may be made to engage one set of jaws or no jaws while the limiting means is in one position and the other set of jaws or no jaws when the limiting means is in a second position.



1,398,581. WEB FEEDING AND CUTTING APPARATUS. Alfred B. Walne, Whitman, Mass., assignor to Lorenz Muther, Newton, Mass. Substitute for application Serial No. 165,119, filed Apr. 28, 1917. This application filed Apr. 28, 1920. Serial No. 377,416. 23 Claims. (Cl. 164—42.)

1. In a device of the character described in combination, a support, a pair of web-grippers, one of said grippers being yieldable to permit feeding of the web, and a web-feeder having a segmental feeding surface arranged

to feed the web and to hold said yieldable gripper in an open position so long as said segmental feeding surface is in engagement with said web.

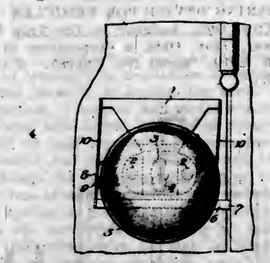


1,398,582. STEAM-GENERATOR. Joseph T. Blakeman, Richland Center, Wis. Filed Apr. 10, 1920. Serial No. 372,915. 8 Claims. (Cl. 122—323.)

1. A steam generator of the character described, comprising an outer casing, a plurality of water containing sections located therein and all subjected directly to the heat produced in the casing, two of said sections arranged one above the other and surrounding a third section, each of said sections having a steam chamber, the steam chambers of upper and lower sections opening into the steam chamber of said third section, with the steam chamber of the lower section opening into the steam chamber of the third section below the upper section, and an outlet pipe for the steam produced by the generator opening into the steam chamber of said third section.

1,398,583. FOLDING COMBINATION TOILET ARTICLE. Ransom Y. Boyer, Maywood, Ill. Filed Jan. 17, 1921. Serial No. 437,890. 10 Claims. (Cl. 132—79.)

6. A folding toilet article embodying a casing formed of sheet material shaped to form spaced side walls, a plurality of members projecting between the said walls, a pivot pin extending through the walls and through one end of each of the said members for pivotally securing the members to the casing to be folded into and out of the casing, each of the casing walls and the end of the adjacent member being provided, adjacent the pivot of the member, one with a projection and the other with a recess for receiving the said projection, and a

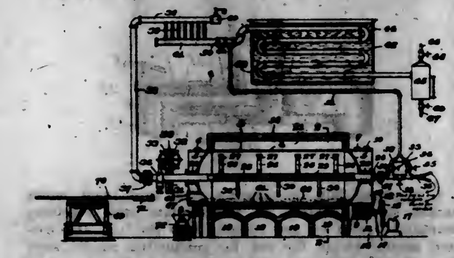


spring washer element encompassing the pivot pin and operating on the member for yieldingly holding the said projection seated in the recess.

1,398,584. BOX FOR POURING STEEL INGOTS. William D. Bradford, Sewickley, Pa. Filed Dec. 13, 1920. Serial No. 430,860. 2 Claims. (Cl. 22—79.)

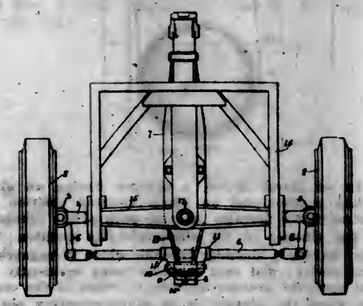
1. A closed box for pouring steel into ingot molds having spaced nossles, an intermediate steel receiving fountain carried by and opening into the box, and covered means within the box for conducting molten steel from the fountain and within the box to the respective nozzles.

1,398,585. ALARM. James M. Butcher, Chicago, Ill., assignor to Sentinel Alarm Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 16, 1920. Serial No. 358,848. 4 Claims. (Cl. 116—162.)



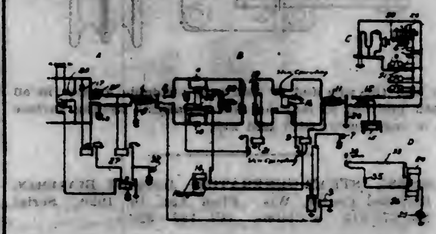
1. In an alarm device, a plunger having an alarm-arresting position and an alarm-releasing position, and a control device movable into the path of the plunger to hold the plunger in the alarm-releasing position; said plunger having a shoulder through which it engages the control device; and said shoulder being resiliently supported upon the plunger whereby it yields to the control device when the plunger is in alarm-arresting position and returns to engagement with the control device when the plunger is in alarm-releasing position.

1,398,566. COMBINED DOOR-JOINT PROTECTOR AND NAME-PLATE FOR AUTOMOBILES. PATRICK CURRY, Chicago, Ill. Filed Sept. 12, 1921. Serial No. 499,997. 4 Claims. (Cl. 296—44.)



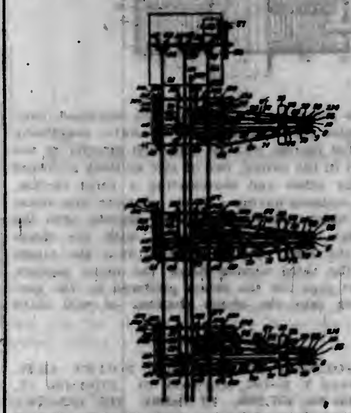
1. In a device of the class described, the combination of an automobile body having a swinging door, a door joint protector, secured to said door near its upper swinging end, and adapted when the door is closed, to bridge the joint between the door and body and overlap a substantial portion of the body near the door opening, said protector having a downwardly extending portion co-extensive therewith on the outside of the door and means for rigidly securing said protector to said swinging door, substantially as and for the purposes described.

1,398,587. OIL-DISTILLING APPARATUS. DANIEL A. DEAN, Enid, Okla. Filed Apr. 11, 1919. Serial No. 289,198. 8 Claims. (Cl. 196—3.)



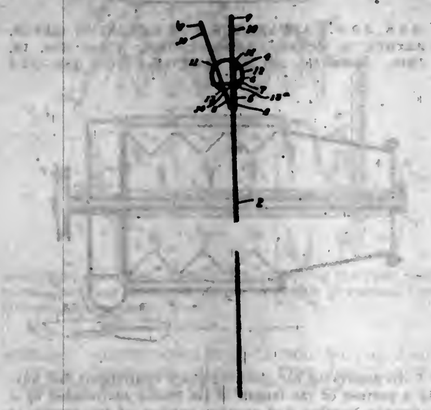
1. In an oil distilling apparatus the combination of a revoluble retort, supporting means therefor, means operative to rotate the retort, means to heat the retort, and a quantity of loose elements within the retort and having abrading edges and being free to move in all directions, whereby when the retort is rotated said elements will be actuated therein for the purpose set forth.

1,398,588. STEERING DEVICE FOR VEHICLES. JOHN F. ECCARD, Troy, Ohio, assignor to The Troy Wagon Works Company, Troy, Ohio, a Corporation of Ohio. Filed Aug. 27, 1919. Serial No. 320,087. 3 Claims. (Cl. 280—335.)



1. In a trailer, the combination, with a spring-supported frame and a draw-bar pivoted thereto, of a fixed axle, steering knuckles pivoted to said axle, wheels rotatably connected to said knuckles, steering arms connected to said knuckles and a tie rod connecting said arms, the draw-bar having an extension projected beyond its pivot, a yoke pivoted to said extension, and another yoke swivelly connected at one end with the first yoke at a point more remote from the axle than said tie rod and at the other end pivoted on said tie rod, whereby said steering arms are made to travel through an arc greater than that through which the draw-bar travels.

1,398,589. TELEPHONE-EXCHANGE SYSTEM. CLARENCE B. ROWLES, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 19, 1920. Serial No. 425,682. 3 Claims. (Cl. 179—41.)



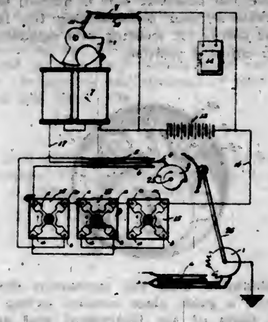
1. In a telephone exchange system, a subscriber's line circuit, a subscriber's station on said line, a source of current at said station, an operator's position, a cord circuit associated with said operator's position, a supervisory signaling device associated with said cord circuit, a link circuit for extending a connection from said cord circuit to said line circuit, means for operating said supervisory signaling device from said station in response to the source of current thereat so as to be steadily operated, an interrupter circuit for connection to the link circuit, and means for intermittently operating said supervisory signaling device when said link circuit is connected to said interrupter circuit.

1,398,590. EMBROIDERING MECHANISM. JOSEPH A. GROEBLI, New York, N. Y. Filed Aug. 6, 1920. Serial No. 401,708. 9 Claims. (Cl. 112—90.)

1. In embroidering mechanism, the combination, with a plurality of embroidering machines, each embodying fabric carrying, shifting and tensioning means, of common means for controlling the operation of the shifting and tensioning means to shift and tension the fabric on the carrying means of each and optionally of a plurality of the several embroidering machines.

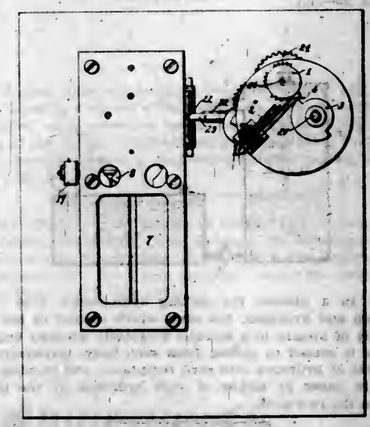
1,398,591. MEMORANDUM-FILE. GEORGE H. HORNBERN, Minneapolis, Minn., assignor of three-fifths to J. D. Brown, Minneapolis, Minn. Filed Mar. 27, 1920. Serial No. 369,172. 5 Claims. (Cl. 129—35.)

1. In combination, with a memorandum-backing plate, a paper clip mounted thereon comprising jaws and a spring normally holding them together and having both jaws on the same side of said plate, one end of the clip spring engaging the face of the plate on the opposite side thereof from said jaws.



1,398,592. MEMORANDUM-FILE. GEORGE H. HORNBERN, Minneapolis, Minn., assignor of three-fifths to James D. Brown, Minneapolis, Minn. Filed Feb. 14, 1921. Serial No. 444,776. 5 Claims. (Cl. 24—66.)

1. A memorandum file comprising a plate having an opening therein to receive one end of the spring of a memorandum clip to bear on the rear side of the plate, and a jaw having an end to enter an opening in the other end of the spring and be held by the tension thereof against the front of the plate.



1,398,593. ALARM SYSTEM. RICHARD M. HOPKINS, Rutherford, N. J., assignor to American District Telegraph Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 29, 1920. Serial No. 369,584. 5 Claims. (Cl. 177—369.)

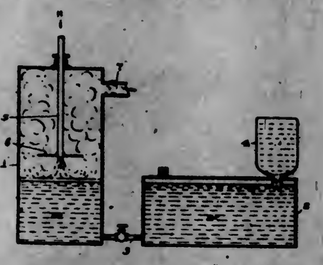
2. An alarm system comprising in combination a magnet-operated controlling means including means arranged to provide a predetermined interval of no-signal transmission following actuation of the controlling magnet in a sense to cause operation of the transmitter, a plurality of controlling switches connected in series with said magnet and so arranged that operation of one of said switches changes the magnetic condition of said magnet in a sense to initiate said predetermined interval of no-signal transmission and that operation of one of said switches during said interval of no-signal transmission changes the magnetic condition of said magnet in a sense to prevent transmission of the signal, and circuit transposing means operated by the transmitter in the event of said transmission-operation of said transmitter, and arranged by its operation to condition the transmitter

for further operation in the event of subsequent operation of one of said controlling switches.

1,398,594. TRANSMITTER. RICHARD M. HOPKINS, Rutherford, N. J., assignor to American District Telegraph Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 29, 1920. Serial No. 369,585. 3 Claims. (Cl. 177—369.)

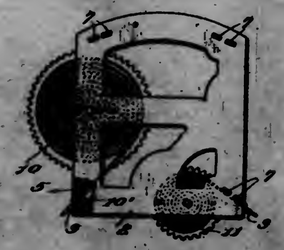
3. In a transmitter such as described, the combination of transmitting mechanism comprising driving means tending normally to operate the same, a detent for said mechanism, a magnet and means controlled thereby for releasing said detent, and circuit transposing means operated by said transmitting mechanism upon its initial movement and operatively connected to said magnet to so change the magnetic condition of said magnet, upon operation of said transmitting mechanism, that the detent may operate to bring the transmitting mechanism to rest upon the conclusion of a cycle of operations, and that the transmitter may be then in condition for further operation, without resetting, upon further change of magnetic condition of said magnet.

1,398,595. MEANS FOR CALIBRATING AMMETERS. ADRIAN H. HOYT, Penacook, N. H.; Wallace C. Hoyt administrator of said Adrian H. Hoyt, deceased. Filed June 7, 1920. Serial No. 387,075. 6 Claims. (Cl. 171—95.)



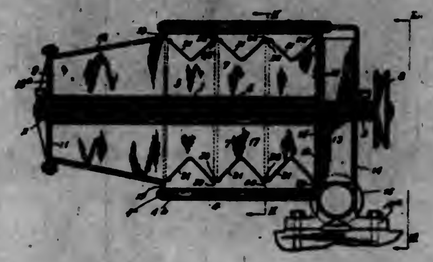
2. In an instrument of the class described, means for calibrating the instrument, comprising a pointer, a mag-

netising coil controlling the pointer, a slotted back plate, means extending through the slotted portion of said plate to which the magnetic coil is affixed, said means being adjustable without disassembling the instrument, and fastening means for securing said magnetic supporting means in adjusted position.



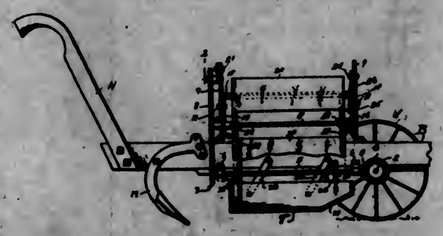
3. In combination with the mechanism described in claim 2, posts, a guide plate member having arms engaging said posts of the instrument and adapted to facilitate adjustment of the magnetized coil, substantially as described.

1,398,596. METHOD OF MAKING HYDROBROMIC ACID AND APPARATUS THEREFOR. COULTER W. JONES, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Aug. 31, 1918. Serial No. 252,191. 13 Claims. (Cl. 23—1.)



13. In a process for making hydrobromic acid from bromin and hydrogen, the steps which consist in heating a body of bromin in a suitable receptacle whereby bromin vapor is caused to ascend from such body, introducing a current of hydrogen into such receptacle, and burning the bromin vapor by means of such hydrogen at the place where the two meet.

1,398,597. CLOCK-FRAME. PAUL LUX, Waterbury, Conn., assignor to Lux Clock Manufacturing Company, Inc., Waterbury, Conn., a Corporation of Connecticut. Filed Aug. 25, 1921. Serial No. 496,284. 3 Claims. (Cl. 58—52.)



1. A clock frame formed of front and back frames, flat pillars carried by the front frame having spaced lugs at their ends, the back frame being provided with spaced openings to receive said lugs, said lugs being adapted to be spread apart for fastening the back frame thereto.

1,398,598. APPARATUS FOR CLEANING GASES. ARTHUR G. MCKEE, Cleveland, Ohio. Filed Mar. 19, 1919. Serial No. 283,547. 14 Claims. (Cl. 183—37.)

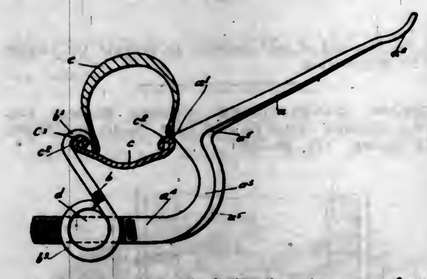
1. In apparatus for cleaning gas a centrifugal fan having a portion of the length of its blades surrounded by a stationary housing and another portion of the length of its blades provided with a serrated shell secured to the fan for rotation therewith and having openings through its serrations.

1,398,599. BOLL-WEEVIL ERADICATOR. GEORGE W. MOSLEY, Waynesboro, Ga. Filed May 20, 1921. Serial No. 471,042. 1 Claim. (Cl. 43—142.)

A machine of the class described comprising a portable body, a brushing medium carried thereby, a trough positioned below the body, flexible members connecting the trough and body, and links pivotally connecting the trough and body.

1,398,600. LEATHER-PRESERVER. HOWARD ANGELO MUTES, Mobile, Ala. Filed May 25, 1920. Serial No. 384,167. 2 Claims. (Cl. 134—9.)

1. A composition of the character described comprising a mixture of castor oil, paraffin, Venetian turpentine, and oil of cinnamon.



1,398,601. ADJUSTABLE READING-RACK. IVAN L. OSTERHOUT, Colfax, Wash. Filed May 28, 1920. Serial No. 385,019. 4 Claims. (Cl. 45—82.)

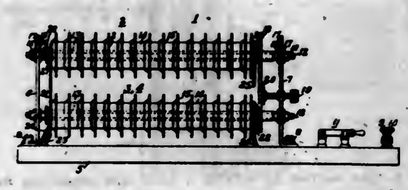
1. In an adjustable reading rack, the combination of a bracket releasably attached to an article of furniture, a tube mounted on the bracket, a second L-shaped tube telescopically mounted and radially swingable in the first named tube, said tubes having channels of suitable size for the threading of an electric light cord therethrough, means for securing the second tube in adjusted positions, longitudinally extensible means attached to the second tube for supporting a book rack, said means including means for extensibly supporting an electric light cord, a

book rack, and means adjustably connecting the book rack to the aforesaid extensible means to permit of vertical and tiltable adjustment.

1,398,602. ADJUSTABLE TIRE-LEVER. WILLIAM JOHN OWENS, Chippenham, England. Filed June 1, 1920. Serial No. 385,754. 2 Claims. (Cl. 157—6.)

1. Apparatus for manipulating the outer covers of pneumatic tires, comprising a manipulating lever, a projection on said lever intermediate its ends adapted to engage one edge of the tire, an externally threaded forwardly projecting portion on said lever, a link of substantially S-shape adapted to embrace the opposite edge of the wheel rim, a cylindrical member rotatably mounted in the lower end of said link and formed with a screwed hole to receive the externally screwed forwardly projecting portion of the lever, for the purposes described.

1,398,603. VEHICLE-TIRE FASTENER. WILLIAM H. PARHAM, Knoxville, Tenn., assignor to Parham Auto Patents Corporation, Knoxville, Tenn., a Corporation of Delaware. Filed July 27, 1920. Serial No. 399,382. 5 Claims. (Cl. 152—6.)

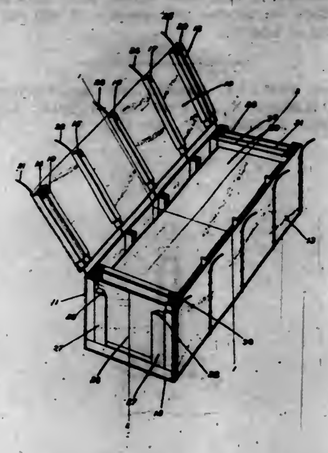


1. In a tire fastener, the combination with a channel rim provided with annular grooves in its vertical legs, one leg being provided with a series of openings and the other with a series of notches in transverse alinement with said openings, of a resilient tire arranged within said rim having transversely arranged bores in transverse alinement with said openings and notches and fastening devices slidably mounted in said bores having their ends normally held within the notches and openings of said rim by the resiliency of said tire.

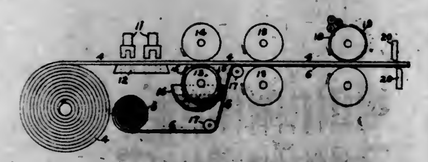
1,398,604. RIM-NUT. MAXIMILIAN CHARLES SCHWEINERT, West Hoboken, N. J. Filed Oct. 31, 1919. Serial No. 334,802. 5 Claims. (Cl. 85—32.)

5. A sheet metal nut having a body portion with top and sides, forming a recess within the sides, and an outward extension, said extension being internally threaded, the metal of the top surrounding said extension being pressed partly inward to form a continuous annular bearing seat within the recess.

1,398,605. COMPRESSION-RHEOSTAT. THOMAS SPOONER, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed May 14, 1920. Serial No. 381,469. 10 Claims. (Cl. 219—51.)



1. In a compression rheostat, the combination with a self-sustaining resistor, of a radiating plate that only partially surrounds said resistor.

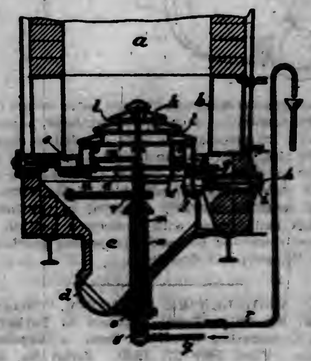


1,398,606. WIRE-BOUND BOX. EDWARD A. SKILL, Chicago, Ill. Filed Sept. 1, 1917. Serial No. 189,285. 19 Claims. (Cl. 217—12.)

1. A wirebound double-walled box comprising outer side and end walls composing the exterior of the box; inner side and end walls forming an interior inclosure;

cleat frames relatively positioning said several walls, certain of said cleat frames mutually reinforcing the outer and inner side walls; and bindings secured to and around the box.

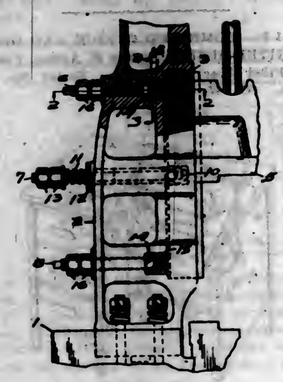
1,398,607. COIN-CARD AND METHOD OF MAKING THE SAME. HERBERT H. STEELE, Brooklyn, N. Y., assignor, by mesne assignments, to John H. Eggers Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 12, 1916. Serial No. 90,795. 5 Claims. (Cl. 93—1.)



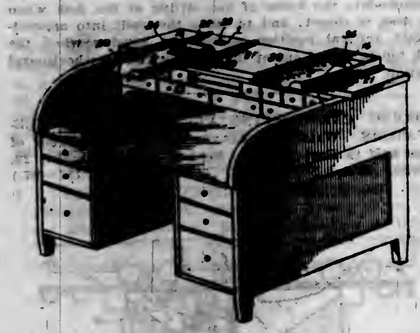
1. The method of making a coin card consisting first in forming one or more openings in the card, secondly in moistening the back of the card, and thirdly in applying to the moistened back under pressure, a strip of previously prepared dry adhesive material in such a manner as to bridge the coin opening or openings.

1,398,608. PRESSURE INDICATOR OR RECORDER. LEONARD GODFREY PINNEY THRING, Cambridge, England. Filed Mar. 28, 1921. Serial No. 456,133. 32 Claims. (Cl. 234—17.)

3. In a fluid pressure indicator, in combination, an elongated substantially straight elastic member, one end of which is supported and the other end of which is free and adapted to be subjected to pressure to strain the member in the direction of its length, and an indicating element mounted on a relatively fixed base and connected to the free end of said member, to indicate the amount of its deformation.



1,398,609. GAS-PRODUCER. FREDERIC THUMAN, London, England. Filed June 13, 1917. Serial No. 174,482. 2 Claims. (Cl. 48—66.)

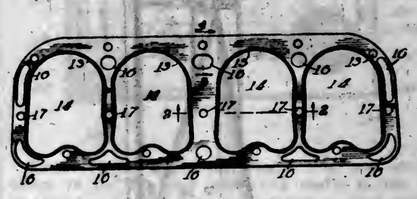


1. In a gas generator the combination of a rotary grate provided with an ash crusher and a twyer, closed water circulating passages arranged in series and provided in the grate in step wise arrangement and having a water inlet and a water outlet, water inlet and outlet mains, and water inlet and outlet pipes connected with the water inlet and outlet of the passages and carried by the grate and coupled with the mains co-axially of the grate, substantially as described.

1,398,610. GIB-ADJUSTER. MYRON E. TIBBELS, Fremont, Ohio. Filed July 12, 1920. Serial No. 395,796. 1 Claim. (Cl. 78—37.)

In a plunger machine having gibs for guiding the plunger member, a pair of bolts for pressing against the gibs to adjust the gibs relative to the plunger member, a pair of nuts coacting with the bolts, the frame having pockets in which the nuts and the inner ends of the bolts are located for ready removal of the nuts and the ends of the bolts when the same have been severed from the bolts.

1,398,611. PAPER RECEPTACLE OR TRAY. ALBERT T. VAN ALSTYN, Grand Rapids, Mich. Filed Aug. 23, 1918. Serial No. 251,048. 13 Claims. (Cl. 45—90.)



1. In a desk tray, a base portion adapted to be attached to the upper portion of a desk, a paper-receiving tray slidably mounted in said base portion, means to prevent said tray being inadvertently slid entirely out of said base portion, and said means comprising a recess in one of said parts and a finger on the other of said parts, said finger adapted to enter said recess when registering therewith.

2. In a device of the class described, a base portion adapted to be attached to the upper portion of a desk, a paper-receiving tray slidably mounted in said base portion, said base portion being adjustable whereby to accommodate desks of different dimensions.

6. In a desk tray a body portion having side walls, outwardly extending flanges on said side walls, a bottom portion having its edges bent up over said flanges, and a base portion having its longitudinal edges bent upwardly and inwardly whereby to form opposed guideways to slidably receive certain of said bent over edges of said bottom portion.

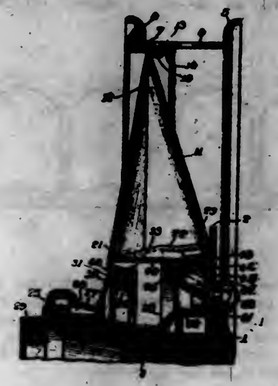
1,398,612. GASKET. JOSEPH B. VICTOR, Chicago, Ill., assignor to Victor Manufacturing & Gasket Co., Chicago, Ill., a Corporation of Illinois. Filed Apr. 15, 1918. Serial No. 228,612. 3 Claims. (Cl. 288—1.)

1. A gasket for use between the cylinder block and head of a gas engine having water spaces comprising two sheets of thin copper of relatively large area and a flat, thin filler sheet comprised of cork and a binder interposed between said copper sheets and having its edges exposed at the water openings.

1,398,613. PLASTIC COMPOSITION AND METHOD FOR MAKING THE SAME. WILLIAM V. WATSON, San Diego, Calif., assignor of one-half to San Diego Consolidated Gas and Electric Company, San Diego, Calif., a Corporation of California. Filed Sept. 9, 1920. Serial No. 409,061. 6 Claims. (Cl. 106—32.)

5. A plastic composition, comprising refuse sponge from gas purifiers, fine particles of stone, and oil and water gas tar.

1,398,614. PLATE-WEB WHEEL. WILLIAM ERASTUS WILLIAMS, Chicago, Ill. Filed Dec. 15, 1919. Serial No. 344,865. 4 Claims. (Cl. 301—63.)

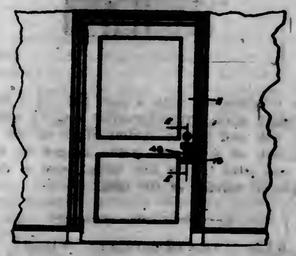


1. The combination with a cast hub, of a rolled wheel disk having a plain circumferential zone at some distance from the hub and in the medial plane of the wheel, the inner margin of said zone being braced by integral divergent ribs held in the hub metal, and a rim cast on the peripheral margin of the disk.

1,398,615. TENSION-PLATE WHEEL. WILLIAM ERASTUS WILLIAMS, Chicago, Ill. Filed Jan. 8, 1920. Serial No. 350,106. 13 Claims. (Cl. 301—63.)

1. The combination with a rim and a hub barrel of two disks secured to the rim and having their hub zones

forced laterally into and closely fitting the interior of the opposite ends of the hub, respectively, and cor-

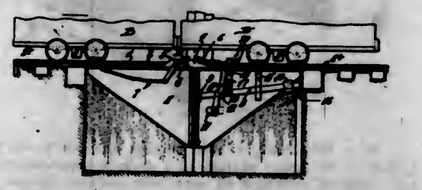


responding clamping rings pressed into and permanently fixed in the in-bent portions of the disks.

1,398,616. GAGGING APPLIANCE. WALTER REGINALD WILSON, Doncaster, England. Filed Oct. 5, 1920. Serial No. 414,850. 2 Claims. (Cl. 128—12.)

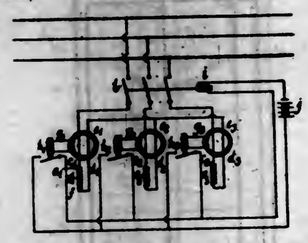
1. A device of the character referred to, comprising a member adapted to be inserted behind the upper lip, a member adapted to be inserted behind the teeth and gum of the lower jaw, a stem connecting said members so as to hold the mouth open and a laterally directed handle connected to the stem intermediate of its length so that a torque can be transmitted thereto at a point between the two members, the handle leaving the upper and lower part of the face free for the subsequent application thereto of an inhaler.

1,398,617. LOCK. JOHN L. YATES, New York, N. Y. Filed June 21, 1920. Serial No. 390,548. 7 Claims. (Cl. 70—14.)



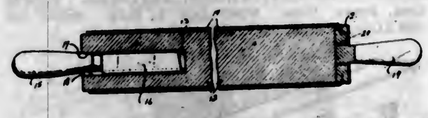
2. The herein described door lock comprising a casing, two independent slidable holding members within and projecting from the casing, a pair of coaxial finger pieces, one journaled in the casing and the other journaled within the first, and a pair of connecting members between the respective holding members and the aforesaid finger pieces.

1,398,618. COMBINED OFFICE AND DROPHEAD TYPEWRITER-DESK. GEORGE F. ALBRO, Los Angeles, Calif. Filed Mar. 18, 1920. Serial No. 366,973. 5 Claims. (Cl. 45—52.)



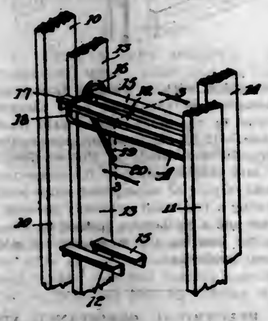
1. The combination with a housing, of a desk top and a shelf mounted and movable within the housing, and means connecting the shelf with the desk top and adapted to transmit motion from the desk top to the shelf to move the shelf into approximately horizontal position when the desk top is moved into approximately vertical position within the housing and at such a distance rearwardly from the front of the housing as to accommodate the knees of one sitting at the desk when the desk is closed; and to move the shelf into approximately vertical position within the housing when the desk top is moved out of the housing and into horizontal position.

1,398,619. CAR-STOPPING ATTACHMENT FOR ELEVATORS. WALTER S. ALLYN, Logan, Ill., assignor of one-half to Earl V. Akin, Benton, Ill. Filed Nov. 22, 1920. Serial No. 425,717. 5 Claims. (Cl. 187—97.)



1. The combination of an elevator, a car movable on said elevator, a car btop carried by the elevator, a stop-displacing member carried by said elevator, an abutment adapted to be engaged by said stop-displacing member to cause operation thereof, trippable means whereby motion is transmitted from said stop-displacing member to said car stop so as to displace the stop from its operative position, and a car-actuated tripping member whereby said trippable means is displaced to restore said car stop, said abutment being engaged by said stop-displacing member when the elevator is positioned to receive the car, and said car-actuated tripping member being carried by the elevator so as to cooperate with said trippable means while the car is moving on the elevator.

1,398,620. PROTECTING DEVICE FOR MULTIPHASE ALTERNATING-CURRENT APPARATUS. JAMES ROBERT BEARD, Newcastle-upon-Tyne, England. Filed Oct. 9, 1917. Serial No. 195,633. 9 Claims. (Cl. 175—294.)



1. In a protective device for an alternating-current apparatus, the combination with an electro-responsive device, of a transformer having a secondary winding operatively connected to the electro-responsive device and two oppositely acting primary windings connected in series with the winding of the apparatus to be protected.

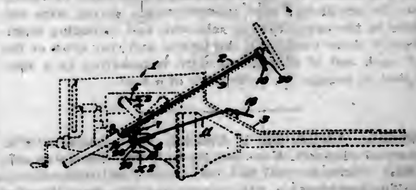
1,398,621. DOUGH-ROLL AND ROLLING-PIN. BERNARD L. BRADDICK, San Diego, Calif. Filed Feb. 4, 1920. Serial No. 356,165. Renewed Oct. 12, 1921. Serial No. 507,355. 2 Claims. (Cl. 107—50.)

1. A rolling pin body, a removable sheath of textile material, a handle at one end of the rolling pin and a handle at the opposite end, said handle being attached to a disk having a diameter as large as the diameter of the rolling pin, and a sleeve attached to the disk forming a cake cutter, said sheath coöperating with the body to provide a pocket, said sleeve engaging the body within the pocket.

1,398,622. EXTENSION-LADDER STOP. PETER BROMAN, Chicago, Ill., assignor to Brown Safety Ladder Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 7, 1920. Serial No. 356,965. 4 Claims. (Cl. 228—65.)

1. A hook for extension ladders comprising a member having an eyelet adapted to oscillate about a rung of one of said ladders, a hooked portion adapted to engage a rung of an adjoining ladder and a lug adapted to engage the first mentioned ladder so as to prevent relative movement of the two ladders in one direction.

1,398,623. AUTOMATIC ROAD-MAP. ELMER K. BROWN, Seattle, Wash. Filed Mar. 24, 1921. Serial No. 455,201. 1 Claim. (Cl. 40—86.)



An automatic map comprising a box, web driving means in the box, web supporting shafts in the box, the sides of the box being formed with vertical parallel pairs of grooves, carriages supporting the said shafts and having laterally directed pins engageable in the vertical grooves for insertion of the carriages in the box, the sides of the box being formed with horizontal grooves communicating with the vertical grooves to receive the said pins and permit the longitudinal movement of the carriages and shafts toward and away from the driving means to contact the wound portions of the web with the driving means and cause winding and unwinding of the web.

1,398,624. UNDERGARMENT. ALGERNON E. CLARKE, Grand Rapids, Mich. Filed May 24, 1920. Serial No. 383,979. 1 Claim. (Cl. 2—144.)

A union garment having an oblong opening across the back from side to side of the garment, an elastic insert placed in said opening with the upper and lower edges of the insert and the upper and lower edges of the garment fabric abutting each other, a thin fabric belt stitched upon each side of the fabric and of the insert covering the abutting edges thereof, both above and below the opening and folds formed in the waist part of the garment at the belt line and tapered to terminate near the arm scyes of the garment.

1,398,625. HAND AND FOOT ACCELERATOR FOR CARBURETERS OF AUTOMOBILE ENGINES. WILLIAM E. CLOUGH, Redondo Beach, Calif. Filed June 21, 1919. Serial No. 307,209. 4 Claims. (Cl. 74—39.)

1. In a hand and foot accelerator, a throttle lever, a cable one end of which is attached to said throttle lever,

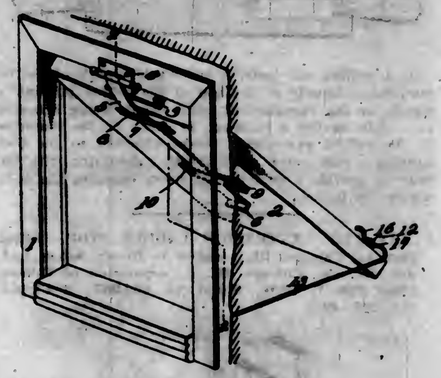
a foot lever for moving said cable to actuate the throttle lever, and the other end of said cable being attached to said foot lever, a lug mounted on said cable, a hand lever, and means on said hand lever to engage said lug to actuate the throttle lever.

1,398,626. NON-RESONANT PHONOGRAPH-CABINET. WILLIAM H. COLE, Newark, N. J. Filed May 6, 1920. Serial No. 379,242. 1 Claim. (Cl. 274—2.)

A phonograph cabinet composed externally of metal and internally of cement plaster upon which the metal is deposited and which is a unitary structure possessed of weight and solidity.

1,398,627. RESILIENT CUSHION FOR HEELS. JAMES M. COMBS, Akron, Ohio, assignor of one-half to V. R. Smithfield, Cleveland, Ohio. Filed Feb. 20, 1920. Serial No. 360,059. 1 Claim. (Cl. 36—36.)

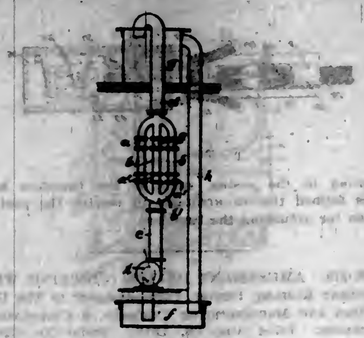
A resilient cushion for shoe heels comprising a pad adapted to lie flat against the wearing face of a heel and having a relatively thin elastic wall extending upwardly from the peripheral edge thereof, and a spring wire embedded in the upper edge of said wall and extending longitudinally therethrough on the lateral and rear sides of the heel, each end of said spring wire terminating in a spur adapted to engage the breast face of a heel.



1,398,628. EMERGENCY VAULT AND SAFE LOCK. DAVID J. CONDON, Kenwood Park, Iowa. Filed Jan. 17, 1921. Serial No. 437,804. 5 Claims. (Cl. 109—8.)

1. The combination with a safe and the door therefor having locking mechanism including a combination lock and bolt work, of a pair of gravity locking arms carried by the door, a bridge member spanning said locking mechanism, a support for holding said locking arms mounted upon said bridge member and means for locking

said arms in horizontal position against the bolt-work when released by said support.

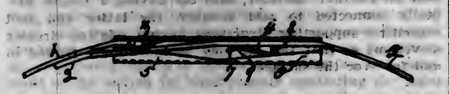


1,398,629. CASEMENT-WINDOW ADJUSTER. WALTER COX, Provo, Utah. Filed July 2, 1919. Serial No. 308,215. 1 Claim. (Cl. 292—275.)

The combination with a window frame, of a window pivotally mounted on the outer edge thereof, a hinged member carried by the inner edge of said frame having a flexible tongue, said tongue being adapted to lie on a plane parallel with the inner face of the window, a strip secured over said tongue adjacent its connection with the window frame, a pair of superposed strips secured to said window forming a frictional guideway through which said tongue passes and a projection formed on the free end of said tongue for limiting the movement of said tongue in said frictional guideway.

1,398,630. ELECTRICAL RESISTANCE APPARATUS. PHILIP HENRY DAWE, London, England. Filed Aug. 25, 1917. Serial No. 189,284. 2 Claims. (Cl. 165—416.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

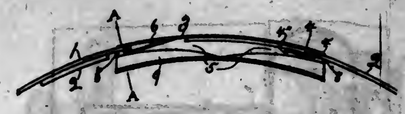
1. An electric apparatus of the character described, comprising a plurality of tubular elements, some of insulating and some of conductive material alternatingly disposed forming a conduit for a liquid medium adapted to be acted upon by the electric current, said conductive



elements constituting the electrodes, and means for continuously passing the said liquid medium through said conduit.

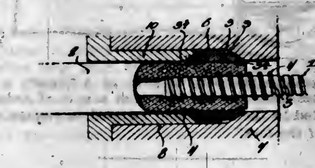
1,398,631. RUBBER HEEL. SAMUEL DE GRAZIA, Washington, D. C. Filed Oct. 22, 1920. Serial No. 418,679. 2 Claims. (Cl. 36—35.)

1. A cushion shoe heel comprising a nail holding insert in the form of a leather plate of the thickness of a lift at its margin and having a concavity in its upper face, said plate being provided with a central opening, and a rubber body in which the insert is inclosed completely with the exception of its marginal edge, the rubber body extending through the opening of the insert and filling the concavity of the latter, the upper surface of the body being in the same plane as the highest marginal portion of the insert, whereby the insert has the appearance of an upper leather lift when the heel is in use.



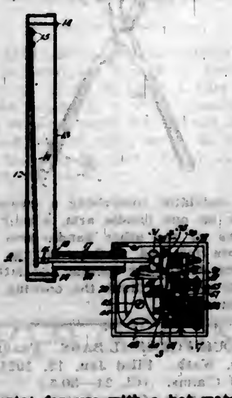
1,398,632. APPAREL-BELT BUCKLE. KENNEDY DOUGAN, Minneapolis, Minn. Filed Apr. 14, 1921. Serial No. 461,261. 4 Claims. (Cl. 24—194.)

1. A belt buckle including a front plate having parallel sides, tapering grooves formed in said sides adjacent said front plate the sides of said grooves converging toward the ends of said buckle, and belt holding means in said grooves adapted to hold the belt by forcing it against said front plate.



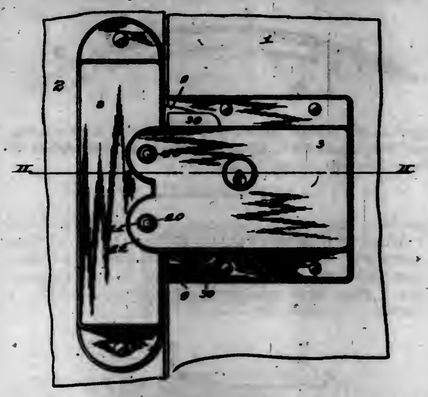
1,398,633. APPAREL-BELT BUCKLE. KENNEDY DOUGAN, Minneapolis, Minn. Filed Apr. 20, 1921. Serial No. 462,266. 3 Claims. (Cl. 24—194.)

1. A belt buckle including a front plate having parallel sides projecting from the back thereof, grooves formed between an inwardly turned portion of said sides and said front plate, said grooves tapering from the longitudinal



center of the buckle toward either end with a decreasing taper, and means for holding both the fixed and adjustable ends of the belt to the buckle.

1,398,634. MEANS AND METHOD FOR CONNECTING TUBING OF DISSIMILAR MATERIALS. JOSEPH PETER EASTMAN, Manitowoc, Wis., assignor to Eastman Manufacturing Company, Manitowoc, Wis., a Corporation. Filed June 20, 1919. Serial No. 305,715. 4 Claims. (Cl. 285—84.)



3. An article of the class described adapted to secure a relatively incompressible tube and a relatively compressible tube together comprising a non-resilient sleeve having an external, annular reinforcing band, said band being approximately twice the distance from one end than the other, whereby when the end portions of the sleeve on each side of the band are bent in a suitable tool, the bend of the wider portion will be begun before the bend of the narrow portion, but the bending will be completed substantially simultaneously.

1,398,635. THERMOSTAT. HARRISON H. FOGWELL and JOHN M. MORRIS, Los Angeles, Calif. Filed Nov. 15, 1917. Serial No. 202,238. 5 Claims. (Cl. 200—138.)

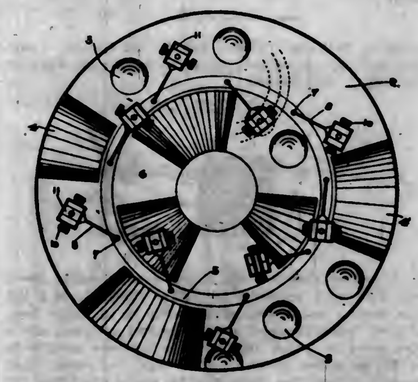
5. A thermostat for use with a hot water tank comprising a thermostat case adapted to be clamped in good thermal contact with the outside of said tank at a point intermediate of the height thereof; a thermostatic element in said case; a switch case; a switch in said switch case; and means by which said thermostatic element operates said switch.

1,398,636. LOCK. MORRIS FORLANDER, New York, N. Y. Filed Jan. 25, 1921. Serial No. 439,740. 14 Claims. (Cl. 70—46.)

1. The combination with a lock, of a keeper, a bolt operatively mounted in the lock, and a pair of swinging bolts mounted in the keeper and adapted to engage opposite edges of the lock.

1,398,637. HAIR-ONDULATOR. CAROLINA FUCHS-MAURER, Zurich, Switzerland. Filed Apr. 6, 1920, Serial No. 371,720. Renewed Apr. 9, 1921. Serial No. 460,095. 2 Claims. (Cl. 132—37.)

1. A hair ondulator comprising a two-armed handle, a fixed finger on one handle arm, a pair of separated pivoted fingers on the other handle arm, eccentrically disposed pivots for and trailers on the said pivoted fingers, resilient means for opening the latter, and stops on the handle arms to limit the opening movement of said pivoted arms.

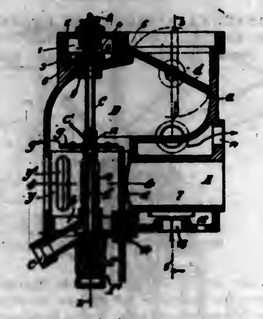


1,398,638. LOCK FOR MAIL-BAGS. FRANK L. GRAHAM, Jr., Seattle, Wash. Filed Jan. 18, 1921. Serial No. 438,137. 6 Claims. (Cl. 24—30.5.)

5. As a new article of manufacture, a detachable lock for the tie fasteners of newspaper mail sacks comprising a rectangular casing having an open end, a bolt slidably mounted in the casing through said open end, a rigid jaw carried by the bolt, a pivoted jaw carried by the bolt and arranged to extend beyond the casing when the bolt is in its extended position, spring means for normally urging the bolt outwardly of the casing, a post carried by the bolt, locking tumblers pivotally

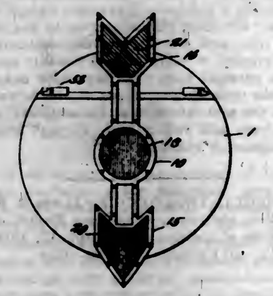
mounted in the casing, each of the tumblers having gates formed therein arranged to receive the post, and means for actuating the tumblers.

1,398,639. AMUSEMENT DEVICE (CIRCLING WHIP.) ERNEST KOEHLER, Denver, Colo., assignor to The United Mines and Manufacturing Company, a Corporation of Arizona. Filed Aug. 28, 1919. Serial No. 320,392. 6 Claims. (Cl. 46—27.)



1. In an amusement apparatus of the character described, an inner and outer concentric supporting structure spaced from each other at their adjacent edges and having a generally horisontal top contour; an intermediate member arranged in and bridging said space; and a car having wheels to traverse the surface of the said inner and outer concentric supporting structures and said intermediate member, said car having a tongue pivotally connected to said member, the latter and said concentric supporting structures having relative circular movement so that the car may be indefinitely trailed to and fro over the surfaces.

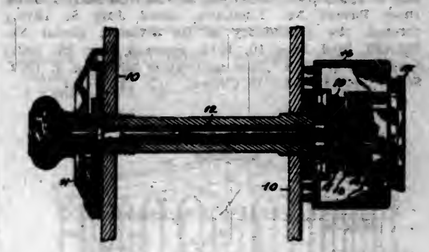
1,398,640. CARBURETER. PAUL LANDIS, Zurich, Switzerland. Filed Jan. 30, 1919. Serial No. 274,074. 3 Claims. (Cl. 261—41.)



2. In a carbureter, a body having a mixing chamber and inlet ports communicating therewith, a chamber in said body, a liquid fuel jet having a discharge aperture located in the mixing chamber, a spring closed valve associated with the discharge aperture of the jet and having a longitudinal opening adapted to conduct liquid fuel from the discharge aperture of the jet to the second mentioned chamber, a throttle valve located in the body, said body having a passage terminating adjacent the

throttle valve and communicating with the second mentioned chamber, and a diaphragm located in the second

mentioned chamber connected with the valve whereby the latter is actuated by the production of a depression in the second mentioned chamber.

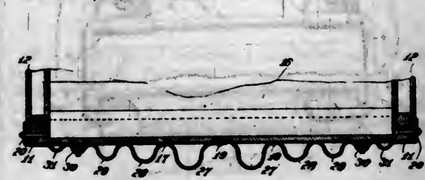


1,398,641. VEHICLE-SIGNAL. WILLIAM H. LEARMONT, Yale, Mich. Filed Dec. 5, 1918. Serial No. 265,423. 4 Claims. (Cl. 177—327.)

1. In a vehicle signal the combination with a normally stationary index having translucent faces, and a lamp housing between the ends of the index and at the axis of movement thereof, of a lamp for illuminating said housing, stationary shutters normally cutting off light rays from the housing to the translucent faces of the index, a switch adapted to be operated by the driver, an electrically operated means controlled by one movement of the switch for continuously oscillating the index relative to the shutters to intermittently illuminate said faces of the index while the switch is held at the position to which it is moved by the driver.

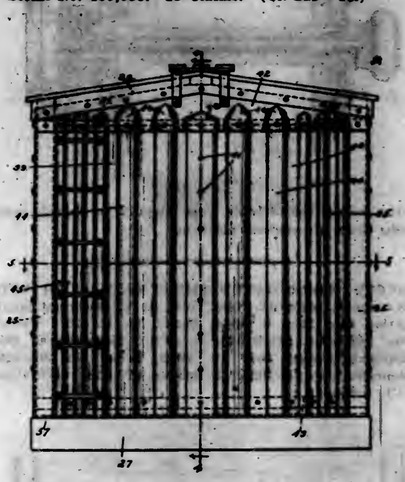
1,398,642. DIAL-LOCK. ROLLIN C. LEWIS, Stamford, Conn., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Filed Mar. 25, 1921. Serial No. 455,464. 8 Claims. (Cl. 70—53.)

1. In a lock, the combination of a series of tumblers, a driving cam for the same, a fence, a movable member held in locking position by the tumblers and fence and a safety latch normally held in inoperative position by its engagement with the periphery of the driving cam, and adapted to move to deadlock said movable member



in the event the driving cam should be forced rearwardly from its normal position.

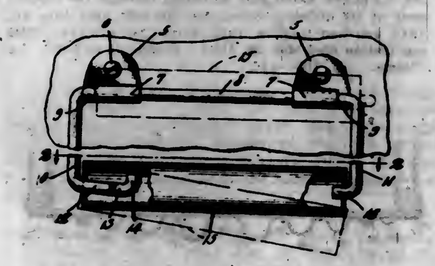
1,398,643. CORRUGATED SHEET-METAL CAR END. WALTER P. MURPHY, New York, N. Y. Original application filed Mar. 6, 1916, Serial No. 82,423. Patent No. 1,309,484, dated July 8, 1919. Divided and this application filed June 10, 1919. Serial No. 304,429. Renewed May 28, 1921. Serial No. 473,318. 23 Claims. (Cl. 105—410.)



5. A sheet metal end structure for a railway car comprising a plurality of corrugated sheets overlapped on vertical lines and secured together and to the frame of the car, each corrugated sheet being formed with uniform vertical corrugations, those of the central sheets being deeper than those of the adjacent sheets.

1,398,644. CORRUGATED-SHEET-METAL CAR END. WALTER P. MURPHY, New York, N. Y. Division of application Serial No. 82,423, filed Mar. 6, 1916, (now Patent No. 1,309,484, dated July 8, 1919,) through the copendency of its division, Serial No. 304,429, filed June 10, 1919, renewed May 28, 1921, Serial No. 473,318. This application filed May 28, 1921. Serial No. 473,377. 14 Claims. (Cl. 105—410.)

1. A car end structure comprising two end sheets secured together along the vertical center line of the end and formed with corrugations which are deepest adjacent said vertical center line and are progressively shallower each with respect to the preceding one toward the sides of the car.



1,398,645. VERTICALLY-REINFORCED SHEET-METAL CAR END. WALTER P. MURPHY, New York, N. Y. Division of application Serial No. 82,423, filed Mar. 6, 1916, (now Patent No. 1,300,484, dated July 8, 1919,) through the copendency of its division, Serial No. 304,429, filed June 10, 1919, renewed May 28, 1921, Serial No. 473,218. This application filed Aug. 1, 1921. Serial No. 489,658. 13 Claims. (Cl. 219—40.)

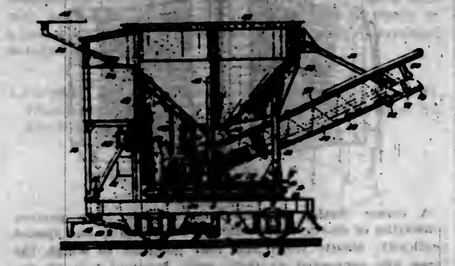
1. An end structure for a railway car comprising two metal end sheets secured together along the vertical center line of the end and formed with rigidifying corrugations which are deeper near the middle of the end than at the sides thereof.

2. An end structure for a railway car comprising two metal end sheets secured together along the vertical center line of the end and formed with vertically disposed rigidifying corrugations which are deeper near the middle of the end than at the sides thereof.

1,398,646. ROLL-HOLDER. WALTER Z. MURRAY, Richmond, Va. Filed July 21, 1921. Serial No. 486,627. 2 Claims. (Cl. 211—31.)

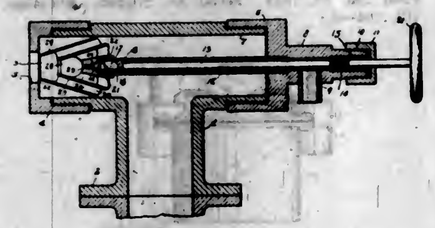
1. A roll holder including a pair of brackets, each bracket having a gripping member and having a shoulder disposed adjacent thereto, a movable support including a rod having arms formed at its ends, one of said arms extending inwardly and having an outwardly curved portion terminating in a right angled end, a spool supported on the arms, and the opposite arm having a right angled end to be positioned in the opposite end of the spool.

1,398,647. INTERNAL-COMBUSTION ENGINE. HAROLD CORNELIUS READING, Dewsbury, England. Filed Mar. 31, 1920. Serial No. 370,182. 3 Claims. (Cl. 123—73.)



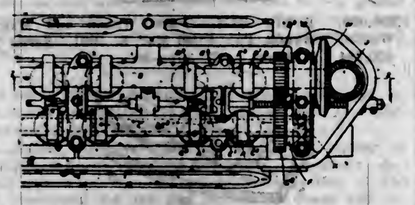
1. In an internal combustion engine having a carbureter, a cylinder having a combustion chamber and an extension and a conduit arranged for connection to the carbureter and leading from said extension to the combustion chamber of the cylinder, a valve in said conduit arranged to close against pressure from the combustion chamber, and a piston in the cylinder and having means to draw a rich mixture into the said extension at its outstroke, and at its instroke to force said rich mixture through said conduit into said combustion chamber.

1,398,648. REGULATING DEVICE. JAMES B. REPLOGLE, Detroit, Mich., assignor to The Remy Electric Company, a Corporation of Indiana. Filed Apr. 17, 1918. Serial No. 229,015. 10 Claims. (Cl. 200—90.)



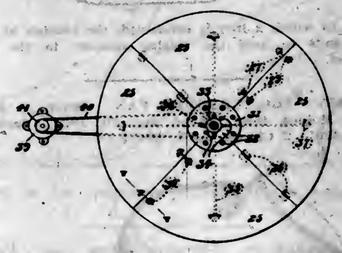
2. In a controlling device, the combination with an electromagnet including a winding and a core; an armature carrying spaced contacts; means for resiliently supporting said armature and capable of adjustment relatively to said core to cause one portion of the armature to be nearer to the core than another portion, but without changing the air gap area; spaced movable contacts supported by the armature; and stationary contacts supported by said means.

1,398,649. CHARGING DEVICE. RAY S. RICHARDS, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Dec. 18, 1917, Serial No. 207,734. Renewed Apr. 22, 1921. Serial No. 463,575. 6 Claims. (Cl. 214—83.)



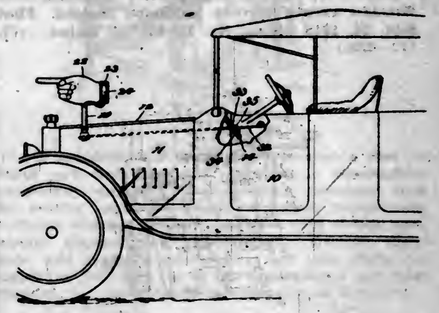
6. In a device of the class described, the combination with a source of supply, of a trough adapted to deliver material from said source, and an automatic valve adapted to close the end of the trough when the flow of material therethrough becomes less than a predetermined rate.

1,398,650. OIL-BURNER. BERTRAM S. ROTHWELL, Cleveland, Ohio. Filed Oct. 1, 1919. Serial No. 327,729. 5 Claims. (Cl. 158—76.)



1. In an oil burner, the combination of T-joint casing, having an air inlet, a cap removably attached to said T-joint, a fuel conduit removably attached to said cap and extending forwardly of said T-joint, and a mixing member removably attached to said conduit and consisting of a series of cone shaped sleeves, spaced from each other and attached to each other by spiral blades, the blades between successive sleeves spiraling in opposite directions.

1,398,651. VALVE-GEAR FOR INTERNAL-COMBUSTION ENGINES. ARTHUR JOHN ROWLEDGE, London, England, assignor to D. Napier & Son Limited, London, England. Filed Nov. 7, 1918. Serial No. 261,520. 6 Claims. (Cl. 123—59.)

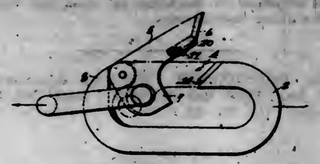


1. In a valve gear for a multicylinder engine, the combination with a series of valves having valve stems and tappet disks, of a cam shaft located above said tappet disks and having a cam operating on each tappet disk, a bearing for the cam shaft located adjacent each tappet disk and arranged to discharge oil upon the same, and means for oiling the bearings.

1,398,652. ROUNDABOUT. WALTER J. ROZANSKI, Pittsburgh, Pa. Filed May 31, 1921. Serial No. 473,617. 2 Claims. (Cl. 46—27.)

1. In a roundabout, a vertical post, a hollow shaft rotatably mounted on said post and having an enlargement at its upper end defining a horisontal annular shoulder, a platform fitted onto the upper end of said base and resting upon said shoulder, said platform being provided with a series of sockets in its under face, and upwardly projecting rigid pins extending from said shoulder and fitting into said sockets.

1,398,653. TRAFFIC-SIGNAL FOR MOTOR-VEHICLES. JAMES J. SANTIN and GEORGE M. WHITE, El Reno, Okla. Filed Jan. 17, 1921. Serial No. 437,977. 9 Claims. (Cl. 116—46.)

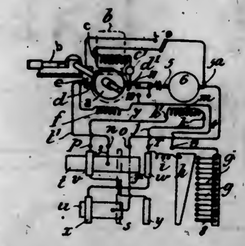


1. A traffic signal including a rotatable shaft, an indicator connected therewith, an arm extending from the shaft, and slidable means connected with said arm movable for swinging the arm and rotating the shaft, said means being formed to coact with the shaft whereby said means will be limited in its movement.

1,398,654. SAFETY-HOOK. ANDREW J. SARUP, North Vancouver, British Columbia, Canada, assignor to Annie M. Sarup, North Vancouver, Canada. Filed June 29, 1920. Serial No. 392,629. 4 Claims. (Cl. 24—242.)

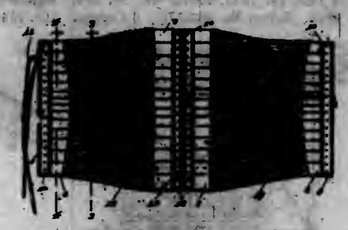
1. A safety hook, the shank of which is recurved toward the point of the hook, a member pivotally mounted in the recurved end of the shank and adapted

to close against the end of the hook and alinb therewith, said member having a projection within the recurved



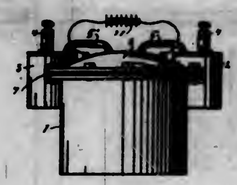
shank to which a line is connected, the tension of which line tends to hold the closing member in the closed position.

1,398,655. EGG-TURNOVER PAN. JESSE A. SMITH, Des Moines, Iowa. Filed Apr. 19, 1921. Serial No. 462,620. 2 Claims. (Cl. 53—7.)



1. In a device of the class described, a frying pan having a lip thereon, said lip being curved in cross section and having its free edge arranged so that it extends over the bottom of the pan, the parts being so adapted that a sudden jerk of the pan will cause the contents thereof to be slid against the lip and to position where it will be turned over for the purposes stated.

1,398,656. POWER-TRANSMITTING MECHANISM. WILLIAM ARTHUR STEVENS, Maidstone, England. Filed Sept. 24, 1918. Serial No. 255,433. 3 Claims. (Cl. 172—239.)



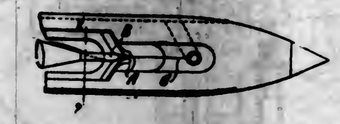
1. An electrical transmission arrangement of the kind referred to, comprising an electrical generator having shunt and series field windings, a motor having a series field winding adapted to be connected in parallel with the generator series field winding, a lead connecting one brush of the governor to one brush of the motor, a variable resistance connected to one end of the generator series field winding, a controller and leads adapted to connect the said resistance in parallel with the generator series field winding and at the same time short circuit the motor series field winding, and a pair of terminals one connected to the lead directly connecting the generator and motor and the other connected to the lead between the variable resistance and the generator series winding, from which terminals current can be supplied for purposes such as lighting with a variable compounding effect of the generator.

1,398,657. CORSET. ELLA THOMPSON, Chicago, Ill. Filed Sept. 28, 1920. Serial No. 413,264. 1 Claim. (Cl. 2—73.)

A corset section composed of a main body portion consisting of elastic tapes running horizontally and spaced vertically, elastic front and rear portions to which the tapes are connected at their ends, front and rear edge members connected to said front and rear portions respectively, and a loose lining for one side of the aforesaid tapes, said covering being composed of strips which run parallel to the tapes and are connected at their longitudinal edges and also to the tapes, and the ends of said strips being connected to the aforesaid front and rear portions at their junction with the tapes.

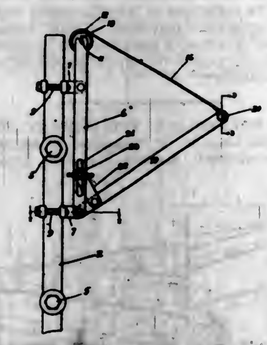
1,398,658. PROCESS FOR EXTRACTING GASES FROM LIQUIDS. FRANK S. VINCENT, Grand Rapids, Mich. Filed Jan. 13, 1919. Serial No. 270,967. 3 Claims. (Cl. 204—5.)

1. In the process of extracting gases from liquids by electrolysis, the use of an air tight tank divided into two chambers, said chambers electrically connected and partly filled with an electrolyte and arranged to form a vacant space in each chamber above the electrolyte, an air tight receiving chamber connected with each vacant space above the electrolyte, the electrolyte chambers and the receiving chambers relieved of all air possible, an anode plate partly immersed in the electrolyte in one chamber, a cathode plate partly immersed in the electrolyte in the other chamber, and proper electrical connections with said anode plate and cathode plate for separating the gases from the electrolyte and storing them in their respective receiving chambers.



1,398,659. SPLIT RIM. FRED WELLS and MARTIN WELLS, Towanda, Pa. Filed Mar. 8, 1921. Serial No. 450,784. 2 Claims. (Cl. 301—30.)

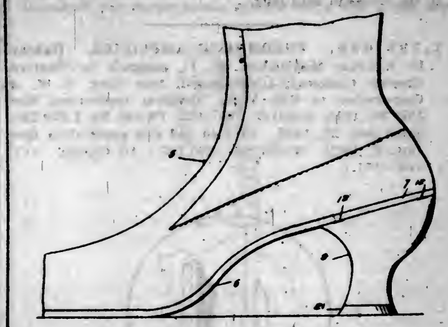
1. The combination with adjacent abutting ends of a split rim, of means for forcing said ends into abutting



engagement from an overlapped position, said means comprising a plate carried by one of said ends and provided with oppositely arranged notches, a dog carried by a pivoted member on the other abutting end and coöperating with depressions in the plate, said dog and depressions forming means whereby the overlapped ends may be moved in opposite directions intermittently by a tool when said tool is inserted in the oppositely arranged notches of the plate.

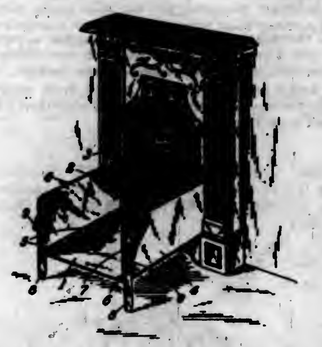
1,398,660. LOOM-SHUTTLE. THOMAS HENRY WHALLEY, Blackburn, England. Filed June 16, 1920. Serial No. 389,392. 3 Claims. (Cl. 139—46.)

1. The combination, with a loom shuttle provided with a peg for holding a cop, of a strip of resilient material secured to the shuttle body at one end and provided at its free end portion with a smooth surface which bears forcibly against the free end portion of the said peg and operates to press the weft against the said peg as the weft passes out of the shuttle.



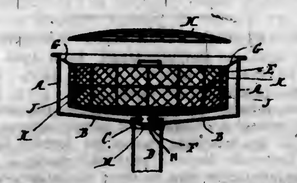
1,398,661. WINDSHIELD-SHADE. HORACE G. WHITMORE and CHARLES T. GLASSER, Minneapolis, Minn. Filed Sept. 23, 1920. Serial No. 412,202. 2 Claims. (Cl. 296—95.)

1. The combination, with a wind shield frame, of clamps secured thereto, bars mounted on said clamps in front of and adjacent to said frame, the upper ends of said bars being adjacent the top of said frame, a shade roller and shade having bearings in the upper end of said bars, arms pivoted at one end to the lower ends of said bars and having means at their outer ends for connection with the free end of said shade, and links pivoted on said arms near said bars and having sliding clamping adjustment with said bars for forcing said arms downwardly against the tension of said shade and roller.



1,398,662. INTERCHANGEABLE HEEL. ERNEST A. WINDSOR, Port Huron, Mich. Filed Feb. 27, 1920. Serial No. 361,894. 1 Claim. (Cl. 36—40.)

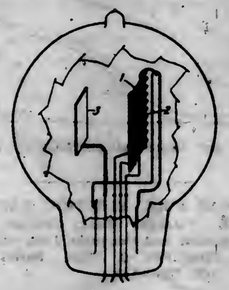
A molded shoe heel cored in its top and bottom to provide outwardly opening chambers, oppositely disposed pins secured in the intermediate portion of the heel separating the top and bottom chambers and extending through the latter and threaded at their outer ends, plates extending over the respective chambers and having inwardly depressed centrally apertured portions to receive the outer threaded ends of the respective pins, and nuts threaded on the outer ends of the pins and



disposed in the depressed portions of the respective plates.

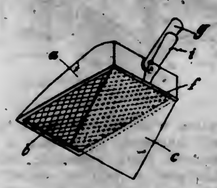
1,398,663. GAS FIRE, ELECTRIC RADIATOR, AND THE LIKE. CHARLES WRAY, Croydon, England, assignor to himself and Conquest John Stanley, London, England. Filed Feb. 6, 1920. Serial No. 356,769. 5 Claims. (Cl. 126—141.)

2. In combination with heating apparatus, a heat reflector and draft excluder, comprising a substantially horizontally disposed plate extending forwardly from the heating apparatus, a pair of spaced substantially vertically disposed plates at opposite sides of said horizontally disposed plate and extending upwardly therefrom, and supports mounted on said side plates for supporting the outer end of the heat reflector and draft excluder, for the purposes substantially as described.



1,398,664. DISH-CLEANER. CONSTANCE DURELL ARMSTRONG, Gisborne, New Zealand. Filed June 21, 1920. Serial No. 390,460. 2 Claims. (Cl. 141—9.)

2. A sink having a closure plug detachably fitted in its waste pipe, said plug having a bearing recess in its upper

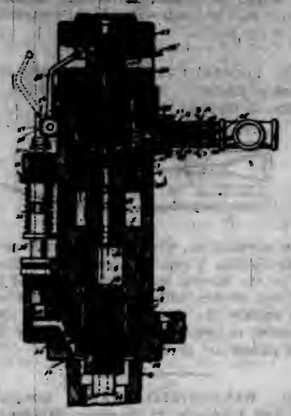


side, and a cage arranged in said sink and having a central supporting member detachably and revolubly mounted in the recess of said plug.

1,398,665. THERMIONIC AMPLIFIER. HAROLD D. ARNOLD, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Original application filed July 30, 1918, Serial No. 247,422. Patent No. 1,329,283, dated Jan. 27, 1920. Divided and this application filed Jan. 8, 1920. Serial No. 350,197. 10 Claims. (Cl. 179—171.)

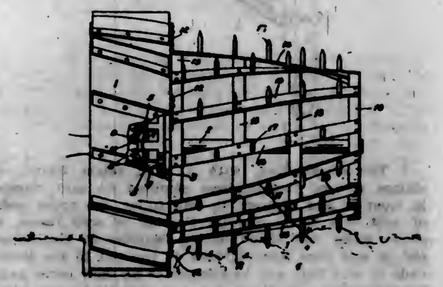
1. A thermionic discharge device having a cathode, an anode and a controlling element, said controlling element being located in close proximity to the cathode, and said anode being relatively widely spaced from said cathode whereby the device operates to repeat electrical waves and impulses with amplified voltage.

1,398,666. COMBINED SIFTER AND SHOVEL. HERBERT HENRY BEACH, Balham, London, England. Filed May 27, 1919. Serial No. 300,125. 1 Claim. (Cl. 83—60.)



A combined sifter and shovel including a shovel body having a screened bottom permanently fitted thereto, a handle carried by the shovel body, a false bottom hinged to the rear edge of the shovel body and co-extensive with the said screened bottom portion thereof, a handle carried by said false bottom and extending to one side of the hinging axis, and a spring confined between the handle on the shovel body and the said handle on the false bottom to maintain the latter in a normally closed position.

1,398,667. INTERNAL-COMBUSTION ENGINE. EARL V. BEALS, Arlington Heights, Mass. Filed June 14, 1916, Serial No. 104,126. Renewed Nov. 20, 1918. Serial No. 263,438. 14 Claims. (Cl. 123—25.)

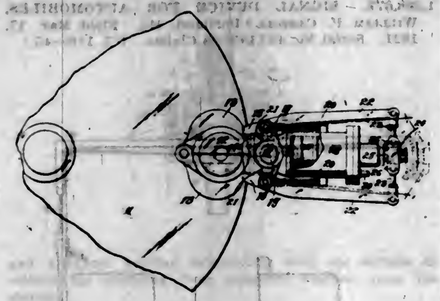


1. In an internal combustion engine, the combination with the explosion chamber; of means operated by the pressure of the exploding charge for forcing liquid into the said explosion chamber while the charge is burning; and a separate device also operated by the pressure of the exploding charge for regulating the amount of liquid forced into the cylinder.

18. In combination with a cylinder of an internal combustion engine, means for forcing liquid into the engine cylinders during the explosion period comprising a plunger subjected to the pressure within the cylinder and movable in response to an explosion pressure, and a valve carried by the plunger and opened by liquid pressure occasioned

by a movement of the plunger, and means for regulating the amount of liquid delivered, comprising means movable in response to variations in liquid pressure occasioned by a pressure responsive movement of said plunger, and a stop movable to different positions and actuated by pressure within the cylinder for regulating the delivery of liquid to the cylinders.

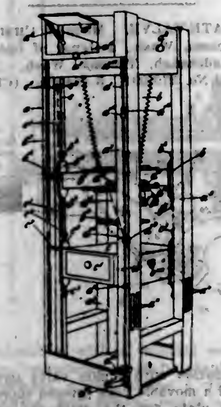
1,398,668. PULVERIZER ATTACHMENT FOR TRACTORS. EVANDOR K. M. BORDSEN, Wedderburn, Oreg. Filed Nov. 15, 1920. Serial No. 424,213. 5 Claims. (Cl. 55—24.)



1. A pulverizer comprising a shaft, a plurality of wheels secured to said shaft, ground-breaking members carried by the peripheries of said wheels, and means at one end of said shaft for clamping it to a tractor wheel.

1,398,669. [WITHDRAWN.]

1,398,670. MOLD-CLAMP FOR GLASS-FORMING MACHINES. EDWARD G. BARNES, Anderson, Ind., assignor to Lynch Glass Machinery Company, Anderson, Ind., a Corporation of Indiana. Filed Mar. 24, 1920. Serial No. 368,208. 7 Claims. (Cl. 49—14.)

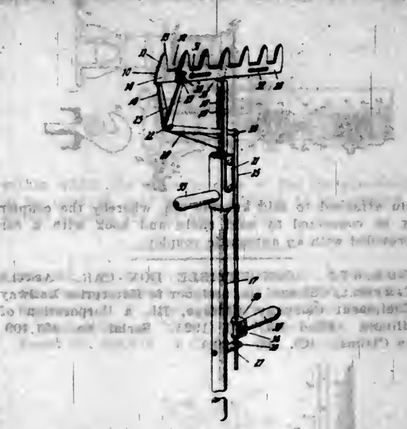


7. In a glass-molding machine, the combination of a mold carrier and molds thereon composed of hinged sec-

tions, means arranged alongside the path of movement of the molds for engaging the mold sections and clamping them together, said clamping means comprising a pair of levers pivoted near their mold engaging ends to swinging arms, an operating device located between the opposite

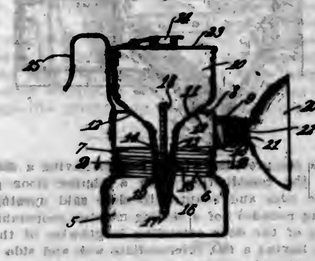
ends of said levers, and links connecting said operating device and the ends of said levers, said links having shoulders limiting the swinging movement of said links, whereby movement of said operating device swings said links to open and close said clamping levers and to move said arms and levers toward and from the mold sections.

1,398,671. UPRIGHT PHOTOGRAPHIC, ENLARGING, COPYING, AND REDUCING APPARATUS. JOHN GILLIS BROWN, Newport, England. Filed Aug. 9, 1919. Serial No. 316,828. 3 Claims. (Cl. 88—24.)



3. A photographic apparatus of the class described including a frame, a fixed negative receiving member at the top of the frame, a balanced adjustable lens box beneath the negative receiving member, a balanced work-carrying member beneath the lens box, and a vignetting support adjustably carried by the lens box at one side of the shutter position thereof.

1,398,672. HAND CLIPPER-MOWER. AMBROSE CASSAR, Mosman, near Sydney, New South Wales, Australia. Filed Sept. 17, 1920. Serial No. 410,662. 3 Claims. (Cl. 30—11.)

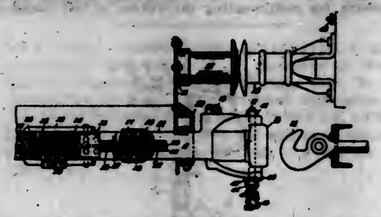


1. In a hedge clipper, a haft having a head, a comb fixed transversely on the head of the haft, a cutter coact-

ing with said comb and adapted to be reciprocated on said comb, a rod slidably carried on said haft in alinement therewith for reciprocating the cutter, a bell crank con-

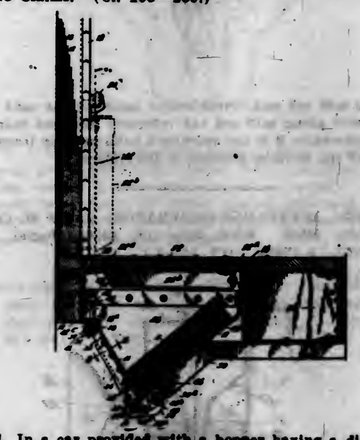
necting said rod and cutter, and a hand grip on said rod immovable along said rod but rotatably mounted thereon to accommodate it to the operator's hand position irrespectively of the working position of the clipper.

1,398,673. ACETYLENE-GENERATOR. JAMES W. CAIN, Detroit, Mich. Filed June 18, 1920. Serial No. 389,983. 1 Claim. (Cl. 48—4.)



An acetylene generator comprising a carbid container, a water containing receptacle supported on the carbid container, a discharge tube secured to the base of the water containing receptacle, and communicating with the carbid container, said base of the water containing receptacle being formed into a funnel-shaped downward extension terminating within the discharge tube in a restricted mouth, a nut frictionally held within the discharge tube and in spaced relation below the restricted mouth, said nut having openings to permit fluid to pass therethrough, and a threaded valve member operating through a threaded opening in the nut for controlling the passage of fluid through the discharge tube.

1,398,674. RAILWAY DRAFT-RIGGING. ARGYLE CAMPBELL, Chicago, Ill., assignor to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed May 24, 1920. Serial No. 383,651. 2 Claims. (Cl. 213—42.)

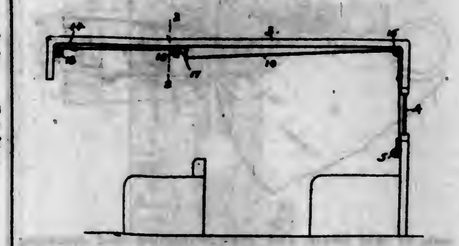


1. In a railway draft rigging interchangeably usable with automatic couplers of the Master Car Builders' type and hook and link couplings, the combination with

a coupler having an M. C. B. automatic coupler head, including a pin for the knuckle; of a hook and link

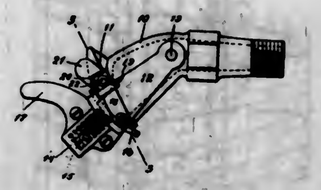
chain attached to said knuckle pin, whereby the coupler may be connected by said chain and hook with a car unprovided with an automatic coupler.

1,398,675. CONVERTIBLE BOX-CAR. ARGYLE CAMPBELL, Chicago, Ill., assignor to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 10, 1921. Serial No. 451,409. 18 Claims. (Cl. 105—239.)



1. In a car provided with a hopper having a discharge opening, the combination with a hopper door pivoted along one edge and adapted to close said opening, said edge being rounded; of a sealing member coöperable with said edge of the door extending lengthwise of the door edge and having a flat intermediate web and side flanges extending therefrom toward the door and within which is oscillatably movable said rounded edge of the door, said rounded edge having lines of contact with the inner faces of said flanges and with said web.

1,398,676. ALCOHOL-TORCH. FRANCIS B. CARLETON, Boston, Mass. Filed June 1, 1920. Serial No. 385,419. 2 Claims. (Cl. 158—27.5.)



1. An alcohol torch, comprising a tank, a wick-tube detachably mounted in said tank with its upper end projecting above the tank, said tank being provided with a vertical groove in its body-portion and extending along one side thereof, a blower-tube positioned in said vertical groove, and means for retaining the blower-tube in the groove and holding it in its adjusted positions.

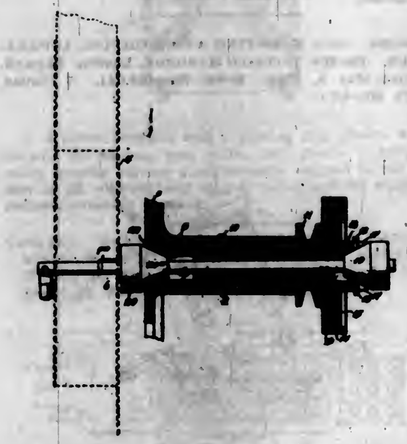
1,398,677. SIGNAL DEVICE FOR AUTOMOBILES. WILLIAM P. CARROLL, Portland, Me. Filed Mar. 17, 1921. Serial No. 453,143. 5 Claims. (Cl. 116—45.)

1. A signal device for automobiles, consisting of a spring roller secured to the rear of the car adjacent to the window, a strip of flexible material wound thereon having signal words visible from the rear of the car, a spring roller in the forward portion of the car having a strip of flexible material wound thereon, the said strips of flexible material being united by a cord or the like and guides for guiding said cord.

1,398,678. GATE-VALVE. MOGENS CHRISTIAN CHRISTENSEN, Tacoma, Wash., assignor of one-half to Randolph F. Radebaugh, Tacoma, Wash. Filed May 5, 1920. Serial No. 379,091. 5 Claims. (Cl. 251—19.)

1. In combination with a gate valve structure including a body and a movable yoke pivoted thereto and carrying a closure plate for the discharge end thereof, a locking device comprising a spring secured at one end upon the yoke, a guide bracket carried by the yoke and through which said spring extends, a block member carried by the projecting end of the spring and formed with a handle, and a catch projecting from said block member, the body being provided with a recess for the reception of said catch and having an inclined shoulder leading thereto.

1,398,679. TOOL-HOLDER. CHARLES JEROME CLARK, Lakewood, Ohio. Filed Jan. 25, 1921. Serial No. 439,846. 4 Claims. (Cl. 279—16.)



1. In a tool holder of the floating type, the combination of a spindle; a driving element therefor; an Oldham coupling interposed between the same; means acting upon

said coupling and independent of the driving connections thereof to alline the spindle and driving element;

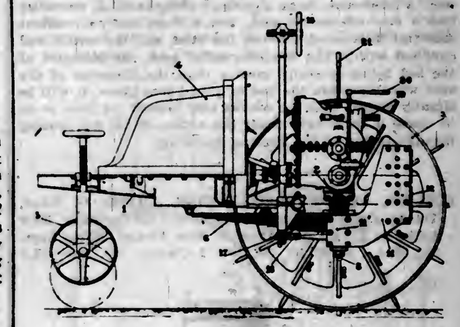
and a thrust bearing coöperating with the spindle to relieve the coupling from pressure exerted upon the spindle.

1,398,680. TAKE-UP MECHANISM FOR WINDING DEVICES. JOSEPH CLAYTON, New York, N. Y. Filed Apr. 24, 1920. Serial No. 376,253. 10 Claims. (Cl. 242—55.)

6. The combination with a winding mechanism of a take-up device, comprising a shaft adapted to support the winding element, driving means, a clutch mechanism interposed between said driving means and said shaft, and means for permitting a longitudinal movement of said shaft as the load upon the winding element increases to function the clutch mechanism in a manner whereby the winding element will take-up the material being wound with an even tension, irrespective of the amount of material on said element.

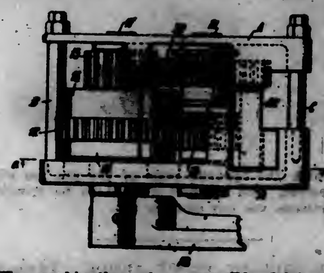
1,398,681. NUT-LOCKING-MEANS. FRANK V. COOKE, Highland Park, Mich. Filed Nov. 19, 1920. Serial No. 425,109. 4 Claims. (Cl. 151—29.)

1. In combination with a nut and the end of a threaded member, said threaded end being provided with a transverse aperture therethrough, a pin adapted to be received in said aperture, a washer adapted to be received upon the end of said threaded member provided with a portion adapted to embrace the nut so as to prevent rotation thereof and provided with grooves



within which the opposite ends of the pin are adapted to be received, said washer adapted to be crimped inwardly between the nut and the pin.

1,398,682. BULLET-PROOF ARMOR. THEODORE DE DRAGIC and ALBERT SCHWARZ, New York, N. Y., assignors to U. S. Armor Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 26, 1920. Serial No. 368,818. 9 Claims. (Cl. 89—36.)



1. In a bullet proof shield, the combination of a flexible support, and bullet proof armor consisting entirely of plates of highly tempered thin sheet metal wrapped with textile fabric as the bullet resisting members, the said wrapped plates being each independently and flexibly secured to the support, and being arranged in shingle-like overlapping relation one with another.

1,398,683. TRACTOR. LOUIS LUBIN DUBOIS, Asnières, France. Filed June 29, 1920. Serial No. 392,793. 12 Claims. (Cl. 180—12.)

1. A tractor, particularly for agricultural implements, comprising a chassis, two driving wheels at the rear, a third wheel in front, means for adjusting said third wheel vertically, steering mechanism for the said driving wheels, and means for connecting the steering mechanism with the two driving wheels or to the front wheel as desired.

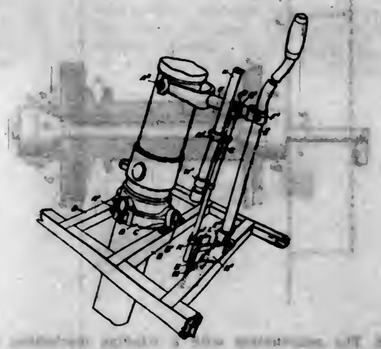
1,398,624. QUICK-RETURN PUMP-HEAD GEARING. BERNARD P. FALETE, Barnesville, Pa. Filed Nov. 12, 1919. Serial No. 337,511. 12 Claims. (Cl. 74—59.)

3. The combination of a reversible driving shaft, a counter shaft having two gears secured thereon, differential gears on the driving-shaft, one-way clutch devices respectively arranged to drive in opposite directions, one clutch device adapted to drive a low speed gear and the other a high speed gear of the said differential gears, means to bias both clutch devices into position to engage both said low and high speed gears, and a means, responsive to the engaging movement of the clutch device for the high speed gear, for holding the clutch device for the low speed gear in inoperative position.

1,398,685. AIR-FILTER. JOHN A. GORDON, Kansas City, Mo., assignor of one-half to Charles E. Hose, Kansas City, Mo. Filed Mar. 5, 1921. Serial No. 449,790. 2 Claims. (Cl. 183—44.)

1. A filter comprising a casing having an inlet, an outlet and a circumferential seat, and a filter bed of resilient material interposed between the inlet and the outlet and confined within the circumferential seat, the diameter of the bed being normally greater than the diameter of the seat whereby when the bed is forced into place, it will be slightly dished with the convex side toward the inlet so as to cause it to vibrate under the action of the air passing through it during the filtering operation.

1,398,656. SHIPPING-CONTAINER. HENRY G. GRAF, Toledo, Ohio, assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 30, 1915. Serial No. 53,200. 1 Claim. (Cl. 220—55.)

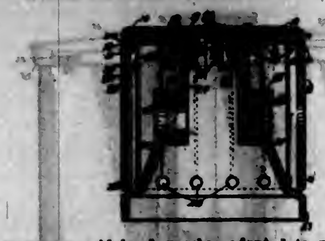


A shipping vessel comprising a body having an outwardly extending peripheral bead, a cover for said body having a downwardly extending peripheral flange fitting around said bead of the body, said flange extending below said bead and being spaced away from the wall of the body, said flange being formed with a plurality of tongues cut out from said flange along their side and bottom edges and integral with said flange along their tops, and adapted to be bent inwardly to engage beneath the bead of the body to secure the cover in place, the bottom edge of the cover flange being left continuous around the vessel, at a distance from the wall of the vessel.

1,398,687. THERMOPHONE. ROSS D. GRAY, Greenwich, Conn., assignor to American Thermophone Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 19, 1920. Serial No. 359,948. 5 Claims. (Cl. 179—101.)

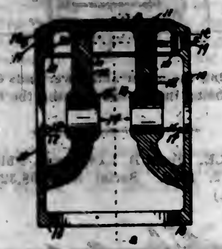
1. The device above described comprising segments arranged to form a chamber and thermic units, each segment carrying one or more of said thermic units arranged parallel to each other and projecting therefrom into said chamber in a plane or planes crosswise of the length thereof, and means for connecting said units with a source of current.

1,398,688. GUN MOUNTING AND SIGHTING APPARATUS. BELTON TATTNALL HAMILTON, London, England. Filed May 9, 1921. Serial No. 468,041. 7 Claims. (Cl. 89—40.)



1. In a gun mounting for aircraft and aircraft defense guns, in combination, a fixed support, a gun mounted on said support for universal movement relatively thereto, a sighting device also mounted on said support for universal movement, and means connecting said gun and sighting device whereby angular movement of the gun about its axis will result in an exactly similar and equal movement of the sighting device.

1,398,689. PISTON FOR RECIPROCATORY ENGINES. STEPHEN D. HARROD, St. Louis, Mo. Filed Oct. 29, 1919. Serial No. 334,848. 5 Claims. (Cl. 74—108.)



1. A piston comprising a body having integrally connected inner and outer portions, said outer portion pro-

vided with a series of ribs, a head member for said body, removably attached to said inner portion and locking

means on said head member adapted to prevent the unlocking of the holding means for the head member of said piston.

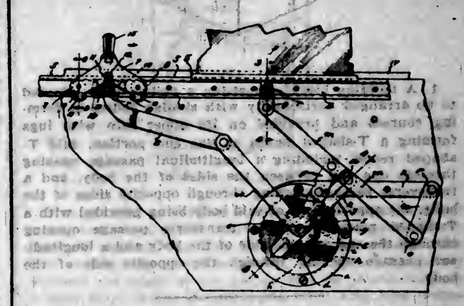
1,398,690. PISTON. STEPHEN D. HARROD, St. Louis, Mo. Filed Apr. 27, 1920. Serial No. 377,108. 7 Claims. (Cl. 74—108.)

2. A piston provided with a packing ring groove, which permits the packing ring within said groove to have its entire interior surface unobstructedly exposed to the contact of oil, whereby said ring is cooled and its tensional resistancy thereby retarded.

1,398,691. FRICTION SHOCK-ABSORBING MECHANISM. STACY B. HASELTINE, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed May 26, 1920. Serial No. 384,822. 4 Claims. (Cl. 213—64.)

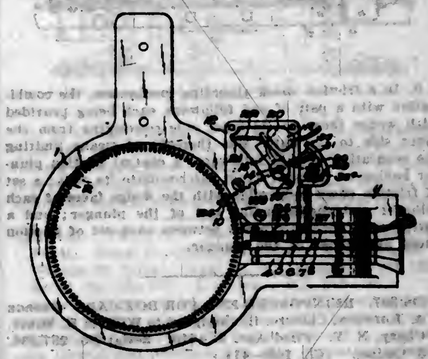
1. In a friction shock absorbing mechanism, the combination with a friction shell, friction shoes coöperable therewith, and spring means to yieldingly resist relative movement between the shell and shoes; of a pressure-transmitting main wedge; a plurality of expansible auxiliary wedges interposed between said main wedge and the friction shoes and coöperable with both; and spring means coöperable directly with said auxiliary wedges and exerting radially inwardly directed pressure thereon to effect collapse of the auxiliary wedges upon removal of the actuating pressure.

1,398,692. FRICTION SHOCK-ABSORBING MECHANISM. STACY B. HASELTINE, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed May 26, 1920. Serial No. 384,826. 3 Claims. (Cl. 213—64.)



1. In a friction shock absorbing mechanism, the combination with a friction shell, spring resistance, and friction shoes coöperable with the shell; of a pressure-apply-

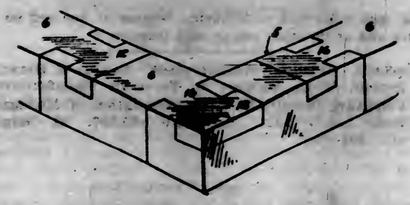
ing member; and oppositely extending toggle elements between said member and shoes, said toggle elements cross-



ing each other and each having bearing at one end on a shoe and at its other end on said member.

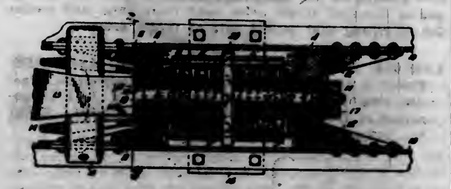
1,398,693. WINDOW-REGULATOR. HARRY E. HEINTZ, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 7, 1921. Serial No. 435,597. 21 Claims. (Cl. 261—4.)

1. In a window regulator, the combination of a frame, a window slidable vertically in the frame, a pair of toggle levers for lifting the window having a fixed pivot at one end of the toggle, a second pair of toggle arms by which the toggle levers may be straightened or broken and pivoted on the same fixed pivot, and operatively engaging the first toggle arms near their knee, and means for operating said second pair of toggle arms.



1,398,694. STOP-MOTION FOR KNITTING-MACHINES. EDSON S. HINELINE, Apponaug, R. I., assignor to Hineline Engineering Company, Providence, R. I., a Corporation of Rhode Island. Filed Mar. 15, 1920. Serial No. 365,940. 24 Claims. (Cl. 66—7.)

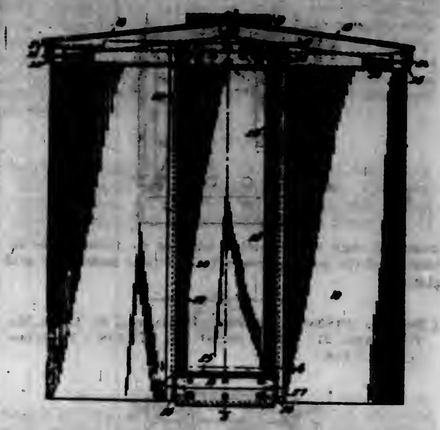
1. The combination with the needles of a knitting machine adapted for both rotary and reciprocating knit-



ting, and a member mounted to slide toward and from the needles, and having functioning relation with respect to the normal path of the needles during rotary knitting whereby it may cause functioning of an emergency device, but having non-functioning relation with respect thereto during reciprocating knitting.

1,398,695. WALL-BLOCK. JOHN W. HULL, San Antonio, Tex., assignor of one-fourth to Henry D. Mantin, San Antonio, Tex. Filed July 12, 1920. Serial No. 395,438. 2 Claims. (Cl. 72—33.)

1. A building block comprising a hollow body adapted to be arranged horizontally with similar bodies in forming courses and provided on its upper face with lugs forming a T-shaped recess at one end portion, said T-shaped recess including a longitudinal passage opening through one end between the sides of the body, and a transverse passage opening through opposite sides of the body, the opposite end of said body being provided with a T-shaped recess having a transverse passage opening through the end and one side of the body and a longitudinal passage opening through the opposite side of the body.

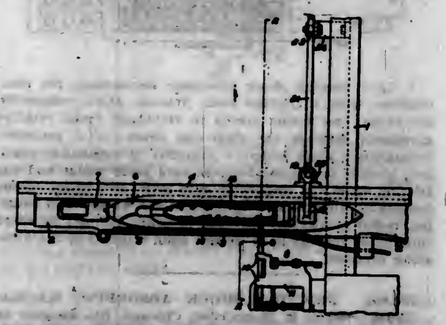


1,398,696. FRICTION SHOCK-ABSORBING MECHANISM. BRADLEY S. JOHNSON, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Dec. 18, 1920. Serial No. 431,745. 6 Claims. (Cl. 213—64.)

5. In a friction shock absorbing mechanism, the combination with a pair of end followers, each being provided with wedge faces on its inner side converging from the inner side to the outer side thereof; of means limiting the separation of said followers; a central friction plunger having an integral flange intermediate its ends; a set of friction shoes coöperable with the wedge faces of each follower and corresponding end of the plunger; and a spring resistance interposed between each set of friction shoes and flange of the plunger.

1,398,697. REINFORCED END FOR BOX-CARS. GEORGE A. JOHNSON, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed Apr. 8, 1919. Serial No. 287,296. 3 Claims. (Cl. 105—411.)

1. In a box car having an end wall comprised of wood sheathing and posts, the combination with commercial shaped reinforcing beams secured to the outer side of said wall, of upper and lower tie plates rigidly secured



to and connecting the upper and lower ends of said beams, said tie plates being interposed between the beams and the sheathing.

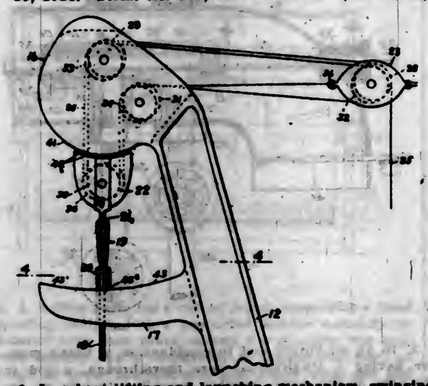
1,398,698. TILE. JOHN B. LANCASTER, Philadelphia, Pa. Filed July 2, 1919. Serial No. 306,322. 1 Claim. (Cl. 72—21.)

As an improved article of manufacture, a tile having a series of tapered grooves, embedded in the back thereof, and extending longitudinally from one end to the other, said grooves being inclined in opposite directions in each half section of said tile, and said tile being thicker at its body portion than at its longitudinal outer edges.

1,398,699. SHUTTLE-POSITIONER. OVIDE LEGENDRE, Fitchburg, Mass., assignor to Thomas C. Sheldon, Fitchburg, Mass. Filed Nov. 15, 1919. Serial No. 338,204. 18 Claims. (Cl. 139—35.)

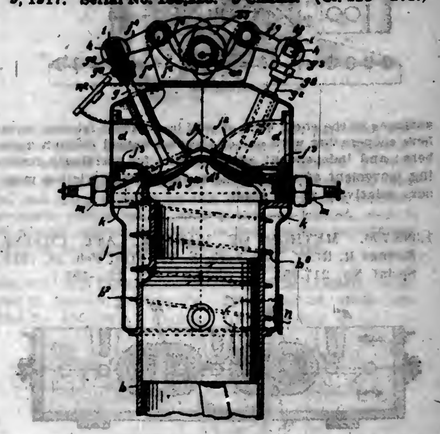
1. In a loom, the combination with a shuttle, of a shuttle box therefor, and means operable independently of the movement of said shuttle automatically to depress said shuttle to its operative position in said box.

1,398,700. NON-COLLAPSIBLE TIRE. JAMES B. LYNCH, Syracuse, N. Y. Filed June 14, 1921. Serial No. 477,875. 5 Claims. (Cl. 152—10.)



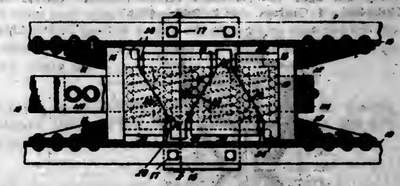
1. A non-collapsible vehicle tire including an inner tube, a shoe covering said tube and having an annular tread rib, the said rib being provided with similar integral laterally extending margins for providing similar oppositely facing annular recesses, and a spring-metal casing forming a protecting envelop for said shoe composed of similar circular sections, the peripheral margins of said sections being rolled for forming beads which are received in said recesses and which resiliently support the external lateral margins of the tread rib and prevent collapsing of the shoe.

1,398,701. ELASTIC STEP-MAT. WARREN MACPHERSON, Cambridge, Mass. Filed Sept. 4, 1920. Serial No. 408,166. 2 Claims. (Cl. 280—166.)



1. A step mat composed of an elastic body having a flat bottom face and spaced apart ribs integral with the body and projecting above the top face of the latter, said ribs and top face forming gutters extending from end to end of the body, and having bottoms which are inclined to permit water to flow from the mid-length to the opposite ends of the body between the ribs, the upper faces of said ribs collectively constituting an antifrictional tread above the body.

1,398,702. BOAT LIFTING AND LAUNCHING MECHANISM. DESIDERIO MAGGI, Philadelphia, Pa. Filed July 19, 1918. Serial No. 245,649. 2 Claims. (Cl. 9—22.)



2. In a boat lifting and launching mechanism, swinging davits having curved lower surfaces at their outer ends, sheaves in the outer ends of the davits above the curved surfaces, a sheave block for each davit adapted to ride against these surfaces, friction reducing means on the blocks engaging the curved ends of the davits and ropes passing about the sheaves of the davits and of the blocks to operate them.

1,398,703. INTERNAL-COMBUSTION ENGINE. BOUDEWIJN B. NEUTEBOOM, Detroit, Mich. Filed Aug. 9, 1917. Serial No. 185,225. 5 Claims. (Cl. 123—173.)

5. A garment combining a skirt portion having opposed front panels, and a belt, a trouser section suspended from the belt beneath the skirt portion and attached to the free vertical edges of the panels, and attaching means whereby the edges of the panels may be joined to form a dress skirt in one instance, and other attaching means securing the lower portions of the panels around the limbs of the wearer below the knees with the panels coöperating, in a second instance, to form a pair of trousers, the side and back sections of the skirt portion retaining their skirt form.

1,398,704. FRICTION DRAFT-GEAR FOR RAILWAY-CARS. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed June 6, 1919. Serial No. 302,256. 11 Claims. (Cl. 213—64.)

1. In a draft rigging for railway cars, in combination, front and rear followers, a plurality of laterally-movable friction elements between said followers, a pair of lateral followers within and common to all of said friction elements and springs mounted between said lateral followers.

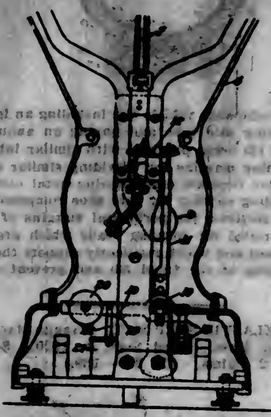
1,398,705. FRICTION SHOCK-ABSORBING MECHANISM. JOHN F. O'CONNOR, Chicago, Ill., assignor to William H. Miner, Chazy, N. Y. Filed May 26, 1920. Serial No. 384,437. 4 Claims. (Cl. 213—64.)

1. In a friction shock absorbing mechanism, the combination with a single friction shell having interior longitudinally extending friction surfaces at the opposite ends thereof and provided also with oppositely arranged interior friction surfaces each inclined with respect to the axis of the shell; of a friction member at each end of

the shell and adapted with respect thereto and cooperating with the corresponding friction members, in addition thereto, a pair of friction members within the shell and each cooperating with one of said inclined friction

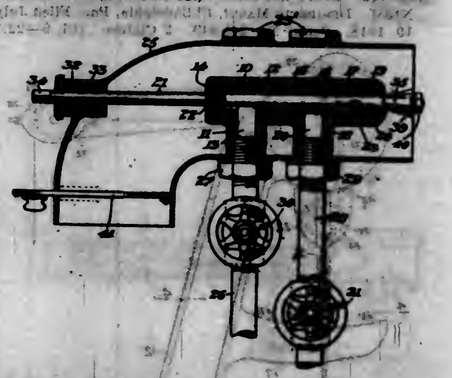
surfaces of the shell, each of said last named friction members cooperating with one of the first named friction members; and independent spring means for yieldingly resisting movement of each of the second named friction members relatively to the shell.

1,398,706. METHOD OF MAKING CAST CHAINS. ROBERT R. RUST, New York, N. Y. Filed Feb. 18, 1918. Serial No. 217,953. 3 Claims. (Cl. 22—197.)



1. The herein-described process of making cast chains from a two-part sand mold, the halves of which are to be brought face to face to form the completed mold, which consists in forming the half molds with a single row with cavities in each half mold for a pair of links and a cavity between such cavities and merging therewith, in inserting in said central cavity a link already cast and a mold member having therein formed cavities corresponding to and completing the cavities for the pair of links, in bringing the halves of the mold together and in pouring the links.

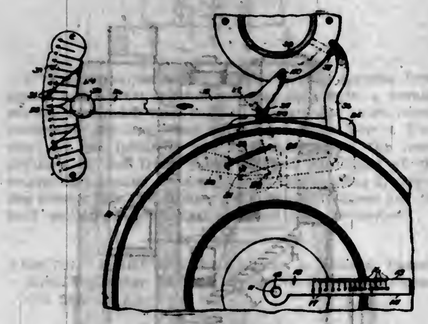
1,398,707. CARBURETER. HARRY K. TARRINGTON, Chicago, Ill., assignor of one-half to Howard L. Babcock, Chicago, Ill. Filed Oct. 18, 1916. Serial No. 126,283. 4 Claims. (Cl. 261—49.)



1. In a carureter, the combination of a mixing chamber, an air inlet passage and a fuel inlet passage, a throttle valve controlling the passage of mixture from the mixing chamber, a pivoted member having a passage therethrough and adapted to be moved to bring said passage into communication with the mixing chamber, a valve controlling the passage through said pivoted member, a fuel inlet passage leading to said pivoted member, a valve controlling said fuel inlet passage, a valve controlling the passage between the chamber and mixing passage, a piston slidable in said chamber to increase the velocity of discharge through said valve independently of the valve adjustment, and means responsive to differences of pressure between the inlet passage and mixing passage for operating said piston.

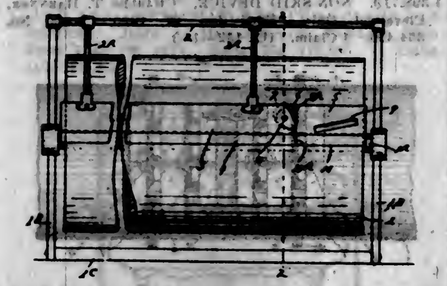
1,398,708. WEIGHING-SCALE. WILLIAM TIMSON, Birmingham, England, assignor to W. & T. Avery, Limited, Birmingham, England. Filed Nov. 15, 1920. Serial No. 424,269. 5 Claims. (Cl. 265—61.)

1. A pendulous weighing scale having in combination a two part compound lever, a scale pan connected to one part of said lever, a weight indicator connected to the other part of said lever, and linkage forming the aforesaid connection, the two parts of the said lever being adapted for independent cooperating motion when a load is violently applied to the scale pan.



1,398,709. OIL-BURNER. JOSEPH T. WENSIULIS, New York, N. Y., assignor to Columbia Machine Works & Malleable Iron Co., Brooklyn, N. Y., a Corporation of New York. Filed Jan. 9, 1920. Serial No. 350,294. 3 Claims. (Cl. 158—78.)

2. In an oil burner and in combination, a nozzle member having a longitudinal bore therethrough, a rod in the bore of the nozzle member providing therein an annular oil discharge passage, a member connected to the said



nozzle and providing therein an annular air discharge passage, the air passage being curved inwardly adjacent its orifice to cause the same to lie in substantially the same plane as the orifice of the oil passage, the said discharge passages having substantially coincident discharge orifices, and a deflector member journaled on the rod adjacent the discharge orifices of the said oil and air passages and adapted to be operated by the discharge of the oil and air therefrom.

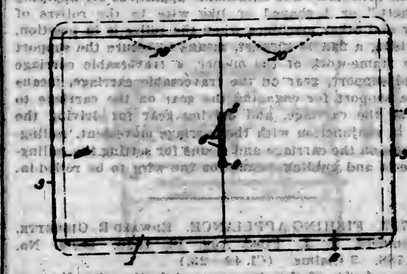
1,398,710. INDICATOR OR MEASURING GAGE FOR DISK RECORDS. OTTO ROSENBAT, Chicago, Ill., assignor to Vitanola Talking Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 19, 1920. Serial No. 374,914. 5 Claims. (Cl. 192—116.)

1. An indicator or measuring gage for use with disk records for measuring or indicating the point of termination of the sound grooves on the record, in combination with brake or stop mechanism, and means cooperating with the said indicator or gage whereby the said mechanism may be set to correspondingly rendered active, the said means embodying a dial and pointer, said dial and indicating means having cooperating graduations thereon.

1,398,711. PAPER-CUTTER. FRANK J. ROSUKY, Detroit, Mich. Filed Sept. 27, 1920. Serial No. 413,159. 7 Claims. (Cl. 211—32.)

6. A cutting blade for a roll of paper comprising a fixed supporting section and a supported section normally in alinement with each other, means for swinging the supported section out of alinement to expose the edge of the roll of paper therebetween and means upon the end of the supporting section for maintaining alinement between the sections.

1,398,712. POWDER-PUFF. FRANK J. ROSUKY, Detroit, Mich. Filed Feb. 8, 1921. Serial No. 442,072. 6 Claims. (Cl. 132—86.)



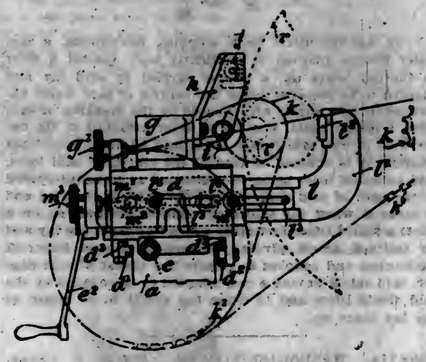
2. A powder puff having a facing of soft material, and having a fabric lining for its rear face, and a segmental pocket secured to said lining, the peripheral portion of said facing being rolled to marginally cover said rear face, and being stitched to said lining forming a circular depression within which said pocket is located, and a disk shaped mirror insertible in said pocket and fitting snugly in said depression when so inserted.

1,398,713. FILLING STOP-MOTION FOR LOOMS. HARVEY O. BROWN, Easton, Pa. Filed Aug. 24, 1920. Serial No. 405,606. 7 Claims. (Cl. 139—84.)

1. In an automatic loom stopping mechanism, a lay, feeler fingers adapted to resiliently bear against a filler as the lay beats up, a dagger carried by said lay and adapted to be elevated under the control of said feeler fingers when said fingers are released by the breaking of said filler, a breast beam, a knock-off lever attached to the upper face of the said breast beam and having connections whereby it is adapted to control the clutch of said loom, said knock-off lever being so positioned as to be interposed in the path of said dagger when the same is elevated and to clear it when the said feeler fingers are bearing on a filler, a shield lifter forwardly projecting from the lay and an inclined shield pivotally attached to said knock-off mechanism and adapted to receive the thrust of said dagger, said shield having a cam adapted to be engaged by the said shield lifter and to cause the shield to be raised as the lay beats up.

1,398,714. WINDSHIELD-COVER. ALBERT E. CANBY, Hubbard, Ohio. Filed Oct. 30, 1920. Serial No. 420,677. 3 Claims. (Cl. 296—84.)

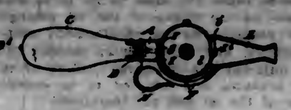
1. A cover for automobile windshields, comprising a pair of complemental plates adapted to be mounted in hori-



sentially-alined vision-obstructing relation to a windshield, each plate having a hook formed at its outer lateral edge for partially embracing the end portion of the frame of the windshield when the opposite edges of said plates occupy meeting relation, and means for interlocking said meeting edges.

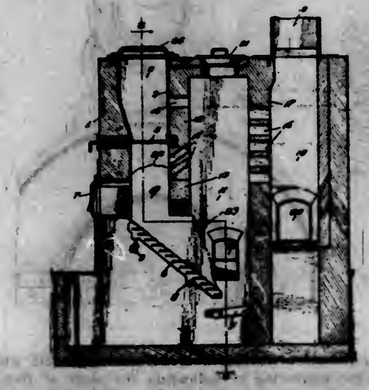
1,398,715. DIRECTION-INDICATOR. John Cupar, Nelta, Ohio. Filed June 18, 1921. Serial No. 478,759. 1 Claim. (Cl. 116—26.)

In a device of the class described, the combination with the steering mechanism of a vehicle, of a supporting bar, opposed gear trains carried by the bar, a signaling means mounted at each end of the bar and adapted to be operated by the gear trains, and a pair of toothed segments radiating from the steering mechanism in such position as to alternately operate said gear trains when the steering mechanism is rotated.



1,398,716. MEANS FOR APPLYING GARNETT OR LIKE WIRE TO ROLLERS OR CYLINDRICAL SURFACES. James Dearnaley, Oldham, England. Filed Mar. 9, 1920. Serial No. 364,558. 5 Claims. (Cl. 140—97.)

1. An attachable and detachable apparatus for applying "Garnett" or L-shaped or like wire to the rollers of opener and other machines when the roller is in position, comprising a fixable support, means to secure the support to the frame-work of the opener, a traversable carriage on said support, gear on the traversable carriage, means on the support for engaging the gear on the carriage to traverse the carriage, and driving gear for driving the roller in conjunction with the carriage movement, rolling-in wheels on the carriage and means for setting the rolling-in wheels and guiding means for the wire to be rolled-in.



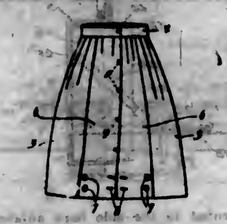
1,398,717. FISHING APPLIANCE. Edward R. Gillette, Bloomfield, N. J. Filed Aug. 16, 1920. Serial No. 403,788. 3 Claims. (Cl. 43—23.)

1. In a device of the character set forth, a handle having transverse grooves at its end, a tubular line-guide in axial alinement with said handle and having notches in its sides, a curved bar connecting said handle and guide, a reel having base pillars received in such grooves and a

pillar engaged in such notches, and a locking-plate arranged to clamp said base pillars to said handle.

1,398,718. INCINERATOR. Joseph Goess, Chicago, Ill. Filed Dec. 13, 1917. Serial No. 206,870. 9 Claims. (Cl. 110—17.)

2. In a furnace of the class described, an inclined grate, a substantially vertical distillation chamber disposed above a portion of the grate, a drying chamber disposed above the distillation chamber, and a combustion chamber disposed above another portion of the grate and separated from both of the aforesaid chambers by a partition wall terminating at a distance above the inclined grate, the said partition wall being equipped with ports leading respectively from the combustion chamber to the other two chambers.

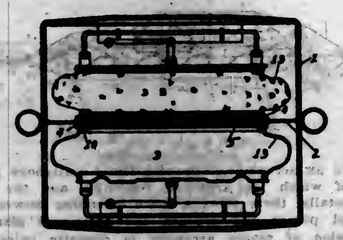


1,398,719. NON-SKID DEVICE. Charles T. Hannner, Cleveland, Ohio. Filed Jan. 27, 1920. Serial No. 354,495. 1 Claim. (Cl. 152—14.)

A non-skid device comprising a single unit consisting of four distinctively formed members, each member of said unit being a rectangular plate curved to conform to the curvature of a tire, each plate having a double row of lugs extending transversely thereof, the entire series of lugs of said unit having radial faces on one side thereof, and beveled faces upon the opposite side of said series, means flexibly connecting said members transversely and

longitudinally, and flexible elements attached to the lugs at the respective outer corners of said members for connecting the unit to the tire.

1,398,720. GARMENT. Madeline M. Hershey, Los Angeles, Calif. Filed Aug. 19, 1920. Serial No. 404,569. 5 Claims. (Cl. 2—134.)

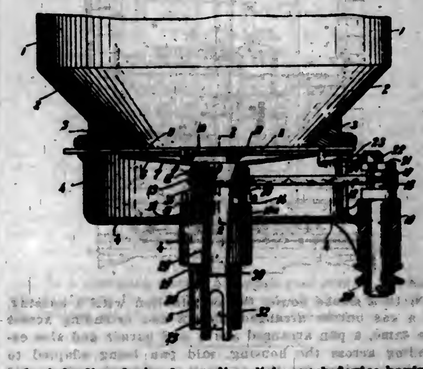


1. A garment combining a skirt having opposed front panels and a back section attached to a belt, a trouser portion suspended from the belt beneath the skirt, means connecting the free edges of the panels to form a dress skirt in one instance, and means attaching the lower portions of the front panels around the limbs of the wearer in a second instance, the panels forming fronts of the trouser legs and trouser cuffs below the knees and the back section maintaining its normal skirt formation.

1,398,721. FISHING-REEL. Glenn A. Higbee, Detroit, Mich. Filed Mar. 26, 1921. Serial No. 456,940. 5 Claims. (Cl. 242—84.5.)

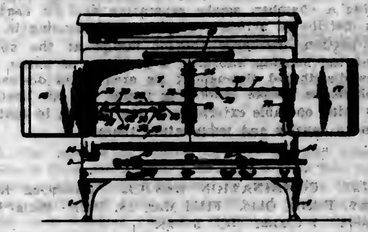
2. A fishing reel comprising a frame, a drum revolubly mounted in said frame, means for rotating said drum, a fish line wound upon said drum, and a rotative member carried by the frame driven in common with the drum for tensioning the portion of the line adjacent the drum.

1,398,722. DETACHABLE DIAPHRAGM FOR GASMETERS. John A. Himmelspach, Saginaw, Mich. Filed June 20, 1921. Serial No. 479,027. 1 Claim. (Cl. 73—1.)



In a gas meter including a partition and flexible bellows, means removably securing said bellows to said partition, said means comprising a base ring having a channel formed therein, said base ring secured to said partition, a diaphragm ring registering with said base ring and adapted to be secured thereto, said diaphragm ring having a laterally extending flange and an axially extending bead, the edge of said bellows secured to said bead, and means for removably securing said diaphragm ring to said base ring, for the purposes set forth.

1,398,723. METHOD OF LEACHING ORES AND THE LIKE. John W. Hornsby, Summit, N. J. Filed Nov. 13, 1917. Serial No. 201,775. 9 Claims. (Cl. 25—21.)

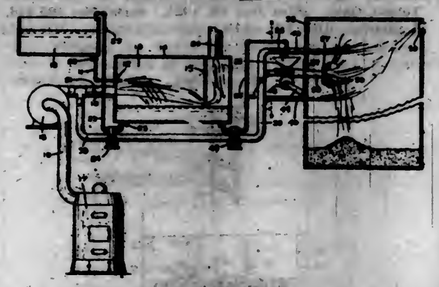


9. The method of leaching ores and the like which comprises, subjecting the material successively to the leaching action of separate bodies of liquid, maintaining suspension of the material in the separate bodies of liquid by vigorous agitation and permitting the material to settle after passing one zone of agitation and before entering the succeeding zone.

1,398,724. FEEDING DEVICE FOR SEALING-DISKS. Carl Walker Kendall, Edgewater Heights, N. J., assignor to Columbia Machine & Stopper Co. Inc., New York, N. Y., a Corporation of New York. Filed Feb. 8, 1919. Serial No. 275,765. 9 Claims. (Cl. 113—113.)

1. A feeding device for sealing disks, such device having, in combination, a hopper having a bottom provided with an outlet, and an elongated agitating member movable transversely of its length within said hopper adjacent to said outlet and spaced from said bottom a distance greater than the thickness and less than the width of a sealing disk, and means for moving said elongated agitating member transversely to its length.

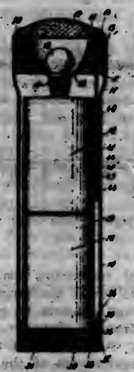
1,398,725. CONVERTIBLE STOVE-OVEN. Joseph Knebel, Cleveland, Ohio, assignor to Herman J. Tronkamp, Cleveland, Ohio. Filed Aug. 9, 1919. Serial No. 316,854. 13 Claims. (Cl. 126—337.)



1. A device of the character described comprising a pair of shelves each provided a given distance from one end with a pair of eyes, and a bracket provided at each

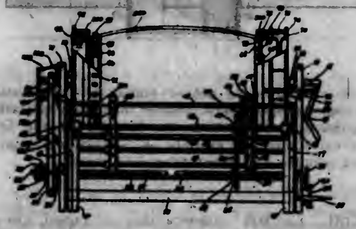
[illegible] gate of the [illegible] [illegible] [illegible]

tem, and finally subjecting the remainder of the fumes to treatment at said station to further separate condensable elements from said fumes.



1,398,735. METHOD OF DESICCATING FLUID MIXTURES. JOHN C. MACLACHLAN, St. Paul, Minn., assignor to Standard Food Products Company, St. Paul, Minn., a Corporation of Delaware. Filed Aug. 21, 1918, Serial No. 250,997. Renewed Feb. 2, 1921. Serial No. 441,995. 9 Claims. (Cl. 99—5.)

1. The process of reducing heavy liquid or semi-liquid substances to dry finely divided form, which consists in projecting the same at high velocity within a space containing a hot gaseous drying material, and in intercepting and violently beating the same in the presence of said hot gaseous drying medium, by means of blades or striking members that are moved positively and at high velocity.



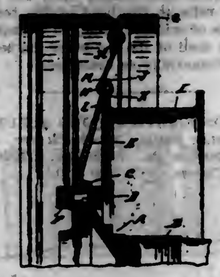
6. The process of producing from milk a dry granular divided substance which consists in delivering the milk in a spray or shower through hot air to reduce the same to a heavy viscous consistency and thereafter projecting such heavy condensed substance at high velocity within a space containing hot gaseous drying material and intercepting and violently beating the same in the presence of said hot gaseous drying medium to complete the reduction of the substance to a dry divided granular form.

1,398,736. HANDLAMP. ARTHUR P. PAINE, New Haven, Conn., assignor to Winchester Repeating Arms Company, New Haven, Conn., a Corporation of Connecticut. Filed Apr. 2, 1920. Serial No. 370,643. 11 Claims. (Cl. 240—8.5.)

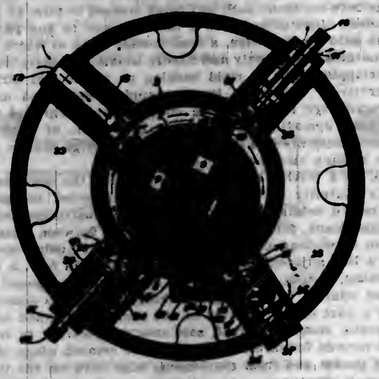
1. A hand lamp comprising a casing adapted to contain a battery and provided at each end with a threaded portion of reduced diameter, a reflector mounted upon one end of the casing, a lamp carried by the reflector, a lens mounted upon the outer edge of the reflector, a ring adapted to be screwed upon the corresponding reduced portion of the casing for clamping the lens and reflector in place, and a cap adapted to be screwed upon the reduced portion at the other end of the casing to hold the battery in place therein, said ring and said cap being formed with smooth outer surfaces adapted to lie flush with the exterior of the casing when the ring and cap are in place thereon.

1,398,737. BARREL-ASSEMBLING MACHINE. FRANK PODNIAD, Wyandotte, Mich. Filed Aug. 11, 1920. Serial No. 402,781. 1 Claim. (Cl. 147—2.)

The combination in a barrel assembling machine having rotatable drums, of means for supporting hoops thereon, belt driven means for conveying staves to the drum, and means for securing staves upon the drums, said means consisting of spring controlled notched gripping dogs radially disposed within the drums, their notches engaging the ends of the staves and means for shifting each hook in succession to admit the end of a stave.



1,398,738. METALLIC VEHICLE-WHEEL. ALDEN L. PUTNAM, Detroit, Mich., assignor, by mesne assignments, to Detroit Pressed Steel Company, Wilmington, Del., a Corporation of Delaware. Filed Apr. 28, 1919. Serial No. 293,195. 7 Claims. (Cl. 301—6.)



7. In a vehicle wheel, the combination with a rim and a two part hub, of a dished disk peripherally secured to said rim and clamped between the parts of said hub, in close proximity to the plane of impact established by said rim.

1,398,739. VEHICLE-WHEEL. ALDEN L. PUTNAM, Detroit, Mich., assignor to Detroit Pressed Steel Company, Wilmington, Del., a Corporation of Delaware. Filed Apr. 15, 1920. Serial No. 374,172. 8 Claims. (Cl. 301—6.)

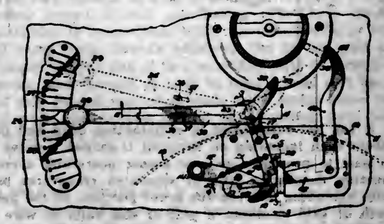
1. The combination with a wheel of the disk type, of a brake drum for said wheel having an outwardly projecting radial flange with an annular shoulder thereon, said flange being parallel to a portion of the disk, and a corresponding shoulder on said disk for engaging the shoulder on said flange and centering the drum with the axis of the wheel.

1,398,740. POWER-TRANSMISSION DEVICE. WILLIAM L. RINEHART, St. Louis, Mo. Filed July 2, 1919. Serial No. 308,282. 4 Claims. (Cl. 192—58.)

1. A power transmission device comprising a rotary drive shaft, a rotary driven shaft, a rotary pump through which motion is transmitted from said drive shaft to said driven shaft, said rotary pump having a rotary piston fixed to said drive shaft, and a rotary cylinder fixed to said driven shaft, said rotary piston being arranged within the said rotary cylinder and spaced therefrom to provide a space wherein the fluid is compressed to yieldingly transmit movement from said drive member to said driven member, said rotary cylinder being provided with a discharge port which communicates with the fluid compression chamber and also with the atmosphere, and a speed changing valve operating in said port comprising a tapering valve seat, a ball-valve, a spring tending to keep the said ball seated, and an operating rod coöperating with said ball-valve whereby the said ball may be manipulated to vary the discharge of fluid to the atmosphere.

1,398,741. GRINDER OR SHARPENER FOR KNIVES, &c. JOHN MITCHELL ROSS, Philadelphia, Pa. Filed Sept. 28, 1920. Serial No. 412,268. 4 Claims. (Cl. 51—210.)

1. In a grinding or sharpening device of the character stated, a hollow body of grinding or sharpening material, a loose disk in the hollow of said body having its periphery



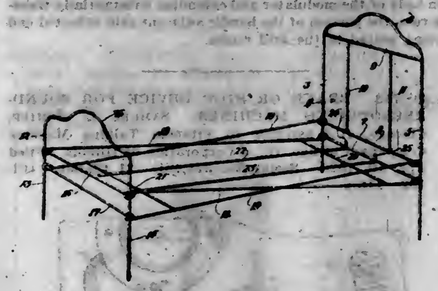
engaging frictionally the inner periphery of said body, and means for supporting said disk and consequently said body.

1,398,742. SOUND-REPRODUCING MACHINE. HENRY T. SCHIFF, Chicago, Ill., assignor to Vitanola Talking Machine Co., a Corporation of Illinois. Filed Feb. 14, 1920. Serial No. 358,702. 4 Claims. (Cl. 187—27.)

1. A device of the character described embodying a passage for sound waves, a sound modulator constructed entirely of flexible fibrous material, and having a recess in one edge, and a handle having a deflected extremity, the said deflected extremity of the handle being seated in th body of the modulator and extending substantially thereacross, the portion of the handle adjacent said deflected end being seated in the said recess.

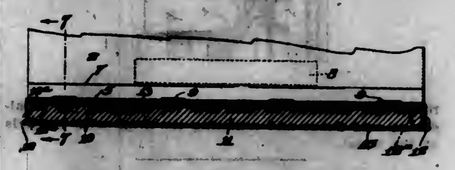
1,398,743. BRAKE OR STOP DEVICE FOR SOUND-REPRODUCING MACHINES. SAMUEL L. SCHIFF, Chicago, Ill., assignor to Vitanola Talking Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 19, 1920. Serial No. 374,881. 21 Claims. (Cl. 192—116.)

1. In combination with a rotatable part of a phonograph or the like, a pivotally mounted brake therefor, means tending normally to render the brake effective, a latch adapted to coöperate with the brake for maintaining the brake ineffective, a tripping element for shifting the latch to release the brake to permit the latter to become effective, means operatively related to the tone arm for actuating



the tripping element, and the feature for putting the tripping element to vary the times of extraction of the latch by the said tripping element with respect to the degree of movement of the tone arm, the said latch being operatively connected with the said indicator through the medium of the said tripping element.

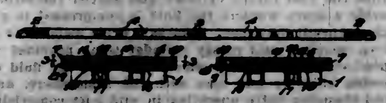
1,398,744. CABINET. JOHN F. BOWLANDER, Chicago, Ill. Filed Jan. 6, 1921. Serial No. 435,388. 7 Claims. (Cl. 211—41.)



4. A cabinet comprising upright frame members at the ends and intermediate thereof, and tray-supporting members carried by said uprights, each of said tray-supporting members carried by said intermediate uprights having horizontally alined transverse arms adapted to support the opposed ends of adjacent trays, and each of the tray-supporting members carried by said end uprights having a single transverse arm cooperating with the oppositely extending transverse arm of an intermediate tray-supporting member to support a tray therebetween.

1,398,745. TOY BED. EMMETT COLEMAN SILVER, Chicago, Ill. Filed June 13, 1921. Serial No. 477,194. 3 Claims. (Cl. 5—9.)

1. A toy bed comprising in combination head and foot members each including an inverted U-shaped member of wire bent to provide a pair of corner posts and a cross connecting member, a pair of separated transverse bars of wire extending between the lower portions of the posts of each of said members, a pair of side rails of wire at each side of the bed each having one of its ends pivotally connected to the upper cross bar of one member and to the lower cross bar of the other member, whereby the side rails at each side of the bed extend in criss-cross fashion longitudinally of such side, a cross bar of wire extending between the lower end portions of the side rails adjacent to the head of the bed, a cross bar of wire extending between the lower end portions of the side rails adjacent to the foot of the bed, a pair of longitudinally extending slats of wire having their foot ends engaged to the cross bar between the side rails at the foot of the bed and their head ends resting upon the cross bar between the side rails at the head of the bed, and hooks on the head ends of said slats adapted to engage the lower cross bar of the head of the bed when the bed is in working position, substantially as described.

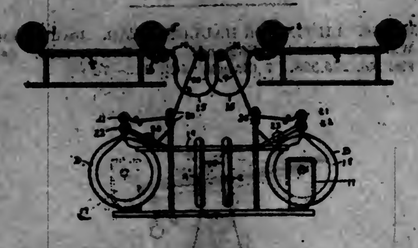


1,398,746. PHONOGRAPH-RECORD ALBUM. JACOB M. SMILEN, NATHAN SEGAL, JACOB CHAITT, and NATHAN RUDIN, Philadelphia, Pa. Filed Nov. 4, 1920. Serial No. 421,652. 7 Claims. (Cl. 369—20.)

1. In a talking machine record album, the combination with a plurality of two-leaf signatures composed of a pair of record-holding leaf pockets united to form a binding edge between them, each leaf being creased to form an independent hinge therefor on a line adjacent to and parallel with said binding edge, a semi-flexible strip to which said signatures are directly and fixedly bound, said strip having overlapping ends, a rigid backing to which said strip is operatively united by its overlapping ends, and means secured over the extending ends of said strip and rigid backing operating to reinforce the union of said last named elements and exclude dust and foreign matter from the binding elements.

5. In a talking machine record album, the combination of a plurality of pairs of leaves constructed to operate as record holding pockets, said leaves constructed from a single blank folded on a medial line between them to form a two-leaf signature, each leaf pocket being creased on a line adjacent to and parallel with said fold, a rigid backing, means to secure said signatures in spaced and fixed relation to said rigid backing, and means constituting a part of one member of the pocket leaf glued to the opposite member thereof, said means operating to retain the records forwardly away from the creased hinge of the leaf pocket and from the binding edge between the leaves of each signature.

1,398,747. WATER-HEATER. SAMUEL C. SMITH, Chicago, Ill., assignor of one-half to Loren L. Hoffmann, Chicago, Ill. Filed Jan. 30, 1920. Serial No. 352,805. 4 Claims. (Cl. 126—53.)



2. A water heating attachment, comprising a chamber consisting of two parts, a water inlet to said chamber and a water discharge leading therefrom, one of said parts having extensions projecting therefrom, a plurality of separated vertically disposed flues passing through said extensions and through apertures in alinement with the flues in the other part forming said chamber, the flues receiving heating gases to intensely heat water surrounding the projecting parts prior to the discharge thereof.

1,398,748. MEANS FOR SECURING RAILS OR BEAMS OR GIRDERS TO CORRUGATED SUPPORTS, WALLS OR FLOORS. DURGA DHARSEN SHARMA, Delhi, India. Filed Dec. 15, 1920. Serial No. 430,902. 4 Claims. (Cl. 238—271.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a concrete support having a hole for the reception of a plug into which a hold fast is driven, a corrugated wall of said hole presenting projections to said plug, and a reinforcement extending along the crests of the corrugations of said wall.

1,398,749. METHOD AND APPARATUS FOR MANUFACTURING TIRES. WILLIAM C. STEVENS, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Oct. 18, 1918. Serial No. 257,923. Renewed Apr. 28, 1921. Serial No. 464,894. 16 Claims. (Cl. 154—14.)

1. In the process of manufacturing tires, the steps of cutting fabric into a plurality of strips, building a continuous length from said strips, leading said length directly from said forming point to a core, and applying the fabric to the core.

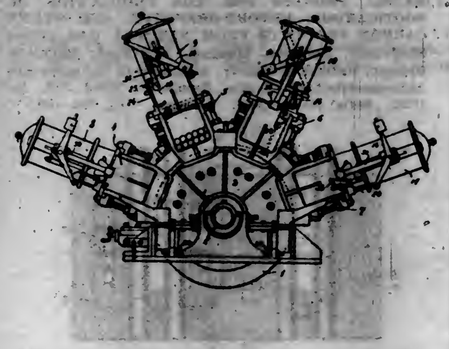
1,398,750. AEROPLANE. JOHN H. STEWART, Cincinnati, Ohio. Filed Mar. 10, 1919. Serial No. 281,665. 17 Claims. (Cl. 244—15.)

1. The combination of an aeroplane comprising in part laterally extending planes with ailerons, driving motor and propeller and a separate helicopter construction rotatably mounted thereon, in fixed relation thereto, and means for converting said helicopter into a normal flying plane.

1,398,751. PROCESS FOR THE PRODUCTION OF SOOT-CARBON, RETORT-GRAPHITE, AND OTHER CARBON PRODUCTS FROM NATURAL GAS. IMRE SZARVASSY, Budapest, Hungary, and FRITZ HEINRICH RENNEL, Ratibor, Germany, assignors to Ratgerswerke Aktiengesellschaft, Berlin, Germany. Filed Feb. 14, 1921. Serial No. 444,965. 3 Claims. (Cl. 134—60.)

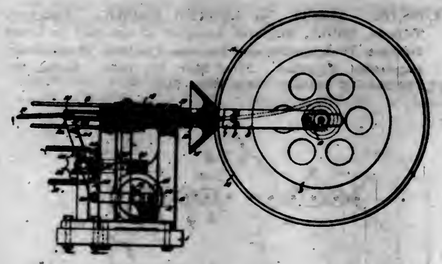
1. Process for the production of soot-carbon, retort graphite and other carbon products from natural gases, characterised in that the natural gas, which is continuously passed through the retorts, is decomposed by about 95%, and the natural gas which has not been completely decomposed is used in combination with the gases produced during the process of decomposition for heating the gas retorts.

1,398,752. TERRY OR LOOPED FABRIC. PERCIVAL TAYLOR, Bolton, England, assignor of one-half to James Johnson Hodgkinson and Pearson Limited, Manchester, Lancaster, England. Filed Mar. 31, 1919. Serial No. 286,314. 3 Claims. (Cl. 139—71.)



1. A terry-fabric composed of terry warp threads arranged in pairs, one thread of one pair being made to take over two threads of weft over which it forms a loop, the other thread of said pair taking over three threads of weft also to form a loop, while the two threads of the pair of terry warp threads adjoining the former pair are arranged so that one of this secondary pair of threads takes under two threads of weft to form a loop and the other of said second pair of threads takes under three threads of weft, also to form a loop, thus forming terry loops of two sizes on both sides of the fabric.

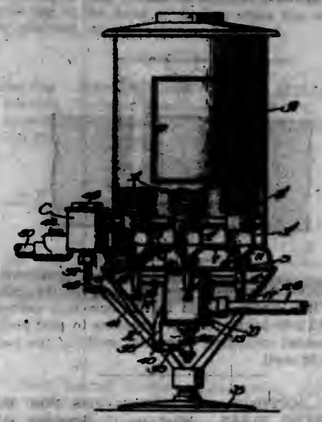
1,398,753. WOOD-PULP GRINDER. WILLIAM RUTGERS TIDMARSH, Bangor, Me., assignor of one-half to Union Iron Works, Bangor, Me., a Corporation of Maine. Filed Aug. 31, 1920. Serial No. 407,153. 6 Claims. (Cl. 83—76.)



1. In a grinding machine the combination of a grinding element, a pocket adjacent the grinding element adapted to receive the material to be ground, a door on the pocket, a reciprocating pressure foot in said pocket for forcing the material to be ground against the grinding element.

means for automatically retracting the pressure foot when the pocket is ready for recharging, and means movable

with the pressure foot for opening the door as the pressure foot is retracted.



1,398,754. CHENILLE UNTWISTING AND WINDING MACHINE. GEORGE C. L. TISCH, Elizabeth, N. J. Filed June 11, 1920. Serial No. 388,103. 6 Claims. (Cl. 139—40.)

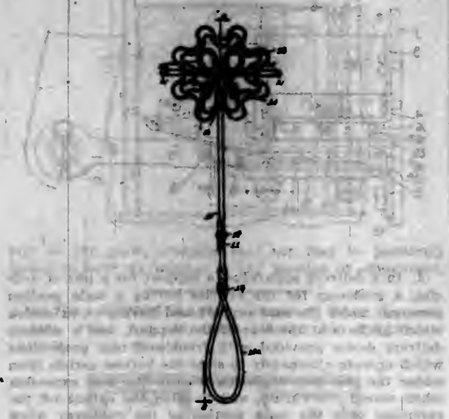
1. A chenille untwisting machine, comprising a drum for receiving chenille, a bracket carrying said drum, a tube directing the chenille to the drum, a cone carried by said tube, said tube being non-rotatable, means connected with the bracket for rotating the same, said drum being rotatably mounted in the bracket so as to rotate independently in a plane at right angles to the plane of rotation of the bracket, a beveled disk connected with said drum and engaging said cone whereby as the bracket and disk are rotated, said disk will frictionally engage the cone and be rotated in a plane at right angles to the rotation of the bracket and thereby rotate said drum, and means causing said disk to press against said cone.

1,398,755. WATER-HEATER. CLAUDE H. TOOMBS, Geneva, Ill., assignor to The Toombs Manufacturing Company, Geneva, Ill., a Corporation of Illinois. Filed May 24, 1919. Serial No. 299,645. 11 Claims. (Cl. 236—25.)

3. In a water heater, the combination of a plurality of water heating coils, burners for said coils, a gas chamber having a head provided with gas conduits leading to said burners and gas ports communicating with said conduits,

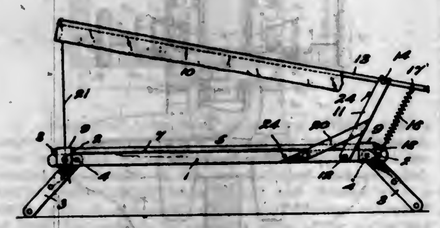
and a gas valve normally closing said ports and serving when closed to prohibit communication between the conduits.

1,398,756. LIFTING OR HAULING GEAR. JOAN HAIGH WALKER, Woolwich, England. Filed Dec. 6, 1918. Serial No. 265,528. 7 Claims. (Cl. 212—76.)



1. A load transfer apparatus including a substantially straight strut, supporting means for the strut, said strut being of such length and weight and the supporting means engaging the strut at such points that the central portion of the strut normally tends to sag downwardly under the force of gravity, a flexible member having its ends fixed to the underside of the ends of the strut, and a load supporting carriage movably mounted on said flexible member and movable along the same, whereby the weight of the load to be transported tends to buckle the strut upwardly at its central portion thereby counter-acting the force of gravity which tends to make the strut sag downwardly at the center, and enables a comparatively light weight strut to be used for transferring heavy loads over long spans.

1,398,757. COOKING DEVICE. KATE A. WHEGARDEN, Vibank, Saskatchewan, Canada. Filed Oct. 28, 1920. Serial No. 420,188. 3 Claims. (Cl. 53—5.)



1. A cooking device of the class described including a body adapted to hold and give shape to the paste to be cooked and comprising inner and outer members in fixed

spaced relation to each other; and an ejector disposed between the inner and outer members of the body and

movable rearwardly therein to an inner inoperative position, or forward therein for ejecting the cooked article.

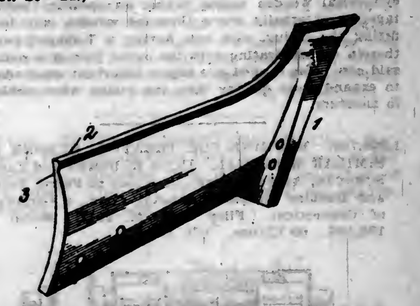
1,398,758. FOLDING COT. CHARLES DOUGLAS WINFIELD, Brooklyn, N. Y. Filed Sept. 18, 1920. Serial No. 411,199. 2 Claims. (Cl. 5—14.)

1. In a cot of the character described the combination with a frame of a pair of upright arms pivotally connected at their lower ends to the head portion of the frame, braces connecting said arms and frame, an adjustable canopy pivotally and detachably connected to the upper ends of said arms, resilient means located intermediate the pivotal and the end portion of the canopy and connecting said frame and canopy for yieldably holding said canopy in an adjusted position and means connecting the canopy and frame for adjusting the canopy and for preventing its accidental upward displacement.

1,398,759. LUBRICATING COMPOSITION. WILLIAM H. WOOD, Richmond, Calif. Filed Aug. 4, 1920. Serial No. 401,218. 1 Claim. (Cl. 87—9.)

A lubricating composition consisting of 16 parts of a grease or oil base and substantially one part each of carbonate of sodium and nitrate of ammonia separately occluded therein.

1,398,760. MEANS FOR CASTING POTTERY AND LIKE ARTICLES. BERNARD JAMES ALLEN, Blythe Bridge, England. Filed Aug. 25, 1919. Serial No. 319,527. 4 Claims. (Cl. 25—29.)

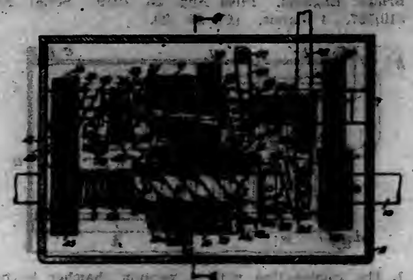


1. The combination with a vacuum chamber having internal tracks, of a porous mold located entirely within the chamber and movably mounted on said tracks.

1,398,761. ORTHODONTIC APPLIANCE. EDWARD H. ANGLE, Pasadena, Calif., and SPENCER R. ATKINSON, Atlanta, Ga. Filed June 15, 1921. Serial No. 477,824. 7 Claims. (Cl. 32—19.)

1. An orthodontic appliance comprising an anchorage device provided with an arch-bar sheath having a bore for the arch-bar and a key-way for a spline integrally carried by said arch-bar.

1,398,762. PLOW-POINT. STANLEY APGAR, High Bridge, N. J., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J., a Corporation of New Jersey. Filed June 17, 1920. Serial No. 389,670. 2 Claims. (Cl. 29—14.)

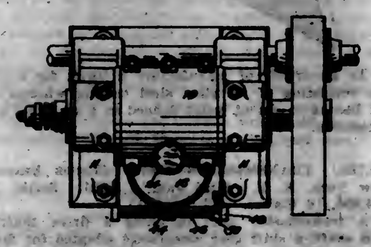


1. As an article of manufacture a blank for a plow share consisting of an alloy steel casting whereof the point has an excess of metal defined as a marginal bead or extension.

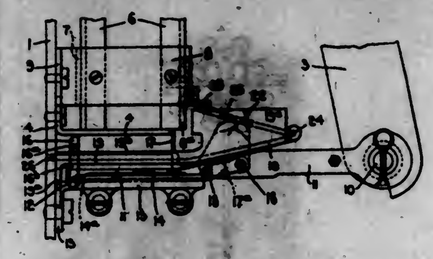
1,398,763. TRANSMISSION-GEAR. CLAUDE BEARENS, New York, N. Y. Filed Jan. 4, 1921. Serial No. 434,890. 6 Claims. (Cl. 74—59.)

1. A transmission gear including a drive shaft, a driven shaft, a shift gear assemblage adapted for direct engagement with the drive shaft for high speed drive, and yieldable to undue load resistance to disengage itself from the drive shaft, intermediate and low speed gear elements, adapted respectively to drive said shift assem-

binge, clutches to selectively bring into action said intermediate or low speed gear elements, and means responsive to a varying degree of shifting movement of said assemblage to successively bring into action the intermediate and low gear drive elements.

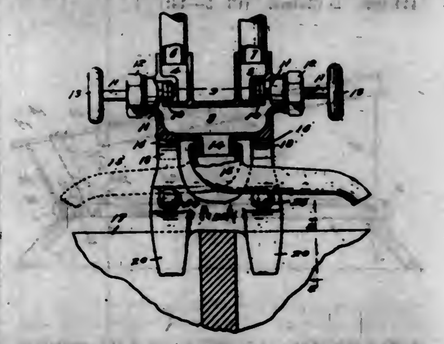


1,398,764. VALVE. Morris Blum, Los Angeles, Calif. Filed Dec. 15, 1920. Serial No. 430,846. 3 Claims. (Cl. 236—66.)



2. A valve comprising an internally screw threaded cylindrical wooden casing having an opening therein, a tapering externally screw threaded wooden core loosely fitting the casing, said core having a T-shaped passage therein communicating with the outlet pipe of a radiator, said core being formed of a highly absorbent wood adapted to expand more quickly than the casing when subjected to moisture.

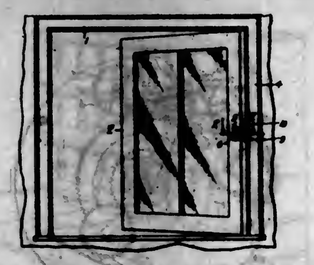
1,398,765. MACHINE FOR TREATING RUBBER AND SIMILAR MATERIAL. David R. Bowen and Carl F. Schnuck, Ansonia, Conn., assignors to Farrel Foundry and Machine Company, Ansonia, Conn., a Corporation of Connecticut. Filed Sept. 25, 1917. Serial No. 193,186. 60 Claims. (Cl. 18—2.)



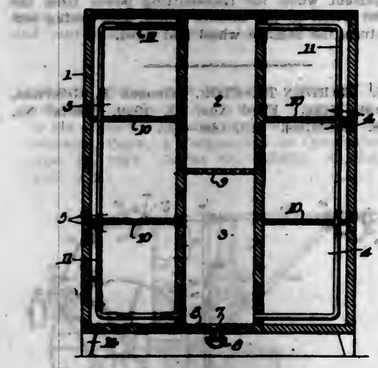
1. In a rubber mixer or like machine, a working chamber, and a plurality of auxiliary chambers or containers cooperating successively therewith.

1,398,766. COIN-FREED DELIVERY APPARATUS. Henry Brocklehurst, Goodmayes, England. Filed Dec. 27, 1920. Serial No. 433,403. 9 Claims. (Cl. 211—8.)

1. In a delivery apparatus, a support for a pile of articles, a guideway for the articles having a main portion arranged under the said support and having an extension which projects at the rear of the support, and a slidable delivery device provided with front and rear projections which operate alternately to slide the bottom article from under the pile and discharge it onto the said extension when moved rearwardly, and to slide the article off the extension onto the main portion of the guideway when moved forwardly, whereby the article thus moved forwardly is enabled to push a similar article, previously moved forwardly, from the guideway.



1,398,767. FAUCET AND ATTACHING BRACKET. Olof S. Burman, Minneapolis, Minn. Filed Feb. 10, 1921. Serial No. 443,882. 7 Claims. (Cl. 4—24.)

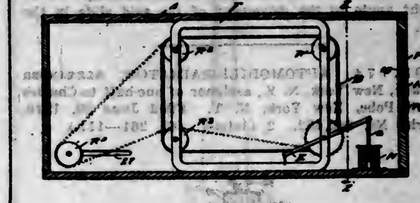


1. The combination with a faucet having a swinging nozzle, of a support, and an attaching bracket having pairs of clamping jaws engageable with the faucet on each side of the swinging nozzle and with the support.

1,398,768. CASEMENT-HOLDER. Walter L. Burtis, Tuckahoe, N. Y. Filed Sept. 13, 1919. Serial No. 324,376. 1 Claim. (Cl. 292—267.)

The combination with a frame having an opening therein and a hinged window connected to the frame, of a plate located inside the window positioned over said opening and having a slot therein registering with the opening, an arcuate bar connected to the window and movable through said slot and opening, said bar including connected upper and lower fingers, a beveled edge cam pivotally connected to and movable over the face of the plate, an operating handle on said cam for operating the cam, said cam adapted to be moved into locked engagement with one serrated face of the bar and to force the other serrated face into positive locked engagement with the wall of the slot in the plate, whereby said bar may be positively locked to hold the window in any position of adjustment.

1,398,769. REFRIGERATOR. Green O. Bush, Luverne, Ala. Filed Apr. 13, 1920. Serial No. 373,582. 1 Claim. (Cl. 62—58.)



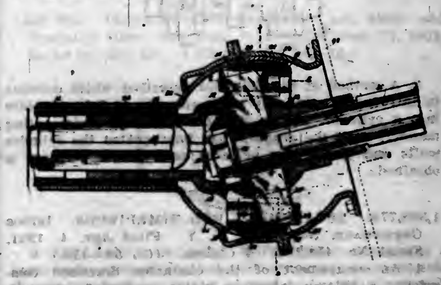
A refrigerator comprising a housing divided into a plurality of compartments, certain of which communicate with each other while others are distinct and unrelated, the bottom of the lowermost of said communicating compartments being sloped and formed with a drain, sets of horizontal alined cooling pipes connected at their free ends to the opposite sides of the upper and lower portions of the communicating compartments and being disposed adjacent the tops and bottoms of the upper and lower of said unrelated compartments, while the intermediate portions of the pipe extend through the unrelated compartments adjacent their outer walls and individual doors in one wall of the housing for each of said compartments.

1,398,770. TRANSFERRING OR EMBOSSING PAPER. Albert L. Clapp, Marblehead, Mass. Filed Nov. 15, 1919. Serial No. 338,949. 2 Claims. (Cl. 41—33.)

1. A transfer paper consisting of a paper base impregnated with a hygroscopic material and having an exterior layer or surface coating of a transfer material which may be transferred by heat and pressure to the object to be printed.

1,398,771. STREET-INDICATOR. William Lee Clarke, Jr., Tallahassee, Fla., assignor of one-half to John A. Grant, Tallahassee, Fla. Filed Jan. 31, 1920. Serial No. 355,993. 1 Claim. (Cl. 40—32.)

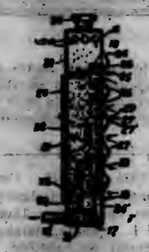
In a combination a street indicator comprising magnetic means for actuating the indicator, a controller including a casing and a lever, a contact on the casing disposed in the path of movement of the lever, a contact on the lever adapted to engage the casing contact and coacting therewith to form a switch, a switch on the lever,



a circuit including said magnetic means and said switches, and a third switch connected in parallel in said circuit with the first two switches and in such manner that said switch can control the circuit independently of the first two switches.

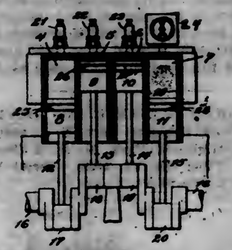
1,398,772. POLISHING-BRUSH. Charles Holcomb Anderson, Oklahoma, Okla., assignor of one-third to Charles H. Anderson, one-third to James T. Hughes and one-third to Edgar L. Bosarth, Oklahoma, Okla. Filed Mar. 10, 1921. Serial No. 451,098. 1 Claim. (Cl. 15—16.)

A polishing brush including a flexible back formed of a material having sufficient resiliency to return to normal condition after flexing and provided with a section of wool bearing skin having its edge secured flatwise against the lower surface of the edge of the back, with its wool side outermost to form a polishing surface and with a fulness inside its said secured edge, and a compressible pad within said full portion of the skin as described.



1,398,773. POWER-TRANSMITTING DEVICE. William J. Francke, Highland Park, N. J., assignor to The Francke Co., Highland Park, N. J., a Corporation of New Jersey. Filed Jan. 17, 1920. Serial No. 352,175. 6 Claims. (Cl. 64—96.)

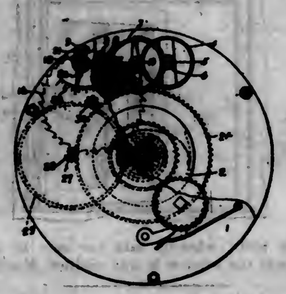
4. A power transmitting device, comprising a universal joint having joint members movable one on the other on



a common center, a radially disposed flexible coupling member secured at one end in one of the joint members, a slide engaged by the free end of the said coupling member, and a pivot mounted to turn in the other joint member and in which the said slide is movably mounted, the said pivot having its axis disposed radially and at a right angle to the movement of the said slide in the pivot.

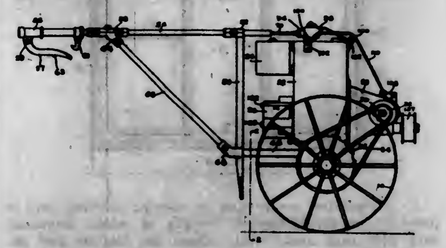
1,398,774. AUTOMOBILE-RADIATOR. ALEXANDER PÜNZER, New York, N. Y., assignor of one-half to Charles Emil Pobe, New York, N. Y. Filed June 20, 1919. Serial No. 305,452. 2 Claims. (Cl. 261—111.)

1. In a device of the class set forth, a radiator having an open front for the free admission of air and having a water pan at its bottom, air and water baffles arranged in said open front, each water baffle embracing but spaced from the adjacent portions of two adjacent air baffles, and means to deliver the water in the form of a spray into the interior of the radiator in direct communication with the air admitted through the open front.



1,398,775. METHOD OF TREATING CYLINDERS AND PISTONS. OSCAR W. GERLEMAN, St. Louis, Mo. Filed Apr. 5, 1920. Serial No. 371,465. 2 Claims. (Cl. 91—68.)

1. A method of the character described which consists in introducing relatively small amounts of flake graphite into a cylinder, and moving the piston in reciprocating manner, until the graphite has impregnated the cylinder walls and piston ring surfaces until proper pressure is obtained.

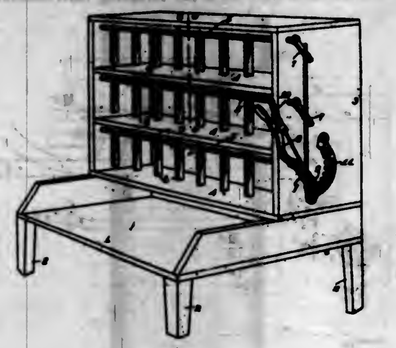


1,398,776. ESCAPEMENT FOR TIMEPIECES. ISIDOR GREENWALD, New York, N. Y. Filed Apr. 4, 1921. Serial No. 458,232. 6 Claims. (Cl. 58—116.)

1. An escapement of the character described comprising a balance wheel, a pinion connected with the balance wheel, a gear wheel meshing with said pinion, a coiled retractile spring connected with said gear wheel and positioned to normally hold said gear wheel in a given position, an escapement wheel and a pawl connected with said balance wheel, said pawl co-acting with

the escapement wheel for transmitting power from the escapement wheel to the balance wheel, said spring acting to return the balance wheel and pawl.

1,398,777. GARDEN-TRACTOR. GEORGE H. GUNTHER, St. Paul, Minn. Filed Apr. 12, 1920. Serial No. 373,138. 6 Claims. (Cl. 180—19.)



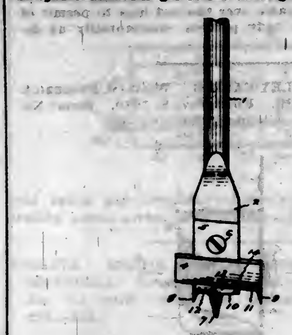
1. A garden tractor comprising a support, a motor mounted on said support, driving wheels upon which said support is mounted, driving connections between said motor and said driving wheels, a pair of rearwardly extending handle members to which said support is pivoted for horisontal oscillating movement, a hand engageable member movably mounted on one of said handle members, and a rod extending forwardly within said handle member from said hand engageable member and adapted to be slid forwardly and backwardly thereby, the forward end of said rod being attached to said support for imparting oscillating movement thereto.

1,398,778. SORTING-RACK. THOMAS HAWKINS, Derry, N. H., assignor to W. B. Severance, Manchester, N. H. Filed Mar. 18, 1921. Serial No. 453,200. 2 Claims. (Cl. 211—36.)

1. In a sorting rack, a plurality of shelves, crank shafts located above the shelves, depending crank fingers carried by the shafts and dividing the shelves into compartments, means for simultaneously swinging all of said fingers to inoperative position to facilitate the removal of the sorted matter from the shelves, said means

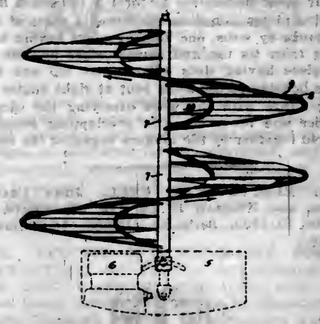
comprising crank arms carried by the shafts, a link compelling all of said crank arms to move together, a

lever forming a continuation of one of said crank arms and controlling the position of the link.



1,398,779. TOOL FOR BORING AND COUNTERBORING WOOD. LOUIS S. HAYDEN, Essex, Conn., assignor to the Connecticut Valley Manufacturing Company, Centerbrook, Conn., a Corporation of Connecticut. Filed Apr. 23, 1921. Serial No. 463,928. 5 Claims. (Cl. 145—125.)

2. A wood working tool comprising a boring bit having a spiral clearance groove, a twisted drill projected axially from the bit, a stop adjustable on the bit, said stop having a spiral slot in its wall, and a guiding and clamping screw extending through said slot in the stop into the bit whereby when said screw is loosened the stop may be rotated and adjusted longitudinally and when the screw is tightened the stop is clamped in the position to which it is adjusted with relation to the cutting ends of the bit and drill.



1,398,780. EXTENSION BORING-BIT. LOUIS S. HAYDEN, Essex, Conn., assignor to The Connecticut Valley Manufacturing Company, Centerbrook, Conn., a Corporation. Filed May 31, 1921. Serial No. 473,625. 3 Claims. (Cl. 145—127.)

2. A boring bit having a head with a feed screw extending from the axis of the head, a spur extending from the periphery of the head on one side with a recess between said spur and feed screw constituting an unconstricted throat between the feed screw and the spur, a cutting lip extending at substantially right angles to the axis from the feed screw to the periphery of the head on the opposite side of the axis from said spur, an oblique mortise in the head above said cutting lip, and an extension blade with a cutting lip clamped in said mortise, the angle of the land side of the cutting lip on the head being more blunt or steeper than the angle of the cutting lip of the blade above

said cutting lip on the head so as to direct chips formed by the head cutting lip over the joint between the blade cutting lip and the head cutting lip.

1,398,781. FLYING-MACHINE. CHARLES E. HICKS and WILLIAM G. HICKS, Mechanicsville, N. Y. Filed Feb. 24, 1921. Serial No. 447,460. 4 Claims. (Cl. 170—167.)

1. A helicopter including a helical-shaped body, comprising a plurality of lifting elements arranged in spaced relation to and above one another, the rear edge of one of said lifting element lying in a plane spaced from the forward edge of the next one, said lifting elements having their radial length greater than their segmental width.

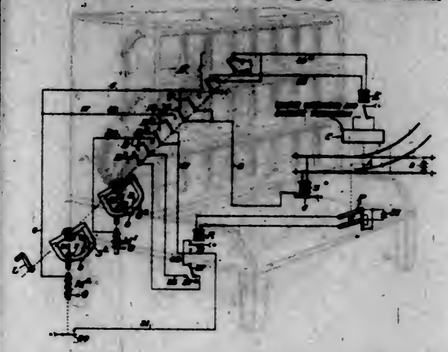
1,398,782. PRICE-TICKET HOLDER. LEO HOPP and HERMANN HOPP, New York, N. Y. Filed Sept. 17, 1921. Serial No. 501,256. 1 Claim. (Cl. 40—16.)

A ticket holding device for flexible tickets comprising a main body portion provided with oppositely disposed side flanges in which a ticket is adapted to be slidably mounted, lugs formed integral with said main body portion, said lugs being formed on the ends thereof to prevent longitudinal movement of the ticket in the side flanges after the

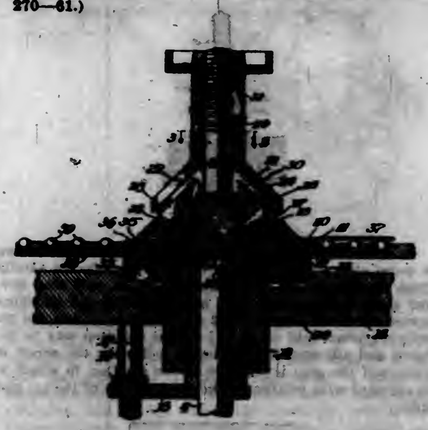
mage has been published therein, and a cut-out portion formed in the body portion to permit of engagement of the ticket to flex the same over the end lugs to permit of its removal from the body portion, substantially as described.

1,398,783. PULLEY-CASING. WILLIAM FREDERICK KRUMMA, Chicago, Ill. Filed Nov. 8, 1919. Serial No. 336,569. 1 Claim. (Cl. 16—212.)

A sash pulley mounting formed from a single sheet of material and consisting of an attaching flange having screw openings at its ends and an elongated opening between the screw openings, said attaching flange having a flange extending around the elongated opening and having its edges bent upon themselves to form a thickened margin, and housing pieces joined to the opposite edges of the attaching flange by webs, one housing piece having tongues projecting from its top and bottom edges and the other housing piece having slots adjacent its top and bottom edges, the housing pieces being bent at right angles to the attaching flange with the webs overlying the same and their upper and lower edges in overlapping engagement and secured together by the tongues engaging the slots.



1,398,784. ELECTROLYTIC CELL. JOHN CRANSTON, Trenton, and WILLIAM D. LE BAR, Wyandotte, Mich. Filed Oct. 19, 1920. Serial No. 418,008. 15 Claims. (Cl. 204—58.)



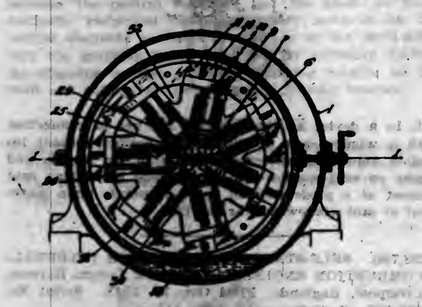
1. An electrode comprising a metallic plate, and a trough turned up on the lower end of the plate from the metal of the plate and adapted to receive liquid.

1,398,785. INTERLOCKING APPARATUS FOR THE CONTROL OF RAILWAY-SWITCHES. HAROLD S. LOOMIS, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 11, 1919. Serial No. 289,237. 15 Claims. (Cl. 246—135.)

1. In railway traffic controlling apparatus comprising a railway switch, a lever for the control thereof, electromagnetic means controlled by said switch and energized in one direction or the other according as the switch occupies one position or the other and deënergized when the switch occupies intermediate positions, and means controlled by said electromagnetic means for preventing completion of a movement of the lever until the switch has completed its movement in response to a partial movement of the lever; the combination with the foregoing instrumentalities of apparatus controlled by said electromagnetic means for preventing completion of the movement of the lever unless said electromagnetic means becomes deënergized due to movement of the switch away from its initial position.

1,398,786. EDGE-TURNING MACHINE. FRANK J. MCDONALD, Akron, Ohio, assignor to The Firestone Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 7, 1918. Serial No. 220,929. 35 Claims. (Cl. 270—61.)

1. In a machine of the character described, a work table over which stock is freely movable and a single mechanism adapted to fold over an edge of the stock and simultaneously advance it.



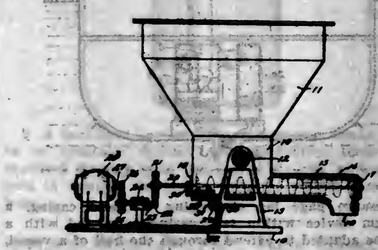
1,398,787. MILK-COOLER. CHARLES W. MCLEAN, Silvertown, N. Y. Filed Mar. 1, 1919. Serial No. 279,363. 1 Claim. (Cl. 31—14.)

The combination of a milk receptacle and a pouring spout in the nature of a funnel having a portion thereof depending into the receptacle and provided with a conduit bore and an annular series of discharge openings in its wall above the base, the depending portion being of slightly reduced diameter with respect to that of the receptacle, whereby to position its wall immediately adjacent to the

inner surface of the receptacle and thus discharge milk from its wall openings against the inner wall of the receptacle.

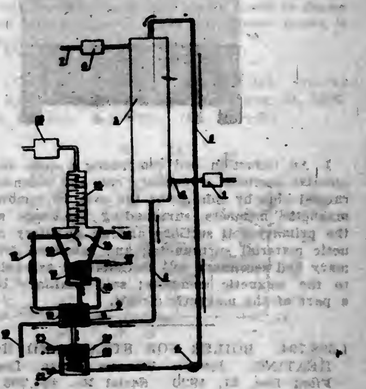
1,398,788. ROTARY PUMP OR MOTOR. WALDEMAR F. MAYER, Philadelphia, Pa., assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J., a Corporation of New Jersey. Filed Nov. 12, 1919. Serial No. 337,420. 4 Claims. (Cl. 121—60.)

4. A fluid transmission comprising a housing, a cylinder body rotatable therein, a valve in the housing on which said body is rotatably mounted, hollow pistons operating in said cylinders, a stroke impelling ring encircling the body, disks secured in said ring to form closures for the pistons under the developed centrifugal force, an adjusting ring in which the impelling ring is rotatably mounted, means for adjusting said ring to change the rotative axis of the impelling ring relative to the body, the impelling ring permitting leakage therebeyond, and a collection reservoir in the housing for such leakage and from which fluid may be restored to the system.



1,398,789. IGNITION CONTROL. VENCESLAUS F. MIKOLASEK, Lankin, N. D. Filed June 6, 1919. Serial No. 302,228. 4 Claims. (Cl. 175—183.)

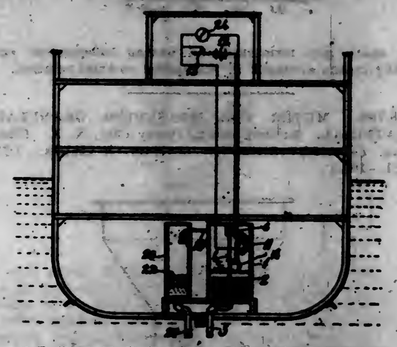
1. A control or indicator for ignition circuits having spark gap terminals arranged in the spark plug including elements of the ignition circuit and independently movable circuit closers arranged in a grounding circuit for respective engagement with corresponding elements of



said spark gap terminals and having independent operating means arranged in juxtaposed co-axial relation.

1,398,790. METER FOR MEASURING GRANULAR MATERIAL. EUGENE OGUR, Jersey City, N. J. Filed Jan. 14, 1920. Serial No. 351,449. 6 Claims. (Cl. 221—102.)

1. In a meter for measuring material, a pivotally mounted container, means for discharging the material from said container, said means being caused to be operated upon a movement of the container, and means for automatically discontinuing the discharge of the material from said container when the material in the same is reduced to a predetermined point.



1,398,791. PROCESS AND APPARATUS FOR THE MANUFACTURE OF LIQUID SULFUROUS ACID FROM DILUTE SULFUROUS-ACID GAS. PAUL PASCAL, Paris, France, assignor to La Manufacture de Produits Chimiques du Nord, Etablissements Kuhlmann, Paris, France. Filed Jan. 9, 1920. Serial No. 350,803. 4 Claims. (Cl. 23—1.)

1. In the process for the manufacture of liquid sulfurous acid from dilute gases and more particularly

from the gas derived from pyrite furnaces, in which the gases are brought into contact at a low temperature with a solvent and the sulfur dioxid is separated from the said solvent by heating, the improvement which consists in the use as solvent of monanthracenic heavy oil.

1,398,792. PRESSURE-GAGE LOG. JOSUA GABRIEL PAULIN, Stockholm, Sweden. Filed Apr. 10, 1918. Serial No. 227,799. 5 Claims. (Cl. 177—351.)

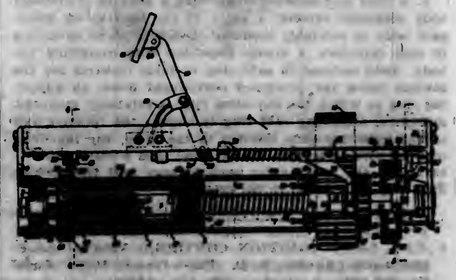
1. Pressure gage log comprising a closed casing, a diaphragm device within said casing connected with a Pitot-tube adapted to extend through the hull of a vessel, another tube for transmitting to the interior of said casing the hydrostatic pressure existing at the mouth of the said Pitot-tube, a rheostat in said casing, controlled by said diaphragm device, an electric circuit controlled by said rheostat, and electrically operated indicating instruments in said circuit.

1,398,793. INDUCTION-COIL. GLEN PERLINSKI, Mohawk, N. Y. Filed Oct. 17, 1919. Serial No. 331,414. 2 Claims. (Cl. 175—359.)

1. An induction coil comprising a core and alternate annular sections of primary coil and secondary coil arranged side by side about the core, in combination with magnetic members surrounding the core adjacent to the primary coil sections and an auxiliary coil of magnetic material surrounding and insulated from the primary and secondary coil sections and extending adjacent to the magnetic members; said auxiliary coil forming a part of the magnetic circuit.

1,398,794. BOILER FOR STEAM AND HOT-WATER HEATING. JOSEPH WARREN FIFER, Lowell, Mass. Filed Dec. 31, 1920. Serial No. 434,208. 1 Claim. (Cl. 122—87.)

A house heating boiler having a fire chamber provided with recesses at the bottom thereof and with a transverse water containing division adapted to segregate the water therein from the circuit of the house, and comprising a series of spaced water-tubes running from the top of



said chamber downward and connected at their lower ends to a horizontal water-tube having closed ends, said closed ends being secured in said recesses to prevent lateral displacement.

1,398,795. SASH-RETAINER. JACOB A. PITTENGER, Millburn, N. J. Filed Aug. 31, 1920. Serial No. 407,150. 5 Claims. (Cl. 292—75.)

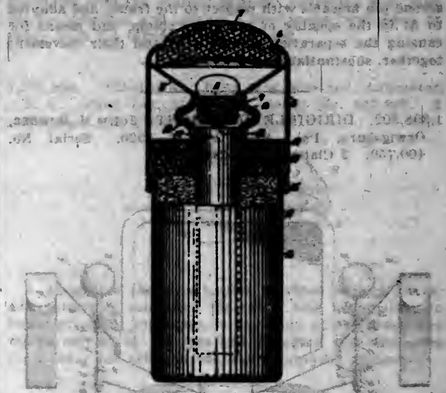
1. In a device as characterized for use in connection with a window-sash or the like, a flexible element inflexibly supported at certain points in its length, and means on said window-sash or the like for flexing said element at a predetermined point or points upon movement of said window-sash or the like.

1,398,796. SELF-STARTING DEVICE FOR INTERNAL-COMBUSTION ENGINES. FREDERICK LIONEL RAPSON, Liverpool, England. Filed Oct. 16, 1918. Serial No. 258,426. 6 Claims. (Cl. 185—41.)

1. A mechanical engine starter comprising, a gear connected with the crank shaft of the engine, a main shaft extending parallel with the axis of the gear, a runner

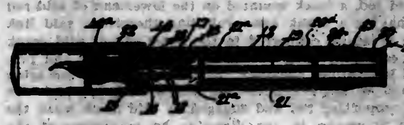
block having screw threaded engagement with the shaft, spring means cooperating with the runner block to cause it to rotate the shaft, means to connect the shaft and gear, and means thrown into action by the movement of the runner block and driven by said gear to place the spring means under tension.

1,398,797. IGNITION SPARKING PLUG FOR INTERNAL-COMBUSTION ENGINES. FREDERICK LIONEL RAPSON, Liverpool, England. Filed Oct. 16, 1918. Serial No. 258,428. 5 Claims. (Cl. 123—169.)



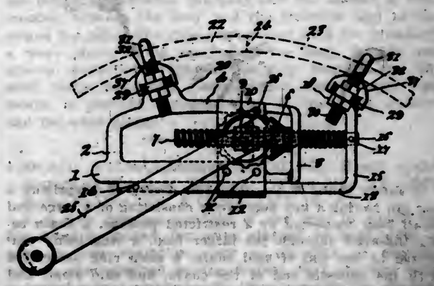
1. A spark plug comprising a shell, a central electrode having a sparking point spaced from the shell, insulation between the central electrode and the shell, an automatically reciprocal cleaning member mounted on the central electrode to clean the surface on the shell adjacent the sparking point, a spring for normally holding the cleaning member over the sparking surface on the shell and guides for the reciprocal cleaning member.

1,398,798. LIFTING-JACK. JOHN RAVEN, Deervale, via Armidale, New South Wales, Australia. Filed Apr. 12, 1920. Serial No. 373,252. 4 Claims. (Cl. 254—103.)



1. In a lifting screw jack, the combination with a standard, a hand lever having pawls pivotally mounted thereon, oppositely rotatable bevel wheels provided with ratchets adapted to be engaged and rotated respectively by said pawls, a non-rotatable plate, and bevel pinions carried by said plate and meshing with said bevel wheels, of a screw spindle capable of being selectively locked to one or the other of said bevel wheels and of being raised or lowered in said standard, and a table freely supported on the upper end of said spindle.

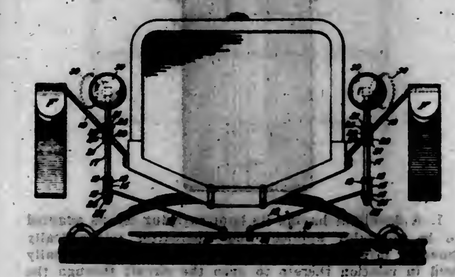
1,398,799. FLASHLIGHT. ADOLPH C. ESCHEN, Oakville, Conn., assignor to The Chase Companies Inc., Waterbury, Conn., a Corporation. Filed Feb. 28, 1921. Serial No. 448,892. 4 Claims. (Cl. 240—8.5.)



1. A flashlight having its lamp-carrying means adapted to be rotatably applied and thereafter telescopically mounted directly upon the cup of its cell, and normally held in relation thereto to open the circuit through the lamp.

1,398,800. FOUNTAIN-PEN. FRANK RIGGIO, Macon, Ga. Filed June 30, 1921. Serial No. 481,444. 3 Claims. (Cl. 120—47.)

1. In a fountain pen, the combination with an outer casing affording an ink chamber of a valve comprising two sleeves provided with openings, one of said sleeves being movable relative to the other to cause said openings to register with each other when desired, a piston sleeve slidingly mounted within said casing, and means whereby said valve will be closed when said piston sleeve is drawn outward, and will be opened when said piston sleeve is moved inward.



1,398,801. TOOL FOR DEMOUNTABLE RIMS. OLIVER METCALF RICE, Birmingham, Ala. Filed Aug. 21, 1920. Serial No. 405,148. 5 Claims. (Cl. 157—1.)

1. A tool of the character described comprising a pair of clamps adapted to be secured at opposite sides of the

cross-cut of a rim, and each component of clamp and plates having openings therein, locks adjustably carried by said plates and adapted to fit about the flanges of the rim, a frame adapted to rest within the rim, a pin on said frame engageable with the openings in one of said clamps, a second pin movable with respect to the frame, and adapted to fit in the opening of the other clamp, and means for causing the separation of said pins and their movement together, substantially as described.

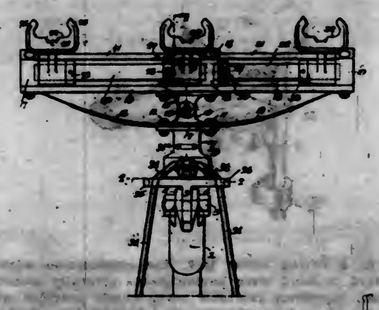
1,398,802. DIRIGIBLE HEADLIGHT. JOHN M. ROHRER, Orwigsburg, Pa. Filed Aug. 2, 1920. Serial No. 400,750. 2 Claims. (Cl. 240—62.)

1. In dirigible headlight construction for automobiles, a link pivotally secured at one end upon the steering rod of the car, a rod vertically supported on the car to turn on its longitudinal axis, a lamp secured to the upper end of said rod, a block mounted on the lower end of said rod and having a crank arm projecting therefrom, said link being pivotally connected to the outer end of said crank arm, ears projecting outwardly from the block and provided with alined openings, the lamp-supporting rod being turnable within said alined opening, a stud connected to the lamp-supporting rod and engaged by said block when the latter is swung in one direction by movement of the steering rod, a torsional spring imparting to the rod a tendency to move in a direction opposite to that in which it is moved by the link, and stop means provided on the rod and engageable with the support thereof to prevent turning of the rod under the influence of the spring beyond a predetermined position.

1,398,803. SAFETY-CHAIN. JOHN J. SCHNEIDER, Lathrop, Mo. Filed Feb. 10, 1920. Serial No. 357,569. 1 Claim. (Cl. 24—3.)

A safety chain of the character described comprising a bar pin having a key hole eyelet consisting of a large and small loop connected by a restricted passage, a chain being threaded through the larger loop, a ring being connected to one end of said chain, a snap ring associated with the opposite end of the chain, and said small and restricted passage receiving said chain to prevent movement thereof with respect to said eyelet.

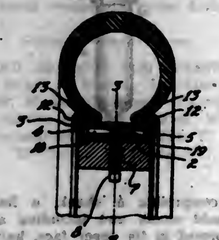
1,398,805. PROCESS FOR THE TREATMENT OF VEGETABLE FIBERS. CHARLES GEORGES VILLEDIEU, Paris, France, assignor to Société Gillet & Fils, Lyon, Rhône, France, a Corporation of France. Filed Dec. 9, 1920. Serial No. 429,978. 2 Claims. (Cl. 8—20.)



1. A process for the treatment of vegetable fibers with a view to impart to them the character of wool, both physically as to the feel, appearance and caloric quality, and chemically, as regards their affinity and absorbent capacity for dyestuffs, said process consisting in impregnating the fiber with a solution of cellulose in concentrated nitric acid, and precipitating upon the fiber a slightly nitrated cellulose by washing with water.

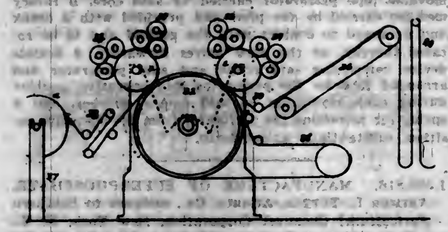
1,398,806. AUXILIARY-AIR INLET. CHARLES B. SHARPE, Norristown, Pa. Filed July 29, 1919. Serial No. 314,124. 2 Claims. (Cl. 48—180.)

1. An attachment of the class described comprising an elongated body member having attaching apertures in its end, and a central opening between said apertures adapted to register with the bore of an engine manifold when applied, a wire screen shielder mounted over said opening, said body having longitudinally extending air chambers formed on opposite sides thereof, said chambers being closed at one end and open at the other, a pipe connecting the open ends of said chambers, one of said chambers having a valve controlled air inlet and each having a plurality of air passages communicating with the central opening in said body.



1,398,808. CURRENT-COLLECTOR. ISAAC D. SHEPPER, Philadelphia, Pa., assignor to The J. G. Brill Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 12, 1921. Serial No. 499,928. 13 Claims. (Cl. 191—59.1.)

1. The combination in a current collector for trolley cars, of a pole; a head mounted on the pole; a swivel member mounted on the head; a carrier pivoted to the swivel member, said carrier extending laterally beyond the swivel member; a spring mounted on the swivel member and tending to support the carrier in its normal position; two shoes spaced apart and pivotally mounted on the carrier, said shoes being insulated one from the other; and means for limiting the rocking movement of the shoes.

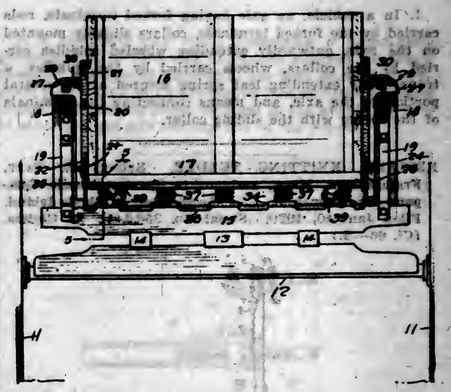


9. The combination of a head; a swivel member mounted on the head; a carrier pivoted to the swivel member; means tending to hold the carrier in a normal position; two shoes pivotally mounted on the carrier and a third shoe centrally located and also mounted on the carrier; and terminals for each of the end shoes, the central shoe being connected to one of said terminals.

1,398,807. RIM. WILLIAM C. SMITH, Robinson, Ill. Filed Jan. 29, 1921. Serial No. 440,966. 1 Claim. (Cl. 301—17.)

A wheel rim comprising a section fixed on a wheel, a tire carrying section surrounding the wheel section, contacting flanges on the opposite edges of the sections, the confronting surfaces of the sections having transverse wedge grooves, orifices intersecting the grooves, and the wheel carrying section having an elongated opening for the passage of the valve stem of the tire carried by the tire carrying section, means between the sections designed to be brought into interengaging position when one of the sections is turned circumferentially on the other sections, and the referred to grooves and orifices designed to alinse when the sections are thus related, a notched wedge key passing through the grooves, a plate having a depending finger passing through the orifices and the notch in the groove, said plate also having a spring finger designed to be received in the slot for the valve casing and to contact with said casing, and the cap of the valve casing designed to be screwed thereon and to contact with the plate, all as and for the purpose set forth.

1,398,808. METHOD OF CONTINUOUS PRINTING BY LITHOGRAPHY. CHARLES P. STIRLING, Somerville, N. J., assignor to Cott-A-Lap Co., Somerville, N. J., a Corporation of New Jersey. Filed Mar. 19, 1919. Serial No. 283,468. 1 Claim. (Cl. 101—138.)

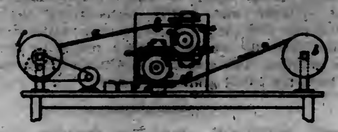


The process herein described of preparing cylinders for making continuous impressions and printing therefrom, said process consisting in preparing a cylinder of zinc or similar material, graining the entire surface of the cylinder, then preparing a design on a flat zinc plate, the design being equal to the circumference of the grained cylinder, and finally transferring the design from the flat zinc plate onto a transfer roller and from the roller onto the grained cylinder, preparing the cylinder for printing, and making a continuous impression on paper from the inked grained cylinder.

1,398,809. ICE-HOOK. JOHN ROY STOGNER, Lancaster, S. C. Filed Oct. 19, 1920. Serial No. 417,918. 2 Claims. (Cl. 294—115.)

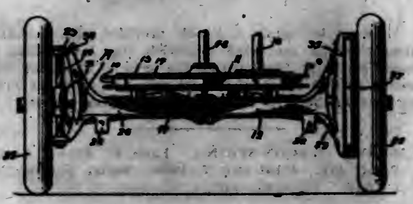
1. In an ice tongs, a handle provided with a shank, arms pivotally connected therewith, legs terminating in hooks pivotally connected to the ends of the arms, and means carried by the legs and engaging with the arms for locking the arms on the legs at varying angles.

1,398,810. WAGON-SPRING. FRED D. STORY, Center Point, Ark. Filed Oct. 7, 1920. Serial No. 415,282. 1 Claim. (Cl. 280—143.)



The combination with a wagon running gear comprising a bolster, standards spaced at the ends of the bolster and a body between the standards, of a cushioning member interposed between the body and the bolster, a wear member between the body and the standard and having means for removable rigid engagement with the standard, a wear plate rigidly secured to the body, tongue and groove connections between the wear member and the wear plate permitting sliding action therebetween, and means to prevent the separation of the wear member and the wear plate.

1,398,811. FILM-CLEANING MACHINE. HARRY ADOLF SÜNECKE, Hamburg, Germany. Filed Mar. 15, 1920. Serial No. 366,179. 4 Claims. (Cl. 15—8.)

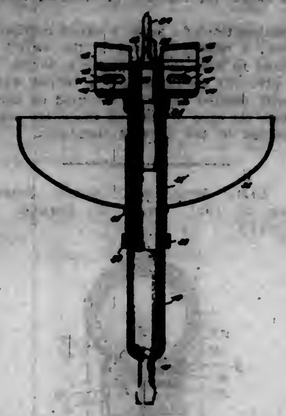


1. A film cleaning machine of the type in which the film band is guided, for being cleaned on both sides at once in one operation, over a plurality of cleaning wheels, characterized by the feature that the film band is passed across pressure pads lying opposite the cleaning wheels in such a manner that the film band moves at

all places of contact with the cleaning wheels in the same direction as the latter and that the forward feed

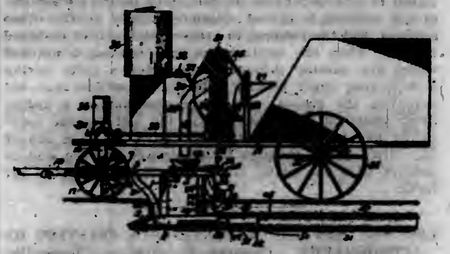
of the film, caused by its being carried along by the cleaning wheels, is compensated by the braking effect of the surface of the pressure pads.

1,396,812. SPRING SUSPENSION FOR AUTOMOBILES AND OTHER VEHICLES. HARRY B. SYLES, Norton, Kans. Filed June 3, 1920. Serial No. 386,831. 6 Claims. (Cl. 280—96.2.)



1. In a vehicle, an axle having forked terminals, rods carried by the forked terminals, collars slidably mounted on the rods, outwardly extending wheeled spindles carried by the collars, wheels carried by the spindles, a transversely extending leaf spring secured at its central portion to the axle, and means connecting the terminals of the spring with the sliding collar.

1,396,813. KNITTING-NEEDLE. SIDNEY H. TAFT, Framingham, Mass., assignor to Spartan Needle Company, Providence, R. I., a Corporation of Rhode Island. Filed Jan. 10, 1920. Serial No. 350,541. 24 Claims. (Cl. 66—5.)

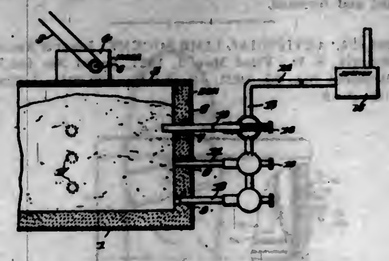


16. A knitting instrument comprising a hook and means slidably arranged at one side only of said hook to effect the opening of the loop supported by said hook for the passage therethrough of said hook and the casting off of said loop from said hook.

1,396,814. DRILL. MICHAEL TANNENBAUM, Brooklyn, N. Y. Filed July 15, 1921. Serial No. 485,662. 5 Claims. (Cl. 145—121.)

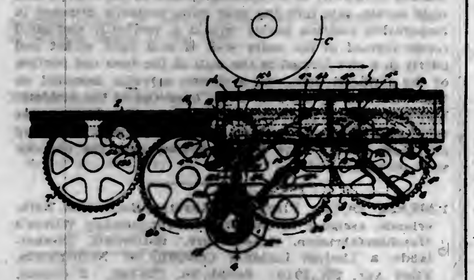
1. A drill comprising a shank, a head removably mounted on said shank and including a plurality of radial ways formed in its upper face, knives adjustable in certain of said ways, and knife carriers adjustable in other of said ways.

1,396,815. MACHINE FOR MAKING AND LAYING PIPE. JAMES F. TRUSTY and DANIEL O. DAVISON, Kansas City, Mo.; said Davison assignor to said Trusty. Filed May 24, 1918. Serial No. 236,442. 1 Claim. (Cl. 111—5.)



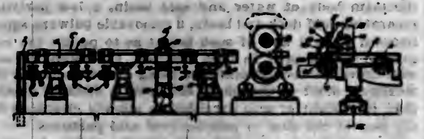
In a machine for making and laying pipe, a conduit forming plow, a core extending rearwardly therefrom, a movable pipe perforator carried by said core, a rotary member carried by the plow and provided with a crank and arranged to contact with the ground and to be rotated thereby, as the plow moves forwardly, a flexible device connecting said crank and said perforator and arranged to draw the perforator into operative position during each revolution of said rotary member, and a spring for retracting the perforator from the operative position, substantially as set forth.

1,396,816. MANUFACTURE OF SUPERPHOSPHATE. ARTHUR L. TUTTLE, Atlanta, Ga., assignor to Southern Agricultural Chemical Corporation, New York, N. Y., a Corporation of Virginia. Filed Jan. 15, 1921. Serial No. 437,466. 4 Claims. (Cl. 71—7.)



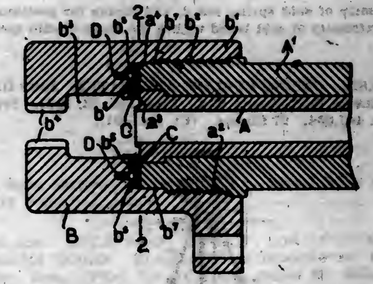
1. In the process of making acid phosphates, the herein described improvement which comprises venting a mass

of raw mixture containing phosphate and acid, at a point below its surface, and allowing the generated steam



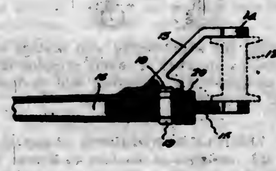
and gases to freely escape therefrom during the period of reaction.

1,396,817. BED-MOTION FOR SHEET-PRINTING PRESSES. BURT F. URMAN, Brookline, and FRANK R. BELLUCHE, Mansfield, Mass., assignors to United Printing Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 17, 1920. Serial No. 366,592. 26 Claims. (Cl. 74—98.)



1. In combination with a reciprocable bed; a member attached thereto having two closely adjacent oppositely inclined faces arranged at an angle of less than ninety degrees to the plane of movement of said bed, said inclined faces converging toward the center of the bed and inclining downwardly and outwardly away from the center of the bed; means for driving the body uniformly during portions of its strokes; and two similar alternately operating means each adapted to engage the related inclined face of said member and reverse the body while in engagement therewith.

1,396,818. AUTOMATIC DUMP-TROUGH-OPERATING APPARATUS. EDWIN L. UPP, Lorain, Ohio, assignor to National Tube Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Dec. 16, 1920. Serial No. 431,228. 4 Claims. (Cl. 80—42.)

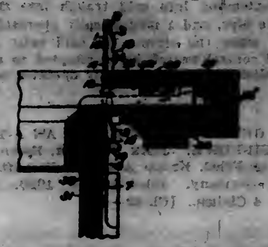


4. The combination with a pipe handling apparatus comprising an in-going trough, sizing rolls, a dump trough having a hinged cover, and a pneumatic cylinder for raising and lowering said cover, having magnetically operated inlet and outlet valves, of an electrical control apparatus adapted to control the circuit to said magnetically operated valves, said apparatus comprising a main control switch mounted over said in-going trough and having a trip lever extending into said trough into the path of travel of the pipe, and a magnetically operated contactor adapted to make the circuits to said inlet and outlet valves, said control switch being adapted to control the circuit energizing said magnetically operated contactor.

1,396,819. GUN-BARREL BUILT OF AN A-TUBE AND A BREECH-PIECE. JOHN VOLLMER, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Dec. 8, 1920. Serial No. 428,086. 4 Claims. (Cl. 89—16.)

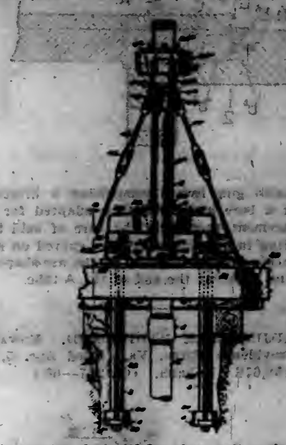
1. A composite gun barrel comprising a breech-piece provided with a bore and an A-tube adapted for screw threaded engagement therewith, the bore of said breech-piece terminating in an arc-shaped face curved on a large radius, and packing pieces disposed in the arc-shaped face of said bore and adjacent the end of the A-tube.

1,396,820. ADJUSTABLE RADIUS-ROD. EDWARD H. WAGNER, Providence Forge, Va. Filed Apr. 5, 1921. Serial No. 458,676. 1 Claim. (Cl. 267—66.)



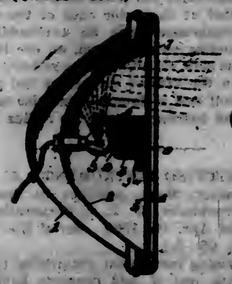
An automobile radius rod comprising a V-shaped member and forks located at the outer ends of the arms of said member for engagement with an automobile axle, said forks each including an offset arm, an eye located at the outer end of the arm, an adjustable eye bolt, an adjusting nut swiveled in the arm of the radius rod and mounted upon the eye bolt and a clamping nut also mounted upon the eye bolt and bearing against the radius rod.

1,396,821. KNITTING INSTRUMENT. J. FRANK WILCOMB, Worcester, Mass., assignor to Spartan Needle Company, Providence, R. I., a Corporation of Rhode Island. Filed Apr. 10, 1920. Serial No. 372,946. 10 Claims. (Cl. 66—5.)



1. A loop forming instrument comprising two relatively slidable elements, one of said elements having a spring beard hook for seising the new yarn and the other of said elements including means for penetrating the old loop at the back of the first mentioned element and progressively

engaging the sides of said loop toward the front of the needle to spread said old loop for the reception of the

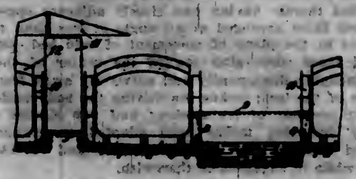


extremity of said spring board, and means for positioning the extremity of said board within the range of said spread loop.

1,398,822. CASING-PULLING APPARATUS. JOHN HART WILSON, Burkburnett, Tex. Filed Feb. 23, 1921. Serial No. 447,054. 27 Claims. (Cl. 254—81.)

1. Apparatus for withdrawing well casings comprising, in combination, a plurality of casing gripping devices, and means for independently operating said devices to effect longitudinal movement of the casing.

1,398,823. VEHICLE-HEADLIGHT. LEON G. WRIGHT, Preston, Md., assignor of one-half to Ernest N. Wright, Choptank, Md. Filed June 29, 1920. Serial No. 392,707. 2 Claims. (Cl. 245—48.4.)

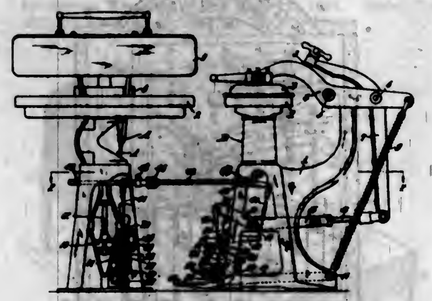


1. As an article of manufacture, a lens for a vehicle headlight lantern having its lower half curved and its upper half transparent, a center hood projecting rearward, said hood having its side edges outwardly curved downward and forward.

1,398,824. ARTIFICIAL-LIMB SOCKET. JOSEPH ABRAMS, Sturgis, S. D. Filed Mar. 1, 1921. Serial No. 448,745. Renewed Oct. 20, 1921. Serial No. 509,804. 1 Claim. (Cl. 3—9.)

The combination with the upper open end portion of an artificial limb, of a rigid socket member adapted to be supported in the open end thereof, an annular inflatable cushioning socket within said rigid socket, a valved inflating tube leading radially from said cushioning socket and extending outwardly of an opening formed in the wall of said rigid socket, said inflating tube being normally disposed in inoperative position partly within a vertically elongated recess formed in the outer wall of said rigid socket and partly in a slot formed in the wall of the open end portion of the artificial limb, and a closure movably mounted on the outer face of the wall of the open end of the artificial limb and adapted to cover the said slot, said inflating valve being adapted to spring outwardly from the said limb and slot when said closure is moved from over the slot for such purpose.

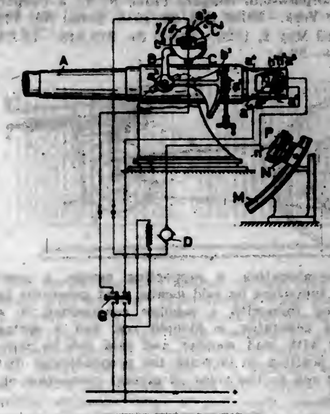
1,398,828. DOCK. PIETER VAN AFFAIRE, Rotterdam, Netherlands, assignor to Naamlooze Vennootschap Wilton's Maschinefabrieken Scheepswerf, Rotterdam, Netherlands, a Limited Liability Company of Netherlands. Filed Apr. 22, 1918. Serial No. 230,160. 2 Claims. (Cl. 61—64.)



1. The combination with a dock having a floor disposed approximately at low water level, of a basin arranged alongside of and offset from said dock with its major dimension substantially parallel to the major dimension of said dock, a wall forming an exterior closure for said dock and one end of said basin, a lock gate located at the other end of said basin for controlling communication between the main body of water and said basin, a low partition separating said dock and basin, a removable bulwark superimposed on said wall of such height as to permit the lock gate to be securely in open position, the height of said wall above the floor of said dock being at least equal to the maximum draft of the empty ship plus a distance greater than the height of said partition to allow a clearance for the keel of the ship in passing over said partition.

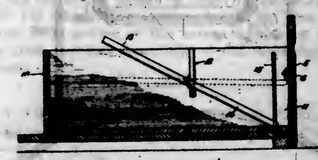
1,398,833. COTTON-PICKER'S SACK. SMITH N. ARMS, Newbern, Tenn. Filed July 27, 1920. Serial No. 399,244. 2 Claims. (Cl. 150—2.)

1. A cotton picker's sack provided at its receiving end with flaps, a suspending means secured to the sack inwardly of the free edges of the flaps, and means by which the upper edge of either flap may be secured to the suspending means at points above the connection of the suspending means to the sack.



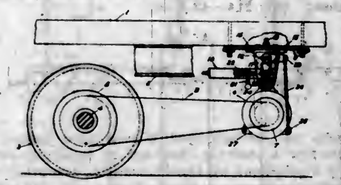
1,398,827. TANDEM ATTACHMENT FOR GARMENT-PRESSERS. WILLIAM E. ARNOLD, Chicago, Ill., assignor to The American Laundry Machinery Company, Norwood, Ohio, a Corporation of Ohio. Filed Nov. 6, 1919. Serial No. 336,574. 22 Claims. (Cl. 68—9.)

1. In apparatus of the class described, the combination with a plurality of pressing machines, each including a movable pressing member and locking means therefor, of means positively connecting the locking means of the said machines.



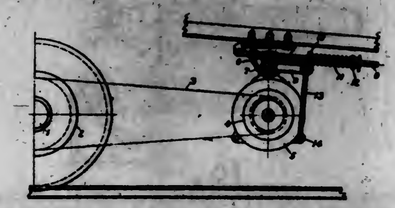
1,398,828. APPARATUS FOR INVESTIGATING AN ELECTRICAL GYROSCOPIC FIRING-GEAR. AUGUST VON APPEN, Kiel, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Dec. 6, 1920. Serial No. 428,755. 4 Claims. (Cl. 89—27.)

1. An arrangement of the class described for testing an electrical gyroscopic firing apparatus used in combination with a gun provided with a firing magnet which comprises a record indicating means positioned so as to be adjacent the breech end of the gun when the gun reaches an elevation corresponding to the range and means disposed in the breech end of the gun and operated by



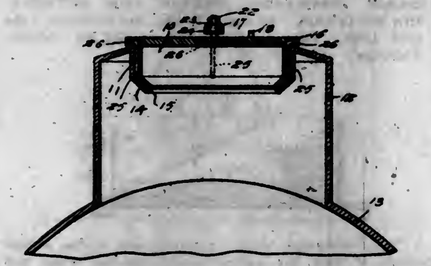
the firing magnet for initiating the record upon said record indicating means.

1,398,829. RELEASING DEVICE FOR POULTRY-HOUSE DOORS. RUSSELL LLOYD BENNINGTON, Lake City, Iowa. Filed Apr. 30, 1921. Serial No. 465,688. 3 Claims. (Cl. 119—22.)



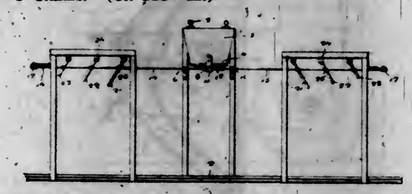
1. The combination with a poultry house having a door opening, a door for automatically opening when not fastened in closed position, a fastener on the inside of said door to hold it closed, a supporting structure adapted to be positioned adjacent said fastener, a lever fulcrumed intermediate its ends in said structure, the front portion thereof being longer than the rear portion whereby its end is normally in lowered position, said lever end being adapted to be placed below said fastener and operable when swung upwardly to engage and release the fastener the other end of the lever being normally raised in position to receive a fowl.

1,398,830. GENERATOR-MOUNTING. WILLIAM L. BLISS, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed July 10, 1916. Serial No. 108,881. 15 Claims. (Cl. 105—106.)



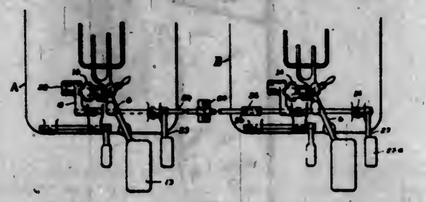
1. A generator mounting comprising, in combination, a plate, and a hanger adapted to be supported by said plate, said hanger being provided with lugs adapted to straddle said plate in pairs.

1,396,831. GENERATOR-MOUNTING. WILLIAM L. BLISS, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Dec. 23, 1916, Serial No. 138,612. Renewed May 8, 1920. Serial No. 379,945. 11 Claims. (Cl. 64—52.)



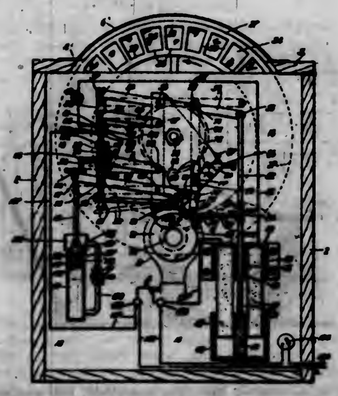
2. In combination, a supporting means, a generator pivotally supported by said means, said generator having coöperating therewith a member constrained to swing with said generator, a pivoted rod and a spring coöperating with said member and said rod to urge said rod to a position to increase the perpendicular distance from said rod to the point of pivotal connection of said generator.

1,398,832. DOME-COVER FOR OIL-CARS. WILLIAM K. BONHAM, Coffeyville, Kans. Filed Feb. 25, 1920. Serial No. 361,198. 2 Claims. (Cl. 220—39.)



1. A tank car provided with a dome having an opening in its top, an internally threaded collar within the dome in line with the opening thereof and terminating at its lower end in a conical seat, and a plug externally threaded to match the internal threads of the collar and having its end tapered to engage the conical seat of the said collar, and having an outer rim to overlap the top of the dome, said rim having lateral openings therein, and the body of the plug having grooves in its sides in communication at their upper ends with the lateral openings and adapted to be closed at their inner ends by the said conical seat.

1,398,833. TRAIN-COALER. SAMUEL LLOYD BOULDIN, Oswego, Kans. Filed Oct. 16, 1920. Serial No. 417,354. 3 Claims. (Cl. 214—42.)

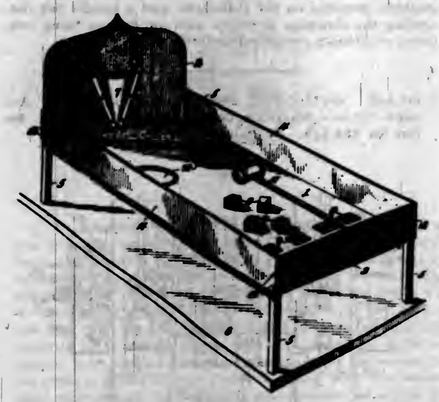


1. A coal loading device comprising a hopper arranged above the track, a bottom hinged to the hopper, means for holding the bottom in closed position, arms of different lengths pivoted above the track, a cable for tripping said means, said cable being connected with said arms, and a trip bar carried in the locomotive and adapted to be set to engage the desired arm in accordance with the travel of the train.

1,396,834. TANDEM ATTACHMENT FOR IRONING-PRESSES. CHARLES L. BRALEY, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Aug. 24, 1916. Serial No. 116,696. 11 Claims. (Cl. 68—9.)

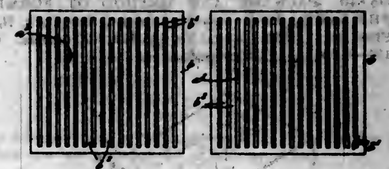
1. Apparatus of the class described, comprising a plurality of pressing machines, each embodying relatively movable pressing members and a plurality of controlling treadles therefor, and operating connections between treadles on different machines whereby operation of a treadle of one machine produces a controlling effect upon another machine.

1,398,835. LUMINOUS DISPLAY APPARATUS. LEOPOLD B. BUCHNER, Fitzroy, Melbourne, Victoria, Australia. Filed Nov. 12, 1920. Serial No. 423,706. 14 Claims. (Cl. 88—27.)



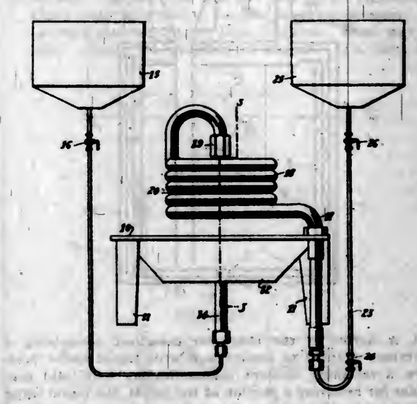
1. In a luminous display apparatus an illuminating medium, a film carrier holding a series of films or plates bearing the signs to be displayed, a solenoid, having a movable core adapted to be operated in one direction by electric energy to successively move the films or plates into position to project their sign onto the display screen, and in a reverse direction by gravity while a sign is being displayed, means for intermittently energizing the solenoid, a dashpot, a plunger within the dashpot cylinder, said plunger having therethrough an oil passage, a ball valve to normally close the oil passage, means for limiting the upward movement of the ball valve and a regulating tap whereby the escape of oil from one end of the dashpot cylinder is controlled to regulate the period occupied by the core in its return or gravity operated stroke.

1,396,836. PROCESS OF PRESERVING MEAT AND ALIMENTARY SUBSTANCES. LOUIS FREDERICK BULLOT, Sydney, New South Wales, Australia. Filed Sept. 28, 1918. Serial No. 255,300. 1 Claim. (Cl. 99—9.)



The herein described method of preserving meat and other alimentary substances, consisting in inclosing the substance in a treatment chamber, and burning a mixture of charcoal, golden wattle bark, saltpeter, sulfur and preserving and flavoring oils in a separate combustion chamber and charging the treatment chamber with fumes of the mixture to the proper density and hermetically sealing said treatment chamber and permitting the substance to remain inclosed and affected by the fumes for a predetermined time.

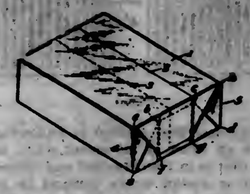
1,398,837. GAME. JOSEPH CARTER, Saskatoon, Saskatchewan, Canada. Filed Mar. 17, 1921. Serial No. 453,094. 3 Claims. (Cl. 46—59.)



1. A game structure comprising a table with surrounding marginal portions rising above the surface of the table, with the bottom of the table of an elastic nature to rebound under blows, a playing element adapted to rest on the table, a pocket at one end of the table, and a mallet for tapping the under surface of the table adjacent to the end remote from the pocket, whereby blows delivered to the under face of and transmitted through the table will cause a playing element on the table to rise therefrom and, if the blow be properly directed, proceed to and drop into the pocket.

1,396,838. PICTURE OR DESIGN HAVING MOTION EFFECT. THOMAS A. B. CARVER, Glasgow, Scotland. Filed July 24, 1917. Serial No. 182,573. 4 Claims. (Cl. 40—137.)

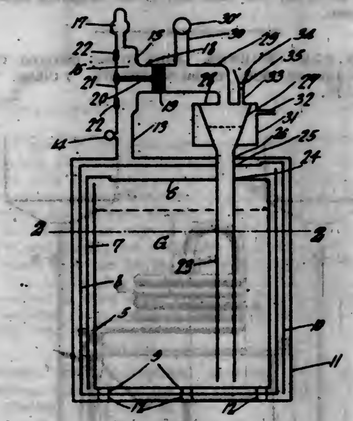
1. The herein described method of endowing a picture or design with an effect of movement when seen from a point of view that is in front thereof and moves relatively to the picture or design which consists in preparing a predetermined number of copies of one and the same picture or design but each copy in a different position or phase, cutting the several copies into vertical strips and discarding alternate strips of each copy, assembling the remaining strips of the several copies on a suitable surface in such manner that the strips of each copy are laterally displaced with respect to the strips of the other copies, and interposing between the point of view and the strip carrying surface a screen comprising a number of vertically disposed obscuring bands of equal width and equal pitch alternating with clear spaces each of a width proportional to the reciprocal of the number of phases in which the picture or design is prepared, the strips assembled on the supporting surface being not less in width than the clear spaces of the screen and being assembled with a pitch not less than that of the obscuring bands of the screen.



1,398,839. BURNER. JOHN CLARY, Oakland, Calif. Filed June 28, 1920. Serial No. 392,270. 1 Claim. (Cl. 158—13.)

A burner comprising a body portion, an open water chamber included in the body portion, a coil supported above the water chamber, means for supplying a hydrocarbon fluid to the coil, a nozzle communicating with and located centrally of the coil for directing the fluid toward the water chamber, a screen clamped between the convolutions of the coil located between the nozzle and the water chamber in the path of the fluid for breaking up the hydrocarbon liquid and a spreader located within the wa-

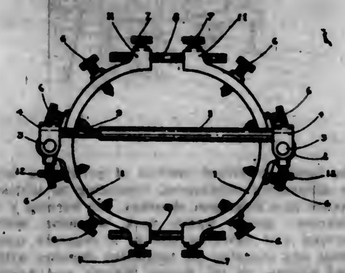
ter chamber, whereby when the burner is lighted the hydrocarbon fluid and water will be vaporized and mixed to provide a fuel for the burner.



1,398,840. PACKAGE AND METHOD OF FORMING THE SAME. Edwin Jameson Cooley, New York, N. Y. Filed Jan. 7, 1921. Serial No. 436,574. 20 Claims. (Cl. 131—11.)

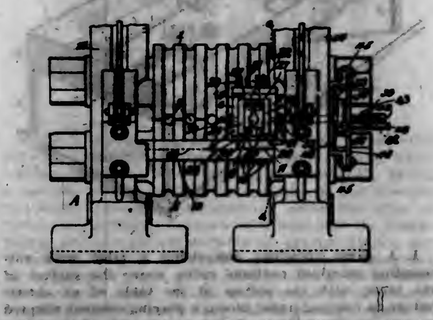
10. A package comprising cigarettes and an inclosure consisting of relatively thin foil having its edges overlapped in opposite directions and fused together.

20. The method of forming inclosures for packages comprising passing overlapped portions of foil between a surface heated to a fusing temperature and a relatively non-heat-conducting backing.



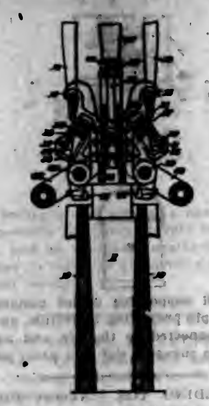
1,398,841. LIQUID-CONTAINER. Courtney Coroves, Philadelphia, Pa. Filed June 14, 1919. Serial No. 304,289. 10 Claims. (Cl. 220—9.)

1. A device of the character described comprising a container adapted to receive a volatile liquid under pressure, a retaining element communicating with said container for receiving a portion of the liquid, the liquid being forced into said retaining element by the pressure exerted upon the liquid within said container, said pressure being greater than the pressure exerted upon the liquid within the receiving element, means for applying heat to a portion of the liquid within said retaining element to increase the pressure exerted upon the liquid within said retaining element, and means for equalizing the pressures exerted respectively upon the liquid within said container and said retaining element.



10. A device of the character described comprising a plurality of tanks arranged within each other and spaced from each other, the innermost of said tanks being adapted to receive a volatile liquid, a chamber communicating with said tanks, means for applying heat to a portion of said liquid to rapidly volatilize the same, a portion of the evolved gases being directed into said chamber, and automatically operated means for rendering the pressure within said chamber equal to the pressure above the heated portion of said liquid whereby the liquid is moved out of contact with the heating medium supplied thereto.

1,398,842. SKULLCAP FRAME AND GUIDE. George M. Cause, Stockton, Calif. Filed Feb. 9, 1920. Serial No. 357,346. 1 Claim. (Cl. 128—2.)



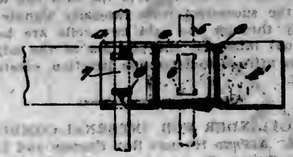
A device of the character described, comprising an annular base and guide member which is in two substantially semi-circular sections, an adjustable connection between said sections, set screws carried by the sections to project radially into the interior of the base and guide member, standards carried by the sections and positioned diametrically opposite each other, clamping members adjustably mounted on the standards, and a handle bar connecting the clamping members, said handle bar being composed of slidably connected sections.

1,398,843. GUIDE-BOX FOR ROLLING-MILLS. Andrew Cullen, Massillon, Ohio. Filed Oct. 30, 1919. Serial No. 334,845. 16 Claims. (Cl. 80—51.)

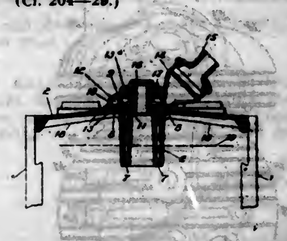
1. A guide box structure for rolling mills comprising a frame, a pair of guide holders each substantially channel shaped and located within the frame, individual guide blocks adjustable within each guide holder, set screws passing through the guide holders and holding the guide blocks in the holders, and other set screws for retaining one of the guide holders in fixed position.

1,398,844. INGOT-STRIPPING MECHANISM. Gustaf L. Dahlstrom, Jr., Chicago, Ill. Filed June 10, 1915. Serial No. 239,215. 12 Claims. (Cl. 22—66.)

1. An ingot stripping mechanism comprising in combination ingot gripping means, hoisting means secured to said ingot gripping means, and means associated with said ingot gripping means for retaining an ingot mold in position during a portion of the stripping operation.



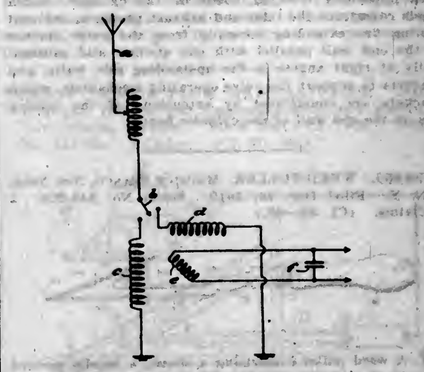
1,398,845. VALVE FOR CONTROLLING FLOW OF GASES. Robert H. Davis, London, England. Filed Aug. 11, 1920. Serial No. 402,885. 8 Claims. (Cl. 277—55.)



4. In a control valve fitting for controlling the flow of gas from apparatus in which the gas is stored in liquid form and which is provided with a vaporiser, an inlet pipe adapted to be connected to the vaporiser, an inlet pipe adapted to be connected to the top of the liquid container, a throttle valve with axis at right angles to the axis of the first inlet pipe, a communicating passage between said throttle valve and said first inlet pipe, a release valve arranged in a passage in communication with the second inlet pipe, a pressure gage communicating with the second inlet pipe, means for adjusting the pressure at which the release valve opens, and passages for bringing the gas passing through both valves to a common outlet.

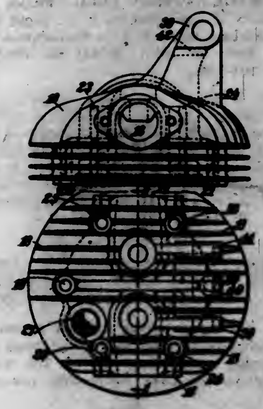
1,398,846. RAILWAY SIGNAL-TORPEDO. Frank Dutchess, Versailles, Pa., assignor to Central Railway Signal Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Feb. 2, 1921. Serial No. 441,715. 6 Claims. (Cl. 246—467.)

1. A railway signal torpedo comprising an explosive wrapped within a plurality of folds of a sheet to form a case therefor with extended wrapped portions, the extended wrapped portions folded inward, and a rail-engaging member passing through openings intermediate and transverse the ends of one of said portions.



1,398,847. STORAGE-BATTERY CELL. Frank Engel, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Sept. 12, 1917. Serial No. 190,879. 8 Claims. (Cl. 204—29.)

1. A battery cell cover having exhaust means placed substantially centrally thereof, said cover being saucer-shaped and having reinforcing ribs on the underside thereof forming passage-ways converging toward said exhaust means.

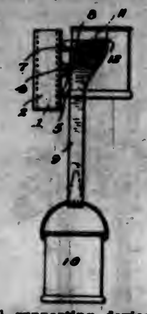


1,398,848. WIRELESS RECEIVING AND TRANSMITTING APPARATUS. James Erskine-Murray and James Robinson, Biggin Hill, England. Filed Mar. 30, 1920. Serial No. 369,892. 5 Claims. (Cl. 250—11.)

1. Wireless direction finding apparatus for use with transmitting systems in which the intensity of radiation is a maximum and minimum in directions which can be changed according to plan, comprising at the receiving station an aerial circuit, two identical coils arranged at

an angle with each other, means for including said coils alternately in the aerial circuit, a receiving circuit and an element in the said receiving circuit which can be adjusted in position with respect to the said two identical coils until the successive least intensity signals passed consecutively through the said two coils are heard as being of equal intensity, the position of the adjustable element being utilised to determine direction, substantially as described.

1,398,849. CYLINDER FOR INTERNAL-COMBUSTION ENGINES. ALFRED HUBERT ROY FEDDEN and LEONARD FREDERICK GEORGE BUTLER, Bristol, England, assignors to The Bristol Aeroplane Company Limited, Bristol, Gloucester county, England. Filed Nov. 1, 1920. Serial No. 421,134. 2 Claims. (Cl. 123—171.)

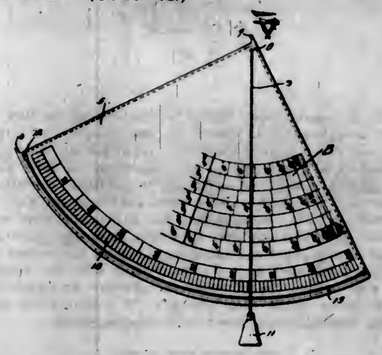


1. A working cylinder for internal combustion engine comprising in combination a cylinder head, an open-ended cylinder spigoted therein, cooling fins upon said head extending radially in planes transverse to the longitudinal axis of the cylinder, the aforesaid head formed with oppositely directed hoods of the cylinder, which hoods constitute the inlet and exhaust passages, external cooling fins extending normally from the outer surface of the end wall parallel with one another and substantially at right angles to the upstanding side walls, and brackets to support the valve operating mechanism, which brackets are constituted by extensions of the cooling fins on the end wall of the cylinder head.

1,398,850. WEED-PULLER. MAURICE FRANCO, New York, N. Y. Filed Dec. 16, 1919. Serial No. 345,225. 2 Claims. (Cl. 55—65.)

1. A weed puller comprising a shank, a handle secured to said shank, one end of said shank being reduced to form an extremely sharp point, a barb formed on the last named end of the shank and coöperating with the shank in forming a weed receiving space, gripping edges formed on the barb and shank, and cutting edges formed on the barb and shank to permit easy insertion of the tool into the ground.

1,398,851. PAINT-PAIL-SUPPORTING DEVICE. ELMER GARVER, Coulterville, Ill. Filed July 20, 1920. Serial No. 397,763. 2 Claims. (Cl. 248—24.)

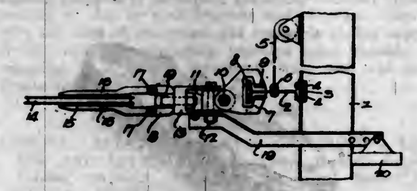


1. A paint pail supporting device comprising an adjustable clamp, a pin projecting therefrom, and a weighted hook pivotally connected to the pin and having an extension adapted to engage a slot in a paint pail.

1,398,852. BUILDING TOY. ALBERT PAUL GILBERT, Durham, N. C. Filed Feb. 4, 1920. Serial No. 356,156. 1 Claim. (Cl. 46—35.)

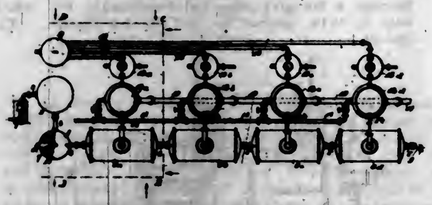
In the construction of toy buildings, the combination with panels which when placed edge to edge and assembled form the building, said panels being provided with a pair of rectangular recesses at either side of each corner, some of the panels having recesses intermediate the corners, and means consisting of a plurality of U-shaped clamps joined together at their closed ends, for connecting the edges of the panels together at the corners and at intermediate points, the rectangular recesses of adjacent panels coöperating to form a seat for the intermediate portion of the connecting means.

1,398,853. RANGE-FINDER. LEO GINZBOURG, Jersey City, N. J. Filed Dec. 1, 1919. Serial No. 341,588. 2 Claims. (Cl. 33—71.)



1. A device of the character described comprising a plate, a weighted member movable across the plate, and means carried by said plate and conforming to one of the edges thereof for guiding the weighted member in its movement across the plate, said guiding means being capable of movement into engagement with the weighted member to retain the same against movement relative to the plate.

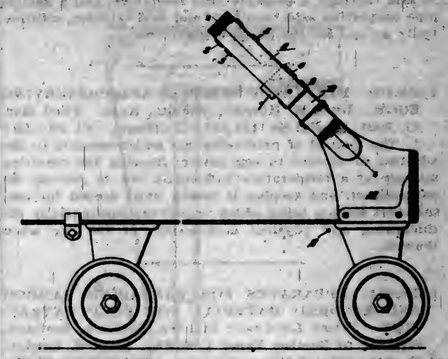
1,398,854. FOLDING CHAIR. JOHN GROOMS, Atlanta, Ga. Filed Nov. 9, 1920. Serial No. 422,824. 2 Claims. (Cl. 155—39.)



1. A chair having a seat section, a base section for the seat section movable relatively thereto for disposition in front thereof, and an elongated upstanding foot rest on the seat section to serve as a barrier to prevent a child leaving the seat section.

1,398,855. ROPE SHEAVE AND SUPPORT. WILLIAM E. HALM, Fort Washington, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 14, 1921. Serial No. 469,722. 3 Claims. (Cl. 254—190.)

1. The combination in a sheave carrier and support, of two posts; a beam vertically adjustable on the posts; means for securing the beam in position; a slide mounted on the beam and capable of longitudinal adjustment thereon; and a balance sheave mounted on the side.

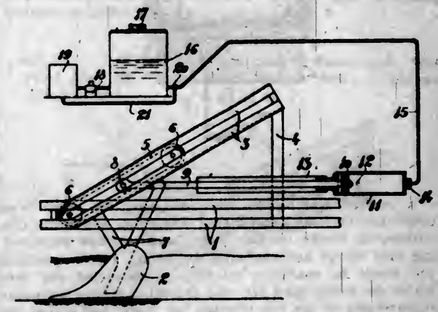


1,398,856. METHOD OF FRACTIONATE DISTILLATION. FRITZ HANSGIRG, Gratz, Austria. Filed Nov. 7, 1919. Serial No. 336,526. 6 Claims. (Cl. 204—63.)

1. A method of fractional distillation, comprising the steps of supplying an electric current to electrical resistances having large heat-transmitting surfaces, and maintaining a constant, low temperature-difference between said surfaces and the liquid undergoing distillation.

1,398,857. SKATE-FASTENER. MAURICE J. HOFFENBERG, New Haven, Conn. Filed Jan. 4, 1921. Serial No. 434,916. 6 Claims. (Cl. 46—53.)

1. A skate strap fastener comprising a plate having attaching loops at its ends and provided adjacent one end on one side edge with an inturned transversely arranged tongue overlying and spaced from one face of

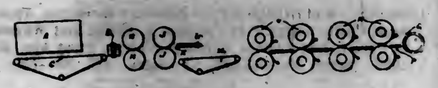


the plate, and strap engaging means adjacent the other end of said plate.

1,398,858. KALEIDOSCOPE. HERBERT E. HOUSE, Pasadena, Calif., assignor to Clarence S. Potter and Warren T. Potter, Los Angeles, Calif., Partners. Filed Apr. 13, 1920. Serial No. 373,556. 1 Claim. (Cl. 88—15.)

In a kaleidoscope, the combination of: mirrors set to form an equilateral dihedral angle; a cylindrical paper tube wound to tightly inclose said mirrors; and a tube into which said tube with its included mirrors may be forced.

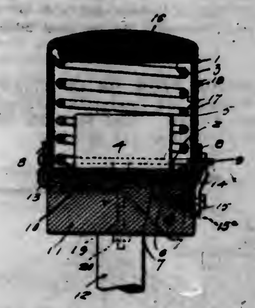
1,398,859. MOTOR PLOW OR CULTIVATOR. PAUL HJALMAR HUBTIG and CHRISTIAN HJALMAR MENTON, Katrineholm, Sweden. Filed Sept. 22, 1920. Serial No. 412,024. 2 Claims. (Cl. 97—30.)



1. In a motor plow or cultivator the combination of an inclined guide way, a plow body supporting carriage

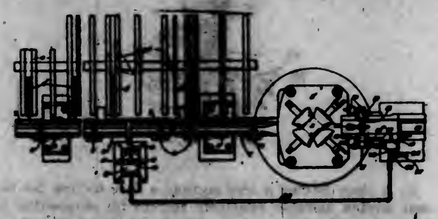
movable up and down therein, a cylinder, a piston therein, a piston rod secured to said piston and pivotally connected to said carriage, a pressure fluid receptacle, and a flexible pipe connecting said receptacle and said cylinder, substantially as and for the purpose set forth.

1,398,860. METHOD OF FREEZING AND PRESERVING EGGS. JOHN M. HUSSEY, Wichita, Kans. Filed Mar. 31, 1921. Serial No. 457,504. 2 Claims. (Cl. 99—11.)



1. The method of preserving egg which consists in the addition of alcohol to egg batter, freezing the resulting mixture at a temperature sufficiently low to prevent decomposition, and keeping it frozen until needed for use, sufficient alcohol being added to prevent substantially the thickening and physical modification of the egg when thawed.

1,398,861. APPARATUS FOR PREPARING BAMBOO AND KINDRED MATERIAL FOR PULP EXTRACTION. JAMES LOCKHART JARDINE, Penicuik, Scotland, assignor to Bamboo Paper Company, Limited, London, England. Filed Aug. 15, 1921. Serial No. 492,579. 5 Claims. (Cl. 83—75.)

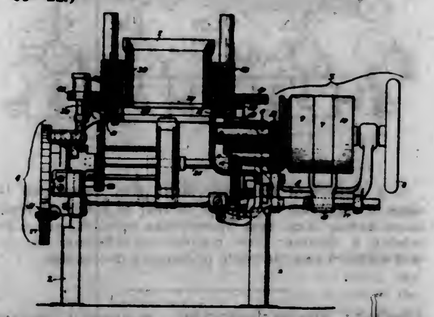


1. Apparatus for preparing bamboo and kindred material for pulp extraction comprising in combination means for feeding the stems through one or more pairs of cracking rolls, a plow device which splits the cracked stems into two portions, a series of pairs of crushing and disintegrating rolls through which the split stems pass, means for dividing the stems into portions of convenient length after they leave the last pair of crushing rolls, and means for driving the various parts of the apparatus as described.

1,398,862. CUSHION-TIRE. ADAM JOHN, Boston, Mass. Filed June 18, 1920. Serial No. 389,079. 1 Claim. (Cl. 152—8.)

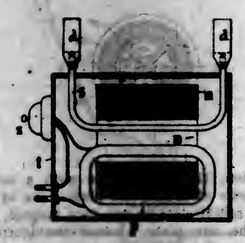
A cushion tire having an outer band, an inner band concentric therewith and spaced therefrom, relatively large cushioning blocks on the inner band, springs surrounding said blocks and engaging the bands, fabric retaining the bands in operative relation, a channeled rim into which the inner band fits, and fastening means extending transversely of the rim through the fabric and across the inner band.

1,398,863. DUMPING-TROUGH-COVER-OPERATING MECHANISM., WILLIAM H. JOHNSTON, Lorain, Ohio, assignor to National Tube Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Sept. 15, 1920. Serial No. 410,549. 8 Claims. (Cl. 80—42.)



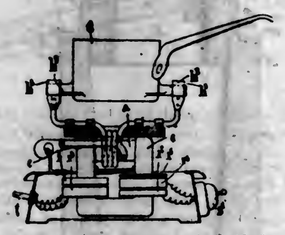
1. The combination with a pipe cooling table having a dumping trough and a hinged cover for said trough, of fluid actuated means operable by the pipes passing under said cover for automatically raising and lowering said cover.

1,398,864. SCRUB-BRUSH. MARTHA E. KELLY, Mill Hall, Pa. Filed Sept. 27, 1919, Serial No. 326,838. Renewed Aug. 2, 1921. Serial No. 489,202. 1 Claim. (Cl. 15—13.)



In combination with a brush, a strip having a recess in one face to receive part of the brush back and having its side edges corrugated to form finger receiving recesses separated by rounded projections and means for securing the strip to the brush back.

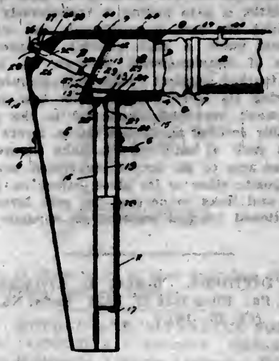
1,398,865. KNITTING-MACHINE CONSTRUCTION. WALTER LARKIN, Philadelphia, Pa., assignor to Fidelity Machine & Manufacturing Co., Philadelphia, Pa. Filed July 1, 1919. Serial No. 307,988. 5 Claims. (Cl. 66—21.)



1. The combination in a circular knitting machine of a main supporting frame; a needle cylinder; an adapter ring removably connecting the frame and the cylinder; and a cam ring rotatably mounted on the adapter ring.

1,398,866. ELECTRIC COOKING OR HEATING VESSEL AND APPARATUS. CLARENCE HAROLD LAUTH, London, England. Filed Dec. 16, 1919. Serial No. 345,851. 4 Claims. (Cl. 219—37.)

1. An electric cooking and heating apparatus for use in a supply circuit of high amperage and low voltage comprising a vessel for receiving the contents to be heated, the shell of the vessel constituting the main resistance of the circuit wherein the heat necessary for heating purposes is developed, projecting contacts rigidly secured to, and in good thermal and electrical contact, with the shell of the vessel and terminals on the supply circuit, the said projecting contacts being capable of engaging in a readily detachable way with the said terminals, as set forth.

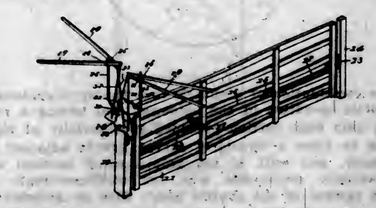


1,398,867. ELECTRIC COOKING OR HEATING VESSEL AND APPARATUS. CLARENCE HAROLD LAUTH, London, England. Filed Dec. 16, 1919. Serial No. 345,353. 10 Claims. (Cl. 219—47.)

1. In electric cooking and like heating apparatus comprising in combination a static transformer, having an open magnetic circuit, and a primary and a secondary electric circuit, and a heating device forming part of the secondary electric circuit of the transformer, a movable magnetic keeper and means by which the said keeper is attached to the stationary part of the apparatus, said means being such as to allow the keeper to be guided toward and complete the magnetic circuit when the secondary electric circuit is placed in position, without the keeper being in any way directly handled, as set forth.

1,398,868. NOZZLE. WILLIAM B. LEE, Seattle, Wash. Filed Aug. 3, 1920. Serial No. 401,039. 4 Claims. (Cl. 226—127.)

4. A nozzle comprising a body having a discharge end, a check valve in said body, a float for closing the valve, a slidably mounted needle in said body, means for positioning the needle in the path of the movement of the valve and adapted to be moved in one direction by the



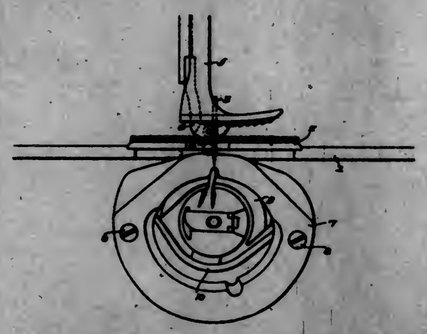
valve moving into a closed position, and means for moving the needle to force the valve into an open position.

1,398,869. SCREEN. GUSTAVE L. LE ROY, Kansas City, Mo. Filed Aug. 24, 1920. Serial No. 405,594. 2 Claims. (Cl. 156—38.)

1. A screen supporting frame of the character described comprising corner pieces of angle shape, pairs of side and end connecting bars forming the intermediate frame members, inwardly projecting flanges provided on the inner edge of said side and end bars, means for holding the frame in the window, including spring controlled dogs pivoted to the corner pieces at one end of the frame and having laterally extending points, and a spring plunger engaging the sill of the window.

1,398,870. GATE. EDWARD LIPSKA, Fennimore, Wis. Filed Jan. 13, 1921. Serial No. 437,006. 2 Claims. (Cl. 39—33.)

1. In a gate mounting and operating device, a post, a bracket thereon, a pintle having a crank arm extending



vertically through the bracket, a toothed segment on the said pintle above the bracket, an arm projecting from the pintle, a gate having a transversely disposed guide in which the arm is oscillatable and which contacts the said guide, a latch slidably mounted on the gate, means of communication between the latch and the arm, a toothed segment oscillatably mounted on the bracket having its teeth engaging the first mentioned toothed segment, standards connected to the post, collars adjustably secured on the standards, levers pivotally mounted on each of said collars, links connecting the levers on one arm to the second mentioned toothed segment at opposite sides of its pivot, levers on the opposite collar, and links connecting the said levers to the second mentioned toothed segment on opposite sides of its pivot.

1,398,871. DIVIDERS. ROBERT L. LIVINGSTON, Williamsport, Pa. Filed May 27, 1920. Serial No. 384,641. 3 Claims. (Cl. 33—191.)

1. An instrument of the class described having relatively slidable gage bars, a block provided with grooves mounting said bars and with a recess intermediate the grooves and communicating therewith, a gear member in said recess, teeth on the bars in mesh with those of the gear member, and a center point member to directly journal the gear, said center point passing through and beyond the gear and block.

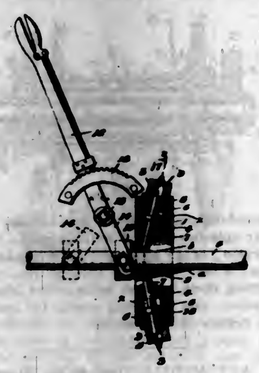
1,398,872. SHUTTLE FOR SEWING-MACHINES. ALFRED F. MCCOLLUM, Bloomsburg, Pa., assignor of three-fifths to James Magee, 2d, Bloomsburg, Pa. Filed June 28, 1918. Serial No. 242,475. 1 Claim. (Cl. 112—196.)

The combination of a shuttle race having a guideway; a shuttle operative in the guideway and having a relatively thin edge portion extended substantially at right angles to form a circularly curved groove adjacent its periphery, one wall of the groove being inclined and substantially continuous with the correspondingly inclined surface of the shuttle body; with an annular retaining member having a guiding rib of angular cross section slidably fitting said groove of the shuttle.

1,398,873. EXPANDING DEVICE FOR PISTONS AND PLUNGERS. STANLEY L. MCNALLY and JOHN D. WILSON, Scranton, Pa. Filed Mar. 2, 1920. Serial No. 363,735. 8 Claims. (Cl. 74—108.)

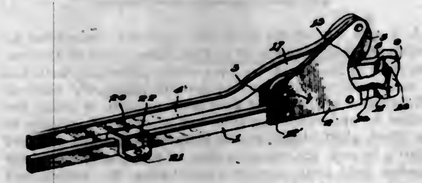
1. In a piston, the combination with a body portion comprising a pair of cylindrical plates, one of which has a plurality of radial slots in one face thereof, and means for holding the one plate against the slotted face of the other, of a plurality of expansion members spaced around the periphery of said body portion and having arms established in the passages formed by said slots and projecting into the cavity where the said slots meet, and means established within the said cavity and operable from the exterior of the body portion for engaging the arms to force the expansion members outwardly from the body portion.

1,398,874. HOT TOP FOR INGOT-MOLDS. THOMAS MCNALLY and WILLIAM S. ORR, Massillon, Ohio, assignors to The Central Steel Company, Massillon, Ohio, a Corporation of Ohio. Filed Oct. 30, 1919. Serial No. 334,492. 4 Claims. (Cl. 22—147.)



1. A hot top for ingot molds, comprising a collar of a size to rest upon and be supported by the top of the mold, said collar having a passage therethrough leading to the interior of the mold for access to said interior, and also having inner, outer, top and bottom walls defining a closed chamber, and heat insulating material located in said chamber and comprising the core material employed in the casting operation.

1,398,875. MECHANICAL BRAKE. MICHAEL D. MALONEY, Hadlock, Wash. Filed Feb. 20, 1920. Serial No. 360,124. 12 Claims. (Cl. 188—91.)



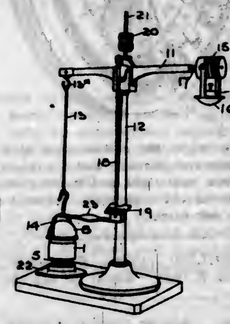
1. In combination, a shaft member, a housing member cooperating with said shaft member, a chamber provided in said housing member, a piston mounted in said chamber and having a rod extending toward said shaft member, means in said chamber for yieldingly urging said rod toward said shaft member, one of said

members being rotatable, a conical eccentric member mounted on one of said members, and means for moving

one of said members co-axially relatively to the other members whereby said rod will be brought into engagement with said eccentric member.

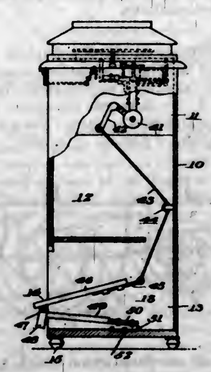
1,398,876. CHAIN-REPAIR TOOL. HENRY MATHIS, Virginia, Minn. Filed Dec. 18, 1920. Serial No. 431,660. 1 Claim. (Cl. 81—15.)

A tire-chain repair tool comprising a handle having one end laterally offset, a spreading point formed on and extending laterally inward at right angles to the extremity of said laterally offset end plates spaced apart and fixed to said handle and extending beyond one edge thereof, a jaw pivotally mounted between said plates and having a laterally offset end, a spreading point on and extending laterally inward at right angles to the extremity of said laterally offset end for coöperation with the spreading point on said handle; the said points having inner flat sides in closely adjacent parallel planes and also having outer sides tapered to points and the said points being reversely directed, a lever pivoted between the said plates at a point forwardly beyond and outwardly from the center of movement of the jaw and having at its forward end a rounded cam projection opposed to the outer edge of the jaw, and a spring interposed between the handle and the inner edge of the jaw and tending to force the jaw outwardly.



1,398,877. THREAD HOLDER AND TENSIONER. EDGAR C. MATSON, Handley, W. Va., assignor of one-half to J. A. B. Holt, Pratt, W. Va. Filed Jan. 19, 1920, Serial No. 352,374. Renewed Apr. 26, 1921. Serial No. 464,536. 6 Claims. (Cl. 242—150.)

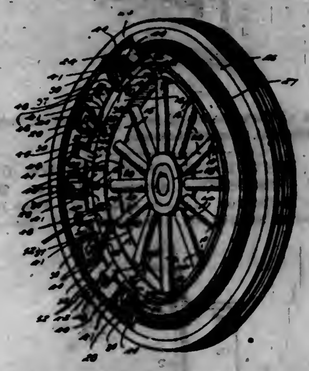
1. In a thread tensioner for tensioning a plurality of threads, a shaft, a plurality of pairs of thread-clamping jaws mounted on said shaft and adjustable relative to one another along the shaft, means including a spring to press the pairs of jaws toward one another and thereby press the jaws of each pair toward one another, and a universal adjusting member operable to simultaneously change



the tension of these pairs of jaws from one uniform tension to a different uniform tension.

1,398,878. METHOD AND APPARATUS FOR DETERMINING VISCOSITY. ANTHONY GEORGE MALDON MICHELL, Melbourne, Victoria, Australia. Filed Jan. 29, 1918. Serial No. 214,407. 18 Claims. (Cl. 265—11.)

1. The herein described method of determining the viscosity of a fluid which consists in measuring the period of time occupied for the complete separation, under the action of a predetermined force, of two closely adjacent surfaces having interposed between the same a film of the fluid of determinate thickness.

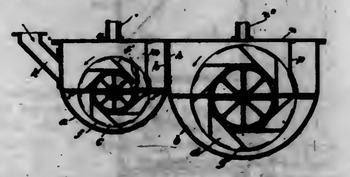


1,398,879. REWINDING MECHANISM FOR TALKING-MACHINES. NICALO MICUCCI, Philadelphia, Pa. Filed June 16, 1919. Serial No. 304,525. 1 Claim. (Cl. 185—39.)

The combination with a talking machine having a spring motor, of a rewinding mechanism comprising a compound

shaft including axially aligned sections, a slipping clutch connecting said sections, a second shaft disposed at right angles to the first mentioned shaft and geared thereto, spaced roller clutches carried by said second shaft, cranks connected to said clutches, operating pedals and flexible connections between the pedals and cranks.

1,398,880. RESILIENT WHEEL. Robert W. Millar, Wilmington, Del. Filed Oct. 2, 1919. Serial No. 327,868. 5 Claims. (Cl. 152—23.)



1. In a vehicle wheel the combination of a rigid wheel portion, a floating rim portion, and a sustaining medium interposed between said rigid and floating wheel portions comprising clustered and separately mounted elastic balls, substantially as set forth.

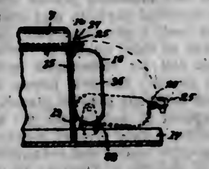
1,398,881. WIGGLER. Alpha E. Moore, Thorntown, Ind. Filed Oct. 9, 1920. Serial No. 415,922. 2 Claims. (Cl. 33—169.)

1. In a wiggler, a shank terminating in a socket, the said socket having slits forming segmental bearing members, a ball frictionally held by the said members in the socket, a shank rigid with the said ball and extending therefrom, the said shank having a longitudinally extending recess, and the said socket having a slot forming a continuation of the recess to receive the shank when the parts are in folded positions.

1,398,882. RECOVERING GASES WHICH HAVE BEEN ABSORBED BY SOLIDS. John Stanley Morgan, London, England, assignor to Thermal Industrial and Chemical (T. I. C.) Research Company, Limited, London, England, a British Company. Filed June 21, 1921. Serial No. 479,315. 3 Claims. (Cl. 252.)

1. A method of expelling gases which have been absorbed by solids, consisting in causing the solid to travel through a bath of liquid metal heated to the required temperature.

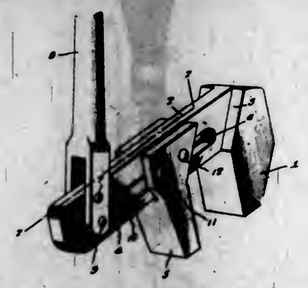
1,398,883. COASTER-BRAKE. August J. Meeman, Philadelphia, Pa., assignor to A. Mecky Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 24, 1921. Serial No. 480,145. 9 Claims. (Cl. 192—6.)



1. The combination of cranks respectively having integral tubular spindles formed with portions of other than circular section; brake shoes actuated by said portions of the spindles; a bolt extending through the crank spindles and permitting their relative rotation; a sleeve inclosing the brake shoes; and clutching means for operatively connecting the cranks and the sleeve.

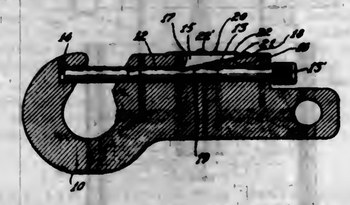
1,398,884. AUTOMOBILE TOOL-BOX. Harry W. Ails, Cincinnati, Ohio. Filed Oct. 20, 1919. Serial No. 331,955. 7 Claims. (Cl. 224—29.)

1. A tool box of the character disclosed comprising an automobile body, a pair of end sections wider at the bottom than at the top facing each other and rigidly attached to said body member and projecting outwardly horizontally from a side wall of said body member, a hinge rod carried by and extending from one of said end sections to the other, a lid hinged at one edge to said hinge rod, and a latch to lock the opposite edge of said lid to said body member, said body member constituting the bottom and one side wall of said box.



1,398,885. VEHICLE-CURTAIN CONTAINER. Harry W. Ails, Cincinnati, Ohio. Filed May 8, 1920. Serial No. 379,906. 2 Claims. (Cl. 224—29.)

1. In combination with a vehicle body seat frame, a curtain container having a curved lower portion to support the curtains, front and end sections, and a lip to engage and be latched to the seat frame, said container being pivotally attached to the vehicle body substantially coaxially with the curved lower portion, and forming with said vehicle body serving as one wall thereof, a closed container in one position and an open tray to discharge or receive the curtains in another position.

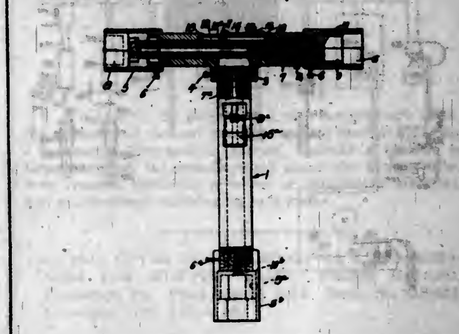


1,398,886. WRENCH. John Bancoman, Idaho Falls, Idaho. Filed April 26, 1921. Serial No. 464,733. 1 Claim. (Cl. 81—126.)

In a wrench, a stationary jaw having a longitudinally slotted shank, a movable jaw having a bifurcated end which receives the shank, an anti-frictional roller carried by the movable jaw and disposed in the slot and contacting with the opposed longitudinal walls thereof, a lever having a bifurcated end straddling and pivoted to

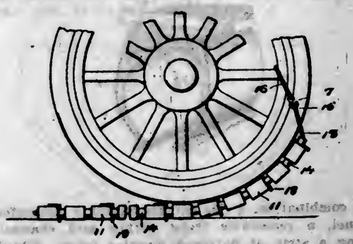
the shank adjacent to the outer end thereof, a link received in the slot of the shank and loosely pivoted in the bifurcated portion of the movable jaw and to the bifurcated end of the lever.

1,398,887. HOOK. Thomas J. Bond, Gadsden, Ala. Filed Apr. 8, 1921. Serial No. 459,583. 3 Claims. (Cl. 24—24.)



2. In combination, a hook including a shank, an enlarged portion formed on said shank and having a longitudinal bore, a locking element arranged within the bore for both sliding and rotary movement, said locking element being formed with a notch, said enlarged portion of the shank having a recess including an inclined bottom intersecting said bore, whereby said notch may be arranged within the recess by rotating the locking element, a latch reposing upon the inclined bottom of the recess and adapted to engage said notch to hold the locking element in active position, and means for limiting the movement of the latch element when retracted to open the hook.

1,398,888. SAFETY ATTACHMENT FOR GAS-STOVES. John E. Cadigan, New York, N. Y. Filed Apr. 5, 1920. Serial No. 371,334. 1 Claim. (Cl. 251—166.)

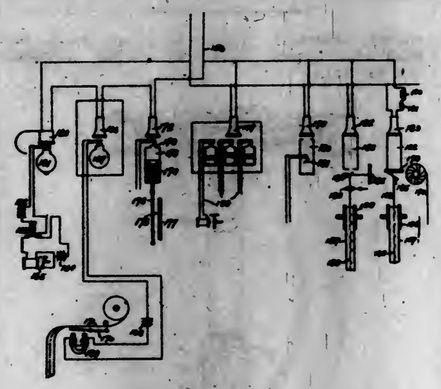


In a device of the character described, the combination of a member comprising attaching means and an upstanding flange provided with an aperture having abutment elements formed at its edge, a locking member adapted to be secured to for movement with the handle of a gas cock, said locking member being adapted to extend through said aperture and to engage with said abutment elements to prevent operation of said handle, one end of said locking member being formed into a handle for releasing said locking member from said abutment elements.

1,398,889. WRENCH. Joseph M. Clark, Apollo, Pa. Filed June 3, 1921. Serial No. 474,743. 1 Claim. (Cl. 81—121.)

In a wrench of the character described, a T-shaped body, outer socket members secured on the ends of the head of the body, an outer socket member secured on the outer end of the stem of the body, a rod slidably mounted in said head, inner socket members secured on the ends of said rod and slidable in the outer socket members of the head, means for securing said rod in adjustment, a rod slidable in said stem, an inner socket member secured on the outer end of said rod and slidable in the outer socket member of the stem, and means for securing the second mentioned rod in longitudinal adjustment.

1,398,890. TRUCK-WHEEL SHOE. William Coatsworth, Highland Park, Mich. Filed Jan. 20, 1919, Serial No. 272,131. Renewed Oct. 15, 1921. Serial No. 508,050. 3 Claims. (Cl. 180—7.)



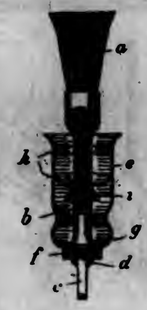
1. A tread block of substantially rectangular formation, and a bent plate carried by said block adjacent a longitudinal edge thereof, one portion of said plate projecting beyond the tread surface of the block to form a traction spur and another portion extending inwardly from the longitudinal edge and bearing on the inner surface of said block.

1,398,891. POLISH AND PROCESS OF MAKING THE SAME. William H. Damon, Chicago, Ill. Filed July 22, 1920. Serial No. 398,204. 8 Claims. (Cl. 134—24.)

8. A polish for automobiles and the like consisting of a cream-like liquid containing water and a finely powdered mild abrasive insoluble in water and in oil, the abrasive and oil of paraffin series being in a state of suspension more or less permanent.

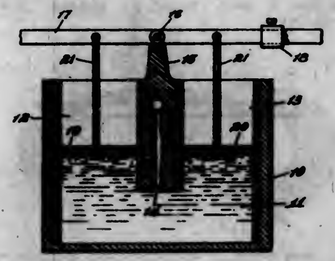
1,398,892. TELEGRAPHY. HERBERT G. DOSSER, Granville, Ohio. Filed Oct. 6, 1916. Serial No. 124,106. 2 Claims. (Cl. 178—47.)

1. In an electric transmission system, a tunable sound resonator, an element mounted to move bodily in the direction of air currents associated with said resonator when said resonator responds to sounds, and electric contacts operated by said element.



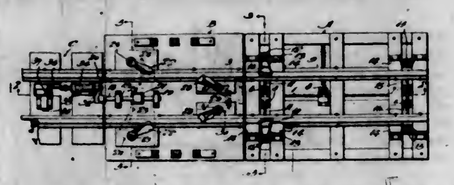
1,398,893. GROUND-GRIPPER DETACHABLE TREAD. EMIL ERIK, Ossining, N. Y., assignor, by direct and mesne assignments, of two-tenths to Elroy I. Quick, Ossining, N. Y., and three-tenths to Alden W. Harvey, New York, N. Y. Filed July 26, 1920. Serial No. 398,850. 1 Claim. (Cl. 152—17.)

In combination, a tire carcass having a circumferential channel, a removable tread within said channel comprising a strip of flattened annular fabric, folded back and forth upon itself, the folds of which are disposed laterally in relation to the tire carcass, said tread being secured to said carcass by means of circumferential tie wires penetrating each fold of the tread, and an interrupted circumferential rib arrranged centrally of said channel secured to said carcass by means of rivets, that portion of the tread member coming in contact with said interrupted rib having cut away portions adapted to receive the rib.



1,398,894. DRIP-GUARD FOR BRUSHES. FRANZ GAMM, Fort Wurttemberg, near Metz, Germany. Filed Mar. 5, 1915. Serial No. 12,467. 1 Claim. (Cl. 15—38.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

A drip-guard for use on shaving and other brushes, comprising in combination a receptacle in the form of a handle, having an opening in its top and deflectors inside

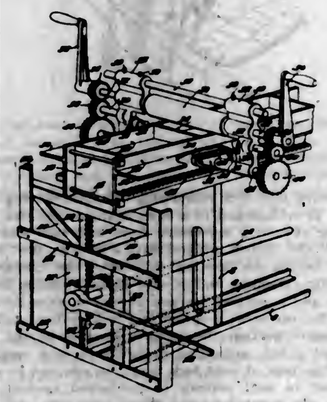


of the wall, and a deflector arranged on the shaft of the brush.

1,398,895. DAMPER-REGULATOR. FRANK GRAY, Philadelphia, Pa. Filed Oct. 11, 1919. Serial No. 329,923. 2 Claims. (Cl. 236—26.)

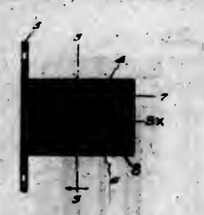
1. In combination with furnace and its boiler, the furnace being provided with a damper, a regulator comprising a casing containing a liquid adapted to be placed under pressure by steam generated within the boiler of the furnace, a pair of pistons disposed within said casing and arranged to be acted upon by the liquid therein under pressure, said pistons being of different diameters, and a lever connected with the damper and connected with said pistons at opposite sides of its fulcrum.

1,398,896. MINE-CAR-CONTROLLING MECHANISM. GEORGE FOSTER, Bicknell, Ind. Filed Aug. 14, 1919. Serial No. 317,491. 3 Claims. (Cl. 187—97.)



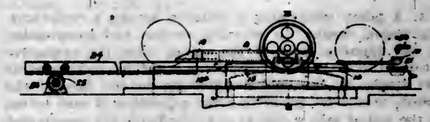
1. A car stop adapted to be pivotally mounted adjacent to a track-rail and comprising a wheel engaging portion adapted to extend over the rail's head and a rail-engaging portion adapted to extend under the rail's head, substantially as shown and for the purpose specified.

1,398,897. DRAG-SCRAPING APPARATUS. WILLIAM E. HALS, Fort Washington, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Feb. 11, 1920. Serial No. 357,768. 1 Claim. (Cl. 254—190.)



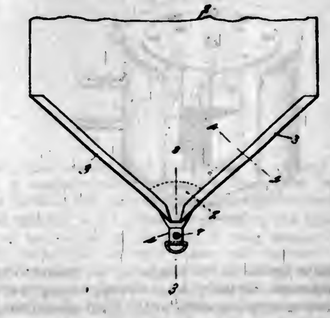
The combination in a hoisting apparatus, of a flanged post, two sets of sheaves mounted on the post, each set of sheaves having a carrier provided with extensions encircling one of the flanges of the post; a frame having trunnions mounted in each carrier, one of the trunnions being hollow for the passage of a hoisting rope, the two sets of sheaves being located close together, one sheave of each set being adjustable in respect to the other sheave; and means for retaining each adjustable sheave in the position to which it is adjusted.

1,398,898. MACHINE FOR MAKING CONCRETE BLOCKS. THEODOR E. HOHENMANN, Boston, Mass., assignor to Dura Construction Company, Boston, Mass., a Corporation of Massachusetts. Filed July 6, 1920. Serial No. 394,074. 23 Claims. (Cl. 25—21.)



1. In a machine for making concrete blocks, the combination of an adjustable form to receive the concrete mixture and means locked to said form for exerting a rolling pressure upon the material to force it into said form.

1,398,899. FUEL-MIXER. FRANCIS F. HUGHES, Atlanta, Ga. Filed Sept. 28, 1920. Serial No. 413,331. 3 Claims. (Cl. 48—180.)

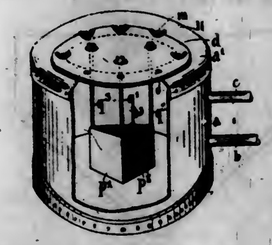


3. A device for the purpose described comprising a cylindrical shell and element arranged in said shell and having a contracted intermediate portion, whereby a passage is formed through the element of the shape of a Venturi tube, said element including a frame of reticulated material, and an absorbent covering on said frame.

1,398,900. COVER FOR SOAKING-PITS AND MECHANISM FOR SHIFTING SAME. WALTER KENNEDY, Pittsburgh, Pa. Filed Aug. 16, 1919. Serial No. 318,053. 7 Claims. (Cl. 110—176.)

1. The combination of a cover, a truck movable independent of the cover, means for raising the truck when shifted horizontally and means whereby the truck will engage and lift the cover, when the truck is raised.

1,398,901. END-BINDER FOR THE RECORD-SHEETS OF PLAYER-PIANOS. OTTO L. KOCH, Jr., Woodlynne, N. J. Filed Sept. 30, 1920. Serial No. 413,670. 1 Claim. (Cl. 84—162.)



As a new article of manufacture, a one-piece record sheet binder, comprising a body, arms of comparative reduced width reaching laterally from opposite ends of the body and folded throughout their lengths transversely upon themselves and having adhesive means at their inner sides to secure them on the end portion of a record sheet, and a tab reaching from the body and arranged in lapped relation to the inner ends of the folded portions of the arms; the said tab being folded lengthwise on itself to hold a finger piece and having its opposed portions permanently connected together by an eyelet to form the tab into a loop.

1,398,902. AIR-PUMP. LEVI LEANDER LARSON, Los Angeles, Calif. Filed Dec. 22, 1920. Serial No. 432,606. 4 Claims. (Cl. 230—27.)

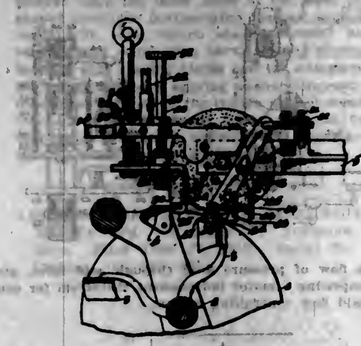
1. A pump comprising a cylinder having a reciprocating piston, means for creating suction and compression at the opposite faces of the piston upon the respective strokes thereof, means comprising a spring compressed at one stroke by the fluid compression at one face of the piston, means for permitting the expansion of said spring at the end of said stroke so as to discharge the compressed fluid to the cylinder at the opposite face of the piston, and means for discharging the fluid at said face of the piston upon the opposite compression stroke.

1,398,903. ELECTRICALLY-HEATED LIQUID-HEATER. CLARENCE HAROLD LAUTH, London, England. Filed June 16, 1920. Serial No. 389,470. 5 Claims. (Cl. 219—39.)

1. A liquid heater to be heated by an electric current of high amperage and low voltage flowing through the shell of the heater having a portion of the shell constituting the heating resistance through which the electric current is passed, made separate and detachable from the remainder of the shell of the vessel intended to receive the liquid to be heated, as and for the purposes set forth.

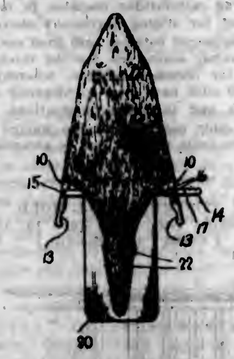
1,398,904. PLIERS. EDWARD M. LOFTUS, St. Paul, Minn. Filed Aug. 9, 1920. Serial No. 402,158. 1 Claim. (Cl. 294—41.)

The combination with a pair of pliers having a pair of jaws pivotally secured together and provided with shoulders disposed transversely of their gripping ends, of a lateral extension formed on one jaw adjacent the pivotal connection, a dog having one end pivotally secured to said



extension and its opposite end beveled for adjustable engagement with the outer end of the shoulder of the other jaw to limit the opening movement of the jaws.

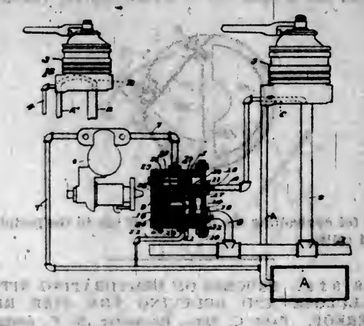
1,398,905. AUTOMOBILE-LOCK. RONALD LUFLOW, Phoenix, Ariz. Filed May 20, 1920. Serial No. 382,791. 1 Claim. (Cl. 70—90.)



A steering post lock comprising a bracket having a back adapted to be fastened to a dash board or the like, a web extending angularly downward from said back and terminating in and formed integral with a steering post column support having an opening to receive the column; the rearwardly extending end of said support having two flat surfaces and a central concave curved surface intermediate the flat surfaces; a cylindrical lock casing received in said concave portion the concave portion having at its lower end a hole extending inwardly to said opening to receive the bolt of said lock which is adapted to engage a member in said column to be locked against movement; a clip member having flanges extending outwardly from a central concave curved portion, and means for fastening said clip to the support, said concave surfaces matching to form a cylindrical hole into which fits said lock casing, and a base in the lower portion of said hole against which abuts the end of said cylindrical lock casing.

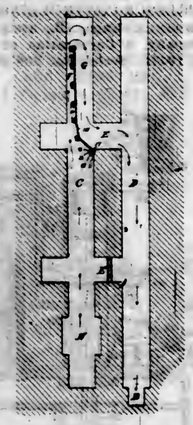
1,398,906. LAWN-MOWER GRINDER. RAMON H. MADDEN, Los Angeles, Calif. Filed July 23, 1920. Serial No. 398,158. 6 Claims. (Cl. 51—249.)

1. In a lawn mower grinder having a supporting frame secured to a lawn mower and a grinding wheel carried thereby, a guide plate arranged to engage a blade of the lawn mower, and an operating connection for pivotally and longitudinally adjusting said guide plate.



1,398,907. FUR-STRETCHER. HENRY MILTON MONTGOMERY, Cedar Vale, Kans. Filed Mar. 9, 1920. Serial No. 364,598. 1 Claim. (Cl. 149—21.)

A fur stretcher comprising a pair of members pivoted at one end for movement toward and away from each other, a bar for holding said members fixed relatively in adjusted position and an elongated member slidably mounted upon the bar, said elongated member comprising a pair of flat sections secured together, and having their opposed faces formed with transverse grooves to provide a bar receiving channel at one side of the transverse center of the elongated member and fastening devices carried by said elongated member.



1,398,908. SAFETY ATTACHMENT FOR AIR-BRAKE SYSTEMS. WALTER M. MOORE, Portsmouth, Va. Filed Mar. 22, 1919. Serial No. 284,511. 5 Claims. (Cl. 303—14.)

1. In an air brake system of train control, the combination with a brake pipe, an engineer's brake valve connected therewith, a feed valve and a main reservoir pipe, of an attachment connected to the feed valve, the brake valve, the brake pipe and the main reservoir pipe and comprising a casing, valves operating therein, one of said valves automatically acting upon a reduction in pressure in the brake pipe to cause operation of the other valve by main

reservoir pressure to cut off connection between the feed valve and the brake valve.

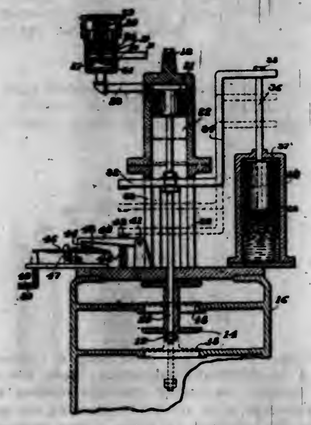
1,398,909. COAL-MINE CURTAIN-ROD. JOHN M. NORTH, Sparta, Ill. Filed Oct. 10, 1918. Serial No. 257,626. 1 Claim. (Cl. 156—19.)

A coal mine curtain rod comprising a tubular lower member, a longitudinally adjustable upper rod member having a pointed end having telescopic relation with the lower rod member, a set screw for retaining the upper rod member at any adjusted elevation, a ring member longitudinally adjustable on said upper rod member, a set screw for retaining said ring member at adjusted position along said upper rod member, an upwardly extending curtain supporting lip fixed to said ring member and a screw threaded member carried in the lower end of the tubular lower member which extends below the lower edge thereof to permit locking of the curtain rod in a position between the floor of a working place in a coal mine and the roof thereof.

1,398,910. INKING-ROLLER. CLAUDE L. POST, Chicago, Ill. Filed Feb. 19, 1921. Serial No. 446,363. 12 Claims. (Cl. 101—367.)

1. In a device of the kind described, an inking roller having a reservoir therein opening on the periphery of

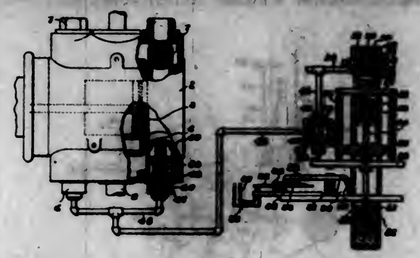
said roller and adapted to receive a supply of ink, a cover fitting over said reservoir at said peripheral opening, and



means for controlling the discharge of ink to the periphery of said roller.

1,398,911. PROCESS OF DEHYDRATING NITROCELLULOSE AND REDUCING THE FIRE RISK THEREOF. Paul C. Smel, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Aug. 9, 1920. Serial No. 402,478. 5 Claims. (Cl. 52—20.)

1. In the process of preparing nitrocellulose, the step which comprises treating nitrocellulose carrying water, with a liquid comprised chiefly of effectivly anhydrous butylic alcohol of low volatility.

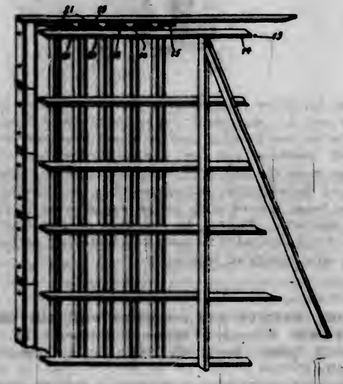


1,398,912. COMPRESSOR-CONTROLLING MECHANISM. Wade H. Wineman, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 22, 1917. Serial No. 208,432. 47 Claims. (Cl. 230—24.)

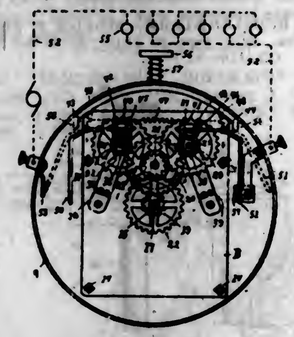
1. In a compressor controlling apparatus, a plurality of controlling mechanisms for controlling the operation of a compressor, and means for governing the operation of both said controlling mechanisms normally disengaged from one of the latter but engageable therewith to control the same.

1,398,913. COMPRESSOR-CONTROLLING MECHANISM. Wade H. Wineman, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 22, 1917. Serial No. 208,433. 27 Claims. (Cl. 230—24.)

1. In combination with a compressor having automatically acting inlet valves, an unloading mechanism, means for controlling said unloading mechanism comprising a pressure fluid inlet to said mechanism, means for controlling a flow of pressure fluid through said inlet, and means comprising a motor independent therefrom for controlling said flow controlling means.



1,398,914. SLIDE-RULE. Robert A. Pierce, Los Angeles, Calif. Filed Feb. 25, 1920. Serial No. 361,331. 3 Claims. (Cl. 235—70.)



1. A slide rule having relatively fixed spaced scales for respective cubical foot and weight factors in an example, the cubic foot scale having the usual logarithmic graduations and having calibrations readable in inch terms, a runner arranged for sliding movement above said fixed scales, a slide arranged between said fixed scales and having two logarithmic scales one for the thickness dimension and one for length dimension, whereby when the runner and said slide have been coördinately arranged on breadth, length and thickness graduations of a given character the cubic content and the weight of a given material for the cubic content can be ascertained on the weight scale.

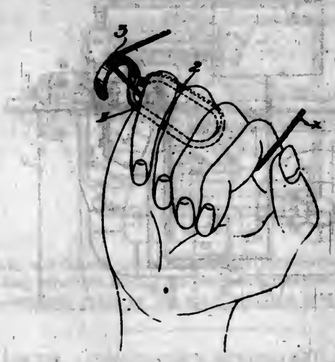
1,398,915. CONCRETE-WALL MOLD. Charles S. Porter, Houston, Tex. Filed June 11, 1920. Serial No. 388,280. 1 Claim. (Cl. 25—131.)

A cement wall mold comprising outer and inner frames, a plurality of separate vertically disposed trough shaped members disposed with their edges against the outer side of the inner frame with their bight portions in spaced relation to the inner side of the frame and having their sides arranged in spaced relation, vertically extending nailing strips disposed between and serving as spacing means for the trough shaped members, reinforcing bars secured upon the inner faces of the sides of the trough shaped members, horizontally disposed spacing blocks located with each trough shaped member and engaging against said reinforcing bars, spacing members disposed between said spacing blocks and the outermost portion of the trough members, spacing washers disposed between the outermost portions of the trough shaped members and the inner face of the outer frame, and tie bolts passing through both frames, through said spacing washer, the spacing block and the spacing member.

1,398,916. TIME-ACTUATED ELECTRICAL SWITCH MECHANISM. Millard F. Roebling, Cincinnati, Ohio. Filed June 27, 1919. Serial No. 307,201. 6 Claims. (Cl. 200—38.)

1. A time controlled switch comprising a rotatably mounted releasing member, an electrical switch arm actuated by said rotatably mounted releasing member to open or close an electrical circuit, a clock mechanism, a resiliently actuated cam member driven rotatably by said clock mechanism to release said rotatably mounted releasing member, and a setting spindle having a cam engaging and restraining head, said spindle being rotatably adjustable to predetermine the period of release of said cam and rotatably mounted releasing member.

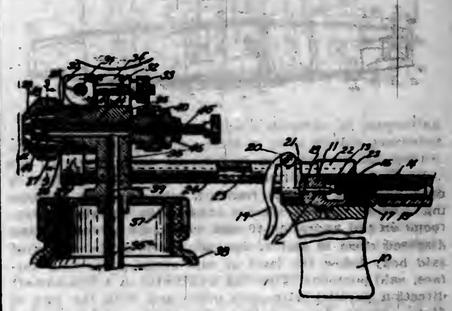
1,398,917. HEAT-RESISTING IRON. Pierce D. Schenck, Dayton, Ohio, assignor to The Duriron Company, Inc., a Corporation of New York. Filed Apr. 12, 1920. Serial No. 373,326. 2 Claims. (Cl. 75—1.)



1. A heat resisting iron composition comprising approximately 10 per cent. nickel, 3 per cent. chromium and the rest substantially all iron.

1,398,918. ACID-RESISTING IRON. Pierce D. Schenck, Dayton, Ohio, assignor to The Duriron Company, a Corporation of New York. Filed Apr. 22, 1920. Serial No. 375,668. 2 Claims. (Cl. 75—1.)

1. An iron composition comprising 8 to 18 per cent. silicon, 5 to 20 per cent. copper, 5 to 20 per cent. nickel and the balance iron.

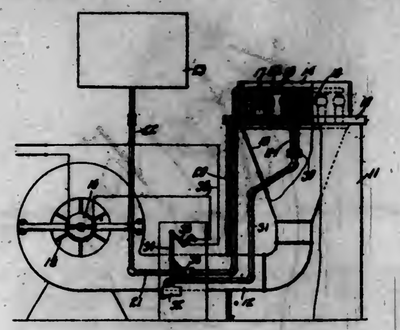


1,398,919. HAND TWINE-CUTTER. Hugo Schwartino, Green Bay, Wis. Filed Mar. 1, 1920. Serial No. 362,313. 1 Claim. (Cl. 30—14.)

As a new article of manufacture, a one-piece twine cutter comprising a loop adapted to be fitted over the little finger and one or more adjacent fingers, the palm stretch of the loop being circular in cross section, and the outer stretch thereof being flat in cross section to thereby prevent wabble of the loop, a flat hooked-blade

extending from the loop approximately parallel to the little finger and beyond the same to constitute a receiver for a cord that is passed through the closed palm, whereby said cord is severed incidental to a pull strain being put upon it.

1,398,920. AIR-BRUSH. Augustine Shelburne, South Pasadena, Calif. Filed Mar. 2, 1921. Serial No. 449,157. 7 Claims. (Cl. 91—45.)



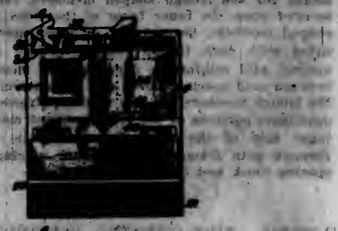
1. In an air brush, the combination with an angular fitting through which is formed a liquid passageway and one leg of said angular fitting being tapered, of a tubular member applied to the tapered leg of said fitting, a conical air nozzle carried by said tubular member and a pivotally mounted adjustable link that forms readily releasable means for securing said tubular member to said angular fitting.

1,398,921. HEATING PLANT. Fred Hubbert Short, Waterville, Me. Filed June 12, 1920. Serial No. 388,512. 17 Claims. (Cl. 158—53.)

3. A heating plant comprising, a base embodying a plate, a plurality of burner units arranged above the plate in geometrical relation and communicating with the under side of the plate, a retort in the form of a pipe bent to correspond to the geometrical arrangement of the burner units located above such units extending

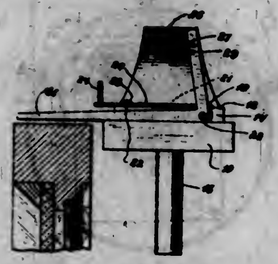
through the center of the base and discharging slightly below the same, an air conduit arranged below the base

embracing the discharge from the retort and communicating with the burner units and means to supply air to the conduit.



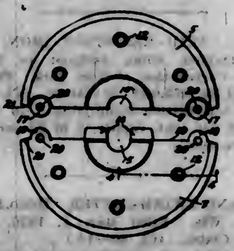
1,398,922. FLYING-MACHINE. Rexford M. Smith, Washington, D. C., assignor, by mesne assignments, to Connecticut Aircraft Company, New Haven, Conn., a Corporation. Filed Sept. 30, 1909. Serial No. 520,240. 2 Claims. (Cl. 244—2.)

1. A combined air and marine craft comprising in combination, a body or frame, a biplane aerial supporting surface carried thereby, two main sustaining pontoons on the underside of said body, said pontoons being disposed close to and at opposite sides of the center of said body below the level of said aerial supporting surface, said pontoons extending lengthwise in a fore-and-aft direction parallel with each other and with the line of flight, means for propelling the craft in the air and on the water and lifting the craft from the water into the air, adjustable controlling means for steering the craft and maintaining its longitudinal and lateral stability, and a pair of fixed centrally located parallel vertical fins in vertical alinement with the outer walls of the pontoons, said fins being arranged above the upper plane of the biplane aerial supporting surface on opposite sides of the longitudinal axis of the machine and parallel with the line of flight for maintaining the direction of travel of the craft and overcoming lateral leeway.



1,398,923. AUTOMOBILE-SIGNAL. Leslie W. Soules, Seattle, Wash. Filed Aug. 7, 1920. Serial No. 401,877. 1 Claim. (Cl. 116—42.)

In an automobile signal, a box having a series of orifices in parallel arrangement adjacent to the upper portion of said box, an elongated orifice formed beneath said first mentioned orifices, doors adapted to close two of said first mentioned orifices, a hinged member adapted to normally close said elongated orifice, means for moving said doors and hinged member independently through an arc of 90 degrees and an arrow attached to each of said doors,



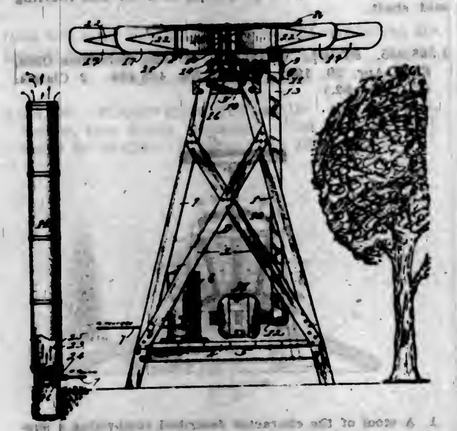
so as to point in opposite directions, the contour of said arrows being invisible when said doors are in their normal position.

1,398,924. BURGLAR-ALARM. William B. Stephens, Sunset, Tex. Filed Sept. 20, 1919. Serial No. 325,059. 1 Claim. (Cl. 116—87.)

A burglar alarm comprising a plate, a tubular member or barrel carried thereby and adapted to receive a cartridge, a pivotally mounted apertured cover plate adapted to be moved over the end of the cartridge to hold the latter in position, a stop pin extending upwardly from the first mentioned plate for engagement within a slot provided in the cover plate, whereby the aperture in the latter will be properly positioned over the cartridge, a spring having one end secured to the first mentioned plate, a firing pin carried by the opposite end of the spring and adapted to pass through the aperture in the pivoted cover plate for contact with the cartridge, a trigger engageable with the spring plate and located in the path of a window sash, whereby the latter will operate the trigger to release the firing pin.

1,398,925. FURNITURE-BUMPER. Harry F. Tyler, Redondo Beach, Calif. Filed Sept. 3, 1920. Serial No. 407,848. 3 Claims. (Cl. 45—127.)

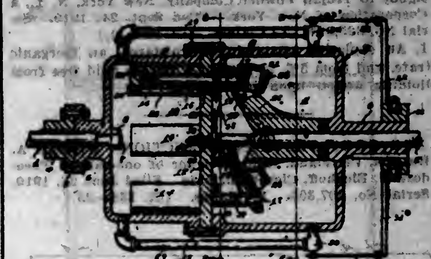
1. A furniture bumper comprising a plate adapted to be received around the shank of a caster, said plate



comprising separable pivotally connected sections having means for connecting the swinging ends of said pivotally connected sections, and a cooperating tongue and groove at the meeting edges of said sections between said pivotal connection and said connecting means.

1,398,926. BEARING MATERIAL. Edwin E. Waite, Framingham, Mass., assignor, by mesne assignments, of one-half to Multicolor Company, Framingham, Mass. Filed Mar. 20, 1918. Serial No. 15,944. 14 Claims. (Cl. 64—19.)

4. An article of the character described, consisting of asbestos fabric impregnated with binding and anti-friction material, baked to a hard consistency and containing lubricating material.

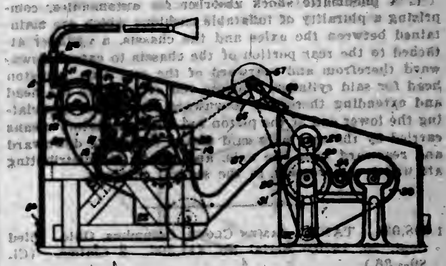


1,398,927. TEMPERATURE-MODERATOR FOR ORCHARDS AND THE LIKE. Lester J. Whitlock, Pomona, Calif. Filed Dec. 31, 1919. Serial No. 349,838. 3 Claims. (Cl. 126—59.5.)

1. A temperature moderator for orchards and the like comprising a horizontally rotatable fan disposed at a height greater than the trees, a supporting frame for said fan, a plurality of heating stacks apart from and surrounding said frame, open at their upper ends, a burner within each stack whereby heated air is delivered from the open end of said stack, and means for rotating said fan whereby air currents are set up to distribute the heated air throughout the orchard.

1,398,928. POWER-TRANSMISSION MECHANISM. Romeo L. Williamson, Mount Vernon, Ohio. Filed May 2, 1918. Serial No. 232,600. 17 Claims. (Cl. 192—59.)

1. In a transmission mechanism of the character described, the combination with a driving and a driven shaft, of means for forming a driving connection between said shafts comprising a casing member rigidly carried by one of said shafts, said casing being divided into a high and a low pressure compartment, a pump structure operatively located between said compartments, means associated with the other of said shafts for deriving its rotary motion by cooperation with said pump structure,



said last named shaft from active cooperation with said pump structure during the continued rotation below a predetermined speed of the shaft carrying said casing.

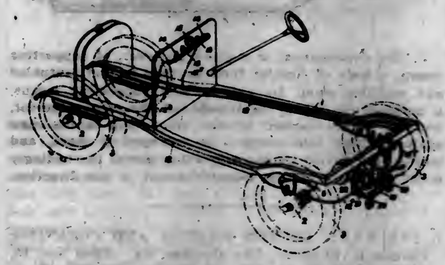
1,398,929. COMBINATION SPRING AND SHOCK-ABSORBER. Hugo A. Becker, Baltimore, Md., assignor of forty-five per cent. to George A. Aman, Baltimore, Md., and twenty-five per cent. to Frank Huart, Baltimore, Md. Filed Dec. 17, 1919. Serial No. 345,501. 3 Claims. (Cl. 267—20.)

3. The combination in a shock absorber, of supporting means, a body of circular form in cross section journaled and rockable about its axis in said supporting means, a gudgeon carried by said body off the center thereof, movable means carried by the supporting means and against which said gudgeon is arranged to work, and means also carried by the supporting means to yieldingly resist movement of said movable means in one direction.

1,398,930. COTTON PICKING AND CLEANING. George R. Bennett, Glen Osborne, Pa. Filed Nov. 15, 1920. Serial No. 424,115. 16 Claims. (Cl. 56—12.)

1. The method of picking and cleaning cotton herein described which consists in removing the lint from a boll by a rapidly moving stream of air, causing such portion of lint to move laterally from such stream of air,

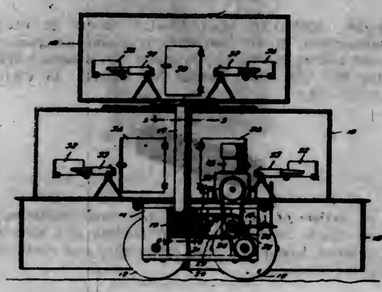
1,398,981. MANUFACTURE OF NITROSTARCH EXPLOSIVES. Jesse B. Bronstein, Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y., a Corporation of New York. Filed Sept. 24, 1919. Serial No. 325,927. 12 Claims. (Cl. 52—11.)



1. An explosive comprising nitro-starch, an inorganic nitrate, and from 5% to 12% of a viscous fluid free from colloiding action upon nitro-starch.

1,398,982. TRACK CONSTRUCTION. William A. Braden, Cleveland, Ohio, assignor of one-half to Theodore H. Eickhoff, Cleveland, Ohio. Filed June 28, 1919. Serial No. 307,395. 17 Claims. (Cl. 238—25.)

1. In railroad track construction, the combination of rails, means connecting with the rails and extending downwardly into the roadbed for restraining lateral movement of the rails, and means underlying said rails in extensive contact with the roadbed for supporting said rails, said last means being unattached to the rails or other supporting elements.



1,398,933. PNEUMATIC SHOCK-ABSORBER. John Westropp Brereton, deceased, by Robert Kean Brereton, executor, Athlone, Ireland. Filed Oct. 7, 1921. Serial No. 506,145. 5 Claims. (Cl. 267—65.)

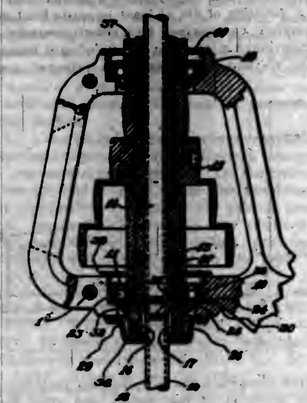
1. A pneumatic shock absorber for automobiles, comprising a plurality of inflatable cushions which are maintained between the axles and the chassis, a cylinder attached to the rear portion of the chassis to extend downward therefrom and rearward of the rear axle, a piston head for said cylinder, a piston rod attached to the head and extending therefrom downward, means for associating the lower end of the piston rod with oscillatory means carried by the rear axle said means extending downward and rearward from the axle, and means for distributing air under compression to the several cushions.

1,398,934. TANK. James Cloud, Columbus, Ohio. Filed Sept. 20, 1920. Serial No. 411,393. 3 Claims. (Cl. 89—36.)

1. An armored motor car of the class described comprising a wheel supported frame, a substantially diamond shaped metallic shell mounted on said frame and having a plurality of openings therein, means for closing said openings, a metallic apron extending downwardly from said shell, a shaft journaled in suitable bearings on said frame and extending upwardly through said shell, means for rotating said shaft, a substantially diamond shaped

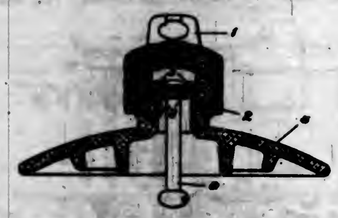
turret mounted upon the upper end of said shaft having a plurality of openings therein, means for closing said openings and means for propelling said car and rotating said shaft.

1,398,935. STOOL. Charles F. Miller, Columbus, Ohio. Filed Apr. 29, 1921. Serial No. 465,438. 2 Claims. (Cl. 155—52.)



1. A stool of the character described comprising a supporting frame, a seat, a stem depending from said seat, said stem being provided with a threaded lower portion, a member threaded to the lower portion of said stem and permitting of vertical adjustment on the part of said seat, a second member loosely carried by said stem above said first named member, a rebound spring positioned between said members and serving to space the latter, and a plurality of shock absorbing springs, extending between said members and said supporting frame.

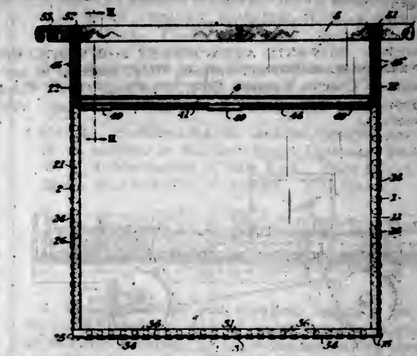
1,398,936. LUBRICATING MEANS. William J. Bayrer, Hartford, Conn.; Homer H. Bayrer, administrator of said William J. Bayrer, deceased, assignor to Robert G. Henry, West Hartford, Conn. Filed Sept. 18, 1916. Serial No. 334,631. 4 Claims. (Cl. 64—56.)



1. Lubricating means including in combination with a bearing support, a shaft or spindle extending therethrough, and an annular ball bearing interposed in substantially horizontal relation between the bearing support and the spindle, a lubricant container comprising an annularly grooved member associated with the non-rotative member of the ball bearing, and a lubricant distributer having an inclined wall depending into the groove of the container

and extending toward the ball race, the distributer being adapted to rotate with the spindle, whereby centrifugal

force will cause lubricant on the inclined wall of the distributer to be directed into the ball race.



1,398,937. SUSPENSION-INSULATOR. Max Carolus, Teltow, near Berlin, Germany. Filed Sept. 29, 1921. Serial No. 504,243. 3 Claims. (Cl. 173—318.)

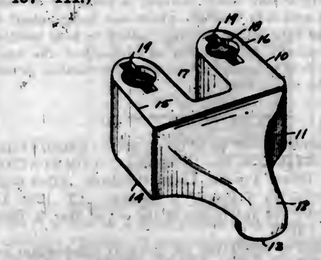
1. In a suspension insulator an insulating body with a head formed with a cavity therein, a supporting ledge in said cavity, a bolt, a conical head on said bolt, a malleable metal ring adapted to be slipped over said bolt and to be expanded by the conical head and pressed against said supporting ledge throughout its periphery so as to prevent said conical head from leaving said cavity, said ring being contracted at its lower edge to engage said bolt, said ring being provided with a circumferentially weakened area adjacent said contracted end, whereby during expansion said ring will bend at its predetermined line of weakness.

1,398,938. FILM-HOLDER. Albert K. Chapman, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 9, 1920. Serial No. 429,540. 8 Claims. (Cl. 95—100.)

1. A frame for holding film during fluid treatment and drying said frame comprising two spaced channel members, the flanges of each of which extend toward the other member, a transverse bar connecting the lower portions of said members, a transverse element connecting the upper portions of said members at one side of the channels thereof, the flange of each member nearest said element having

fluid-draining openings and the other flange of each member having a smooth continuous inner film-guiding face.

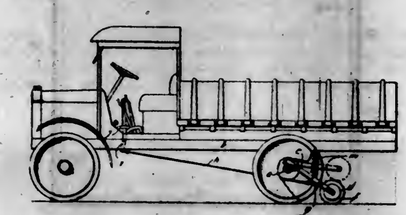
1,398,939. CELLULOSE-ESTER COMPOSITION. Hans T. Clarke, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 27, 1920. Serial No. 433,398. 9 Claims. (Cl. 106—37.)



1. A composition of matter comprising a cellulose ester and a phenolic ester of phthalic acid.

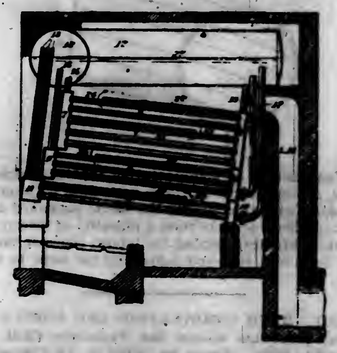
1,398,940. INNER TUBE AND METHOD OF MAKING SAME. James M. Combs, Akron, Ohio, assignor of one-half to V. R. Smithfield, Cleveland, Ohio. Filed Mar. 25, 1920. Serial No. 368,664. 7 Claims. (Cl. 154—14.)

6. That method of manufacturing tubular articles comprising, coating textile fabric on both sides with unvulcanized rubber gum, then folding the fabric backward and forward upon itself so as to form a plurality of closely spaced plait-like folds, then joining the lateral edges of the fabric in the form of a tube and subjecting the same to vulcanization.



1,398,941. BATH COMBINATION AND NOZZLE. Benjamin Franklin Gable, San Francisco, Calif. Filed July 24, 1920. Serial No. 398,734. 12 Claims. (Cl. 137—111.)

7. A hollow tile block having means for attachment to water service pipes and having on its front face a dis-

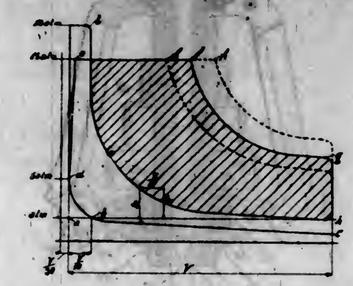


charge mouth from its chamber and means in the block for mixing streams from the pipes before discharge at the mouth.

1,398,942. NON-SKID ATTACHMENT FOR VEHICLES. NEWTON M. MCDANIEL, Carlton, Oreg., assignor of one-half to Charles Leonard Starr, Portland, Oreg. Filed Sept. 24, 1920. Serial No. 412,443. 7 Claims. (Cl. 188—5.)

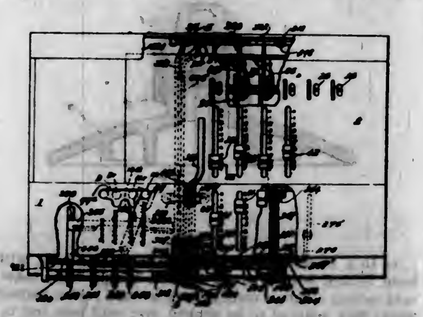
1. In combination with a vehicle, a frame pivoted on an axis coincident with that of the rear axis, means for holding said frame normally off the ground, a drag-wheel journaled in said frame, means for applying the drag-wheel by causing the same to bear on the ground, and operable with variable degrees of force, and means for holding said drag-wheel against rotation, such means included in said drag-wheel applying means.

1,398,943. WATER-TUBE BOILER. JEAN VAN OOSTERWYCK, Louvain-Ans, Belgium. Filed Mar. 25, 1913. Serial No. 756,754. 12 Claims. (Cl. 122—291.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. In a multitubular boiler, having a plurality of tube bunches, front and rear headers which are independent of each other, said tube bunches being united by said headers into elements equally independent of each other, the heating surface of said independent bunches decreasing gradually toward the fire-grate.

1,398,944. METHOD OF IGNITION AND COMBUSTION OF COMBUSTIBLES IN INTERNAL-COMBUSTION ENGINES. HENRI PIERRE, Liege, Belgium. Filed Sept. 9, 1912. Serial No. 719,443. 5 Claims. (Cl. 123—1.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



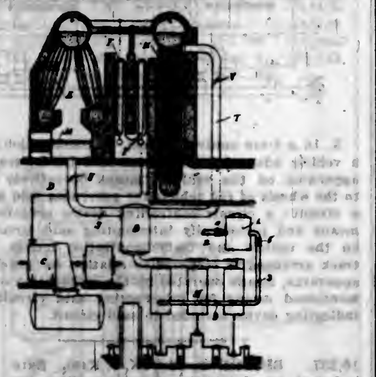
1. The method of operating an internal combustion engine, which comprises admitting into the cylinder a volume of combustible mixture or firing charge equal to a small fraction of the whole capacity of the cylinder, said charge including a quantity of air not exceeding that strictly necessary for its complete combustion, compressing said charge in a substantially undiluted condition, igniting said charge, admitting into the cylinder a combustible mixture including a quantity of air at least equal to that necessary for its complete combustion and simultaneously igniting said last mentioned mixture by means of said firing charge.

3. In the method of operating an internal combustion

engine which comprises the introduction into the cylinder of separate amounts of fuel before and after the piston has reached its dead point, the steps which consist in introducing with the first amount of fuel an amount of air not exceeding that strictly necessary for its complete combustion, limiting the introduction of said fuel and air to a small portion of the suction or intake stroke, and preventing the ingress of air and fuel during the remainder of the suction or intake stroke.

1,398,945. CALCULATING-MACHINE. ALEXANDER RECHNITZER, Berlin, Germany, assignor to Autarit-Gesellschaft m. b. H., Vienna, Austria. Filed Oct. 12, 1908. Serial No. 457,414. 10 Claims. (Cl. 235—62.)

1. In a calculating machine, the combination with recording devices, of a row of two or more slidable buttons which are set to indicate a certain figure to be recorded, a movable lever connected with the recording devices, and means to move the row of buttons indicating the figure to be printed laterally of the movable lever and to adjust the same thereby according to this figure.



3. In a calculating machine, the combination with recording devices, of a row of two or more stepped disks set to indicate a certain figure to be recorded, a movable lever connected with the recording devices, and means to slide the lever along the row of disks indicating figures to be recorded and to oscillate the lever thereby according to those figures.

5. In a calculating machine, the combination with two or more registering devices comprising stepped disks, of slides movable against the stepped disks to different extents depending upon the position of each disk, a member movable along said slides and adapted to be thereby oscillated in a manner depending upon the possible movements of said slides, and means connected with said oscillated member to record the positions of the registering devices.

6. In a calculating machine, the combination with two or more registering devices, of means movable against the registering devices to different extents depending upon the position of each registering device, a member adapted to be oscillated in a manner depending upon the possible movements of aforesaid means, and means connected with said oscillated member to record the positions of the registering devices.

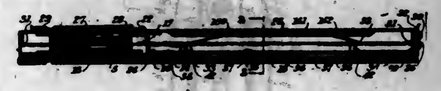
8. In a multiplying machine, the combination with a multiplicand register, product wheels, a multiplying mechanism communicating between the multiplicand register and the product wheels, means for operating said multiplying mechanism to register the partial products in the wheels, means for performing the required addition, a platen, and devices for recording the multiplier, the multiplicand and the product on the same platen.

1,398,946. POWER ENGINE PLANT. WILHELM SCHMIDT, Wilhelmshöhe, near Cassel, Germany, assignor, by mesne assignments, to Superheater Company, a Corporation of Delaware. Filed Jan. 26, 1915. Serial No. 4,458. Renewed Nov. 20, 1919. Serial No. 339,400½. 6 Claims. (Cl. 60—11.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a power plant, the combination with a combustion engine; a boiler and a furnace for the same; a pipe connecting the space below the grate of said furnace with another space, and another pipe so arranged as to be adapted to conduct the exhaust gases of said engine to said last named space; of means for feeding the said engine with compressed air, substantially as and for the purpose described.

1,398,947. MOTOR-FUEL FOR AEROPLANES. WALTER T. SCHREIBER, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed June 25, 1918. Serial No. 241,795. 1 Claim. (Cl. 44—9.)

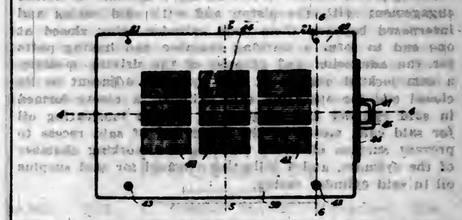
A fuel comprising from 35% to 50% of ethyl alcohol, from 25% to 35% of benzol, and from 20% to 40% of ethyl ether.



1,398,948. MOTOR-FUEL. WALTER T. SCHREIBER, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed June 25, 1918. Serial No. 241,797. 2 Claims. (Cl. 44—9.)

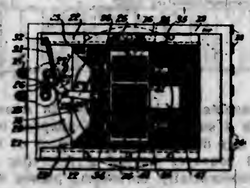
1. A fuel consisting of 90 to 92 parts by volume of a petroleum distillate having a density between 30° B. and 50° B., and about 10–8 parts by volume of a very volatile combustible constituent.

1,398,949. CELLULOSE-ACETATE COMPOSITION. ALBERT F. SULMA, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Jan. 6, 1921. Serial No. 435,508. 8 Claims. (Cl. 106—40.)



1. A composition of matter comprising acetone-soluble cellulose acetate and ethyl butyrate.

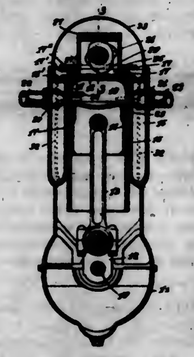
1,398,950. CAMERA-BACK. JULIEN TESSIER, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed May 3, 1920. Serial No. 378,612. 7 Claims. (Cl. 95—2.)



1. The combination with a camera having a rear compartment, the front wall of which contains a plurality of exposure openings, of a plateholder having therein a plurality of exposure openings, there being on the camera and the plateholder coöperating means whereby the openings in both will be exactly registered when the plateholder is positioned in the compartment.

1,398,951. PHOTOGRAPHIC-PLATE HOLDER. JULIEN TESSIER, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed May 3, 1920. Serial No. 378,613. 8 Claims. (Cl. 95—2.)

1. A photographic plate holder having a front wall with an exposure opening, a spring permanently attached to the holder, a removable back for the holder independent of the spring, the spring being inoperative when the back is removed, but operative to press an inserted plate into contact with the front wall when the back is in place on the holder.



1,398,952. COLOR-SCREEN CARRIER. JULIEN TESSIER, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed May 3, 1920. Serial No. 378,614. 7 Claims. (Cl. 95—2.)

1. In combination, a casing, a hinged door adapted to carry a lens in a fixed position, said door carrying a plate slidable thereon to two determinate positions, said plate having a focusing opening which at one position is opposite said lens, and carrying a color filter which at the other of said positions is opposite said lens, an operating

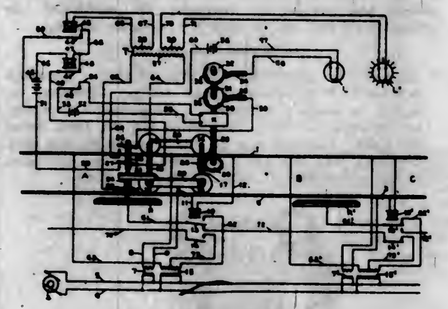
handle for said plate on the front of the door, and a spring controlled by said handle and tending to hold said plate in each of its positions.

1,398,953. INTERNAL-COMBUSTION ENGINE. CHARLES BUSCHINO, Long Island City, N. Y., assignor of one-half to William Charles St. Clair, New Rochelle, N. Y. Filed Oct. 2, 1919. Serial No. 327,844. 4 Claims. (Cl. 123—75.)

1. In an engine, a stationary cylinder casing, a reciprocating piston located in said casing, a cylinder in sliding engagement with the piston and with said casing and interposed between them, said cylinder being closed at one end to form a working chamber and having ports for the admission and exhaust of the driving medium, a cam located outside of said cylinder, adjacent to its closed end for operating said cylinder, a recess formed in said cylinder and adapted to contain lubricating oil for said cam, means at the upper end of said recess to prevent surplus oil from reaching the working chamber of the cylinder, and a collecting channel for said surplus oil in said cylinder casing.

REISSUES.

15,234. LOADING-MACHINE. NEWTON L. BARGER, Braeholm, and JAMES P. DONALDSON, Morgantown, W. Va., assignors, by direct and mesne assignments, to Ford-Barger Machinery Co., Braeholm, W. Va., a Corporation of West Virginia. Filed June 24, 1921. Serial No. 480,234. Original No. 1,307,335, dated June 24, 1919, Serial No. 210,186, filed Jan. 3, 1918. 14 Claims. (Cl. 262—23.)

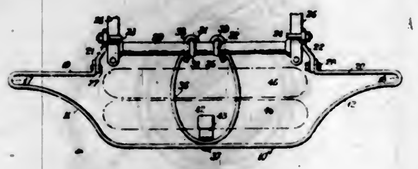


8. In a machine for loading coal in mines, the combination with a supporting frame adapted to rest upon and slide in any direction over the floor of the mine, of an elongated conveyer having a receiving portion extending in substantially horizontal planes adjacent the mine floor, devices upon the frame to actuate the several elements of the machine, an elongated gathering bar extending parallel with and adjacent the advancing side of the conveyer and adapted to revolve about its longitudinal axis, and teeth upon the gathering bar adapted to engage material at the level of the mine floor and lift it onto said conveyer.

15,235. SUBSTITUTE MATERIAL FOR MAKING BOX-TOES FOR SHOES. ANSEL C. DENNING, Johnson City, N. Y. Filed Mar. 9, 1920. Serial No. 364,517. Original No. 1,308,262, dated May 13, 1919, Serial No. 253,900, filed Sept. 13, 1918. 4 Claims. (Cl. 92—3.)

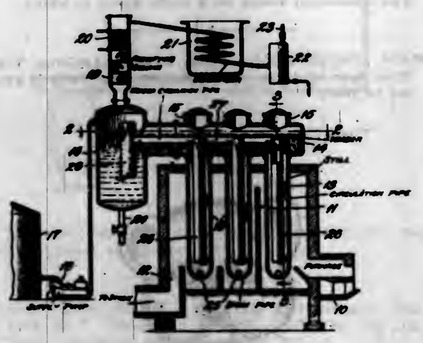
1. The felted material for making box shoe toes composed solely of cotton fabric rags, tannery hair and a thermoplastic binder.

15,236. AUTOMATIC TRAIN-CONTROL SYSTEM. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Oct. 10, 1921. Serial No. 506,902. Original No. 1,306,380, dated June 10, 1919, Serial No. 88,362, filed Apr. 1, 1916. 18 Claims. (Cl. 246—49.)



3. In a train control system, in combination; a track; a vehicle adapted to travel on said track; train control apparatus on the vehicle; means operatively connected to the wheels of the vehicle for governing said apparatus; a circuit; a circuit controlling device actuated by said means and periodically interrupting said circuit; means on the vehicle and traffic controlled means along the track arranged in coöperative relation for governing said apparatus, means operated by the coöperation of said last mentioned means for interrupting said circuit; and an indicating device included in said circuit.

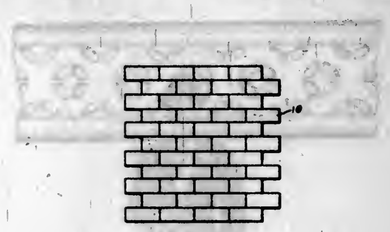
15,237. BUILDING-BLOCK. KARL ERIK WILHELM JAGDMANN, Stockholm, Sweden. Filed Dec. 22, 1920. Serial No. 432,596. Original No. 1,306,962, dated June 17, 1919, Serial No. 255,712, filed Sept. 25, 1918. 4 Claims. (Cl. 72—68.)



1. Method of producing floors from rows of blocks placed beside one another, consisting in providing the joint surfaces of the blocks with mortar, preferably resting the blocks of the first row on a side support, and a removable support of a width corresponding to that of one or more blocks or about to such width, passing reinforcing metal through the blocks in each row, clamping the blocks of the row or rows together by means of said reinforcing metal so as to render the row or rows self sustaining, shifting after the completion of the said row or rows before the hardening of the mortar the removable support to the side a distance corresponding to the width of one or more blocks, placing the blocks of the subsequent row or rows close to the first row or rows on the removable support, and prosecuting the process in the manner set forth.

15,238. AUTOMOBILE-BUMPER. RICHARD T. NEWTON, New York, N. Y. Filed Mar. 8, 1921. Serial No. 450,603. Original No. 1,325,868, dated Dec. 16, 1919, Serial No. 297,287, filed May 15, 1919. 21 Claims. (Cl. 293—55.)

3. An automobile bumper comprising a spring impact member, an associated spring member normally engaging the mid area of the impact member to reinforce the same, but readily disengaged therefrom, and means for so supporting one of said bumper members on the automobile as to permit the ready separation of said members when disengaged.



15,239. METHOD OF AND APPARATUS FOR CRACKING HYDROCARBONS. FRANK PURNING, Pittsburgh, Pa. Filed Sept. 8, 1921. Serial No. 499,352. Original No. 1,358,174, dated Nov. 9, 1920, Serial No. 138,142, filed Dec. 21, 1916. 29 Claims. (Cl. 196—25.)

1. In apparatus of the character described, the combination of a vertically disposed still and means for maintaining a body of incompletely cracked liquid at a point adjacent to such still, a conduit connecting said body of liquid to the lower end of said still, the space between the walls of the still and the exterior of such conduit being relatively small, and means for supplying a gas or vapor to the bottom of the conduit in order to accentuate circulation, or decomposition, substantially as described.

15,240. WOOD-BLOCK PAVING. GEORGE W. WARMOTH, Indianapolis, Ind. Filed June 17, 1921. Serial No. 478,397. Original No. 1,351,546, dated Aug. 31, 1920, Serial No. 256,850, filed Oct. 4, 1918. 5 Claims. (Cl. 94—11.)

1. A pavement or flooring formed of rows of blocks, each row comprising a plurality of blocks adjacent each other, each block having a plurality of transversely extending and angularly disposed kerfs cut in the under side thereof so as to join at the bottom, the kerfs in

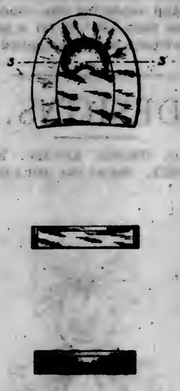
the adjacent rows of blocks registering with each other, and strips angular in cross section inserted in said kerfs for securing the blocks together as a pavement.

15,241. CONDENSER AND METHOD OF MAKING THE SAME. ALBERT PRUESSMAN, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 14, 1920. Serial No. 388,995. Original No. 1,275,468, dated Aug. 13, 1918, Serial No. 183,131, filed July 27, 1917. 10 Claims. (Cl. 250—41.)

1. The method of treating a condenser impregnated in the presence of heat, which consists in applying pressure to the impregnated condenser as it cools and then removing the pressure and reheating the condenser to a temperature of not less than 120° F. for a period of not less than three hours without pressure applied thereto.

DESIGNS.

59,805. TOY. C. GEORGE ADAMEC, Milwaukee, Wis. Filed Apr. 14, 1921. Serial No. 461,419. Term of patent 7 years.



The ornamental design for a toy, as shown.

59,806. TIRE. ARCHIBALD K. ALLEN and CLARENCE A. ALLEN, Seattle, Wash. Filed Jan. 19, 1921. Serial No. 438,456. Term of patent 3½ years.

The ornamental design for a tire, as shown.

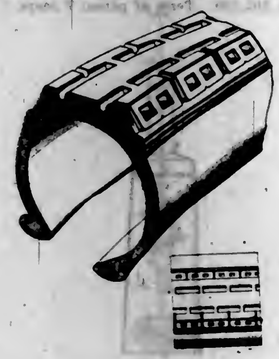
59,807. RUBBER HEEL. PASQUALE ALTRUDA, Providence, R. I. Filed Nov. 15, 1920. Serial No. 424,310. Term of patent 14 years.

The ornamental design for a rubber heel, as shown.

59,808. PRINTED FABRIC. EVA B. BATTERTON, Springfield, Ill. Filed May 24, 1921. Serial No. 472,262. Term of patent 7 years.

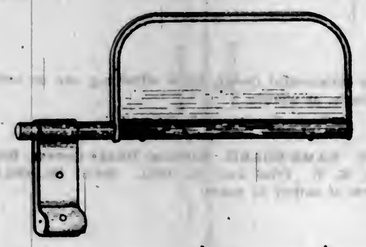
The ornamental design for a printed fabric as shown.

59,809. TRAFFIC-GUARD. MILTON C. BENHAM, Elkhart, Ind. Filed Apr. 30, 1921. Serial No. 465,848. Term of patent 14 years.



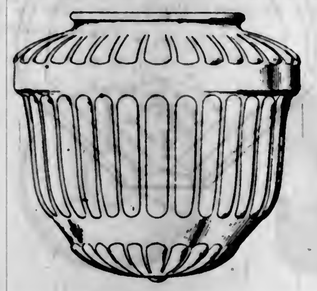
The ornamental design for a traffic guard, as shown.

59,810. PAPER DOLL. FLORA BENSON, Angleton, Tex. Filed June 30, 1920. Serial No. 393,187. Term of patent 14 years.



The ornamental design for a paper-doll, as shown.

59,811. AUTOMOBILE-TIRE. WALTER PHILIP BRAENDER, Montclair, N. J. Filed Jan. 31, 1921. Serial No. 441,487. Term of patent 14 years.

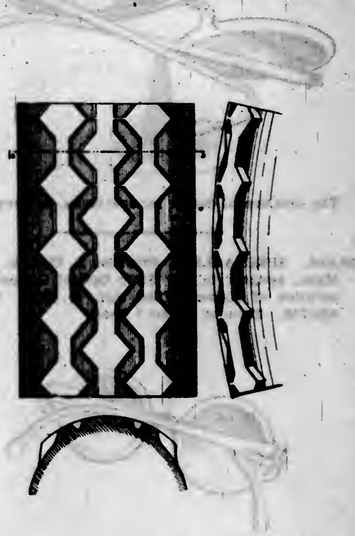


The ornamental design for an automobile tire, as shown.

59,812. DIRECTION-INDICATOR FOR MOTOR-VEHICLES. SAMUEL CARY BRENDEL, McKeesport, Pa. Filed Aug. 5, 1920. Serial No. 401,529. Term of patent 7 years.

The ornamental design for a direction indicator for motor vehicles, as shown.

59,813. LAMP-GLOBE. CHARLES A. CAMPBELL, New York, N. Y. Filed Apr. 3, 1920. Serial No. 371,162. Term of patent 7 years.



The ornamental design for a lamp globe, as shown.

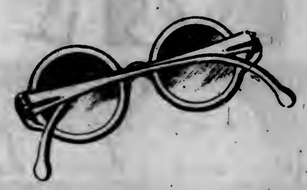
59,814. DOLL. EDSON B. CARD, White Plains, N. Y. Filed Feb. 23, 1921. Serial No. 447,331. Term of patent 3½ years.

The ornamental design for a doll, as shown.

59,815. TIRE. JAMES CHRISTY, Cleveland, Ohio. Filed July 6, 1920. Serial No. 394,372. Term of patent 14 years.

The ornamental design for a tire, as shown.

59,816. WHISTLE. EDWARD H. CLARKE, Peoria, Ill. Filed Aug. 21, 1920. Serial No. 405,175. Term of patent 14 years.

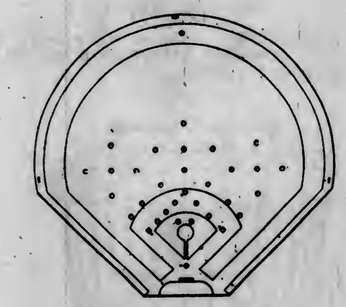


The ornamental design for a whistle, as shown.

59,817. SPECTACLES. STEPHEN J. CLULEE, Attleboro, Mass., assignor to Bay State Optical Company, a Corporation of Maine. Filed Mar. 23, 1921. Serial No. 454,917. Term of patent 7 years.

The ornamental design for spectacles, as shown.

59,818. SPECTACLES. STEPHEN J. CLULEE, Attleboro, Mass., assignor to Bay State Optical Company, a Corporation of Maine. Filed Apr. 8, 1921. Serial No 459,759. Term of patent 7 years.



The ornamental design for spectacles, as shown.

59,819. SIFTER-TOP CAN OR SIMILAR RECEPTACLE. MARTHA HALOWELL CONNON, Baltimore, Md., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md., a Corporation of New Jersey. Filed June 7, 1919. Serial No. 302,599. Term of patent 7 years.

The ornamental design for a sifter top can or similar receptacle, as shown.

59,820. GAME-BOARD. RICHARD HENRY COTTER, Brooklyn, N. Y. Filed July 21, 1921. Serial No. 486,611. Term of patent 3½ years.

The ornamental design for a game board, as shown.

59,821. ELECTRIC-LAMP FIXTURE. JOSEPH M. CAUCHY, New York, N. Y. Filed Oct. 8, 1920. Serial No. 415,709. Term of patent 3½ years.

The ornamental design for an electric lamp fixture as shown.

59,822. ELECTRIC-LAMP FIXTURE. JOSEPH M. CAUCHY, New York, N. Y. Filed Oct. 11, 1920. Serial No. 416,880. Term of patent 3½ years.

The ornamental design for an electric lamp fixture as shown.

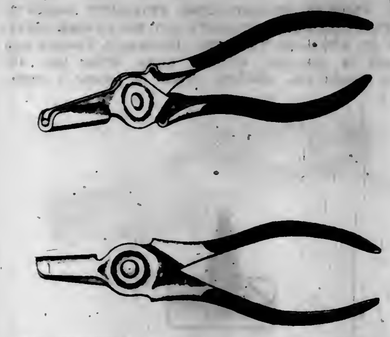
59,823. CAKE OF SOAP. SAMUEL CUMMINS, New York, N. Y. Filed Oct. 15, 1920. Serial No. 417,242. Term of patent 14 years.

The ornamental design for a cake of soap, as shown.

59,824. URN. GEORGE E. CURTISS, New Britain, Conn., assignor to Landers, Frary & Clark, New Britain, Conn., a Corporation of Connecticut. Filed May 19, 1921. Serial No. 470,901. Term of patent 14 years.

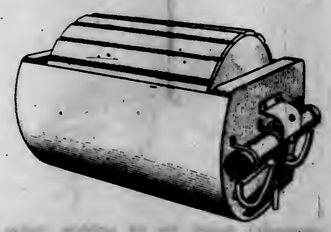
The ornamental design for an urn, as shown.

59,825. EMBLEM, BADGE, RING, STICKPIN, BROOCH, WATCH-CHARM, LAPEL-BUTTON, OR OTHER ARTICLE OF SIMILAR NATURE. EDWARD C. DENNIS and ROBERT M. SHIPLEY, Wichita, Kans. Filed Mar. 19, 1921. Serial No. 453,752. Term of patent 7 years.



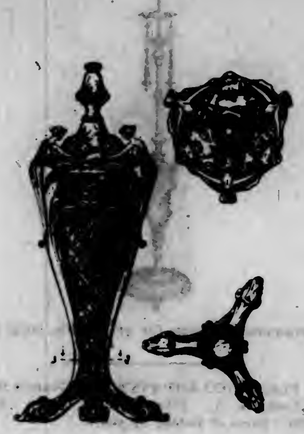
The ornamental design for an emblem, badge, ring, stickpin, brooch, watch-charm, lapel button or other article of similar nature as shown.

59,826. HORSE-COLLAR. MIKE DUNAS, Chicago, Ill. Filed May 31, 1921. Serial No. 473,917. Term of patent 7 years.



The ornamental design for a horse collar, as shown.

59,827. PINCERS. ALFRED L. EVENDEN, JAMES D. CASEY, and JOSEPH A. CASEY, Rome, N. Y. Filed July 16, 1921. Serial No. 485,306. Term of patent 14 years.

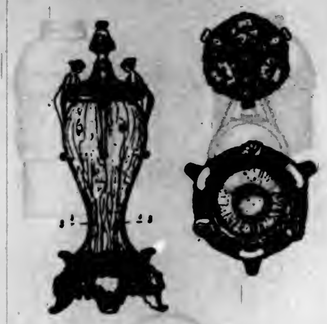


The ornamental design for pincers, as shown.

59,828. WASHING-MACHINE. JOHN J. FINUCANE, Rochester, N. Y., assignor to Washerette Corporation, Rochester, N. Y., a Corporation of New York. Filed June 30, 1921. Serial No. 481,667. Term of patent 14 years.

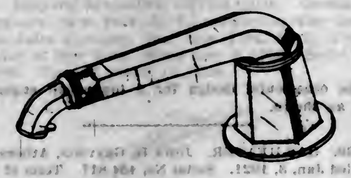
The ornamental design for a washing machine, as shown.

59,829. COMBINED PERFUMER AND DISINFECTOR. ALFRED J. FLAUDER, Bridgeport, Conn., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Apr. 8, 1921. Serial No. 459,804. Term of patent 7 years.



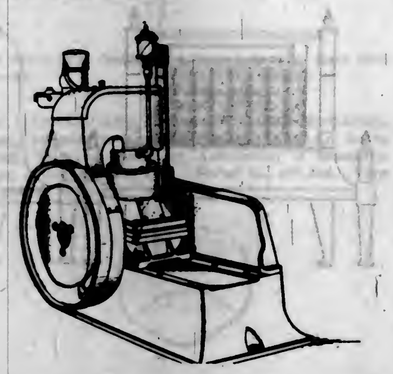
The ornamental design for a combined perfumer and disinfector or similar article as shown.

59,830. COMBINED PERFUMER AND DISINFECTOR. ALFRED J. FLAUDER, Bridgeport, Conn., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Apr. 9, 1921. Serial No. 460,094. Term of patent 7 years.



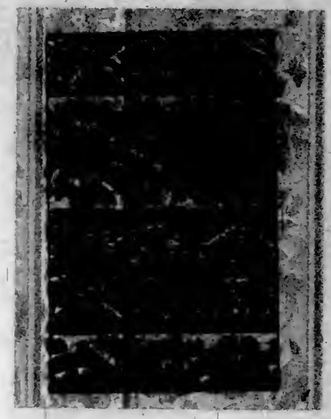
The ornamental design for a combined perfumer and disinfector or similar article as shown.

59,831. COMBINED PERFUMER AND DISINFECTOR. ALFRED J. FLAUDER, Bridgeport, Conn., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Apr. 12, 1921. Serial No. 460,806. Term of patent 7 years.



The ornamental design for a combined perfumer and disinfector or similar article as shown.

59,832. TONE-ARM FOR PHONOGRAPHS. ELMER FLETCHER, Chicago, Ill., assignor to Fletcher-Wickes Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 15, 1921. Serial No. 492,525. Term of patent 14 years.



The ornamental design for a tone arm for phonographs as shown.

59,833. ENGINE-FRAME. CHARLES E. GAMBILL, Oak Park, Ill. Filed Mar. 24, 1919. Serial No. 284,871. Term of patent 7 years.

The ornamental design for an engine frame, as shown.

59,834. FABRIC. Gustav Gruenstein, Baldwin, Long Island, N. Y., assignor to Golding Bros. Company, New York, N. Y., a Corporation of New York. Filed July 16, 1921. Serial No. 485,296. Term of patent 7 years.

The ornamental design for a fabric, as shown.

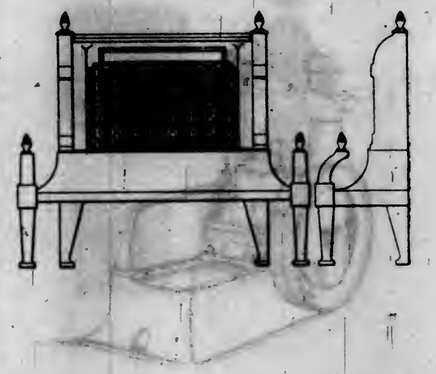
59,835. FABRIC. Gustav Gruenstein, Baldwin, Long Island, N. Y., assignor to Golding Bros. Company, New York, N. Y., a Corporation of New York. Filed July 16, 1921. Serial No. 485,297. Term of patent 7 years.

The ornamental design for a fabric, as shown

59,836. FABRIC. George Greenheimer, Baldwin, Long Island, N. Y., assignor to Golding Bros. Company, New York, N. Y., a Corporation of New York. Filed July 22, 1921. Serial No. 487,189. Term of patent 7 years.

The ornamental design for a fabric, as shown.

59,837. FABRIC. George Greenheimer, Baldwin, Long Island, N. Y., assignor to Golding Bros. Company, New York, N. Y., a Corporation of New York. Filed July 22, 1921. Serial No. 487,189. Term of patent 7 years.



The ornamental design for a fabric, as shown.

59,838. TOWER-BELL ENGAGEMENT-RING. Johann L. Gossens, Providence, R. I. Filed Aug. 22, 1921. Serial No. 497,522. Term of patent 7 years.

The ornamental design for a tower bell engagement ring as shown.

59,839. GAS-HEATER. John H. Grayson, Athens, Ohio. Filed Jan. 3, 1921. Serial No. 434,817. Term of patent 14 years.

The ornamental design for a gas heater, as shown.

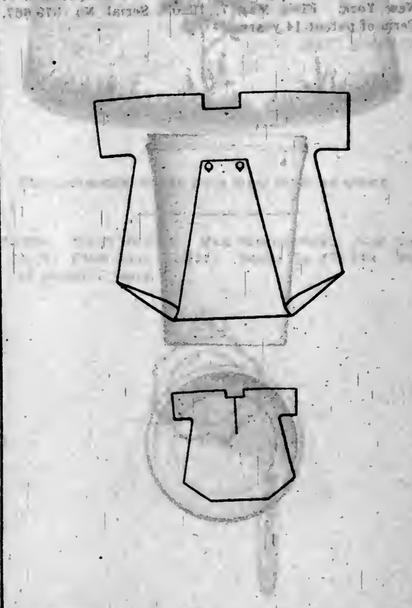
59,840. ATTACHMENT-PLUG OR CONNECTOR. William Henry Hasselwood, Hartford, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed June 25, 1921. Serial No. 480,454. Term of patent 14 years.

The ornamental design for an attachment plug or connector, as shown.

59,841. SEWING-MACHINE COVER-CASE. Gronon G. Hammouck, New York, N. Y., assignor to The Grand Union Sales Company, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 7, 1920. Serial No. 372,069. Term of patent 14 years.

The ornamental design for a sewing machine cover case, as shown.

59,842. LENS-BLANK. Harry W. Hill, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Apr. 21, 1921. Serial No. 463,406. Term of patent 14 years.

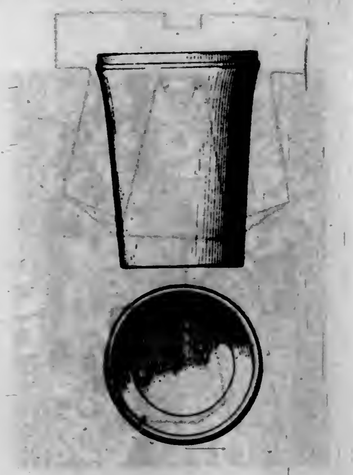


The ornamental design for a lens blank substantially as illustrated.

59,843. ENGINE-CASING. Carl C. Hinkley, Detroit, Mich. Filed Nov. 10, 1919. Serial No. 337,604. Term of patent 14 years.

The ornamental design for an engine casing, as shown.

59,844. ROMPER. Ruth F. Howes, South Pasadena, Calif. Filed Mar. 24, 1921. Serial No. 455,164. Term of patent 7 years.



The ornamental design for a romper, substantially as described and shown.

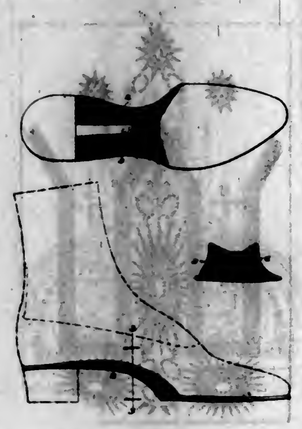
59,845. LAMP. Joseph Hoya, Jr., Hibbing City, Minn. Filed Oct. 1, 1920. Serial No. 414,126. Term of patent 3½ years.

The ornamental design for a lamp as shown.

59,846. JAR OR SIMILAR ARTICLE. Kivend Ingram and Harry Ingram, Brooklyn, N. Y., assignors to Ingrams Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed May 7, 1920. Serial No. 379,067. Term of patent 14 years.

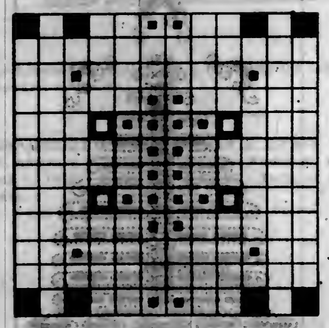
The ornamental design for a jar or similar article, as shown.

59,847. DOLL. Dorothy Helen Island and Lowa Bessie Island, Ogden Lake, Idaho. Filed Apr. 20, 1921. Serial No. 463,093. Term of patent 7 years.



The ornamental design for a doll as herein shown and described.

59,848. TIRE SHOE-HORN. Edward F. King, Wakefield, R. I. Filed Aug. 15, 1921. Serial No. 492,520. Term of patent 3½ years.



The ornamental design for a tire shoe horn, as shown.

59,849. SOLE FOR BOOTS, SHOES, OR SIMILAR ARTICLES. Thomas Clement Lloyd, Portsmouth, Ohio, assignor to The Irving Knox Company, Portsmouth, Ohio, a Corporation of Ohio. Filed Oct. 18, 1920. Serial No. 417,843. Term of patent 14 years.

The ornamental design for a sole for boots, shoes or similar articles, as shown and described.

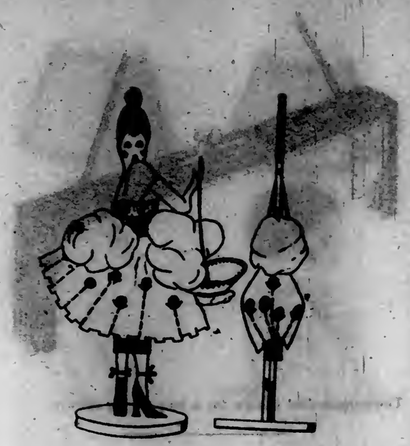
59,850. GAME-BOARD. John F. Lyons, Seattle, Wash. Filed Aug. 15, 1921. Serial No. 492,523. Term of patent 7 years.

The ornamental design for a game board as shown.

59,851. BAG-TOP. Sabatino G. Mamelian, North Adams, Mass. Filed Jan. 6, 1921. Serial No. 435,886. Term of patent 14 years.

The ornamental design for a bag top as shown.

59,852. LAMP-SHADE. Abraham S. Meadoff, Brooklyn, N. Y. Filed Mar. 25, 1920. Serial No. 368,753. Term of patent 3½ years.

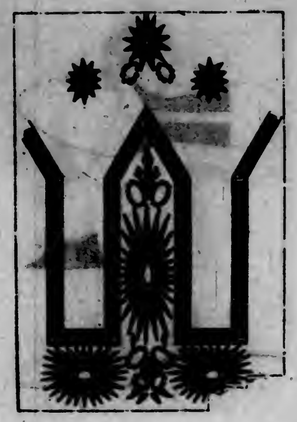


The ornamental design for a lamp shade as shown.

59,853. WATCHCASE. Max Megurowsky, New York, N. Y. Filed June 18, 1921. Serial No. 478,740. Term of patent 7 years.

The ornamental design for a watchcase as shown.

59,854. DOLL, STATUETTE, OR MINARET FIGURE. Bruno Alw Sidney Oakland, Calif. Filed Nov. 29, 1920. Serial No. 426,602. Term of patent 7 years.



The ornamental design for a doll, statuette, or minaret figure, as shown.

59,855. TOY BROOM. Reuben Nakian, West Hoboken, N. J. Filed Aug. 17, 1921. Serial No. 492,185. Term of patent 14 years.

The ornamental design for a toy broom, as shown and described.

59,856. TRIMMING FOR LADIES' WEARING APPAREL. Samuel Nehlinger, New York, N. Y. Filed Dec. 20, 1919. Serial No. 346,384. Term of patent 3½ years.

The ornamental design for a trimming for lady's wearing apparel as shown.

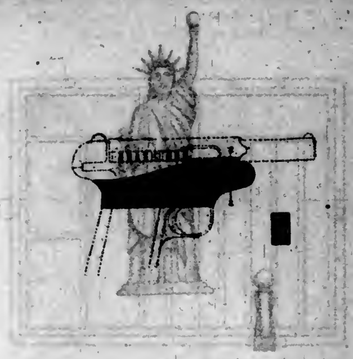
59,857. TRIMMING FOR LADIES' WEARING-APPAREL. Samuel Nehlinger, New York, N. Y. Filed Dec. 20, 1919. Serial No. 346,383. Term of patent 3½ years.

The ornamental design for a trimming for lady's wearing apparel as shown.

59,858. TRIMMING FOR LADIES' WEARING-APPAREL. Samuel Nehlinger, New York, N. Y. Filed Dec. 20, 1919. Serial No. 346,384. Term of patent 3½ years.

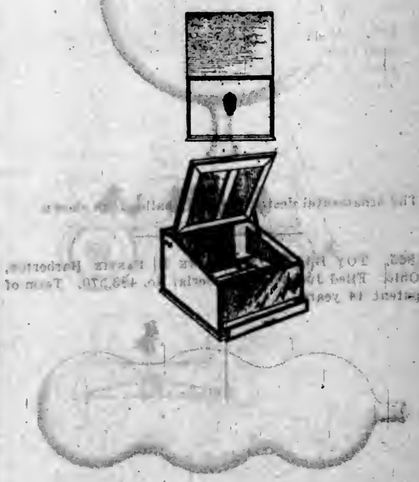
The ornamental design for a trimming for lady's wearing apparel as shown.

59,859. TRIMMING FOR LADIES' WEARING-APPAREL. Samuel Nehlinger, New York, N. Y. Filed Dec. 20, 1919. Serial No. 346,385. Term of patent 3½ years.



The ornamental design for a trimming for lady's wearing apparel as shown.

59,860. BELT-BUCKLE. William J. Nelson, Rockford, Ill., assignor to Joseph P. Gordon, Rockford, Ill. Filed July 1, 1921. Serial No. 481,946. Term of patent 14 years.



The ornamental design for a belt buckle, as shown.

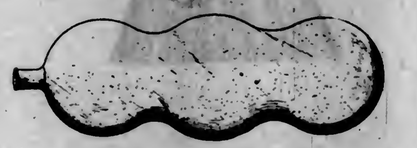
59,861. PISTOL-GUIDE. Mike G. Nikis, Chicago, Ill. Filed Mar. 7, 1918. Serial No. 222,869. Term of patent 14 years.

The ornamental design for a pistol guide substantially as shown and described.

59,862. DISPENSING-CABINET. Leon S. Palefou, Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Mar. 30, 1921. Serial No. 457,059. Term of patent 7 years.

The ornamental design for a dispensing cabinet, as shown.

59,863. CANDY. Gideon H. Patten, Baltimore, Md. Filed Apr. 19, 1921. Serial No. 463,720. Term of patent 14 years.



The ornamental design for candy as shown.

59,864. TOY BALLOON. Frank B. Pastis, Barberton, Ohio. Filed July 9, 1921. Serial No. 483,569. Term of patent 14 years.

The ornamental design for a toy balloon, as shown.

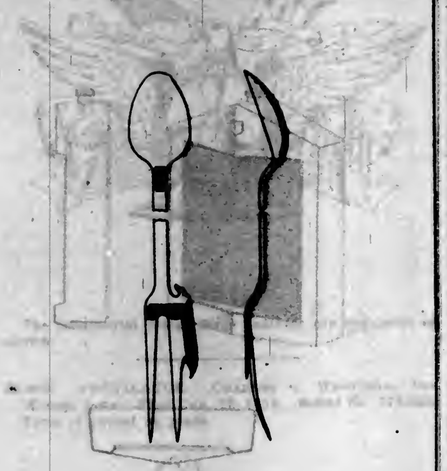
59,865. TOY BALLOON. Frank B. Pastis, Barberton, Ohio. Filed July 9, 1921. Serial No. 483,570. Term of patent 14 years.

The ornamental design for a toy balloon, as shown.

59,866. HEEL-BRACE FOR SHOES. Lula Bowman, Dallas, Tex. Filed Sept. 28, 1920. Serial No. 412,681. Term of patent 14 years.

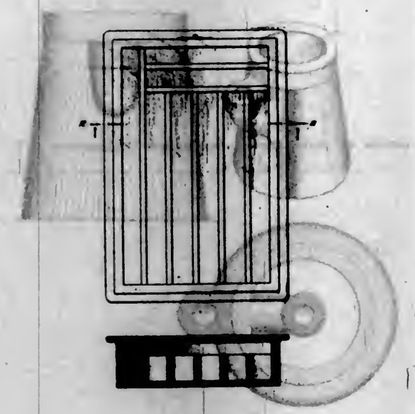
The ornamental design for a heel brace for shoes as shown.

59,867. HEEL-BRACE FOR SHOES. Luca Paternostro, Dallas, Tex. Filed Aug. 25, 1920. Serial No. 406,025. Term of patent 14 years.



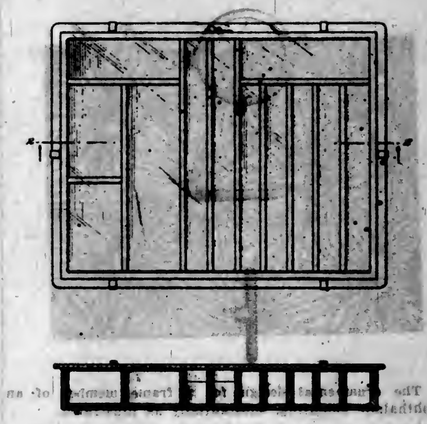
The ornamental design for a heel brace for shoes as shown.

59,868. WATCH-BOW. Elisha A. Phinney, Pawtucket, R. I. Filed Jan. 10, 1921. Serial No. 426,868. Term of patent 14 years.



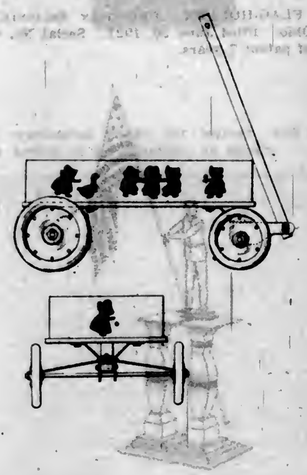
The ornamental design for a watch bow, as shown.

59,869. COMBINATION FORK AND SPOON. Alvin A. Quintard, and Erwin G. Shoemaker, Chicago, Ill. Filed Dec. 22, 1920. Serial No. 432,626. Term of patent 14 years.



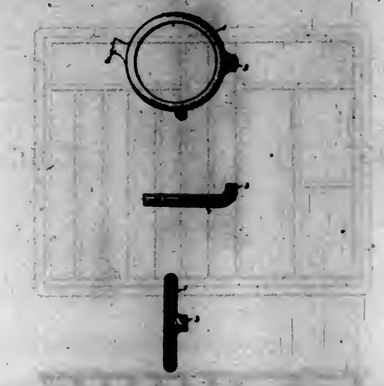
The ornamental design for a combination fork and spoon, as shown.

59,870. DISPLAY-CASE. Irving W. Rice, New York, N. Y. Filed Dec. 5, 1919. Serial No. 342,843. Term of patent 7 years.



The ornamental design for a display case as shown.

59,871. DISPLAY-CASE. Irving W. Rice, New York, N. Y. Filed Dec. 8, 1919. Serial No. 345,012. Term of patent 7 years.



The ornamental design for a display case as shown.

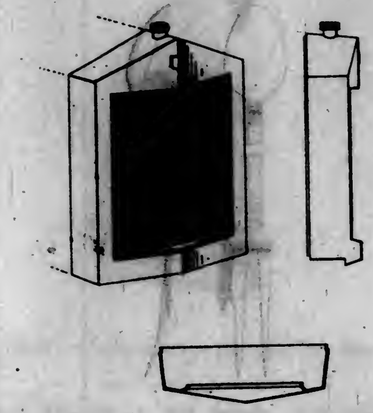
59,872. TOY WAGON. Samuel I. Rose, Cleveland, Ohio, assignor to The Osborn-Crew Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 8, 1921. Serial No. 489,641. Term of patent 7 years.

The design for toy wagon substantially as shown.

59,873. FRAME MEMBER OF AN OPHTHALMIC MOUNTING. Hugo H. Schumacher and William H. Boutelle, Southbridge, Mass., assignors to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Mar. 31, 1921. Serial No. 457,526. Term of patent 14 years.

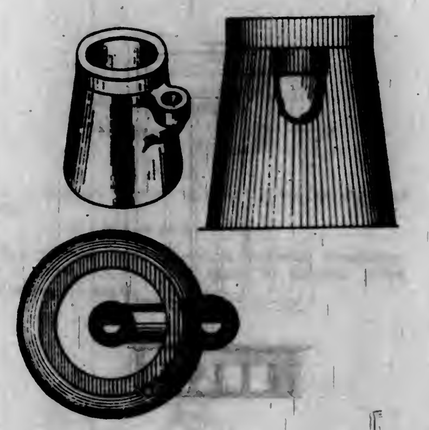
The ornamental design for a frame member of an ophthalmic mounting, substantially as illustrated.

59,874. RING OR SIMILAR ARTICLE OF MANUFACTURE. Monroe Seiger, New York, N. Y., assignor to Morris Seiger and Simon Seiger, doing business as M. Seiger & Son, New York, N. Y. Filed July 29, 1921. Serial No. 488,486. Term of patent 14 years.



The ornamental design for a ring or similar article of manufacture substantially as shown.

59,875. FLAG-HOLDER. Christian Selisnik, Cleveland, Ohio. Filed June 20, 1921. Serial No. 479,142. Term of patent 7 years.

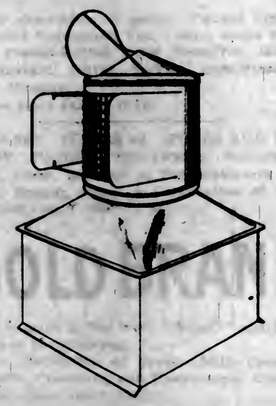


The ornamental design for a flag holder, as shown.

59,876. RADIATOR FOR AUTOMOBILES. Roscoe Stahl, Oshkosh, Mich., assignor to Benjamin Briscoe & Stahl Engineering Co., Inc., Detroit, Mich., a Corporation of Delaware. Filed Apr. 23, 1920. Serial No. 376,151. Term of patent 3½ years.

An ornamental design for a radiator for automobiles as shown.

59,877. AIR-INJECTOR FOR PUMPS. Lucius L. Taylor, Waupun, Wis. Filed Oct. 6, 1917. Serial No. 195,202. Term of patent 14 years.



The ornamental design for an air injector for pumps, as shown.

59,878. RADIATOR-CAP ORNAMENT. Anthony Travers, Fairhaven, Mass. Filed May 17, 1921. Serial No. 470,480. Term of patent 14 years.

The ornamental design for a radiator cap ornament as shown.

59,879. VENTILATOR. Charles O. Whitnell, Des Moines, Iowa. Filed Jan. 28, 1919. Serial No. 273,656. Term of patent 3½ years.

The ornamental design for a ventilator, as shown.

59,880. LEATHER, WALL-PAPER, OR SIMILAR ARTICLE OF MANUFACTURE. Henry G. Wurm, Yonkers, N. Y. Filed Aug. 2, 1921. Serial No. 489,393. Term of patent 7 years.

The ornamental design for leather, wall paper or similar article of manufacture, as shown.

59,881. LEATHER, WALL-PAPER, OR SIMILAR ARTICLE OF MANUFACTURE. Henry G. Wurm, Yonkers, N. Y. Filed Aug. 2, 1921. Serial No. 489,394. Term of patent 7 years.

The ornamental design for leather, wall paper or similar article of manufacture, as shown.

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 29, 1921.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Second Circuit.

MUNGER v. PERLMAN RIM CORPORATION.

Decided June 1, 1921.

[275 Fed. Rep., 21.]

1. PATENTS—638,588, FOR DEMOUNTABLE RIM FOR AUTOMOBILE-TIRES, HELD VALID AND INFRINGED.

The Munger patent, No. 638,588, for means of attaching automobile-tires to the rims, claim 4 *Held* valid and, given the broad construction to which it is entitled, as covering the principle of wedge action for fastening a demountable rim, infringed.

2. SAME—REASONABLE ROYALTY TO BE PAID BY INFRINGER DETERMINED.

Where it was determined that a patentee of an automobile part was entitled to damages for infringement, measured by a reasonable royalty, such royalty *Held* properly based on a percentage of the sale price of the infringing part in conformity with the custom of so fixing royalties for similar patented parts.

APPEAL from the District Court of the United States for the Southern District of New York.

Suit in equity by Louis De F. Munger against the Perlman Rim Corporation. Decree for complainant, and defendant appeals. Modified and affirmed.

See also (D. C.) 244 Fed., 730.

STATEMENT OF THE CASE.

Suit is upon Patent 638,588, for which application was filed April 25, 1899, patent issued December 5, 1899, to National Wheel & Traction Company as assignee of the inventor, who is the plaintiff herein.

The disclosure of the specification is for an improvement in "cushion-tires" for vehicle-wheels, the object being—

to provide an improved means of attachment of the tire to the wheel rim or felly, and specially designed for the driving wheels of automobiles.

It is admitted that the specification reveals two entirely distinct thoughts—one for securing the pneumatic tire to its base by vulcanization, the other for the means of attaching said tire base to the wheel proper.

The only claim in suit is No. 4, which deals with the last alleged inventive thought, and reads as follows:

In combination with a tapered felly, a tire, an annular rigid base to which said tire is secured, said base having a tapered under-surface and fitted on said felly, substantially as described.

The description referred to is of a—

felly slightly inclined or at an angle with the axle, the outer diameter of the wheel being the smaller to form a tapering fit for the tire base.

As shown, the tapered felly fits within a similarly tapered tire base, to the end that—

the larger circumference of the base can be easily slipped over the small outer circumference of the felly.

It is then stated that—

when in place these wedge-shaped surfaces form a close fit and also resist any tendency of further inward movement of the band on the felly due to strain on the tire in turning corners.

The tapered or frusto-conical tire-base when placed over the similarly-shaped felly, is not only locked in position but pressed into further wedge-like relation to the felly by bolts passing through said felly substantially at right angles to a spoke and with an extension or lug (integral or detachable) bearing upon the outer surface of the tire-base; the entire bolt and lug being tightened with a nut so as to press (if necessary) the tapered tire-base farther on the similarly-tapered felly.

Of this construction it is said that when the securing bolts are loosened it is only necessary in removing the tire base—

to back off the base slightly from the felly, when it can be easily slipped down off the inclined surface.

Under the assignment above referred to, National Wheel & Traction Corporation remained the owner of record of this and other patents of Munger's until September 5, 1916, when it assigned said patents to the plaintiff herein by a transfer duly recorded. It is upon this title that plaintiff brought suit.

In July, 1902, however, an assignment of the patent in suit (and others) was drawn and executed by the National, etc., Company to a New Jersey corporation known as "Munger Automobile Tire Company." This assignment was delivered to the attorney for the men who had agreed to finance the then newly-created Munger, etc., Company, and who caused the incorporation of that company.

This corporation commercially manufactured under Munger's tire patent; but the business lasted only a few months. It is evident that there were disagreements, if not quarrels, between this plaintiff and the men who were to furnish capital for the new corporation bearing plaintiff's name. Such disagreements quickly produced insolvency proceedings in the chancery of New Jersey (in October, 1902).

The receiver sold out the effects of the Munger, etc., Company, but never specifically sold the patent or patents covered by the assignment of July, 1902, until September, 1917, about a year after the beginning of this suit. Between 1902 and 1917 the assignment from National, etc., Company to Munger, etc., Company remained in the possession of the attorney for the financial backers of Munger, etc., Company, who (as found below) never fulfilled the promises of financial aid or working capital made

by them to National, etc., Company and Munger when the project was formed that took shape in the incorporation of Munger Automobile Tire Company, the concern which they themselves promptly put into insolvency.

In 1917 defendant herein in effect acquired by formal conveyances from the receiver and purchasers at the receiver's final sale of 1908 (who apparently had never seen or heard of the patent) whatever paper rights to the patent in suit were or had been of the Munger Automobile Tire Company of New Jersey, whereupon by leave of the district court the defence was presented that plaintiff had no title to the patent in suit.

The alleged infringing article is a now familiar form of demountable motor-rim, and may be described in language taken from the decision of Hunt, C. J., in *Perlman* v. *Standard Welding Co.* (D. C., 231 Fed., 453; affirmed 231 Fed., 734; 146 C. C. A., 18.)

Defendant's demountable rim is of the clincher type, and is in effect provided with a block, or stop, so that it will not creep. Each of the locking devices consists of a bolt and a metal wedge. The wedges go between the demountable rim and the fixed rim (or felly), and exert an inclined pressure upon the demountable rim radially away from the wheel-body, spacing it from the fixed rim, and also press it laterally against the flange at the other end of the fixed rim; the wedges used by defendant are propelled by means of threaded bolts. (D. C., 231 Fed., at p. 455.)

The court below found that defendant's alleged infringing article was manufactured under a patent owned by it, No. 1,052,270, being the same patent which was considered and interpreted in this circuit in the cases above referred to. It was further held that the patent in suit should not be "restricted to the precise relation of the wedge elements shown" therein, but should be so construed as to "include within its scope the obvious equivalents." It then declared that defendant's structure "performs its function in practically the same way as the patented" one, and therefore decreed infringement.

Pending trial, however, plaintiff's patent had expired, whereupon (no injunction issuing) it was decreed that plaintiff

> recover from * * * defendant, a reasonable royalty on all demountable rims manufactured, sold, or otherwise disposed of by said * * * defendant in this cause in infringement of (said claim 4 of the patent in suit), as damages for such infringement.

The ascertainment of these damages was sent to a master, who under the form of decree quoted from had no power to do more than ascertain damages by ascertaining the proper royalty upon Munger's invention. No exception has been taken to this limitation upon the master's power. That official reported: (1) That defendant corporation was liable only for such infringements as it had committed from the date of its incorporation April 6, 1916, to the date of the expiration of the patent in suit—*i. e.*, December 5, 1916—(2) that during that time defendant had either manufactured or sold, or both, 348,568 infringing rims or tire-bases; (3) that a reasonable rate of royalty for the use of the invention of the claim in suit is $.2006 per rim; (4) wherefore, after making certain deductions, plaintiff should recover as the reasonable royalty aforesaid $73,070.06—for which amount, with interest from the date of the master's report and costs, final decree was entered, and defendant took this appeal.

Mr. Melville Church and *Mr. John Thomas Smith* for the defendant-appellant.

Mr. William B. Gresley and *Mr. Ambrose L. O'Shea* for the plaintiff-appellee.

Before WARD, ROGERS, and HOUGH, Circuit Judges.

HOUGH, Cir. J., (after stating the facts as above:)

This appeal presents three questions: (1) Has the plaintiff title to the patent in suit? (2) Is claim 4 valid and infringed? (3) Have the damages been properly adjusted?

The question of title depends solely on whether the delivery of the written assignment of the patent in suit to the attorney for the promoters of Munger Automobile Tire Company was absolute or in escrow. Plaintiff contended that it was merely deposited with the attorney in question until such time as his clients produced the money they had promised to provide for the new corporation. It is plain that they never provided the money.

It is not doubted that an escrow is a written instrument, which by its terms imports a legal obligation, and which is deposited by the grantor with a third party to be kept by the depository until the performance of a condition or the happening of a certain event, and then to be delivered over to the grantee (10 R. C. L., 621.)

Undoubtedly there was much to be said in favor of interpreting a deposit with the promoters' attorney as a delivery to the promoters, yet it was and remained wholly a question of fact whether there ever was a delivery or merely a deposit in escrow. The trial judge considered this question of fact on a record containing the testimony (so far as we can see) of every living person who could have had knowledge in the premises, and after such hearing decided that there was a deposit in escrow, and that the condition upon which delivery depended had never been fulfilled. We are not disposed to disturb these findings of fact, and it is not denied that from them flowed the conclusion of law that title to the patent never passed out of the National, etc., Company, as whose assignee the plaintiff brings this suit.

(1) The trial court found as a fact that defendant's rims were made under the Perlman patent so fully considered in this circuit in *Perlman* v. *Standard, etc., supra.* This statement is true in a strictly legal sense, but it is also true that what this defendant has made and is making is in substance or essence the device which was found to infringe in *Perlman* v. *Standard Co., supra.* This means that the scope accorded Perlman Patent 1,052,270 was so broad that it covered a style of demountable rim very much better for commercial purposes than anything disclosed by Perlman's specification.

Perlman's disclosed means consist essentially in a plurality of threaded bolts passing through the felly at appropriate intervals, having frusto-conical heads, which can be "set up" by nuts, into apertures in the rim or tire-base, which base fitted loosely over the felly. By the wedge action of these frusto-conical bolt-heads the tire-base is to be held firmly in position. The wedge action held to be a mechanical equivalent is set forth in (D. C.) 231 Fed. at page 455, and is mechanically identical

with what is now said to infringe Munger's patent. Throughout the Perlman litigation, *supra*, the patent now in suit was not cited or referred to. It is a necessary inference from our previous decision, and is abundantly proven here, that wedge action for the purpose of tightly fastening a demountable rim was broadly new when Munger filed his application.

The references now introduced were disposed of by our previous decisions; they are assuredly no better as against Munger than they were against Perlman. The difference between Perlman's disclosed device and that which was held to infringe in the case cited was in the method of applying wedge action, but the devices of both parties applied wedges at certain predetermined points on the periphery of the felly, whereas Munger makes of the whole of his tapered rim one wedge when it is slipped over and pressed upon the similarly-tapered felly. If, as we have held, wedge action in this art was broadly new, it makes no difference that instead of a half a dozen wedges Munger has one large wedge.

It is objected that Munger's device was not operative, but the evidence proves that it was used and that it did operate in accordance with the law of its being as described and claimed. That it was not a commercial success is true, as the story of sales shows. But neither was Perlman's disclosed means successful, yet his concept of wedge action seemed so new and meritorious, as to entitle him to dominate, and (in the person of the defendant corporation bearing his name) ultimately appropriate, the superior application of wedge action practised by the defendants in the original Perlman litigation, *supra*.

The Munger patent is entitled to the same broad scope, because it is a still earlier concept of wedge action, operative and useful even though not commercially successful. As we have held that wedges driven in between felly and rim must pay tribute to one who described only wedge-bolts protruding through the felly (the claim being sufficiently broad), so must the same successful device pay tribute to Munger's earlier wedge-action device.

(2) The interlocutory decree (as interpreted by the opinion below) substantially held that this plaintiff was not entitled to profits; and that since there was not and never had been any established license rate under Munger's patent, and there was no adequate basis for an assessment of damages on lost sales, the master was told to assess damages by ascertaining—

> what would have been a reasonable royalty, considering the nature of the invention, its utility and advantages, and the extent of the use involved. (*Dowagiac, etc., Co.* v. *Minnesota, etc., Co.*, 235 U. S., 648; 35 Sup. Ct., 221, 224; 59 L. Ed., 398.)

No assignment of error challenges this limitation on plaintiff's recovery, and we express no opinion on this point. The only question before us is whether, assuming plaintiff to be entitled to any damages, the ascertainment and computation thereof was correct.

Plaintiff proved that defendant under the Perlman patent had an established or usual royalty charge; that there were many patents covering parts of or devices used in motor vehicles, and that for them rates of royalty had been and were being charged, based upon a percentage of the sale prices of the part or devices containing said patented invention. Then a witness, apparently disinterested, a pioneer in motor exploitation and himself an inventor and manufacturer, gave it as his opinion that from 10 per cent. to 15 per cent. of the sale price of infringing rims would be a reasonable royalty for the use of Munger's invention. There was substantially no evidence in contradiction of the foregoing. Under the *Dowagiac Case* we think this evidence competent, and if believed sufficient whereon to ground an award of damages, if supplemented (as it was) by proof of sales and manufacture.

This expert's royalty rate the master "accepted, for the purpose of apportioning defendant's profits," choosing, however, "15 per cent. rather than the minimum 10 per cent. or any figure between the two."

The sentence regarding "apportioning defendant's profits" is the master's method of stating the thought (naturally arising on this record) that a reasonable royalty under the Munger patent, a commercially unsuccessful invention, should be less than the price justly chargeable for using the detachable wedge of defendant's actual system. It is but another way of stating the thought of plaintiff's expert, when he suggested a percentage royalty, for his highest figure amounts to much less than the royalty defendant has been charging other manufacturers.

The case comes down to this: Having regard to the history of this invention, and the obviously more desirable application of the wedge principle used by defendant, was the master justified in using the higher rate suggested by plaintiff's expert rather than the lower? The matter is one not made plainer by discussion. After consideration of the record we are of opinion that the master should have taken the 10 per cent. estimate rather than the 15 per cent. one. It is therefore ordered that the decree appealed from be modified by reducing the amount of plaintiff's recovery to $48,713.39, and that, as so modified, the decree appealed from be affirmed, without costs in this court.

Disclaimer.

1,371,364.—*Sylvester Leo Gookin*, Boston, Mass. FASTENER-SETTING MACHINE. Patent dated March 15, 1921. Disclaimer filed November 21, 1921, by the assignee, *United Shoe Machinery Corporation*.

Presents this disclaimer—

"To said claims 4 and 12 of said patent which are in the following words, to wit:

"4. In a machine for setting fasteners, two coöperative setting tools constructed and arranged to set a barrel member and a reinforcing member of a compound fastener in telescopic relation, and means arranged to supply the barrel member and the reinforcing member to said tools respectively, the tool for the reinforcing member having an annular seat for the latter and having an au-

ular clinching portion the maximum diameter of which is less than the minimum diameter of said seat, said clinching portion being arranged to clinch the barrel member against the reinforcing member.

"12. A machine for setting cooperative tubular fasteners in telescopic relation, comprising cooperative setting tools one of which is movable toward and from the other, means for supplying telescopic fasteners to said tools respectively, means associated with one of said tools to support the smaller fastener frictionally by engagement with its internal surface, and means for imparting relative movement to said tools to insert the smaller fastener through the other and to clinch the smaller fastener against the other."

Adverse Decisions in Interference.

PATENT No. 1,363,910.

On October 25, 1921, a decision was rendered that Lewis H. Johnson was not the first inventor of the subject-matter covered by claim 26 of his Patent No. 1,363,910, subject, "Telephone systems," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,346,206.

On October 26, 1921, a decision was rendered that Henry T. Dubet was not the first inventor of the subject-matter covered by the claim of his Patent No. 1,346,206, granted, "Pliers," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,329,286.

On October 26, 1921, a decision was rendered that John C. Hubaret was not the first inventor of the subject-matter covered by claims 5, 6, 7, 8, 11, and 12 of his Patent No. 1,329,286, subject, "Fireproof composition," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,314,856.

On October 28, 1921, a decision was rendered that Jesse Coffman was not the first inventor of the subject-matter covered by claims 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10 of his Patent No. 1,314,856, subject, "Process of extracting sulfur from ore," and no appeal having been taken within the time allowed such decision has become final.

Barrett Company, The. (See Miller, Stuart P., assignor.)

Bassett, Harry P., Cynthiana, Ky., and S. S. Sadtler, Springfield township, Montgomery county, Pa. Recovering volatile solvents. No. 1,395,940; Nov. 1.

Bastian Company, The. (See Diez, Daniel E., assignor.)

Bauchet, Henry, Sens, France. Ground-gripping device for tractors. No. 1,395,542; Nov. 1.

Bauer, John, Detroit, Mich. Aircraft. No. 1,395,660; Nov. 1.

Baum, Chester E., and R. A. Peacock, Delaware City, Del. Combined rocking and revolving chair. No. 1,395,939; Nov. 1.

Bayerdorffer, Max, Huguenot Park, N. Y. Key-examiner. No. 1,395,332; Nov. 1.

Bayerdorffer, Max, Huguenot Park, N. Y. Spiral tag-band. No. 1,395,333; Nov. 1.

Bayuk, Meyer, Philadelphia, Pa. Cigar-package. No. 1,395,467; Nov. 1.

Beasley, Arthur J., assignor to The National Malleable Castings Company, Cleveland, Ohio. Coupling-operating mechanism. No. 1,395,250; Nov. 1.

Beasley, Arthur J., assignor to The National Malleable Castings Company, Cleveland, Ohio. Coupling-operating mechanism. No. 1,395,251; Nov. 1.

Beal, Michael L., Pasadena, Calif. Sandpapering-machine. No. 1,395,468; Nov. 1.

Beattie, Frank, Detroit, Mich. Vending-machine. No. 1,395,941; Nov. 1.

Beck, Charles W., Detroit, Mich., assignor to The Beck-Frost Corporation. Steering-wheel and forming same. No. 1,395,899; Nov. 1.

Beck, Edward E., assignor to Crown Die and Tool Company, Chicago, Ill. Thread-cutting dies. No. 1,395,252; Nov. 1.

Beck-Frost Corporation, The. (See Beck, Charles W., assignor.)
Beckwith, Charles A., Shullsburg, Wis. Fence-staple. No. 1,395,894; Nov. 1.
Behrman, Marcus E., Terre Haute, Ind. Hair-cutting implement. No. 1,395,884; Nov. 1.
Belding, George A., Billings, Mont. Joint for metal culverts or the like. No. 1,395,263; Nov. 1.
Belding, Samuel C., Mason City, Iowa. Trap-seat. No. 1,395,942; Nov. 1.
Bellan, Eugène, and H. L. Laîné, Paris, France. Device for securing railway-rails to their sleepers. No. 1,395,663; Nov. 1.
Bellamy, Alexander M., U. S. Army. Pile-driving machine. No. 1,395,905; Nov. 1.
Bellows, Sheffield D., Kelly Corners, N. Y. Chain-fastener. No. 1,395,906; Nov. 1.
Benbow, James D., assignor to Western Wheeled Scraper Company, Aurora, Ill. Three-way valve. No. 1,395,460; Nov. 1.
Benson, Hall, West Hartford, assignor to The Carling Tool & Machine Company, Hartford, Conn. Work-support. No. 1,396,664; Nov. 1.
Berkowitz, Isidor, New York, N. Y. Feed-table for printing-presses. No. 1,395,907; Nov. 1.
Berlin Mills Company. (See Moore, Hugh K., assignor.)
Bernard, Theis F., assignor to F. M. Shoalit, Detroit, Mich. Compound grinding-head for grinding two cylindrical machine parts at the same time. No. 1,396,790; Nov. 1.
Berner, Jesse S., *et al.* (See Downey, Richard F., assignor.)
Bertolini, Giuseppe. (See Merli, C., and Bertolini.)
Bianchi, Carlo E., Montpelier, Vt. Intermittent-motion mechanism. No. 1,396,002; Nov. 1.
Biddle, Frank E., Elkhart, Ind. Filing-machine. No. 1,395,331; Nov. 1.
Biggerstaff, Charles C., Rowesville, S. C. Seed-cotton cleaner. No. 1,396,382; Nov. 1.
Billingsley, Percy L., Orlando, Fla. Flexible operating mechanism. No. 1,396,626; Nov. 1.
Binkley, John T., Chicago, Ill. Fastening device. No. 1,395,627; Nov. 1.
Bishop, James A., Chicago, Ill. Condenser. No. 1,395,898; Nov. 1.
Black, Archibald, Brooklyn, assignor, by mesne assignments, of one-half to L-W-F Engineering Company, Inc., College Point, Long Island, N. Y. Aeroplane control system. No. 1,395,254; Nov. 1.
Black, Charles F., assignor to The Republic Tool Products Company, Dayton, Ohio. Wheeled toy. No. 1,395,470; Nov. 1.
Blackmore, Charles C., Dayton, Ohio. Shock-absorber. No. 1,395,471; Nov. 1.
Blomberg, Klas G., Södertälje, and B. A. Pettersson, Lidköping, Sweden. Machine for producing spring dress-fasteners. No. 1,395,899; Nov. 1.
Blomberg, Klas G., Södertälje, and B. A. Pettersson, Lidköping, Sweden. Machine for producing spring dress-fasteners. No. 1,395,900; Nov. 1.
Blundell, Mary E., *et al.* (See Blundell, William C., assignor.)
Blundell, William C., assignor of one-half to M. E. Blundell and one-half to O. W. Smith, Los Angeles, Calif. Low-water signal for steam-boilers. No. 1,395,550; Nov. 1.
Bogart, Peter B., Milwaukee, Wis. Car-ventilating system. No. 1,395,383; Nov. 1.
Bolas, Harold, Clifton, Bristol, assignor to G. G. Parnall, Bristol, England. Means for folding the planes of aircraft. No. 1,396,622; Nov. 1.
Bollier, Walter, and I. Diemand, Zurich, Switzerland. Time-recording apparatus. No. 1,395,665; Nov. 1.
Booth, Homer A., Pittsfield, Mass. Valve-lifter. No. 1,395,901; Nov. 1.
Bosshard, Gustav A., assignor to Firm A.-G. Seerlet, Bleicherei, Filiale Arbon, Arbon, Switzerland. Improving cotton fabrics. No. 1,395,472; Nov. 1.
Bourquin, Paul P., Philadelphia, Pa. Multiple-impression typewriter. No. 1,395,594; Nov. 1.
Bowman, Robert L., Knoxville, Tenn. Conductor for mine explosives. No. 1,395,791; Nov. 1.
Bowman, Robert L., Knoxville, Tenn. Conductor for mine explosives. No. 1,395,792; Nov. 1.
Boyce, Theodore, *et al.* (See Corum, Adolphus H., assignor.)
Boyd, Andrew C. (See Sawyer, W. H., and Boyd.)
Boyd, Jesse B. (See Breakfield, Charles C., assignor.)
Boyle, John, & Company. (See Markert, Frederick E., assignor.)
Bosso, Pedro, Buenos Aires, Argentina. Machine for cutting cardboard strips for making matches. No. 1,395,473; Nov. 1.
Bradshaw, Arthur F., Bieber, Calif. Check-protecting method. No. 1,395,948; Nov. 1.
Bragg, Gilbert A., Thomson, Nev., assignor to Metals Research Company. Hydrometallurgy of copper. No. 1,396,755; Nov. 1.
Brake, Archibald and R. K., Toronto, Ontario, Canada. Headlight for vehicles. No. 1,395,599; Nov. 1.
Brake, Richard K. (See Brake, Archibald and R. K.)
Braley, Charles L., and S. Prestwich, assignors to The American Laundry Machinery Company, Cincinnati, Ohio. Safety attachment for pressing-machines. No. 1,395,604; Nov. 1.
Brand, Charles P., Wheeling, W. Va. Snap-movement valve mechanism. No. 1,395,551; Nov. 1.
Bray Metal Hardening Co. (See Bray, Nelson H., assignor.)
Bray, Nelson H., San Francisco, Calif., assignor to Bray Metal Hardening Co. Treatment of rails, switch-points, frogs, and crossings. No. 1,395,476; Nov. 1.
Breakfield, Charles C., assignor of one-half to J. B. Boyd, Allensville, Ky. Deadlock for end drop-gates. No. 1,395,639; Nov. 1.
Briant Specialty Company. (See Granata, Herbert C., assignor.)
Bridges, William C., North Easton, Mass. Velocipede. No. 1,395,883; Nov. 1.
Bried, Julius A., Oakland, Calif. Rolling screen. No. 1,396,475; Nov. 1.
Briggs, Robert. (See McReynolds, W. A., and Briggs.)
Bristol Aeroplane Company Limited, The. (See Fedden, A. H. R., and Butler, assignors.)
Britton, Andrew C., Westmond, assignor of one-half to P. A. Nelson, Sandpoint, Idaho. Cow-tail holder. No. 1,395,709; Nov. 1.
Brock and Company. (See Ginder, Wallace G., assignor.)
Brodowski, John F., Milwaukee, Wis. Sash-hanger. No. 1,396,594; Nov. 1.
Brophy, Daniel J., Montreal, Quebec, Canada. Clamping device for molds. No. 1,395,553; Nov. 1.
Broschart, Jacob L., Trenton, Mo. Pencil attachment. No. 1,396,793; Nov. 1.
Brown, Ray M., Yonkers, assignor to H. L. Ingersoll, White Plains, N. Y. Booster-engine for steam-locomotives. No. 1,395,478; Nov. 1.
Brown, William W., Medford, Oreg. Lid-holder for cooking utensils and receptacles. No. 1,395,554; Nov. 1.
Brose, Stanley A., *et al.* (See Scholts, John, assignor.)
Brubaker, William A., Akron, Ohio. Tire-vulcanizing mold. No. 1,395,944; Nov. 1.
Bruegger, Zeno A., Boise, Idaho. Engine-piston. No. 1,395,794; Nov. 1.
Bryant, L. J. (See Aton, William E. and W. J., assignors.)
Büchler, G. J. (See Garver, Uriah D., assignor.)
Buchner, Max, Heidelberg, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Washing, cleansing, and lubricating medium. No. 1,395,902; Nov. 1.
Buckeye Traction Ditcher Company, The. (See George, Charles L., assignor.)
Buckwalter, Tracy V., assignor to Timken Roller Bearing Company, Canton, Ohio. Bearing-cage. No. 1,395,385; Nov. 1.
Budd, Edward G., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Latch mechanism for automobile-doors. No. 1,395,477; Nov. 1.
Budd, Edward G., Manufacturing Company. (See Budd, Edward G., assignor.)
Budd, Lester, Philadelphia, Pa. Operating device for shaking-grates. No. 1,395,478; Nov. 1.
Buhl, Olaf, Newell, Iowa. Firearm. No. 1,395,903; Nov. 1.
Bumgardner, Adam G., Clarksburg, W. Va. Rack. No. 1,395,980; Nov. 1.
Bunker, William G., Augusta, Me. Combined toilet and lavatory. No. 1,395,479; Nov. 1.
Burditt, William F., Jr., Lyons Farms, N. J. Press. No. 1,395,286; Nov. 1.
Burger, Leopold F., Riverside, Ill., assignor, by mesne assignments, to International Harvester Company. Carbureter. No. 1,396,587; Nov. 1.
Burke, Alice S., New York, N. Y. Alinement device for manifold-sheets. No. 1,396,255; Nov. 1.
Burroughs Adding Machine Company. (See Gascon, Malcolm F., assignor.)
Burton, Charles S., Oak Park, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Mileage-period-signaling device. No. 1,396,256; Nov. 1.
Butchart, William A., Denver, Colo. Agitator. No. 1,395,480; Nov. 1.
Butler, Leonard F. G. (See Fedden, A. H. R., and Butler.)
Byer, John D., Butte, Mont. Match and toothpick dispenser. No. 1,395,288; Nov. 1.
Cain, Thomas, Topeka, Kans. Dust-guard. No. 1,395,701; Nov. 1.
Caldwell Silo Co. (See Caldwell, Warren A., assignor.) (Reissue.)
Caldwell, Warren A., assignor to Caldwell Silo Company Inc., Oskaloosa, Iowa. Ventilated grain-crib stave. (Reissue.) No. 15,217; Nov. 1.
Callahan, Francis E. (See Stoddard, H. A., and Callahan.)
Carling Tool & Machine Company, The. (See Benson, Emil, assignor.)
Carlson, Alvin E., Nevis, Minn. Dispensing device. No. 1,395,795; Nov. 1.
Carmichael, James J., Ridgway, Colo. Automatic cylinder-cock. No. 1,395,796; Nov. 1.
Carnot Development Corporation. (See Hayes, Albert, assignor.)
Castelli, Vitale B. (See Frattola, E., Castelli, and Regnoni.)
Catello, Patrick J., assignor of one-half to M. F. Schneible, Roma, N. Y. Clothes-drying cabinet. No. 1,395,797; Nov. 1.
Catlett, William C., Pritchett, Tex. Planter. No. 1,395,798; Nov. 1.
Chambers, Clayton E., Asheville, N. C. Loom attachment. No. 1,396,994; Nov. 1.
Chase Companies, The. (See Grigsmer, William E., assignor.)
Chase, Herschel E., assignor to United States Hoffman Machinery Company, Syracuse, N. Y. Garment-press. No. 1,396,987; Nov. 1.
Chemical Foundation, Inc., The. (See Bechner, Max, assignor.)
Chemical Foundation, Inc., The. (See Kohner, Alfred, assignor.)
Chemical Foundation, Inc., The. (See Kuppers, Karl, assignor.)
Chemical Foundation, The. (See Römer, Adolf, assignor.)
Chemical Foundation, Inc., The. (See Türk, Gustav, assignor.)
Cheate, William E., Hamilton, Mass., assignor, by mesne assignments, to Federal Finance Corporation. Work and material holder for stamping-machines. No. 1,395,558; Nov. 1.
Chubb, Lewis W., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical measuring instrument. No. 1,396,535; Nov. 1.
Cincinnati Frog & Switch Company. (See Partington, Charles, assignor.)
Clark, Charles H., Easton, Me. Caster-wheel. No. 1,395,357; Nov. 1.
Clark, Harry L., Norwood, and J. H. Sower, Cincinnati, assignors, by mesne assignments, to The Southern Ohio Tin Can Company, Winton Place, Ohio. Paraffining-machine. No. 1,396,256; Nov. 1.
Clarke, Hans T., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose ether composition. No. 1,396,905; Nov. 1.
Claude, Georges, assignor to L'Air Liquide Societe Anonyme Pour l'Etude et l'Exploitation Des Procedes Georges Claude, Paris, France. Extraction of hydrogen from gaseous mixtures. No. 1,395,930; Nov. 1.
Claus, Emil L., Milwaukee, Wis. Combined burner structure for gas-stoves. No. 1,396,799; Nov. 1.
Clay, Anson E., deceased, Newton, Iowa; A. Perry, administratrix. Window-lock. No. 1,396,556; Nov. 1.
Clayton, Samuel B., Greensboro, N. C. Automobile-lock. No. 1,396,906; Nov. 1.
Clement, Lewis M., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Oscillation-generating system. No. 1,395,390; Nov. 1.
Clements, Arthur E., South Jacksonville, Fla. Combined jack and puller. No. 1,395,945; Nov. 1.
Clemons, Charles H., Weldon, Ill. Wrist-pin. No. 1,395,946; Nov. 1.
Cleveland Chain & Mfg. Company, The. (See Hughes, Hugh T., assignor.)
Cline, Robert W., assignor of one-half to F. S. Moore, San Jose, Calif. Artichoke-trimmer. No. 1,395,481; Nov. 1.
Cluett, Peabody & Co. (See Connolly, Charles M., assignor.)
Coble, Ernest H., Jackson, Mich. Foot-rest. No. 1,396,000; Nov. 1.
Cochran, Edwin W., Catawba, N. C. Wrench. No. 1,395,800; Nov. 1.
Coley, Lemuel B. (See Sanford, Thomas H., assignor.)
Collyer, Louis G. (See Dickinson, J. H., and Collyer.)
Conners, Edward R., Covington, Ky., assignor to The Precision Truing Machine and Tool Company, Cincinnati, Ohio. Device for truing and dressing grinding-wheels. No. 1,396,391; Nov. 1.
Conners, Edward R., assignor to The Precision Truing Machine and Tool Company, Cincinnati, Ohio. Device for truing and dressing grinding-wheels. No. 1,396,392; Nov. 1.
Conners, Edward R., assignor to The Precision Truing Machine and Tool Company, Cincinnati, Ohio. Mechanism for truing and dressing grinding-wheels. No. 1,396,393; Nov. 1.
Conners, Edward R., assignor to The Precision Truing Machine and Tool Company, Cincinnati, Ohio. Mechanism for truing and dressing grinding-wheels. No. 1,396,394; Nov. 1.
Connolly, Charles M., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y. Collar-display form. No. 1,396,557; Nov. 1.
Cook, Frank E., Amarillo, Tex. Self-locking grease-plug. No. 1,396,259; Nov. 1.
Cooley, Fred W., assignor to J. J. Gerber, Minneapolis, Minn. Distributing-spout. No. 1,395,947; Nov. 1.
Copeman Development Company. (See Copeman, Lloyd G., assignor.)
Copeman, Lloyd G., assignor to Copeman Development Company, Flint, Mich. Grease-cup. No. 1,396,386; Nov. 1.
Corning Glass Works. (See Gage, Henry P., assignor.)
Corum, Adolphus H., assignor of one-fourth to G. W. Dunlap, one-fourth to T. Boyce, and one-fourth to L. J. Dunlap, St. Louis, Mo. Fuel-agitator. No. 1,396,801; Nov. 1.
Cotton, Alfred, assignor to Heine Safety Boiler Company, St. Louis, Mo. Check-damper. No. 1,395,395; Nov. 1.
Coulson, Albert M., Baltimore, Md. Dimming mechanism for automobile-lights. No. 1,395,907; Nov. 1.
Cox Brass Manufacturing Company. (See Cox, William G., assignor.)
Cox, William G., Cleveland, Ohio, assignor to Cox Brass Manufacturing Company, Albany, N. Y. Bumper. No. 1,395,908; Nov. 1.
Crawford, Walter W., Kew Gardens, Surrey, England. Manufacture of bricks. No. 1,395,950; Nov. 1.
Crane, Leonard S., New York, N. Y. Delineating apparatus. No. 1,395,560; Nov. 1.
Crane, Leonard S., New York, N. Y. Sliding-top desk. No. 1,395,558; Nov. 1.
Crown Die and Tool Company. (See Beck, Edward E., assignor.)
Cullinan, John J., Bradford, Pa. Amusement device. No. 1,396,261; Nov. 1.
Cunningham, George T. (See Possinger, W. E., and Cunningham.)
Curtis, Henry, Gloversville, N. Y. Tool-holder. No. 1,395,262; Nov. 1.
Cutts, Richard, Swampscott, assignor of one-half to Renton Heel Company, Lynn, Mass. Unattached heel. No. 1,395,263; Nov. 1.
Dandeville, Leontine. (See Levé, M. S., and de Laitte, assignor.)
Davidson, George A., Ada, Minn. Potato-seed-cutting machine. No. 1,395,482; Nov. 1.
Davis, Cleland, Englewood Cliffs, N. J. Non-recoil gun. No. 1,395,650; Nov. 1.
Davis, Frederick A. W., Pelham, N. Y. Railway-dagman's carriage. No. 1,395,550; Nov. 1.
Dayton Engineering Laboratories Company, The. (See Hunt, John H., assignor.)
Dayton Engineering Laboratories Company, The. (See Walter, Frank L., assignor.)
Deacon, Ernest J. (See Wyles, William H., assignor.)
Dean, Henry D., Benton Harbor, Mich., assignor of one-half to F. J. Petrovics, Chicago, Ill. Cofferdam. No. 1,395,631; Nov. 1.
De Caudemberg, Charles A. C., Nice-Gare, France. Paving composition and making the same. No. 1,395,906; Nov. 1.
De Laitte, Leopold B. (See Levé, M. S., and de Laitte.)
De Lany, Edwin H., and S. H. Payne, New York, N. Y. Apparatus for determining the amount of certain constituents in gases. No. 1,395,560; Nov. 1.
Delbrückamp, Henry D. (See Mulherin, James A., assignor.)
Dellenbarger, Charles E., Chicago, Ill. Display apparatus. No. 1,395,397; Nov. 1.
Dellenbarger, Charles E., Chicago, Ill. Sheet-handling machine. No. 1,395,909; Nov. 1.
Dellinger, Abraham M., Lancaster, Pa. Sheaf-elevator. No. 1,395,561; Nov. 1.
De Luxe Brush Company, The. (See Shalkop, Isaac C., assignor.)
Denney, Charles A., Portland, Ind. Pallet. No. 1,395,483; Nov. 1.
Dennis, Basil W., Detroit, Mich. Window-ventilating stop. No. 1,395,910; Nov. 1.
Dennis, Lewis T., *et al.* (See Hansen, William N., assignor.)
Detroit Pressed Steel Company. (See Putnam, Alden L., assignor.)
Detroit Stove Works. (See Mersfelder, William L., assignor.)
De Vry Corporation, The. (See De Vry, Herman A., assignor.)
De Vry, Herman A., assignor to The De Vry Corporation, Chicago, Ill. Stereopticon. No. 1,395,396; Nov. 1.
De Zeng, Henry L., Moorestown, N. J. Diagnostic instrument. No. 1,395,264; Nov. 1.
Dickinson, Joseph H., Cranford, and L. G. Collyer, Upper Montclair, N. J., assignors to The Aeolian Company. Rewind device for phonographs. No. 1,395,902; Nov. 1.
Diemand, Irma. (See Bollier, W., and Diemand.)
Diss, Daniel B., Newark, N. J., assignor to The Bassick Company, Bridgeport, Conn. Top-bearing caster. No. 1,395,484; Nov. 1.
Ditson, Jesse, Littleton, Colo., assignor to Ingersoll-Rand Company, Jersey City, N. J. Shank and bit punch. No. 1,396,702; Nov. 1.
Doble, John A. (See Doble, William A. and J. A.)
Doble Laboratories. (See Doble, William A., and J. A., assignors.)
Doble, William A. and J. A., assignors to Doble Laboratories, San Francisco, Calif. Fluid-heater. No. 1,395,399; Nov. 1.
Dowe, George M., New York, N. Y. Signal-controlling device. No. 1,395,562; Nov. 1.
Downey, Richard F., assignor of one-third to A. Leich and one-third to J. S. Berner, Milwaukee, Wis. Time-recorder. No. 1,395,400; Nov. 1.
Dräger, Alexander B., Lübeck, Germany. Helmet and mask for use with respiratory apparatus. No. 1,395,948; Nov. 1.
Dreyfus, Henry, London, England. Manufacture of solutions, preparations, or compositions having a basis of cellulose acetate. No. 1,395,401; Nov. 1.
Drill, Daniel C., Greenville, Ohio. Transmission and steering mechanism for farm-tractors. No. 1,395,663; Nov. 1.
Drosdzynski, Stanislaus T., Toledo, Ohio. Flexible ladder-support. No. 1,395,563; Nov. 1.

Du Bois, John T., and F. B. Hanna, Detroit, Mich. Paper-clip. No. 1,295,561; Nov. 1.

Du Bois Rubber & Tube Company. (See Leichtman, Silas H., assignor.)

Dudas, George A. (See Gerhausen, L. L., and Dudas.)

Dudley, Howard M., Philadelphia, Pa. Dyeing-machine. No. 1,295,609; Nov. 1.

Dudykian, Antonio, New York, N. Y. Joint for electrodes. No. 1,295,402; Nov. 1.

Duncan, David C. and R. C., Duluth, Minn. Coup for portable gas-generators. No. 1,295,485; Nov. 1.

Duncan, Ronald C. (See Duncan, David C. and R. C.)

Duncan, William M., Alton, Ill. Traveling-grate stoker. No. 1,295,602; Nov. 1.

Dunlap, Guy W., *et al.* (See Corum, Adolphus M., assignor.)

Dunlap, Lilburn J., *et al.* (See Corum, Adolphus M., assignor.)

Easterday, Van Buren, Urbana, Ill. Building-block. No. 1,295,632; Nov. 1.

Eastman Kodak Company. (See Clarke, Elmer T., assignor.)

Eastman Kodak Company. (See Jones, John G., assignor.)

Eckard, James W. (See Stedman, W. H., and Eckard.)

Eckman, Walter H., Mankato, Minn. Electrically-heated electrotuner. No. 1,295,669; Nov. 1.

Edell, Joseph W., assignor of one-half to M. J. Mercer, Cleveland, Ohio. Permissible mining fuse-head. No. 1,295,670; Nov. 1.

Ehrhalt, Frederick M. (See Barnard, Thaddeus F., assignor.)

Ehrhart, Raymond N., and J. A. Fryzell, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company. Automatic shut-off valve for jet-condensers. No. 1,295,265; Nov. 1.

Ekberg, Nels, St. Paul, Minn. Rail-cutting device for railways. No. 1,295,763; Nov. 1.

Electric Water Sterilizer and Ozone Company. (See Hartman, Harry B. and F. E., assignors.)

Electro Chemical Company, The. (See Gerstle, John, assignor.)

Electrolytic Zinc Company of Australasia Proprietary Limited. (See Gepp, Herbert W., assignor.)

Elmendorf, James M., Belen, N. Mex. Heel-slitter blank. No. 1,295,604; Nov. 1.

Endless Belt Corporation. (See Grupe, William F., assignor.)

Ensign, William J., assignor to The Vacuum Carburetor Company, Monte Vista, Colo. Vacuum-carburetor. No. 1,295,908; Nov. 1.

Engel, George J., New York, N. Y. Manufacturing ornamentations and finished article derived therefrom. No. 1,295,911; Nov. 1.

Engelhardt, Carl, Butte, Mont. Cloth-holder. No. 1,295,633; Nov. 1.

Enriquez, Magdalena de las S., New York, N. Y. Retainer for ladies' cape-collars. No. 1,295,564; Nov. 1.

Erickson, Axel F., and D. W. Shiek, assignors to All-Steel Equip Company, Aurora, Ill. Door structure. No. 1,295,671; Nov. 1.

Erickson, Edward, Fresno, Calif. Toy. No. 1,295,565; Nov. 1.

Essex Motors. (See Fekete, Stephen I., assignor.)

Essex Motors. (See Whisler, Ralph H., assignor.)

Fedden, Albert H. R., and L. F. G. Butler, Bristol, assignors to The Bristol Aeroplane Company Limited, Bristol, Gloucester, England. Induction-pipe for radial or rotary internal-combustion engines. No. 1,295,930; Nov. 1.

Federal Finance Corporation. (See Choate, William E., assignor.)

Feigenbaum, William, New York, N. Y. Game. No. 1,295,634; Nov. 1.

Felbelmann, Rudolph, Cleveland, Ohio. Rail. No. 1,295,803; Nov. 1.

Fekete, Stephen I., assignor to Essex Motors, Detroit, Mich. Blading-tip. No. 1,295,403; Nov. 1.

Fenner, Herbert E., Ryan Mawr, Pa. Automobile-lock. No. 1,295,337; Nov. 1.

Fenton, John F., Kansas City, Kans. Combination spike-puller. No. 1,295,28; Nov. 1.

Ferdon, Guy W., Cranford, N. J. Conical straining device. No. 1,295,931; Nov. 1.

Ferentzi, Rudolph, Newark, N. J. Heated bed. No. 1,295,917; Nov. 1.

Fiken, William M. (See Quill, Charles J., assignor.)

Finizio, Thomas D., Kitchawan, N. Y., assignor to Steatite Electric Products Corporation. Electric iron. No. 1,295,635; Nov. 1.

Finke, Fred E., Milwaukee, Wis. Time-controlled lighting system. No. 1,295,866; Nov. 1.

Fischer, Gustav A., Cleveland, Ohio. Dry-swing apparatus. No. 1,295,672; Nov. 1.

Fisher, William H., Minocqua, Wis. Rotary motor. No. 1,295,267; Nov. 1.

Flannery Belt Company. (See Mennie, Robert S., assignee.)

Fleming, James E., Scranton, Pa. Journal-box and mounting. No. 1,295,487; Nov. 1.

Flick, James E., Vineland, N. J. Gas-burner attachment. No. 1,295,404; Nov. 1.

Fluhr, Philip H., Nyack, N. Y. Plumbing-clamp. No. 1,295,566; Nov. 1.

Folsom, William S., Stoneham, Mass., assignor to Standard Oil Company of New York, New York, N. Y. Liquid-dispensing apparatus. No. 1,295,490; Nov. 1.

Ford, Henry, Detroit, Mich. (See Sorensen, Charles E., assignor.)

Ford, Henry, Dearborn, Mich. Hub construction. No. 1,295,911; Nov. 1.

Forest, Nicola, Santa Rosa, Calif. Water-meter box. No. 1,295,507; Nov. 1.

Forrer, Eugene, Budd Lake, N. J. Pipe-joint. No. 1,295,935; Nov. 1.

Foerl, Victor, Paris, France. Automatic gas igniter and extinguisher. No. 1,295,937; Nov. 1.

Frank, George, deceased, by J. Frank, executrix, Chicago, Ill., assignor to Frank, Lesser & Co., Chicago, Ill. Lamp. No. 1,295,900; Nov. 1.

Frank, Mary J., executrix. (See Frank, George.)

Fram, John W., assignor of one-half to E. A. Hoffmann, St. Louis, Mo., Grease and oil cup. No. 1,295,405; Nov. 1.

Franz, John J., Brightwood, Mass. Wrench. No. 1,295,982; Nov. 1.

Fratinger, Marion V. E. Costelli, and E. Howard, Hope, Tex., assignors to Gerber, No. 1,295,511; Nov. 1.

Freund, Harry E., Shelbyville, Mo. Dispensing apparatus. Nov. 1.

Frick, Gerald Martin, Wis. Cableway-operating engine. No. 1,295,673; Nov. 1.

Fusco, Frank, *et al.* (See Merli, C., and Bottarini, assignors.)

Fuster, Frederick W., Kansas City, Mo., assignor to United Shoe Machinery Corporation, Paterson, N. J. Splitting and buffing machine. No. 1,295,867; Nov. 1.

Gage, Henry P., assignor to Corning Glass Works, Corning, N. Y. Optical projecting system. No. 1,295,965; Nov. 1.

Gale Ray Machinery Company. (See Gale, Henry A., assignor.)

Gale, Henry A., Pittsburg, assignor to Gale Ray Machinery Company. Wood-working machine. No. 1,295,409; Nov. 1.

Gamble, Joseph W., assignor by mesne assignments, to H. S. B. W.-Cochrane Corporation, Philadelphia, Pa. Water-heater. No. 1,295,681; Nov. 1.

Gamille, James F., Fredericktown, Pa. Ventilating signal appliance for mines. No. 1,295,954; Nov. 1.

Garver, Uriah D., assignor to G. I. Richter, Philadelphia, Pa. Blasting and ignition system. No. 1,295,309; Nov. 1.

Gascon, Malcolm F., assignor to Burroughs Adding Machine Company, Detroit, Mich. Adding-machine. No. 1,295,991; Nov. 1.

Gebauer, Charles L., Cleveland, Ohio. Metallic article. No. 1,295,259; Nov. 1.

Gee, Frederick S., London, England. Display device. No. 1,295,982; Nov. 1.

Gentis, Herman, Victoria, British Columbia, Canada. Incubator. No. 1,295,989; Nov. 1.

George, Charles L., assignor to The Buckeye Traction Ditcher Company, Findlay, Ohio. Sight-arm attachment for ball-measuring-machines. No. 1,295,810; Nov. 1.

George, John W., Stroud Green, England. Rotary internal-combustion engine. No. 1,295,698; Nov. 1.

Gepp, Herbert W., assignor to Electrolytic Zinc Company of Australasia Proprietary Limited, Melbourne, Victoria, Australia. Treatment of zinc-bearing ores. No. 1,295,813; Nov. 1.

Gerber, Edward V., Leavenworth, Kans. Multiple looking-glass. No. 1,295,572; Nov. 1.

Gerber, James J. (See Cooley, Fred W., assignor.)

Gerstle, Sam, assignor to The Electro Chemical Company, Dayton, Ohio. Electrolytic cell. No. 1,295,704; Nov. 1.

Gibbs, Benedict T., Jr., assignor to Morden Frog & Crossing Works, Chicago, Ill. Railway-crossing. No. 1,295,829; Nov. 1.

Giles, Jesse H., Ogden, Utah. Lock. No. 1,295,638; Nov. 1.

Gillis, James B., B. J. Rhodes, and H. J. Lowe, Salisbury, Md. Spike-puller. No. 1,295,950; Nov. 1.

Ginder, Wallace G., assignor to Brock and Company, Los Angeles, Calif. Ring. No. 1,295,469; Nov. 1.

Gish, S. J. (See Jennings, Aaron H., assignor.)

Glass, Perley B., Brookline, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Splitting-machine. No. 1,295,868; Nov. 1.

Glass, Perley B., Brookline, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Punch-binding-straightening and cement-applying machine. No. 1,295,570; Nov. 1.

Globe Machine & Stamping Company, The. (See Root, Ralph R., assignor.)

Glover, Frank B., New York, N. Y. Adjustable guide for transfer mechanisms. No. 1,295,490; Nov. 1.

Gobats, Lafayette C., Brooklyn, N. Y. Alarm mechanism for radiator-tanks. No. 1,295,271; Nov. 1.

Godfrey, Truman M., Chicago, Ill., assignor to The American Cotton Oil Company, New York, N. Y. Oil-proof and greaseproof paper can. No. 1,295,273; Nov. 1.

Gold Car Heating & Lighting Company. (See Gold, Edward R., assignor.)

Gold, Edward R., assignor to Gold Car Heating & Lighting Company, New York, N. Y. Safety positive lock for hose-couplings. No. 1,295,213; Nov. 1.

Goodrich, B. F., Company, The. (See Stedman, H. A., and Juve, assignors.)

Goodrich, B. F., Company, The. (See Kemmet, Curt, assignor.)

Gooding, Frank L., Brookline, assignor to A. O. Norton, Inc., Boston, Mass. Spool-controlling device for lifting-jacks. No. 1,295,340; Nov. 1.

Gooding, Frank L., Brookline, assignor to A. O. Norton, Inc., Boston, Mass. Self-lowering jack. No. 1,295,341; Nov. 1.

Gottlieb, Carl J. A., Aarhus, Denmark. Creaseless end pin-tumbler connection. No. 1,295,624; Nov. 1.

Gottlieb, Carl J. A., Aarhus, Denmark. Lubricating device for sewing-tools. No. 1,295,625; Nov. 1.

Graf, Walter W., East Cleveland, assignor of one-half to J. D. Schmitz, Cleveland, Ohio. Lamp. No. 1,295,690; Nov. 1.

Granby, Frank, Southampton, Mass. Reflect heel. No. 1,295,968; Nov. 1.

Grannis, Herbert C., assignor to Hobart Specialty Company, Troy, N. Y. Rolling and locking device for game apparatus. No. 1,295,705; Nov. 1.

Gravlee, Sam H., Long Beach, Calif. Illuminated Mezuzah-plate. No. 1,295,467; Nov. 1.

Grevatt, Charles H., Fort Royal, Va., Station-indicator. No. 1,295,916; Nov. 1.

Graves, Eugene C., Kankakee, Ill. Weed-killing implement. No. 1,295,637; Nov. 1.

Gray & Davis. (See Moses, William S., assignor.)

Green, Robert C., Winchester, England. Hydraulic ram for raising water. No. 1,295,949; Nov. 1.

Greer, Archie P. (See Leonard, D. C., and Greer.)

Gregson, Herbert, Wankwitch, N. S. Tobacco-pipe. No. 1,295,817; Nov. 1.

Greve, Edgar E., Bellevue, Pa. Rotary well-drilling apparatus. No. 1,295,706; Nov. 1.

Grieshaber, William A., assignor to Wire Chaser Companies, Inc., Waterbury, Conn. Crimped joint for bathroom-fixtures. No. 1,295,707; Nov. 1.

Griffin, Edgar L., Ladue, Mo. Saw. No. 1,295,957; Nov. 1.

Grode, Frank P., and F. Hasting, Kansas City, Mo. Ventilating-sash lock. No. 1,295,708; Nov. 1.

Grotlisch, Victor E. (See Starling, W. F., Grotlisch, and Veltch.)

Grubman, Leo J., Erie, Pa., and G. A. Dufen, Brooklyn, N. Y. Speed-indicating instrument. No. 1,295,966; Nov. 1.

Grunseman, Michael G., Smithwick, Minn. Shoe. No. 1,295,635; Nov. 1.

Grundmann, Otto W., Jersey City, N. J. Swimming device. No. 1,295,415; Nov. 1.

Grupe, William F., North Bergen, N. J., assignor to Endless Belt Corporation, Inc. Blanking and stamping. No. 1,295,515; Nov. 1.

Gudka, E. E., Mfg. Co. (See Williams, Frank P., assignor.)

Guggenheimer, Leopold, Hastings-upon-Hudson, N. Y., assignor to Rolup Screen Company. Window-screen. No. 1,295,492; Nov. 1.

Guy, Frank E., New Southgate, London, England. Calculating-machine. No. 1,295,963; Nov. 1.

Guy, Virgil A., Englewood, Colo. Lamp shade and toster. No. 1,295,545; Nov. 1.

H. C. Tack Company, The. (See Hill, Charles K., assignor.)

H. S. B. W.-Cochrane Corporation. (See Gamble, Joseph W., assignor.)

Hagelstein, Christian H. T., assignor to The Reece Button Hole Machine Company, Boston, Mass. Sewing-machine. No. 1,295,274; Nov. 1.

Hague, Floyd T., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Winding for dynamo-electric machines. No. 1,295,696; Nov. 1.

Haines, George B., Chicago, Ill. Waterproofing apparatus. No. 1,295,915; Nov. 1.

Halbleib, Edward A., assignor to North East Electric Company, Rochester, N. Y. Switch-box. No. 1,295,498; Nov. 1.

Hamel Shoe Machinery Company. (See Angell, Otis B., assignor.)

Hamel Shoe Machinery Company. (See Lancaster, John T., assignor.)

Hamel Shoe Machinery Company. (See Perrine, James O., assignor.)

Hamel Shoe Machinery Company. (See Scott, John E., assignor.)

Hamilton, Thomas S., Kansas City, Mo. Detachable sanding-sole. No. 1,295,522; Nov. 1.

Harbaugh, Charles B., Milwaukee, Wis. Pump-support. No. 1,295,275; Nov. 1.

Hartman National Bank of the City of New York, trustee. (See Vassalli, Anthony, assignor.)

Harrington, Frank B., assignor of one-half to F. A. Miller, Los Angeles, Calif. Reinforcing spring. No. 1,295,494; Nov. 1.

Harris, Henry, London, England. Destroying mud. No. 1,294,820; Nov. 1.

Harsen, William N., Attica, assignor of one-third to H. B. Palmer and one-third to L. T. Bennis, Imlay City, Mich. Lifting-jack. No. 1,295,621; Nov. 1.

Hartel, Frank B. (See Dorman, Jerry S., and Hartel.)

Hartman, Frank B. (See Hartman, Harry B. and F. E.)

Hartman, Harry B. and F. E., Sweetdale, Pa., assignors to Electric Water Sterilizer and Ozone Company. Drying or setting paints, varnishes, enamels, or the like. No. 1,295,569; Nov. 1.

Hassler, Robert P., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for vulcanizing rubber pumps. No. 1,295,810; Nov. 1.

Hastings, Charles S., New Haven, Conn. Lens system for terrestrial telescopes. No. 1,295,822; Nov. 1.

Hayes, Albert, New York, N. Y., assignor to Carnot Development Corporation. Rotary pump. No. 1,295,916; Nov. 1.

Hayes, Albert, New York, N. Y., assignor to Carnot Development Corporation. Rotary pump. No. 1,295,917; Nov. 1.

Hayes, Daniel J. (See Anderson, Edward H., assignor.)

Hazen, Chas D., Washington, D. C. Tool for scraping cylindrical surfaces. No. 1,295,823; Nov. 1.

Heim Safety Boiler Company. (See Cotton, Alfred, assignor.)

Heimrand, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, Armature-excited dynamo-electric machine. No. 1,295,944; Nov. 1.

Hemleb, Martin, Elizabeth, N. J., assignor to The Singer Manufacturing Company. Motor attachment for sewing-machines. No. 1,295,640; Nov. 1.

Hemsath, Eva N., Cincinnati, Ohio. Amusement device. No. 1,295,674; Nov. 1.

Hendricks, Daniel. (See Arvesqueier, Frederick E., assignor.)

Henry, Stewart J., Cedar Rapids, Iowa. Automatic furnace-damper controller. No. 1,295,709; Nov. 1.

Herman, John, Los Angeles, Calif. Ore-crusher. No. 1,295,950; Nov. 1.

Hershey, Delmer H., Lorain, Ohio. Alarm for automobiles. No. 1,295,276; Nov. 1.

Herskovits, Max, Chicago, Ill. Electric-lighting fixture. No. 1,295,710; Nov. 1.

Herskovits, Max, Chicago, Ill. Electric-lighting fixture. No. 1,295,711; Nov. 1.

Hessel, Philip, Norfolk, Va. Ice-machine. No. 1,295,421; Nov. 1.

Hesser, Ralph V., Yonkers, N. Y. Chemical apparatus. No. 1,295,541; Nov. 1.

Hewitt, Frank. (See Walker, George E. and S. H., and Hewitt.)

Heywood-Wakefield Company. (See Lloyd, Marshall B., assignor.)

Higbee, Albert H. (See Prosser, Walter B., assignor.)

Hill, Charles K., assignor to The H. C. Tack Company, Cleveland, Ohio. Tack or nail. No. 1,295,530; Nov. 1.

Hirsch, Abe. (See Hoerger, William, assignor.)

Hirschel, Benjamin, assignor to National Ura Ray Co., New York, N. Y. Tea-cartridge. No. 1,295,649; Nov. 1.

Hitzenberger, Herman H., Oakland, Calif. Trap. No. 1,295,676; Nov. 1.

Hodgson, James E., New York, N. Y. Embroidery-machine. No. 1,295,291; Nov. 1.

Hoerger, William, assignor of one-half to A. Hirsch, Albert Lea, Minn. Oil-burner. No. 1,295,624; Nov. 1.

Hoffman, Harry A., and W. H. Juve, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Mixing rubber with comminuted metal. No. 1,295,413; Nov. 1.

Hoffman, Peter A., Hastings, Minn. Clamping device. No. 1,295,428; Nov. 1.

Hoffmann, Clarence O., and W. A. McKinnon, Detroit, Mich. Fuel-supply system for internal-combustion engines. No. 1,295,412; Nov. 1.

Hoffmann, Edwin A. (See Franz, John W., assignor.)

Holden, Hiram, Manchester, N. H. Shoe-upper. No. 1,295,277; Nov. 1.

Holland, Granville G. P., Jr., Norfolk, Va. Testing device for spark-plugs. No. 1,295,570; Nov. 1.

Hollister, Frederick P., Beaver Dam, Wis. Scrubbing-brush. No. 1,295,495; Nov. 1.

Holmes, Harris P., Claremont, N. H., assignor to Sullivan Machinery Company, Mining-machine. No. 1,295,696; Nov. 1.

Hopkins, Richard M., Rutherford, N. J., assignor to American District Telegraph Company, New York, N. Y. Supervisory signaling system. No. 1,295,826; Nov. 1.

Horner, John H., Enterprise, Oreg. Window construction. No. 1,295,963; Nov. 1.

Hosley, Bert F., Syracuse, N. Y. Non-skid fastening means. No. 1,295,715; Nov. 1.

Howard, Frank S., Lisbon, N. H. Car-coal-conveying means for internal-combustion engines. No. 1,295,571; Nov. 1.

Hudson, Percy G., Liverpool, England. Apparatus for taking soundings. No. 1,295,572; Nov. 1.

Huffman, Lewis, Toronto, Ontario, Canada. Knee-lock. No. 1,295,414; Nov. 1.

Hughes, Hugh T., assignor to The Cleveland Chain & Mfg. Company, Cleveland, Ohio. Chain-link connector. No. 1,295,415; Nov. 1.

Hughes, James W., Haddon Heights, N. J. Automatic vending-machine. No. 1,295,416; Nov. 1.

Hughes, John M., Atlanta, Ga. Power mechanism. No. 1,295,573; Nov. 1.

Humphrey, Ernest N., New Britain, Conn. Belt-buckle. No. 1,295,718; Nov. 1.

Hunkins, William S., Los Angeles, Calif. Hose-supporter. No. 1,295,416; Nov. 1.

Hunkins, William S., Los Angeles, Calif. Hose-supporter. No. 1,295,417; Nov. 1.

Hunt, John H., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Heating system. No. 1,295,490; Nov. 1.

Hupfel, Adolph G., Reno, Nev. Golf-ball-marking device. No. 1,295,418; Nov. 1.

Hurlbut, Edward G. (See Barnes, F. A., and Hurlbut.)
Huseman, Charles, St. Louis, Mo. Convertible child's wagon, coaster, and scooter. No. 1,395,427; Nov. 1.
Hustus, Thomas, Kokomo, Ind. Farm-gate. No. 1,395,574; Nov. 1.
Hutchins, Henry M., New York, N. Y. Display-stand. No. 1,395,419; Nov. 1.
Huttig, Fred. (See Grode, F. P., and Huttig.)
Hyltenette, Neak V., Christiania, Norway. Separating metals by electrolysis. No. 1,395,827; Nov. 1.
Ingersoll, Howard L. (See Brown, Ray M., assignor.)
Ingersoll-Rand Company. (See Ditzen, Jesse, assignor.)
Ingersoll-Rand Company. (See Smith, William A., assignor.)
International Cork Company. (See Allatt, Thomas, assignor.)
International Harvester Company. (See Burger, Leopold F., assignor.)
International Harvester Company. (See Johnston, Edward A., assignor.)
International Harvester Company. (See Morwin, George M., assignor.)
International Harvester Company. (See Mowry, Edward, assignor.)
International Harvester Company. (See Sperry, Herbert B., assignor.)
International Patent Licensing Corporation. (See Peters, William A., assignor.)
Iver, Barry, Chicago, Ill. Intake-manifold. No. 1,395,677; Nov. 1.
Jacovett, Benedict D., Lorain, Ohio. Sewer-redilling tray. No. 1,395,823; Nov. 1.
Jameson, Charles V., Chicago, Ill. Air-motor for automatic musical instruments. No. 1,292,278; Nov. 1.
Jarvis, Ida H., Brookline, Mass. Landscape. No. 1,395,575; Nov. 1.
Jeffrey Manufacturing Company, The. (See Levis, Nils D., assignor.)
Jennings, Aaron R., Owensboro, assignor of one-half to S. J. Glah, Central City, Ky. Tire-tread. No. 1,395,576; Nov. 1.
Jennison, Harry G., Toledo, Ohio. Wood-block pavement. No. 1,395,829; Nov. 1.
Jensen, Olaf, Notodden, assignor to Norsk Hydro Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Concentration of nitric acid. No. 1,395,577; Nov. 1.
Johnson, Albert B., New Britain, Conn. Forceps. No. 1,395,714; Nov. 1.
Johnson, Hvass S., Lewis, Okla. Spring-tire. No. 1,395,430; Nov. 1.
Johnson, Fred, Burnley, England. Adjustable last for use in making and repairing boots, shoes, and the like by hand. No. 1,395,578; Nov. 1.
Johnson, Gustave P., Waukegan, Ill. Cushion-spring. No. 1,395,431; Nov. 1.
Johnson, Wiley B. (See Mitchell, John E., assignor.)
Johnston, Edward A., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Traction-wheel. No. 1,395,422; Nov. 1.
Jones, Charles B., above Cynwyd, Pa. Resistance-switch. No. 1,395,579; Nov. 1.
Jones, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Package of X-ray film. No. 1,395,915; Nov. 1.
Jones, Lawrence R., Peoria, Ill. Valve-lock. No. 1,395,678; Nov. 1.
Jones, Thomas J., Jersey City, N. J. Automatic tension-controlling mechanism. No. 1,395,580; Nov. 1.
Joseph, Louis, Joliet, Ill. Ship-retarding device. No. 1,395,890; Nov. 1.
Joseph, Richard, Massillon, Ohio. Roofing-tile. No. 1,395,432; Nov. 1.
Josephsohn, Adalbert, New York, N. Y. Display-card. No. 1,395,581; Nov. 1.
Julius, George A., Sydney, and F. A. Wilkinson, Sans Souci, near Sydney, New South Wales, Australia. Ticket-issuing machine. No. 1,395,270; Nov. 1.
Justus, Theodore R., Chicago, Ill. Clothespin. No. 1,395,434; Nov. 1.
Juttlen, Henry W., Hamilton, Ontario, Canada. Upright electric toaster. No. 1,395,545; Nov. 1.
Juve, Walter H. (See Hoffman, H. A., and Juve.)
Kahn Mirror Plate Company. (See Martin, Rudolph, assignor.)
Kahn, Samuel, New York, N. Y. Window-cleaning device. No. 1,395,580; Nov. 1.
Kalsing, William, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Ignition-switch. No. 1,395,679; Nov. 1.
Kalamazoo Loose Leaf Binder Company. (See Wigginton, George P., assignor.)
Kaplan, Max, Cincinnati, Ohio. Arch-support for the human foot. No. 1,395,496; Nov. 1.
Kamprath, Josef, Lancaster, Pa. Animal-trap. No. 1,395,680; Nov. 1.
Kanan, Mahlon O., Chicago, Ill. Bottle-capping tool. No. 1,395,499; Nov. 1.
Kavle, Oscar C., Syracuse, N. Y. Gear-testing mechanism. No. 1,395,582; Nov. 1.
Keenan, George A., Pittsburgh, Pa. Method of and machine for straightening bars. No. 1,395,681; Nov. 1.
Keith, Darwin E., Fort Worth, Tex. Holder for car and locomotive replacing frogs. No. 1,395,583; Nov. 1.
Kelley, George A., Burlington, Kans. Game. No. 1,395,643; Nov. 1.
Kellogg Switchboard and Supply Company. (See Kalsing, William, assignor.)
Kelly, Martha E., Laredo, Tex. Cereal food and preparing the same. No. 1,395,501; Nov. 1.
Kennedy, Joseph E., New York, N. Y. Apparatus for cutting fruits, vegetables, and the like. No. 1,395,495; Nov. 1.
Kennedy, Joseph E., New York, N. Y. Apparatus for cutting vegetables and the like. No. 1,395,496; Nov. 1.
Kennedy, William A., Leonia, N. J., and A. J. Mottau, Far Rockaway, N. Y.; said Mottau assignor to said Kennedy. Multiple-unit electric heater. No. 1,395,584; Nov. 1.
Kent, Arthur A., Beaumont, Pa. Electric contact device. No. 1,395,427; Nov. 1.
Kentucky Switch & Signal Co. (See Scoggan, Richard E., assignor.)
Kephart, Harmon M. (See Sloan, Samuel R., assignor.)
Kerlin, Harry and J. R. Malaney, Birmingham, Ala. Penholder. No. 1,395,429; Nov. 1.
Kilburn, Arthur R., Whitehall, Wash. Automatic safety train-stop mechanism. No. 1,395,632; Nov. 1.
Kirby, James E., Cleveland, Ohio. Brushing mechanism for sweepers. No. 1,395,500; Nov. 1.
Kishima, Denjiro, assignor to Hirotchiro Kishima, Oakland, Calif. Collar-ironing machine. No. 1,395,501; Nov. 1.
Kishima, Hirotchiro. (See Kishima, Denjiro, assignor.)
Kitchen, Lewis R., Indianapolis, Ind. Oil-gage for motor-cars. No. 1,395,433; Nov. 1.
Kiser, Thomas E., Chattanooga, Okla. Socket-wrench. No. 1,395,588; Nov. 1.
Klauber, Edward. (See Monro, E., and Klauber.)
Kleckner, Arthur C., assignor to Webster Electric Company, Racine, Wis. Ignition apparatus. No. 1,395,429; Nov. 1.
Kleinberg, Victor, et al. (See Merli, C., and Bertolini, assignor.)
Kling, Fred R., Youngstown, and L. B. Weddell, Cleveland, Ohio. Pitching-mat. No. 1,395,823; Nov. 1.
Knoedler, Jacob L. (See Robbins, Henry, assignor.)
Knott, Eustace E., Sharon, Mass. Popcorn-salting machine. No. 1,395,715; Nov. 1.
Knox, George K., Wilkinsburg, Pa. Cotton-harvester. No. 1,395,644; Nov. 1.
Koenig, Philipp, Cuero, Tex. Insecticide for boll-weevils. No. 1,395,910; Nov. 1.
Kohnke, Alfred, Berlin, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Making horny bodies. No. 1,395,834; Nov. 1.
Kopp, Waldemar. (See Monro, E., and Klauber, assignors.)
Kopp, Waldemar. (See Monro, Randolph, assignor.)
Kopp, Waldemar, New York, N. Y. Gas-mask. No. 1,395,626; Nov. 1.
Kopp, Waldemar, New York, N. Y. Gas-mask. No. 1,395,636; Nov. 1.
Kopp, Waldemar, New York, N. Y. Gas-mask. No. 1,395,637; Nov. 1.
Koretsky, Harry M., New York, N. Y. Dry battery-cell. No. 1,395,581; Nov. 1.
Koretsky, Harry M., New York, N. Y. Dry battery-cell. No. 1,395,582; Nov. 1.
Kostenbauder, Harry D., Ariston, Pa. Mineral or coal separating jig. No. 1,395,716; Nov. 1.
Kramer, Harry, New York, N. Y. Wheel-lock for automobiles. No. 1,395,430; Nov. 1.
Kray, Jacob, Elgin, Ill. Roller-bearing-sleeve puller. No. 1,395,502; Nov. 1.
Krenky, Jesse E., Petaluma, Calif. Brooder-stove. No. 1,395,431; Nov. 1.
Krichbaum, William F., Irvington, N. J. Automatic shut-off valve. No. 1,395,585; Nov. 1.
Kroyer, John M., Stockton, Calif. Cleat for tractor-wheels. No. 1,395,433; Nov. 1.
Kruz, Frank, Chicago, Ill. Stove. No. 1,395,488; Nov. 1.
Kuentzel, Carl, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Tire-core-stripping machine. No. 1,395,434; Nov. 1.
Küppers, Karl, Aachen, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Method of and apparatus for forming glass tubes. No. 1,395,963; Nov. 1.
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,395,503; Nov. 1.
L-W-F Engineering Company. (See Black, Archibald, assignor.)
Laird, Henri L. (See Bellan, E., and Laird.)
L'Air Liquide Societe Anonyme Pour l'Etude et l'Exploitation Des Procedes Georges Claude. (See Claude, Georges, assignor.)
Lancaster, Herbert S., Wabash, Ind. Resilient wheel. No. 1,395,435; Nov. 1.
Lancaster, John T., Haverhill, Mass., assignor to Hamel Shoe Machinery Company. Heel-nailing machine. No. 1,395,883; Nov. 1.
Langdon, Robert M., Englewood Cliffs, N. J. Chain. No. 1,395,283; Nov. 1.
Lantieri, Frank and G., Jersey City, N. J. Adjustable clamp. No. 1,395,586; Nov. 1.
Lantieri, Gabriel. (See Lantieri, Frank and G.)
Lavoie, Alphonse J., Montreal, Quebec, Canada. Clutch and brake mechanism. No. 1,395,840; Nov. 1.

Lavoie, Alphonse J., Montreal, Quebec, Canada. Clutch and brake mechanism. No. 1,395,841; Nov. 1.
Lawrence, Frederick K., Chicago, Ill. Turning-tool. No. 1,395,436; Nov. 1.
Leach, Horace J., Mount Carmel, Ill. Toy vehicle. No. 1,395,842; Nov. 1.
Le Cocq, Frank and I., Aberdeen, S. D. Sand, gravel, and stone cleaning machine. No. 1,395,717; Nov. 1.
Le Cocq, Irwin. (See Le Cocq, Frank and I.)
Lee, Marie P., assignor to North East Electric Company, Rochester, N. Y. Electric system. No. 1,395,504; Nov. 1.
Leedom, Walter M., Oakland, Calif. Direction-indicator. No. 1,395,645; Nov. 1.
Legg, John E., San Antonio, Tex. Chiropractic table. No. 1,395,846; Nov. 1.
Legg, David A. (See Weismann, C., and Legg.)
Leich, Arthur, et al. (See Downey, Richard F., assignor.)
Leighton, Albert. (See Randall, E. H., and Leighton.)
Leiman, Henry, Tampa, Fla. Making cigar-boxes. No. 1,395,843; Nov. 1.
Leland Lock Company. (See Stanley, Theodore D., assignor.)
Leonard, Don C., and A. P. Greer, Greenville, S. C. Front-rail stand for spinning-frames. No. 1,395,284; Nov. 1.
Levi, Marcus S., Oakland, and L. R. de Laitte, assignors to L. Deadeville, San Francisco, Calif. Machine for carburating air. No. 1,395,505; Nov. 1.
Levens, Swan J., assignor of one-third to C. Shields and one-third to J. T. Marron, Rock Island, Ill. Storage battery. No. 1,395,683; Nov. 1.
Levis, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Mining-machine. No. 1,395,647; Nov. 1.
Lewis, Rollin C., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Dial-lock. No. 1,395,844; Nov. 1.
Lewis, Rollin C., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Dial-lock. No. 1,395,845; Nov. 1.
Lewis, Samuel H., Richmond, Va. Steam-supply means for cylinders of railway-locomotives. No. 1,395,648; Nov. 1.
Libenschek, Rudolf, Pittsburgh, assignor of one-third to S. Lovrencic, Bellevue, and one-third to P. Radocaj, Pittsburgh, Pa. Muffler. No. 1,395,930; Nov. 1.
Liebau, Richard, New Haven, Conn., assignor to The Westinghouse Air Spring Company. Magnetic spring. No. 1,395,437; Nov. 1.
Liebau, Richard, New Haven, Conn., assignor to The Westinghouse Air Spring Company. Air-spring suspension. No. 1,395,438; Nov. 1.
Liebknecht, Otto, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Manufacture of perborates. No. 1,395,684; Nov. 1.
Liebknecht, Otto, Frankfort-on-the-Main, Germany, assignor to The Roessler & Hasslacher Medical Company, New York, N. Y. Manufacture of alkali perborates. No. 1,395,685; Nov. 1.
Liebler, Henry B. (See Mehl, C. F., Liebler, Nall, and Nebbe.)
Lightfoot, Liles H., Signal Mountain, assignor to Du Bois Rubber & Tube Company, Chattanooga, Tenn. Inner tube. No. 1,395,439; Nov. 1.
Lindley, George W., Philadelphia, Pa. Pneumatic tire. No. 1,395,688; Nov. 1.
Lindmark, Mauz E., Brooklyn, N. Y. Envelop check-book stub. No. 1,395,637; Nov. 1.
Lloyd, Marshall B., Menominee, Mich., assignor, by mesne assignments, to Heywood-Wakefield Company, Boston, Mass. Reed-weaving machine. No. 1,395,964; Nov. 1.
Lochner, Albert T., assignor to Wodack Electric Tool Corporation, Chicago, Ill. Brush-holder. No. 1,395,440; Nov. 1.
Long, Elmer C., Quincy, Ill. Piston. No. 1,395,441; Nov. 1.
Loomer, Henry M., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Burnishing-machine. No. 1,395,285; Nov. 1.
Lord, John D., Winthrop, Mass. Liquid-fuel burner. No. No. 1,395,846; Nov. 1.
Lorey, William, Philadelphia, Pa. Adjustable lamp-support. No. 1,395,847; Nov. 1.
Loudon, Warren P., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Storage-battery construction. No. 1,395,902; Nov. 1.
Lovrencic, Slavk, et al. (See Libenschek, Rudolf, assignor.)
Lowe, Hollis J. (See Gillis, J. B., Rhodes, and Lowe.)
Ludlow, George M., Chicago, Ill. Territorial business-chart. No. 1,395,848; Nov. 1.
Lunkea Window Company, The. (See Stickle, Frederick A., assignor.)
Lutsey, George E., Wilkes-Barre, Pa. Emergency rear wheel axle and hub. No. 1,395,921; Nov. 1.
Lux, George J., and J. Wilcox, Independence, Kans. Scaffold. No. 1,395,644; Nov. 1.
McCaig, Thomas E. (See Roadhouse, Robert, assignor.)
McCarter, William A., Topeka, Kans. Dental expansion-arch. No. 1,395,922; Nov. 1.
McCarty, Roy A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Ventilation of dynamo-electric machines. No. 1,395,847; Nov. 1.
McCoy, James W., Detroit, Mich. Chicken-roost. No. 1,395,649; Nov. 1.
McCoy, Marion M., Dawson, N. Mex., assignor of one-half to G. A. Will, St. Louis, Mo. Spark-plug. No. 1,395,923; Nov. 1.
McCrosky, Aubrey D., assignor of one-half to B. B. McCrosky, Oakland, Calif. Doll. No. 1,395,984; Nov. 1.
McCrosky, Bynum B. (See McCrosky, Aubrey D., assignor.)
McCulloch, Alexander, Govan, Saskatchewan, Canada. Door latch. No. 1,395,688; No. 1.
McGavran, Stephen W. (See McLean, E. J., and McGavran.)
McKenzie, Joseph H., Beaumont, Tex. Horse-boot. No. 1,395,689; Nov. 1.
McKinnon, William A. (See Hoffmann, C. O., and McKinnon.)
McLachlan, John, East Elmhurst, N. Y. Cam-shaft remover. No. 1,395,567; Nov. 1.
McLaren, Henry, assignor of one-half to J. & H. McLaren, Limited, Leeds, England. Cable-reciprocating apparatus. No. 1,395,850; Nov. 1.
McLaren, J. & H., Limited. (See McLaren, Henry, assignor.)
McLean, Edward J., San Francisco, and S. W. McGavran, Burlingame, Calif. Atomizing and spraying device. No. 1,395,995; Nov. 1.
McLean, Francis B., Ocean Grove, N. J. Valve-operating mechanism. No. 1,395,851; Nov. 1.
McManus, Joseph C., Jacksonville, Fla. Pedal-lock. No. 1,395,906; Nov. 1.
McMeans, William, West Liberty, Iowa. Mausoleum. No. 1,395,852; Nov. 1.
McReynolds, William A., and R. Briggs, Haselton, Kans. Valve. No. 1,395,756; Nov. 1.
McWhirter, John S., New York, N. Y. Foldable seat for prepayment-cars. No. 1,395,757; Nov. 1.
Macdonald, David B., Leicester, England. Manufacture of picric acid. No. 1,396,001; Nov. 1.
MacGregor, Peter G., New York, N. Y., assignor to Pyrene Manufacturing Company. Spray-nozzle. No. 1,395,442; Nov. 1.
Mack, Patrick H., Bradford, assignor to Oil Well Supply Company, Pittsburgh, Pa. Oil-well packer. No. 1,395,718; Nov. 1.
Mack, Patrick H., Bradford, assignor to Oil Well Supply Company, Pittsburgh, Pa. Oil-well packer. No. 1,395,719; Nov. 1.
Mack, Patrick H., Bradford, assignor to Oil Well Supply Company, Pittsburgh, Pa. Well-seal. No. 1,395,720; Nov. 1.
MacNeill, John B., Wilkinsburg, Pa., assignor to Westinghouse Electric Manufacturing Company. Circuit-breaker. No. 1,395,848; Nov. 1.
Madison, Randolph, Petersburg, Va. Locking device. No. 1,395,721; Nov. 1.
Magnetic Power Transmitter Company. (See Setterstrom, Ferdinand, assignor.)
Magoun, Francis P., Cambridge, Mass. Towing submerged objects, such as submarine torpedoes. No. 1,395,924; Nov. 1.
Malaney, John R. (See Kerlin, H., and Malaney.)
Manzapane, Salvatore, et al. (See Merli, C., and Bertolini, assignors.)
Mansure, Nellie F., Chicago, Ill. Bolster or pillow-roll support. No. 1,395,505; Nov. 1.
Mardis, Paul L., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. No. 1,395,849; Nov. 1.
Markert, Frederick E., assignor to John Boyle & Company, Incorporated, New York, N. Y. Fastening device. No. 1,395,443; Nov. 1.
Marks, Albert J., New Britain, Conn. Numbering-machine. No. 1,395,722; Nov. 1.
Marriott, Harry H., Okmulgee, Okla. Sign. No. 1,395,853; Nov. 1.
Marron, J. T., et al. (See Leveen, Swan J., assignor.)
Marsteller, Sylvester A., Carrick, assignor of one-half to J. H. Roney, Pittsburgh, Pa. Brick and wall construction. No. 1,395,507; Nov. 1.
Martin, Jacob F., Bellevue, Ohio. Automobile-buffer. No. 1,395,925; Nov. 1.
Martin, William H., New York, N. Y., assignor to American Telephone and Telegraph Company. Balancing signaling system. No. 1,395,854.; Nov. 1.
Martini, Rudolph, assignor to Kahn Mirror Plate Company, St. Louis, Mo. Mirror-holder. No. 1,395,855; Nov. 1.
Maruna, Michael J. (See Edell, Joseph W., assignor.)
Mason, Earl W., Los Angeles, and C. D. Miller, San Diego, Calif. Road-map. No. 1,395,508; Nov. 1.
Mason, Earl W., and C. D. Miller, Los Angeles, Calif. Road-map. No. 1,395,509; Nov. 1.
Mason, William A., Boston, Mass. Bench for handling oil-burners. No. 1,395,856; Nov. 1.
Masszcyk, Alexander, Milwaukee, Wis. Operating means for hinged tools. No. 1,395,758; Nov. 1.
Matthews, Thomas A., Nashville, Tenn. Delivery-cabinet. No. 1,395,857; Nov. 1.
Maxwell, Maxwell C., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Combined hoist and hopper. No. 1,395,858; Nov. 1.
Mayhew, Walter H., Toronto, Ohio. Apparatus for handling sewer-pipe and the like. No. 1,395,588; Nov. 1.

Mears, Frank C., Edinburgh, Scotland. Parachute for use with aeroplanes. No. 1,395,722; Nov. 1.
Mehl, Charles F., H. E. Liebler, C. Hall, and S. J. Mobbs, Cleveland, Ohio. Safety device for moving-picture machines. No. 1,395,724; Nov. 1.
Meade, Robert G., Chicago, Ill., assignor to Stanwood Belt Company, Pittsburgh, Pa. Staybelt structure. No. 1,395,290; Nov. 1.
Merli, Carlo, and G. Bertolini, New York, N. Y.; said Bertolini assignor of his entire right to V. Kleinberg, G. Mangiapane, and F. Pumo, New York, N. Y. Machine for stuffing meat and like provisions. No. 1,395,967; Nov. 1.
Metzger, William L., assignor to Detroit Stove Works, Detroit, Mich. Grate. No. 1,395,444; Nov. 1.
Meyer, George M., Berwyn, Ill., assignor, by mesne assignments, to International Harvester Company. Binder-canvas-cutter. No. 1,395,445; Nov. 1.
Meszaros, Helen, McKeesport, Pa. Garment-hanger. No. 1,395,537; Nov. 1.
Metals Research Company. (See Bragg, Gilbert A., assignor.)
Meyer, Alfred F., assignor to Morton Corporation, Morton, Ill. Elevator structure. No. 1,395,985; Nov. 1.
Meyer, Alfred F., assignor to Morton Corporation, Morton, Ill. Elevator. No. 1,395,986; Nov. 1.
Meyer, George W., and C. A. Ross, Cincinnati, Ohio. Adjustable chuck. No. 1,395,849; Nov. 1.
Meyer, George W., and C. A. Ross, Cincinnati, Ohio. Lifting-jack. No. 1,395,850; Nov. 1.
Michaelson, Joseph M., Minneapolis, Minn. Mechanical starter for explosive-engines. No. 1,395,939; Nov. 1.
Miller, Chester D. (See Mason, H. W., and Miller.)
Miller, Delbert A. (See Miller, John R., assignor.)
Miller, Frederick A. (See Harrington, Frank C., assignor.)
Miller, John R., Spokane, assignor of one-half to D. A. Miller, Thornton, Wash. Truck-coupling. No. 1,395,688; Nov. 1.
Miller, Stuart P., Philadelphia, Pa., assignor to The Barrett Company. Preparing resin. No. 1,395,998; Nov. 1.
Milmoe, Michael J., Glenolden, assignor to W. C. Ritchie & Company, Chicago, Ill. Box-making machine. No. 1,395,442; Nov. 1.
Mills, David, Seattle, Wash. Throttle-pedal. No. 1,395,651; Nov. 1.
Milspaw, Daniel W., Greenville, S. C. Car-door opener. No. 1,395,627; Nov. 1.
Miner, William H. (See O'Connor, John F., assignor.)
Minton, Carl F., Cincinnati, Ohio. Dusting-tool. No. 1,395,510; Nov. 1.
Mitchell, John E., Hill Top, W. Va., assignor of one-half to W. B. Johnson, Clermont, Va. Car-step. No. 1,395,589; Nov. 1.
Moe, Leonidas L., Denver, Colo. Automobile-hotel. No. 1,395,999; Nov. 1.
Mondriut, Michael, Akron, Ohio. Multiple plow. No. 1,395,447; Nov. 1.
Monro, Randolph, assignor to W. Kops, New York, N. Y. Gas-mask. No. 1,395,759; Nov. 1.
Monro, Randolph, assignor to W. Kops, New York, N. Y. Gas-mask. No. 1,395,760; Nov. 1.
Monro, Randolph, and E. Klauber, assignors to W. Kops, New York, N. Y. Gas-mask. No. 1,395,761; Nov. 1.
Moore, Floyd S. (See Cline, Robert W., assignor.)
Moore, Hugh K., assignor to Berlin Mills Company, Berlin, N. H. Machine for testing lubricating-oil. No. 1,395,448; Nov. 1.
Morden Frog & Crossing Works. (See Gibbs, Benedict T., Jr., assignor.)
Morgan, Salmon J., Albany, Wis. Hacksaw-frame. No. 1,395,511; Nov. 1.
Morin, Henry V., Poughkeepsie, N. Y. Tool-holder. No. 1,395,859; Nov. 1.
Morton Corporation. (See Meyer, Alfred F., assignor.)
Moseley, James F., Manchester, England. Insecticide. No. 1,395,860; Nov. 1.
Moses, William E., Watertown, assignor to Gray & Davis, Inc., Cambridge, Mass. Ignition apparatus. No. 1,395,590; Nov. 1.
Mott, Lucifer J., New York, N. Y. Engraving-machine. No. 1,395,861; Nov. 1.
Motter, Andrew, Buffalo, N. Y. Scouring device. No. 1,395,652; Nov. 1.
Mottiau, August J. (See Kennedy, W. A., and Mottiau.)
Mount, Lambton L., St. John's Wood, London, England. Glass-melting furnace. No. 1,395,501; Nov. 1.
Mowry, David C., Geneva, Nebr. Road-working machine. No. 1,395,450; Nov. 1.
Mowry, Edward, Sterling, Ill., assignor to International Harvester Company. Caster-wheel. No. 1,395,449; Nov. 1.
Muff, Adam, Buffalo, N. Y. Manufacture of wing-nut blanks. No. 1,395,763; Nov. 1.
Mulbarth, James A., assignor of one-third to H. D. Delkeskamp, St. Louis, Mo. Bath brush and sprayer. No. 1,395,762; Nov. 1.
Mullikin, Levin H., Easton, Md. Braking mechanism for talking-machine motors. No. 1,395,725; Nov. 1.
Mullikin, Levin H., Easton, Md. Brake mechanism for talking-machine motors. No. 1,395,726; Nov. 1.
Murphy, George L., Marion, Calo. Extension swinging stacker. No. 1,395,513; Nov. 1.
Murray, John, London, England. Automatic stack-feed. No. 1,395,962; Nov. 1.
Neil, James. (See Mehl, C. F., Liebler, Neil, and Mobbs.)
National Malleable Castings Company, The. (See Sandley, Arthur J., assignor.)
National Motor Car & Vehicle Corporation. (See Wall, William G., assignor.)
National Ura Bag Co. (See Hirschhorn, Benjamin, assignor.)
Nelson, John F., New York, N. Y. Sponges. No. 1,395,813; Nov. 1.
Nesbit, F. A. (See Brimm, Andrew C., assignor.)
Neuser, Walther, Berlin, assignor to Firm Siemens & Halske Aktiengesellschaft, Berlin-Siemensstadt, Germany. Pressure-measuring instrument. No. 1,395,895; Nov. 1.
Nidermaier, Joseph O., Wor, W. Va. Automobile loading device. No. 1,395,970; Nov. 1.
Noble, Edward J. (See Mehl, C. F., Liebler, Neil, and Nobbe.)
North-German Electricity Syndicate Aktiengesellschaft. (See Seelmann, Emil, assignor.)
North East Electric Company. (See Hallock, Edward A., assignor.)
North East Electric Company. (See Lee, Earle P., assignor.)
Northover, Harry R., Winnipeg, Manitoba, Canada. Machine for filling cartridge-magazines, cartridge-belts, cartridge-clips, and the like. No. 1,395,629; Nov. 1.
Norton, A. O., Inc. (See Germany, Frank L., assignor.)
Oberst, Frank, Glendale, H. E., assignor to Western Phonograph Corporation. Talking-support. No. 1,395,989; Nov. 1.
Ocean Bond Co. (See Rogers, Allen, assignor.)
O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction clutch-operating mechanism. No. 1,395,684; Nov. 1.
O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction clutch-operating mechanism. No. 1,395,683; Nov. 1.
Oldermatt, Clarence W., San Francisco, Calif. Packing-table. No. 1,395,787; Nov. 1.
Odom, Daniel E., Hendersonville, N. C. Overwinding-preventer. No. 1,395,592; Nov. 1.
Oil Well Supply Company. (See Mack, Patrick H., assignor.)
Okell, James H., assignor to Okell Well Machinery Company, Los Angeles, Calif. Pitman construction. No. 1,395,971; Nov. 1.
Okell Well Machinery Company. (See Okell, James H., assignor.)
Ohmannsh, John M., Newark, N. J. Stage. No. 1,395,893; Nov. 1.
O'Leary, Marguerite V. (See O'Leary, William J., assignor.)
O'Leary, William J., assignor to M. V. O'Leary, Montreal, Quebec, Canada. Clutch for motors and the like. No. 1,395,899; Nov. 1.
Orance, Norman A., Pittsburgh, Pa. Barrel-chaf. No. 1,395,728; Nov. 1.
Osterhaus, William C., Chicago, Ill. Universal tapping-machine. No. 1,395,909; Nov. 1.
Osterstrom, Bruno E., Stockholm, Sweden. Brick wall. No. 1,395,764; Nov. 1.
Owen, Ole A., Bradley Beach, N. J. Motion-picture stage illusion. No. 1,395,518; Nov. 1.
Pagelsen, Edward N., Detroit, Mich. Non-slip device for vehicle-wheels. No. 1,395,594; Nov. 1.
Palmer, Charles S., Pittsburgh, Pa. Composition for protective coatings. No. 1,395,661; Nov. 1.
Palmer, Harry E., et al. (See Hansen, William N., assignor.)
Pape, Herman G., New York, N. Y. Bar-appliance mounting. No. 1,395,844; Nov. 1.
Parker, John J., Bridgeport, Conn. Power device for window-operators. No. 1,395,534; Nov. 1.
Parker, John J., Bridgeport, Conn. Power for window-operators. No. 1,395,535; Nov. 1.
Parnall, George G. (See Bolas, Harold, assignor.)
Parnes, Morris, New York, N. Y. Liquid-supplying apparatus. No. 1,395,510; Nov. 1.
Partington, Charles, assignor to The Cincinnati Frog & Switch Company, Cincinnati, Ohio. Switch-stand. No. 1,395,965; Nov. 1.
Patterson, David C., Omaha, Nebr. Core for hollow walls. No. 1,395,452; Nov. 1.
Paulson, Louis, assignor to American Electric Tool Company, Incorporated, Petersburg, Va. Non-arcing commutating switch device. No. 1,395,990; Nov. 1.
Payne, Edgar, et al. (See De Leary, E. H., and Payne.)
Peacock, Robert A. (See Bacon, C. R., and Peacock.)
Pearce, John S., Vancouver, British Columbia, Canada. Process and apparatus for producing charcoal and like materials. No. 1,395,806; Nov. 1.
Pearce, John S., Vancouver, British Columbia, Canada. Wood distillation. No. 1,395,807; Nov. 1.
Peck, Wilbur H., Los Angeles, Calif. Centrifugal concentrator. No. 1,395,517; Nov. 1.
Pedersen, John D., Jackson, Wyo. Firearm. No. 1,395,721; Nov. 1.
Pedersen, John D., Jackson, Wyo. Firearm. No. 1,395,722; Nov. 1.
Peirce, Ralph G., Hinsdale, Ill. Fastening device. No. 1,395,455; Nov. 1.
Perkins, James O., Auburn, N. Y., assignor to Hamad Shoe Machinery Company, Wall-scouring and beveling machine. No. 1,395,764; Nov. 1.
Perry, Alice, administratrix. (See Clay, Anson E.)

Peters, William A., assignor to International Patent Licensing Corporation, Chicago, Ill. Photographic camera. No. 1,395,293; Nov. 1.
Peth, Herman W., Rochester, N. Y. Pressing-iron. No. 1,395,355; Nov. 1.
Petrovics, Fred J. (See Deam, Henry D., assignor.)
Pettersson, Bengt A. (See Blomberg, K. G., and Pettersson.)
Pettit, John H., Great Falls, Mont. Auto-spring oiler. No. 1,395,518; Nov. 1.
Pfefferle, Raymond O., Madelia, Minn. Box or receptacle. No. 1,395,594; Nov. 1.
Pfeiffer, William G., St. Louis, Mo. Mud-hook. No. 1,395,863; Nov. 1.
Phillips, Ellis J. G., assignor to Richards-Wilcox Manufacturing Company, Aurora, Ill. Fire-door. No. 1,395,705; Nov. 1.
Pickard, Arthur G., and F. Slinger, assignors to Thornton-Pickard Manufacturing Company, Limited, Altrincham, Chester, England. Photographic camera. No. 1,395,660; Nov. 1.
Pierce, Raymond T., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Measuring instrument. No. 1,395,294; Nov. 1.
Pierson, Hubert T., Hoquiam, Wash. Guard for drinkspigot. No. 1,395,856; Nov. 1.
Pixley, Edward C., Sullivan, Ohio. Shade-bracket. No. 1,395,970; Nov. 1.
Plateau, Hermann, Hamburg, Germany, assignor to D. R. Rotman, New York, N. Y. Manufacture of articles from proteins. No. 1,395,720; Nov. 1.
Polinkowsky, Lipa, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,395,896; Nov. 1.
Pond, Edmund M., Rutland, Vt. Medicated tampon. No. 1,395,295; Nov. 1.
Pors, George V., Cleveland, Ohio. Means for dispensing ice-cream. No. 1,395,654; Nov. 1.
Pors, George V., Cleveland, Ohio. Means for feeding and cutting ice-cream. No. 1,395,655; Nov. 1.
Possinger, William E., and G. T. Cunningham, Twin, Wash. Signal-control mechanism. No. 1,395,767; Nov. 1.
Potter's Asbestos Company. (See Tillotson, Edward, assignor.)
Pountney, Frank, Birmingham, assignor to Rudge-Whitworth Limited, Coventry, Warwick, England. Means for gaging the diameters of internal annular grooves. No. 1,395,769; Nov. 1.
Powell, James A. (See Earhart, R. N., and Powell.)
Precision Truing Machine and Tool Company, The. (See Connors, Edward R., assignor.)
Prendergast, Harold Y., New York, N. Y. Stylus-bar mounting for sound-boxes. No. 1,395,972; Nov. 1.
Prestwich, Sydney. (See Braley, C. L., and Prestwich.)
Price, William K., Selah, Wash. Fruit-sizing machine. (Reissue.) No. 13,216; Nov. 1.
Prosser, Walter E., Louisville, Ky., and A. E. Higgins, Buffalo, N. Y. Portable steam-generator. No. 1,395,973; Nov. 1.
Putnam, Alden L., Detroit, Mich., assignor, by mesne assignments, to Detroit Pressed Steel Company, Wilmington, Del. Manufacturing disk wheels. No. 1,395,857; Nov. 1.
Pyrene Manufacturing Company. (See MacGregor, Peter G., assignor.)
Pytlak, Stanly, McMechen, W. Va. Wall-papering machine. No. 1,395,519; Nov. 1.
Quill, Charles J., San Francisco, Calif., assignor of one-half to W. M. Filben, St. Paul, Minn. Alternating-current rectifier. No. 1,395,520; Nov. 1.
Quill, Charles J., San Francisco, Calif., assignor of one-half to W. M. Filben, St. Paul, Minn. Alternating-current rectifier. No. 1,395,521; Nov. 1.
Quinn, Elmer, Philadelphia, Pa. Tire-vise. No. 1,395,296; Nov. 1.
Radio Corporation of America. (See Round, Henry J., assignor.)
Radocaj, Paul, et al. (See Libenschek, Rudolf, assignor.)
Randall, Richard H., and A. Leighton, Brockton, Mass. Resilient yoke connection. No. 1,395,971; Nov. 1.
Ranken, Francis, Kingsway, London, England. Bomb. No. 1,395,769; Nov. 1.
Reardon, Fred A., Bridgeport, Conn. Curtain-fixture. No. 1,395,297; Nov. 1.
Rector, Harlan S., Chicago, Ill. Pneumatic tire. No. 1,395,770; Nov. 1.
Redfield, Willis B., Downey, Calif. Shock-absorber. No. 1,395,974; Nov. 1.
Reece Button Hole Machine Company, The. (See Hagelstein, Christian H. T., assignor.)
Regan, Michael C., Washington, D. C. Portable safe. No. 1,395,771; Nov. 1.
Regnoni, Romualdo. (See Frattoli, E., Castelli, and Regnoni.)
Reichenstein, David, Zurich, Switzerland. Rust-preventing process. No. 1,395,740; Nov. 1.
Renton Heel Company. (See Curtis, Richard, assignor.)
Republic Tool Products Company, The. (See Black, Charles F., assignor.)
Respess, John B., Washington, N. C. Rail-fastener. No. 1,395,596; Nov. 1.
Rhodes, Roy J. (See Gillis, J. B., Rhodes, and Lowe.)
Rice, Nathan F., Chicago, Ill. Valve-pad for pneumatic tires. No. 1,395,731; Nov. 1.
Richards-Wilcox Manufacturing Company. (See Phillips, Ellis J. G., assignor.)
Richardson, Edward L., Brooklyn, N. Y. Suspended trousers-protector. No. 1,395,772; Nov. 1.
Richardson, Thomas D., Cheyenne, Wyo. Nail-extractor. No. 1,395,823; Nov. 1.
Richie, David R., Lansdowne, Pa., assignor to S. L. Allen & Co., Inc. Tractive lug. No. 1,395,997; Nov. 1.
Richman, Walter H., Philadelphia, Pa. Container. No. 1,395,596; Nov. 1.
Rigby, George E., Manchester, England. Frame of motor-cycles. No. 1,395,856; Nov. 1.
Riley, James W., Los Angeles, Calif. Sanitary vending-tray for eatables. No. 1,395,975; Nov. 1.
Riley, James W., Los Angeles, Calif. Sanitary food-cover. No. 1,395,976; Nov. 1.
Ripley, Charles T., Chicago, Ill. Apparatus for manufacturing resilient packing or filling material. No. 1,395,299; Nov. 1.
Ritchie, W. C., & Company. (See Milmoe, Michael J., assignor.)
Roadhouse, Robert, Des Plaines, assignor of one-half to T. E. McCaig, Chicago, Ill. Enameling ware. No. 1,395,722; Nov. 1.
Roberts, Albert O., Philadelphia, Pa. Condiment-holder. No. 1,395,507; Nov. 1.
Rockey, Clarence H., Chicago, Ill. Floor-board clamp for automobiles. No. 1,395,850; Nov. 1.
Roessler & Hasslacher Chemical Company, The. (See Liebknecht, Otto, assignor.)
Rogers, Allen, Brooklyn, assignor to Ocean Bond Co., Inc., New York, N. Y. Treating shark-skins and the like. No. 1,395,775; Nov. 1.
Rogers, Erastus W., Durham, N. C. Attachment for stoves. No. 1,395,523; Nov. 1.
Rogers, Erastus W., Durham, N. C. Oven. No. 1,395,524; Nov. 1.
Rogers, James H., Hyattsville, Md. Radiosignaling system. No. 1,395,454; Nov. 1.
Rolup Screen Company. (See Guggenberger, Leopold, assignor.)
Römer, Adolf, Stuttgart, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Tanning. No. 1,395,733; Nov. 1.
Roney, John H. (See Marstellar, Sylvester A., assignor.)
Roos, Charles A. (See Meyer, G. W., and Roos.)
Root, Ralph R., assignor to The Globe Machine & Stamping Company, Cleveland, Ohio. Wheel. No. 1,395,784; Nov. 1.
Rothmeyer, Charles, Aulnay-sous-Bois, France. Leader-magazine frame for photographic cameras. No. 1,395,900; Nov. 1.
Rotman, D. R. (See Plauson, Hermann, assignor.)
Rottman, George, New York, N. Y. Trousers. No. 1,395,361; Nov. 1.
Round, Henry J., London, England, assignor to Radio Corporation of America, New York, N. Y. Wireless signaling apparatus. No. 1,395,967; Nov. 1.
Roy, Edward H., Louisville, Ky. Refrigerator. No. 1,395,598; Nov. 1.
Rubeam, Charles F., Cleveland, Ohio. Vehicle-wheel. No. 1,395,362; Nov. 1.
Rubeam, Charles F., Cleveland, Ohio. Vehicle-wheel. No. 1,395,363; Nov. 1.
Rudge-Whitworth Limited. (See Pountney, Frank, assignor.)
Ryder, David E., Newburgh, N. Y. Corn-cutting device. No. 1,395,928; Nov. 1.
Saal, Henry G. (See Stafford, Frederick S., assignor.)
Sadtler, Samuel S. (See Bassett, H. P., and Sadtler.)
Sagerman, Frederick, Canton, Ohio. Cloak and robe lock. No. 1,395,525; Nov. 1.
Samuel, Barnett & Sons. (See Samuel, Wilfred S., assignor.)
Samuel, Wilfred S., assignor to Barnett, Samuel & Sons, Limited, London, England. Talking-machine. No. 1,395,364; Nov. 1.
Sanders, George W., township 66, Worth county, Mo. Scoop-board and end-gate. No. 1,395,300; Nov. 1.
Sanford, Thomas H., assignor of one-fourth to L. B. Coley, Alexander City, Ala. Brake-shoe. No. 1,395,865; Nov. 1.
Satterstrom, Ferdinand, Hastings, assignor to Magnetic Power Transmitter Company, Faribault, Minn. Electrical actuating means for typewriter type-bars and other devices. No. 1,395,599; Nov. 1.
Satterstrom, Ferdinand, Hastings, assignor to Magnetic Power Transmitter Company, Faribault, Minn. Electrical actuating means for typewriter type-bars and other devices. No. 1,395,600; Nov. 1.
Sawyer, Harry, assignor to Shaw Electric Crane Company, Muskegan, Mich. Hoisting apparatus. No. 1,395,735; Nov. 1.
Sawyer, Walter H., Philadelphia, and A. C. Boyd, Lansdowne, Pa. Check holder and notcher. No. 1,395,736; Nov. 1.
Schaeder, Peter A., Greensburg, Pa. Spark-intensifier. No. 1,395,737; Nov. 1.
Schafer, Edward A., Wheeling, W. Va. Belt and retainer therefor. No. 1,395,526; Nov. 1.
Schafer, John P. (See Wilson, R. H., and Schafer.)
Schärer, Arnold, New York, N. Y. Hair-waver. No. 1,395,774; Nov. 1.
Schechter, Bernard, St. Louis, Mo. Slack-adjuster. No. 1,395,738; Nov. 1.

Schladitzka, Charles L., Fountain City, Wis. Conveyer. No. 1,395,789; Nov. 1.
Schlemmer, Edward O., and H. Schneider, St. Louis, Mo. Shoe-heel. No. 1,395,740; Nov. 1.
Schlutz, Henry, Pittsburgh, assignor of two-fifths to J. L. Knoedler, Optima, Pa. Wrench. No. 1,395,650; Nov. 1.
Schmidt, George A., Chicago, Ill. Pleasure-railway. No. 1,395,657; Nov. 1.
Schmidt, Ludwig, Arth, assignor to M. Artini, Basel, Switzerland. Separating fatty acids from vegetable and animal fats. No. 1,395,905; Nov. 1.
Schmitt, John O. (See Graf, Walter W., assignor.)
Schnedler, Maxwell P. (See Catello, Patrick J., assignor.)
Schneider, Harry. (See Schlemmer, E. O., and Schneider.)
Scholes, Daniel E., assignor to Aermotor Company, Chicago, Ill. Windmill. No. 1,395,601; Nov. 1.
Scholtz, John, Philadelphia, assignor of one-third to S. A. Brosa, Overland, and one-third to G. W. Sunday, Philadelphia, Pa. Gas-engine. No. 1,395,658; Nov. 1.
Schreiber, John H., St. Louis, Mo. Piston-ring. No. 1,395,586; Nov. 1.
Schroder, Hermann, New York, N. Y. Resonance-chamber for sound-reproducing apparatus. No. 1,395,662; Nov. 1.
Scoggan, Richard R., Jeffersonville, Ind., assignor to Kentucky Switch & Signal Co., Inc., St. Matthews, Ky. Automatic electrically-controlled track-switch. No. 1,395,572; Nov. 1.
Scoggan, Richard R., Jeffersonville, Ind., assignor to Kentucky Switch & Signal Co., Inc., St. Matthews, Ky. Trolley-wire contactor. No. 1,395,573; Nov. 1.
Scott, John E., Lynn, Mass., assignor to Hamel Shoe Machinery Company. Machine for turning shoes. No. 1,395,741; Nov. 1.
Scudder, Frederick J. (See Stearn, F. A., and Scudder.)
Searle, Elbert H., Grimes, Calif. Breech-loading firearm. No. 1,395,455; Nov. 1.
Sechrist, Albert, Denver, Colo. Combined pan-handle and pan-support. No. 1,395,901; Nov. 1.
Seese, Samuel R., Vanderbilt, assignor to H. M. Kephart, Connellsville, Pa. Display-case for license-certificates. No. 1,395,999; Nov. 1.
Seigle, William E., New York, N. Y. Brake or clutch band lining. No. 1,395,743; Nov. 1.
Seigle, William E., New York, N. Y. Impregnating porous or bibulous materials and the product thereof. No. 1,395,744; Nov. 1.
Seigle, William E., New York, N. Y. Machine for making pulp tubes. No. 1,395,742; Nov. 1.
Sell, Frank A., Portland, Oreg. Waffle-machine. No. 1,395,930; Nov. 1.
Shafer, Fay E., assignor to Shafer Safety Auto Post Company, St. Louis, Mo. Dirigible headlight. No. 1,395,745; Nov. 1.
Shafer Safety Auto Post Company. (See Shafer, Fay E., assignor.)
Shalkop, Isaac C., Philadelphia, Pa., assignor to The De Luxe Brush Company, Wilmington, Del. Dispensing device. No. 1,395,902; Nov. 1.
Sharp, Lee C., Plattsmouth, Nebr., assignor to Alfa-Maiwi Manufacturing Company, Wilmington, Del. Animal food composition and preparing same. No. 1,395,746; Nov. 1.
Shaw Electric Crane Company. (See Sawyer, Harry, assignor.)
Sheehan, Walter H., Steubenville, and J. W. Eckard, Mingo Junction, Ohio. Latch for doors and the like. No. 1,395,527; Nov. 1.
Sherwood, Howard M., Vandalia, Ohio. Drag-line scoop-bucket. No. 1,395,988; Nov. 1.
Shiek, Daniel W. (See Erickson, A. F., and Shiek.)
Shields, Carl, et al. (See Lawson, Swan J., assignor.)
Short, Edward C., St. Paul, Minn. Storm-window opener and closer. No. 1,395,803; Nov. 1.
Silva, Frank L., Wailuku, Hawaii. Socket-wrench. No. 1,395,528; Nov. 1.
Siemens & Halske Aktiengesellschaft. (See Nernst, Walther, assignor.)
Singer Manufacturing Company, The. (See Hemleb, Martin, assignor.)
Skarl, Henry, Cleveland, Ohio. Piston-packing. No. 1,395,603; Nov. 1.
Skinner, Stephen G., Wilmette, Ill. Windshield-cleaner. No. 1,395,604; Nov. 1.
Slepian, Joseph, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrolytic condenser. No. 1,395,804; Nov. 1.
Slepian, Joseph, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrolytic condenser. No. 1,395,305; Nov. 1.
Slinger, Frank. (See Pickard, A. G., and Slinger.)
Smith, Charles F. and W. H., Brooklyn, N. Y. Electric condenser. No. 1,395,931; Nov. 1.
Smith, Oliver W. et al. (See Blundell, William C., assignor.)
Smith, William A., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Shank and bit punch. No. 1,395,747; Nov. 1.
Smith, William B., Niagara Falls, N. Y., assignor to American Chain Company, Inc. Chain-tightening lever. No. 1,395,606; Nov. 1.
Smith, William H. (See Smith, Charles F. and W. H.)
Snelling, Walter O., Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y. Explosive and manufacturing same. No. 1,395,775; Nov. 1.
Snelling, Walter O., Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y. Treating nucleid organic nitrates and the like. No. 1,395,776; Nov. 1.
Soderstrom, Carl E., Manhagen, Mich. Emery-wheel dresser. No. 1,395,906; Nov. 1.
Sonora Phonograph Corporation. (See Oberst, Frank, assignor.)
Sorenson, Charles E., Dearborn, assignor to Henry Ford & Son Inc., Detroit, Mich. Producing ball-bearing structures. No. 1,395,977; Nov. 1.
Southern Ohio Tin Can Company, The. (See Clark, H. L., and Sower, assignors.)
Spencer, James H. (See Clark, H. L., and Sower.)
Sperry, Herbert R., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Lug for traction-wheels. No. 1,395,967; Nov. 1.
Spohrer, Gregory J., East Orange, N. J. Dispenser for compressed air. No. 1,395,995; Nov. 1.
Stafford, Frederick E., assignor to H. G. Seal, Chicago, Ill. Wheel. No. 1,395,456; Nov. 1.
Standard Oil Company of New York. (See Folant, William S., assignor.)
Stanchfield, Cleo B., Boone, Iowa. Luggage-carrier for automobiles. No. 1,395,451; Nov. 1.
Stanley, Theodore D., assignor to Leland Lock Company, Detroit, Mich. Steering-wheel lock. No. 1,395,606; Nov. 1.
Stanley, Theodore D., assignor to Leland Lock Company, Detroit, Mich. Lock for steering-wheels. No. 1,395,609; Nov. 1.
Stannard, Joseph H., Sr., Columbia, S. C. Boiler-furnace. No. 1,395,610; Nov. 1.
Starling, James E., North Tonawanda, N. Y. Threshing-machine. No. 1,395,611; Nov. 1.
Stauda, Edwin G., Minneapolis, Minn. Gas-engine governor. No. 1,395,963; Nov. 1.
Stearn, Franklin A., Paterson, N. J., and F. J. Scudder, Long Island, assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,395,977; Nov. 1.
Steatite Electric Products Corporation. (See Finisio, Thomas D., assignor.)
Sterling, Wilbur F., and V. H. Grotlisch, Washington, D. C., and F. P. Veitch, College Park, Md. Making varnish materials. No. 1,395,874; Nov. 1.
Stewart-Warner Speedometer Corporation. (See Burton, Charles E., assignor.)
Stewart, William J., Philadelphia, Pa. Landing stage or station for aircraft. No. 1,395,612; Nov. 1.
Stickle, Frederick A., assignor, by mesne assignments, to The Lunken Window Company, Cincinnati, Ohio. Wire-screen-stretching device. No. 1,395,613; Nov. 1.
Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,395,468; Nov. 1.
Stidham, Charles L., Gravois Mills, assignor of one-half to W. Well, Versailles, Mo. Wrench. No. 1,395,983; Nov. 1.
Stock, Robert, Sandusky, Ohio. Pneumatic tire. No. 1,395,614; Nov. 1.
Stock, Robert, Sandusky, Ohio. Vehicle-wheel. No. 1,395,615; Nov. 1.
Stockton, Frank W., Pittsburgh, Pa. Food product. No. 1,395,894; Nov. 1.
Stoddard, Harry A., and F. E. Callahan, Columbus, Ohio; said Stoddard assignor to said Callahan. Vegetable-cutter. No. 1,395,309; Nov. 1.
Storke, John W. (See Wilkins, Thomas M., assignor.)
Stott, William, Bacchaus, England. Stop-motion for doubling-frames. No. 1,395,529; Nov. 1.
Strane, Archibald J., Tamaqua, assignor to Atlas Powder Company, Philadelphia, Pa. Press. No. 1,395,580; Nov. 1.
Strobeneer, Otto, Creighton, Nebr. Air-hose support. No. 1,395,616; Nov. 1.
Stroh, Henry N., Pittsburgh, Pa. Method and apparatus for calibrating measuring-instrument transformers. No. 1,395,906; Nov. 1.
Stuart, Donald R., Harlan, Iowa. Feed-trough. No. 1,395,907; Nov. 1.
Stuart, Orstal, Liverpool, England. Bulkhead-door. No. 1,395,777; Nov. 1.
Stubbs, William, Sheffield, England. Apparatus for twisting metal bars. No. 1,395,617; Nov. 1.
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sunday, Gustave W., et al. (See Scholtz, John, assignor.)
Superior Manufacturing Company. (See Woock, Walter E., H. J., and E. M., assignors.)
Surbeck, F. Baltis, Lewiston, Idaho. Humidifier. No. 1,395,778; Nov. 1.
Sweeney, Howard L., Oakland, Calif. Automatically-actuated oil-burner. No. 1,395,531; Nov. 1.
Sykes, Martin F., Lawrence, Mass. Staging-support. No. 1,395,908; Nov. 1.
Szalay, Joseph, Vicksburg, Miss. Vessel-raising device. No. 1,395,575; Nov. 1.
Taber, Percy E. and S. M., deceased, Berkeley, Calif.; E. Taber, administratrix. Tire-dressing wheel. No. 1,395,909; Nov. 1.
Taber, Rose, administratrix. (See Taber, Percy E. and S. M.)
Taber, Samuel M., deceased. (See Taber, Percy E. and S. M.)

Tate, Peel J., Big Pine, Calif. Plow and pulverizer. No. 1,395,370; Nov. 1.
Taylor, John W., Edwardsville, Kans. Convertible harrow and drag. No. 1,395,459; Nov. 1.
Teich, Alexander O., Chicago, Ill. Oil-burner. No. 1,395,748; Nov. 1.
Theobald, Harry C., Gibson, N. Mex. Foot-operated accelerator for automobiles. No. 1,395,571; Nov. 1.
Thompson, Frank H., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Last-measuring machine. No. 1,395,310; Nov. 1.
Thompson, John T., Newport, Ky., assignor to Auto-Ordnance Corporation, New York, N. Y. Double-barreled gun. No. 1,395,460; Nov. 1.
Thorn, Howard W., assignor to United States Metals Refining Co., Carteret, N. J. Loading and unloading device. No. 1,395,749; Nov. 1.
Thornton-Pickard Manufacturing Company. (See Pickard, A. G., and Slinger, assignors.)
Thresher, Paul B., assignor to William Warnock Company, Sioux City, Iowa. Stock-waterer. No. 1,395,750; Nov. 1.
Thrasher, William N., Savannah, Ga. Brace. No. 1,395,576; Nov. 1.
Tilden, Elbert E., West Concord, Minn. Theft-preventing attachment for steering-wheels. No. 1,395,532; Nov. 1.
Tillotson, Edward, assignor to Potter's Asbestos Company Limited, Rochdale, England. Carding-engine. No. 1,395,577; Nov. 1.
Tillyer, Edgar D., assignor to American Optical Company, Southbridge, Mass. Lens attachment. No. 1,395,311; Nov. 1.
Timken Roller Bearing Company. (See Buckwalter, Tracy V., assignor.)
Tooker, Nathaniel L., Brooklyn, N. Y. Mail-signing book. No. 1,395,372; Nov. 1.
Toscan, James B., Jamestown, N. Y. Gas-stove. No. 1,395,312; Nov. 1.
Trapasso, William, Duluth, Minn. Dumb-bell. No. 1,395,313; Nov. 1.
Trojan Powder Company. (See Snelling, Walter O., assignor.)
Tubbergen, Johannes H., Afton, Calif. Auto warning-signal. No. 1,395,461; Nov. 1.
Turbayne, William A., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Electric regulator. No. 1,395,779; Nov. 1.
Turt, Gustav, Meiningen, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Machine for producing small strips of fibrous material. No. 1,395,751; Nov. 1.
Turney, George W., Rome, N. Y. Radiator-tube and producing same. No. 1,395,618; Nov. 1.
Tuttle, Orley C., Old Forge, N. Y. Fish-bait. No. 1,395,533; Nov. 1.
Tvedt, Thomas T., City Island, N. Y. Adjustable tiller. No. 1,395,534; Nov. 1.
U. S. Light & Heat Corporation. (See Louden, Warren P., assignor.)
U. S. Light & Heat Corporation. (See Turbayne, William A., assignor.)
U. S. Slicing Machine Company. (See Van Berkle, Cornelis F. M., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Stickney, Burnham C., assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Glass, Perley E., assignor.)
United Shoe Machinery Corporation. (See Loomer, Henry M., assignor.)
United Shoe Machinery Corporation. (See Thompson, Frank H., assignor.)
United States Hoffman Machinery Company. (See Chase, Herschel E., assignor.)
United States Metals Refining Co. (See Thorn, Howard W., assignor.)
Upton, Henry J., West Medford, assignor to Vaughn Upton Company, Boston, Mass. Fountain-pen. No. 1,395,878; Nov. 1.
Vacuum Carburetor Company, The. (See En Earl, William J., assignor.)
Van Berkel, Cornelis F. M., assignor to U. S. Slicing Machine Company, Laporte, Ind. Holder for slicing-machines. No. 1,395,980; Nov. 1.
Vandertip, Louis C., Hibbart, Ind. Vehicle steering mechanism. No. 1,395,314; Nov. 1.
Vassallo, Anthony, Newark, N. J., assignor, by mesne assignments, to The Harriman National Bank of the City of New York, trustee. Automatic release and brake mechanism for talking-machines. No. 1,395,752; Nov. 1.
Vaughn-Upton Company. (See Upton, Henry J., assignor.)
Veitch, Fletcher P. (See Sterling, W. F., Grotlisch, and Veitch.)
Voight, Henry G., New Haven, Conn. Luggage-carrier. No. 1,395,315; Nov. 1.
Wahl Company, The. (See Wahl, John C., assignor.)
Wahl, John C., Chicago, Ill., assignor to The Wahl Company, Wilmington, Del. Chasing-machine. No. 1,395,316; Nov. 1.
Walter, Frank L., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Forming-machine. No. 1,395,535; Nov. 1.
Walker, Frank J., Wichita, Kans. Shoe-heel. No. 1,395,535; Nov. 1.
Walker, George E., Prestwich, S. H. Walker, Southport, and F. Hewitt, Radcliffe, England. Machine for the production of metal tags such as used on laces. No. 1,395,536; Nov. 1.
Walker, George L., New York, N. Y., assignor to Air Reduction Company, Inc. Combination-blowpipe. No. 1,395,537; Nov. 1.
Walker, Samuel H. (See Walker, George E. and S. H., and Hewitt.)
Wall, William G., assignor to National Motor Car & Vehicle Corporation, Indianapolis, Ind. Body construction. No. 1,395,538; Nov. 1.
Wallace, Tirsah, Topeka, Kans. Mattress. No. 1,395,879; Nov. 1.
Walsh, Antanas, Shelton, Conn. Door-adjuster. No. 1,395,539; Nov. 1.
Wanders, Hans H., Brookline, Mass. Milling-machine. No. 1,395,573; Nov. 1.

Yellow-Fluid Chemical Co., The, Charleston, S. C. Insect-exterminator, disinfectant, and deodorizer. No. 149,790; Nov. 1.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 1ST DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Absorption-tank. T. Wight. No. 1,395,463; Nov. 1.
Acid, Manufacture of picric. D. B. Macdonald. No. 1,396,001; Nov. 1.
Adding-machine. M. F. Gascon. No. 1,395,991; Nov. 1.
Adjustable clamp. F. and G. Lantieri. No. 1,395,839; Nov. 1.
Adjustable pulley. F. A. West. No. 1,395,884; Nov. 1.
Aeroplane-control system. A. Black. No. 1,395,254; Nov. 1.
Aeroplane propulsion means. M. H. Anderson. No. 1,395,896; Nov. 1.
Aeroplanes, Parachute for use with. F. C. Mears. No. 1,395,724; Nov. 1.
Agitator. W. A. Butchart. No. 1,395,480; Nov. 1.
Agricultural implement. W. B. and W. J. Aton. No. 1,395,329; Nov. 1.
Air, Dispenser for compressed. G. J. Spehrer. No. 1,395,368; Nov. 1.
Air-hose support. O. Stroberger. No. 1,395,616; Nov. 1.
Air in rooms and chambers of any kind, Arrangement for changing and heating. P. Barducci. No. 1,395,938; Nov. 1.
Air, Machine for carbureting. M. S. Levé. No. 1,395,505; Nov. 1.
Aircraft. J. Bauer. No. 1,395,249; Nov. 1.
Aircraft, Landing stage or station for. W. J. Stewart. No. 1,395,612; Nov. 1.
Aircraft, Means for folding the planes of. H. Bolas. No. 1,395,628; Nov. 1.
Airplane. J. G. Yonkese. No. 1,395,603; Nov. 1.
Amusement device. J. J. Cullinan. No. 1,395,261; Nov. 1.
Amusement device. E. N. Hennegan. No. 1,395,674; Nov. 1.
Animal-trap. J. Kasprzyk. No. 1,395,680; Nov. 1.
Arch and brick therefor, Perforated. A. H. Willett. No. 1,395,542; Nov. 1.
Armchair and bed. C. B. Baird. No. 1,395,465; Nov. 1.
Artichoke-trimmer. R. W. Cline. No. 1,395,481; Nov. 1.
Atomizing and spraying device. E. J. McLean and S. W. McGavran. No. 1,395,965; Nov. 1.
Auto-spring oiler. J. H. Pettit. No. 1,395,515; Nov. 1.
Auto warning-signal. J. H. Tubbergen. No. 1,395,461; Nov. 1.
Automobile-body. J. Zygman. No. 1,395,544; Nov. 1.
Automobile-buffer. J. F. Martin. No. 1,395,925; Nov. 1.
Automobile-doors, Latch mechanism for. E. G. Budd. No. 1,395,477; Nov. 1.
Automobile-hotel. L. L. Moe. No. 1,395,969; Nov. 1.
Automobile-lights, Dimming mechanism for. A. N. Coulson. No. 1,395,907; Nov. 1.
Automobile-lock. B. B. Clayton. No. 1,395,906; Nov. 1.
Automobile-lock. H. B. Penner. No. 1,395,337; Nov 1.
Automobile-locking apparatus. A. L. F. Wattel. No. 1,395,861; Nov. 1.
Automobile-locking device. J. O. Nidermaier. No. 1,395,970; Nov. 1.
Automobile-wheel lock. H. Kramer. No. 1,395,430; Nov. 1.
Automobiles, Alarm for. D. B. Hershey. No. 1,395,276; Nov. 1.
Automobiles, Floor-board clamp for. C. H. Rockey. No. 1,395,359; Nov. 1.
Automobiles, Foot-operated accelerator for. H. C. Theobold. No. 1,395,371; Nov. 1.
Automobiles, Pedal for operating accelerators of. A. A. Williams. No. 1,395,781; Nov. 1.
Axle and hub, Emergency rear wheel. G. E. Lutsey. No. 1,395,921; Nov. 1.
Bait, Fish-. O. C. Tuttle. No. 1,395,533; Nov. 1.
Balancing signaling systems. W. H. Martin. No. 1,395,854; Nov. 1.
Bale-fork. H. A. Waterman. No. 1,395,602; Nov. 1.
Bale-tie machine. G. W. Whittington. No. 1,395,319; Nov. 1.
Ball-deburring machine. R. H. Bannell. No. 1,395,789; Nov. 1.
Ball-marking device, Golf-. A. G. Hupfel. No. 1,395,413; Nov. 1.
Barrel-cleat. N. A. Ormes. No. 1,395,728; Nov. 1.
Bars, Method of and machine for straightening. G. A. Keenan. No. 1,395,661; Nov. 1.
Bathroom-fixtures, Crimped joint for. W. R. Grierson. No. 1,395,707; Nov. 1.
Battery: *See*—
Storage battery.
Battery-cell, Dry. H. M. Koretsky. Nos. 1,395,281-2; Nov. 1.
Bearing. G. E. Andre. No. 1,395,244; Nov. 1.
Bearing-cages. T. V. Buckwalter. No. 1,395,385; Nov. 1.
Bearing-sleeve puller, Roller-. J. Kray. No. 1,395,502; Nov. 1.
Bearing structures, Producing ball-. C. E. Sorensen. No. 1,395,607; Nov. 1.
Bed, Heated. R. Fureatzi. No. 1,395,912; Nov. 1.
Binding, straightening and cement-applying mechanism, French-. P. B. Glass. No. 1,395,270; Nov. 1.
Binding-tip. S. I. Fekete. No. 1,395,403; Nov. 1.
Blanks, Manufacture of wing-nut. A. Muff. No. 1,395,762; Nov. 1.
Block: *See*—
Building-block. Heel-filler block.
Blowpipe, Combination-. G. L. Walker. No. 1,395,587; Nov. 1.
Boat. C. J. Baer. No. 1,395,689; Nov. 1.
Bodies, Making horny. A. Kohner. No. 1,395,634; Nov. 1.
Body construction. W. G. Well. No. 1,395,538; Nov. 1.
Boiler-furnace. J. H. Stannard, Sr. No. 1,395,610; Nov. 1.
Boilers, Low-water signal for steam-. W. C. Blundell. No. 1,395,550; Nov. 1.
Boll-weevils, Insecticide for. P. Koenig. No. 1,395,910; Nov. 1.
Bolster or pillow-roll support. N. F. Mensure. No. 1,395,506; Nov. 1.
Bolt and retainer therefor. E. A. Schafer. No. 1,395,526; Nov. 1.
Bomb. F. Ranken. No. 1,395,769; Nov. 1.
Bottle-capping tool. M. Kasson. No. 1,395,490; Nov. 1.
Boot, Horse-. J. H. McKenzie. No. 1,395,689; Nov. 1.
Boots, shoes &c., by hand, Adjustable last for use in making and repairing. F. Johnson. No. 1,395,578; Nov. 1.
Box: *See*—
Water-meter box.
Box-making machine. M. J. Milmoe. No. 1,395,446; Nov. 1.
Box or receptacle. R. O. Pfefferle. No. 1,395,584; Nov. 1.
Boxes, Lubricating device for stuffing-. C. J. A. Gottlieb. No. 1,395,815; Nov. 1.
Brace. W. N. Tiencken. No. 1,395,876; Nov. 1.
Bracket: *See*—
Shade-bracket.
Brake-bands, Detachable lining for. J. W. Edell. No. 1,395,670; Nov. 1.
Brake-operating mechanism. C. A. Ward. No. 1,395,540; Nov. 1.
Brake or clutch band lining. W. R. Seigle. No. 1,395,743; Nov. 1.
Brake-shoe. T. H. Sanford. No. 1,395,365; Nov. 1.
Brick and wall construction. S. A. Marsteller. No. 1,395,507; Nov. 1.
Bricks, Manufacture of. W. W. Crawford. No. 1,395,980; Nov. 1.
Brush and sprayer, Bath. J. H. Mulherin. No. 1,395,763; Nov. 1.
Brush-holder. A. T. Lochner. No. 1,395,440; Nov. 1.
Brush, Scrubbing-. J. F. Holland. No. 1,395,495; Nov. 1.
Buckle, Belt-. E. N. Humphrey. No. 1,395,718; Nov. 1.
Building-block. V. E. Easterday. No. 1,395,682; Nov. 1.
Bumper. W. G. Cox. No. 1,395,908; Nov. 1.
Burner: *See*—
Liquid-fuel burner. Oil-burner.
Burners, Gas-saving attachment for. A. Ackron. No. 1,395,979; Nov. 1.
Burnishing-machine. H. M. Loomer. No. 1,395,285; Nov. 1.
Cabinet, Clothes-drying. P. J. Catello. No. 1,395,797; Nov. 1.
Cabinet, Delivery-. T. A. Matthews. No. 1,395,857; Nov. 1.
Cable-reciprocating apparatus. H. McLaren. No. 1,395,850; Nov. 1.
Cableway-operating engine. G. Frink. No. 1,395,673; Nov. 1.
Calculating-machine. F. E. Guy. No. 1,395,983; Nov. 1.
Cam-shaft remover. J. McLachlan. No. 1,395,567; Nov. 1.
Camera, Photographic W. A. Peters. No. 1,395,293; Nov. 1.
Cameras, Loader-magazine frame for photographic. C. Rothmeyer. No. 1,395,860; Nov. 1.
Cameras, Photographic. A. G. Pickard and F. Slinger. No. 1,395,869; Nov. 1.
Car and locomotive replacing frogs, Holder for. D. E. Keith. No. 1,395,582; Nov. 1.
Car-door opener. D. W. Millsaps. No. 1,395,927; Nov. 1.
Car-step. J. R. Mitchell. No. 1,395,589; Nov. 1.

Car-ventilating system. P. B. Bogart. No. 1,395,383; Nov. 1.
Cars, Foldable seat for passenger. J. S. McWharten. No. 1,395,757; Nov. 1.
Cars, Oil-gage for motor-. L. E. Kitchen. No. 1,395,682; Nov. 1.
Carbureter. L. F. Burger. No. 1,395,387; Nov. 1.
Carbureter, Vacuum-. W. J. En Earl. No. 1,395,950; Nov. 1.
Carding-engine. E. Tillotson. No. 1,395,877; Nov. 1.
Carrier: *See*—
Luggage-carrier.
Cartridge, Tea-. B. Hirschhorn. No. 1,395,642; Nov. 1.
Cartridge-magazines, cartridge-belts, strip-chargers, &c., Machine for filling. H. R. Northover. No. 1,395,928; Nov. 1.
Caster, Top-bearing. D. B. Dies. No. 1,395,464; Nov. 1.
Caster-wheel. C. H. Clark. No. 1,395,257; Nov. 1.
Caster-wheel. E. Mawry. No. 1,395,449; Nov. 1.
Cellulose acetate, Manufacture of solutions, preparations, or compositions having a basis of. H. Dreyfus. No. 1,395,401; Nov. 1.
Cellulose ether composition. H. T. Clarke. No. 1,395,905; Nov. 1.
Cementitious blocks, Method and apparatus for casting. G. Atterbury. No. 1,395,662; Nov. 1.
Cereal food and preparing same. M. R. Kelly. No. 1,395,831; Nov. 1.
Chain. R. M. Lanahan. No. 1,395,283; Nov. 1.
Chain-fastener. S. D. Bellows. No. 1,395,896; Nov. 1.
Chain-link connector. H. T. Hughes. No. 1,395,415; Nov. 1.
Chain-tightening lever. W. B. Smith. No. 1,395,605; Nov. 1.
Charcoal, &c., Process and apparatus for producing. J. S. Pearce. No. 1,395,866; Nov. 1.
Chart, Territorial business-. G. M. Ludlow. No. 1,395,848; Nov. 1.
Chasing-machine. J. C. Wahl. No. 1,395,811; Nov. 1.
Check holder and notcher. W. H. Sawyer and A. C. Boyd. No. 1,395,736; Nov. 1.
Check-protecting method. A. F. Bradshaw. No. 1,395,943; Nov. 1.
Chemical apparatus. R. V. Heuser. No. 1,395,661; Nov. 1.
Chiropractic table. J. H. Lage. No. 1,395,646; Nov. 1.
Cigar and cigarette holder. F. P. Williams. No. 1,395,320; Nov. 1.
Cigar-bands, Making. H. Leiman. No. 1,395,842; Nov. 1.
Cigar-lighter for steering-wheels. E. H. Ansbelm. No. 1,395,548; Nov. 1.
Cigar-package. M. Bayuk. No. 1,395,467; Nov. 1.
Circuit-breaker. C. Aalborg. No. 1,395,227; Nov. 1.
Circuit-breaker. J. B. MacNeill. No. 1,395,848; Nov. 1.
Clamp: *See*—
Adjustable clamp. Planking-clamp.
Clamping device. P. A. Hoffman. No. 1,395,535; Nov. 1.
Cleaner: *See*—
Cotton-cleaner. Windshield-cleaner.
Clip: *See*—
Paper-clip.
Cloak and robe lock. F. Sagerman. No. 1,395,525; Nov. 1.
Cloth-holder. C. Englehardt. No. 1,395,635; Nov. 1.
Clothes-washer, Bucket. J. A. Wright. No. 1,395,768; Nov. 1.
Clothespin. T. S. Justus. No. 1,395,424; Nov. 1.
Clutch and brake mechanism. A. J. Lavoie. Nos. 1,395,840–1; Nov. 1.
Clutch for motors. W. J. O'Leary. No. 1,395,269; Nov. 1.
Coatings, Composition for protective. C. E. Palmer. No. 1,395,461; Nov. 1.
Cock, Automatic cylinder-. J. J. Carmichael. No. 1,395,796; Nov. 1.
Cofferdam. H. D. Deam. No. 1,395,631; Nov. 1.
Collars, Retainer for ladies' cape-. M. de la R. Mariquas. No. 1,395,504; Nov. 1.
Commutator-brush-reseating tool. D. W. Ward. No. 1,395,880; Nov. 1.
Concentrator, Centrifugal. W. H. Peck. No. 1,395,517; Nov. 1.
Condenser. J. A. Bishop. No. 1,395,886; Nov. 1.
Condiment-holder. A. O. Roberts. No. 1,395,597; Nov. 1.
Conical straining device. G. W. Ferdon. No. 1,395,951; Nov. 1.
Connection, Crosshead and piston-rod. C. J. A. Gottlieb. No. 1,395,514; Nov. 1.
Container, W. H. Richman. No. 1,395,298; Nov. 1.
Control system. P. L. Mardis. No. 1,395,949; Nov. 1.
Conveyer. C. L. Schladinska. No. 1,395,739; Nov. 1.
Cooking utensils and receptacles, Lid-holder for. W. W. Brown. No. 1,395,554; Nov. 1.
Copper, Hydrometallurgy of. G. A. Bragg. No. 1,395,755; Nov. 1.
Cork-feeding device. T. Allatt. No. 1,395,248; Nov. 1.
Corn-cutting device. D. M. Ryder. No. 1,395,920; Nov. 1.
Cotton cleaner, Seed-. C. C. Biggerstaff. No. 1,395,982; Nov. 1.
Cotton fabrics, Improving. G. A. Bosshard. No. 1,395,472; Nov. 1.
Coupling: *See*—
Truck-coupling.
Coupling-operating mechanism. A. J. Baseley. Nos. 1,395,250–1; Nov. 1.
Culverts, Joints for metal. G. A. Belding. No. 1,395,253; Nov. 1.
Cup: *See*—
Grease-cup.
Current rectifier, Alternating-. C. J. Quill. Nos. 1,395,320–1; Nov. 1.
Curtain-fixture. P. A. Stoddard. No. 1,395,297; Nov. 1.
Cutter: *See*—
Ensilage-cutter. Vegetable-cutter.
Feed-cutter.
Cylinder-reamer. N. Anderson. No. 1,395,245; Nov. 1.
Damper. J. Alafasser. No. 1,395,784; Nov. 1.
Damper, controller, Automatic furnace-. E. J. Henry. No. 1,395,709; Nov. 1.
Damper, Stack-. A. Cotton. No. 1,395,395; Nov. 1.
Dehydrating apparatus. L. S. Crone. No. 1,395,268; Nov. 1.
Dental expansion-arch. W. A. McCarter. No. 1,395,922; Nov. 1.
Desk, Sliding-top. L. S. Crone. No. 1,395,558; Nov. 1.
Diagnostic instrument. H. L. De Zeng. No. 1,395,264; Nov. 1.
Dial-lock. R. C. Lewis. Nos. 1,395,844–5; Nov. 1.
Die: *See*—
Thread-cutting die.
Direction-indicator. W. M. Leedom. No. 1,395,645; Nov. 1.
Dish-washing machine. L. C. and E. G. Wood. No. 1,395,324; Nov. 1.
Dispensing apparatus. D. G. Frazier. No. 1,395,467; Nov. 1.
Dispensing device. A. E. Carlson. No. 1,395,795; Nov. 1.
Dispensing device. I. C. Shaltop. No. 1,395,302; Nov. 1.
Display apparatus. C. E. Dellenbarger. No. 1,395,397; Nov. 1.
Display-easel. A. Josephson. No. 1,395,561; Nov. 1.

Pipes, Briar. Simon, Vuillard & Strauss. No. 141,132; Nov. 1.
Poison, Rodent-. H. T. Garner. No. 150,526; Nov. 1.
Portières, silk drapery-cloths, and curtains, Summer. J. Derk. No. 137,568; Nov. 1.
Poultry, Dressed. Missouri Egg & Poultry Company. No. 143,871; Nov. 1.
Poultry, Live and dressed. W. Lukert. No. 147,030; Nov. 1.
Powder and wrinkle-cream, Face-. Usit Manufacturing Company of America. No. 133,031; Nov. 1.
Powder, Liquid face-. J. G. Brown. No. 149,877; Nov. 1.
Powder, Toilet, (face.) Marie Djang-lure Co. No. 150,873; Nov. 1.
Preparation for venereal diseases. Lenzewerke, A. G. No. 141,217; Nov. 1.
Razor-strops. Illinois Razor Strop Company. Nos. 149,694-5; Nov. 1.
Remedy against gall-stones, liver complaint, &c. I. Deiglmayr. No. 141,717; Nov. 1.
Remedy for hemorrhoids. J. Varga. No. 142,833; Nov. 1.
Remedy for tuberculosis. E. E. Moore. No. 146,644; Nov. 1.
Remedy, Stomach. Barney Bennett Co. No. 151,144; Nov. 1.
Rodents, Mixture for destruction of. C. G. Woods, Jr. No. 151,073; Nov. 1.
Root-beer. J. M. Eckenrode. No. 138,162; Nov. 1.
Rubber toys. J. J. Franklin and Sons. No. 142,140; Nov. 1.
Rugs. W. M. Ferguson. No. 151,790; Nov. 1.
Salt, Mineral and medical. Spa Baths Co. No. 149,780; Nov. 1.
Salts, Laxative. Pioneer Biochemic Products Co. No. 136,642; Nov. 1.
Salve. A. Baron. No. 149,795; Nov. 1.
Salve for eczema, &c. Polar Salve Company. No. 149,615; Nov. 1.
Seasonings, soups, consomm4, sauces, &c. Maggi Co. No. 146,975; Nov. 1.
Shoe and leather dressing. Whittemore Brothers Corporation. No. 144,368; Nov. 1.
Shoe-patterns. Wiechman Pattern Company. No. 147,072; Nov. 1.
Silk, linen, woolen, and cotton, &c., piece goods. Haas Brothers Fabrics Corporation. No. 152,256; Nov. 1.
Silks, ribbons, velvets, and cotton goods in the piece. Wyle-Heinzerling Co. No. 151,998; Nov. 1.
Silver-plated flat and hollow ware. Simeon L. & George H. Rogers Company. No. 141,594; Nov. 1.
Soap. Bauer & Black. No. 151,748; Nov. 1.
Soap. Fitzpatrick Bros. No. 151,666; Nov. 1.
Soap. J. S. Kirk & Company. No. 151,799; Nov. 1.
Soap, Laundry. C. T. Perry & Company. No. 151,097; Nov. 1.
Soap, Toilet. A. Schwab. No. 151,564; Nov. 1.
Soda-ash and caustic soda. Diamond Alkali Company. No. 130,906; Nov. 1.
Sodas, sarsaparilla, and sparkling water, Orange, cherry, and grape. Schoenhofen Company. No. 152,045; Nov. 1.
Solution for treatment of diseases of teeth, throat, and mouth. J. M. Stewart. No. 149,824; Nov. 1.
Spark-plugs. Wisconsin Iron Store, Inc. No. 143,799; Nov. 1.
Spark-plugs, receiving-tuners, &c. Precision Equipment Co. No. 114,748; Nov. 1.
Spraying systems for purifying the air of buildings. A. B. Neeb. No. 146,455; Nov. 1.
Storage batteries. Western Battery & Supply Company. No. 150,048; Nov. 1.
Storage battery boxes, tops and screw-caps for same, Electric. Rub-Tex Products, Inc. No. 150,029; Nov. 1.
Surgical or sanitary bandage. Sphagnum Products Company. No. 139,872; Nov. 1.
Syrup for making non-alcoholic beverages. Standard Bottling and Extract Co. No. 142,816; Nov. 1.
Syrup, Malt-. Clinton Malt Product Co. No. 139,249; Nov. 1.
Syrup, Malt. Gerhard Lang Brewery. No. 152,304; Nov. 1.
Syrup, Malt-. Fred Miller Brewing Company. No. 152,022; Nov. 1.
Taffy and chocolate marshmallows, Peanut and other. G. H. Hammerbacher. No. 145,299; Nov. 1.
Tea and coffee. J. A. Folger & Co. No. 150,664; Nov. 1.
Tobacco products, Mouthpiece-holders for. C. P. Rhodes. No. 141,041; Nov. 1.
Toilet preparations. Madame C. J. Walker, Inc. No. 139,727; Nov. 1.
Toilet water, skin-lotions, face-creams, vanishing creams, hair-dressing. Bailey Co. No. 149,121; Nov. 1.
Tonic, Food. P. Franck. No. 149,744; Nov. 1.
Tonic, General. C. Becchietta. No. 146,894; Nov. 1.
Toothbrushes. Samstag & Hilder Bros. No. 128,844; Nov. 1.
Toys, Mentgomery-Winston. No. 145,251; Nov. 1.
Toys in package-containers. Happiwork. No. 150,530; Nov. 1.

Anderson, Hjalmar, Chicago, Ill. Wire-twisting device. No. 1,396,013; Nov. 8.

Anderson, William, Hamburgh, Scotland. Trusting coulter and the like. No. 1,396,098; Nov. 8.

Andrews, Roger W., assignor to Northern Engineering Company, Erie, Pa. Water-flow device. No. 1,396,269; Nov. 8.

Anthony, Alfred T., Detroit, Mich. Shut-off burner. No. 1,396,068; Nov. 8.

Anthony, Arthur H., and C. T. Rossiter, assignors to The Massillon Steel Castings Company, Massillon, Ohio. Wheel construction. No. 1,396,069; Nov. 8.

Apple, Vincent G., Dayton, Ohio. Sighting and lighting apparatus. No. 1,396,041; Nov. 8.

Armpriester, Robert L., Philadelphia, Pa. Walking toy. No. 1,396,007; Nov. 8.

Asepto Service Company. (See Rees, Warren C., assignor.)

Ashton, Hannah, executrix. (See Ashton, Orrell.)

Ashton, Orrell, deceased. Instrument by H. Ashton, executrix, Wollaston, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Pulling-over machine. No. 1,396,096; Nov. 8.

Associated Engineers Company. (See Buckley, Harry H., assignor.)

Astell, James W., Chicago, Ill. Expanding design. No. 1,396,393; Nov. 8.

Auburn Deer Hanger and Specialty Company. (See Foshee, E., and Van Dorenes, assignors.)

Autographic Register Company. (See Snow, W. C., and Dilks, assignors.)

Automatic Gas Power Company. (See Vaughn, Fred S., assignor.)

Avis, Robert R. (See Chaix, J. P., and Avis.)

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Treating distillery waste. No. 1,396,007; Nov. 8.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Producing organic acids. No. 1,396,008; Nov. 8.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Method of producing organic acids. No. 1,396,009; Nov. 8.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Method of producing organic acids. No. 1,396,010; Nov. 8.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Apparatus for evaporation. No. 1,396,238; Nov. 8.

Backhaus, Arthur A., and C. Haner, Jr., Baltimore, Md., assignors to U. S. Industrial Alcohol Co. Treating distillery waste. No. 1,396,006; Nov. 8.

Backstrom, Helge M., et al. (See Cederberg, Ivar W., assignor.)

Bagshaw, Henry C., Bedford Park, London, assignor to S. F. Burrows and H. L. P. Alexander, London, England. Composition for and the production of waterproof cements, concretes, and mortars. No. 1,396,546; Nov. 8.

Badger Manufacturing Composition. (See Hathaway, Charles H., assignor.)

Baewskin, Abraham J., Chicago, Ill. Composition. No. 1,396,486; Nov. 8.

Bagnell, Christopher C., Duluth, Minn. Electric signal-switch. No. 1,396,600; Nov. 8.

Baker, Newton D., Secretary of War, United States of America, trustee. (See Holmes, Bradford E., assignor.)

Bakeman, Abraham M., New York, N. Y. Show-cart. No. 1,396,550; Nov. 8.

Bakstad, Johan R., assignor to Hobbs & Wells, Inc., Chicago, Ill. Electric heater. No. 1,396,244; Nov. 8.

Barber, Franklin L., assignor to Standard Car Truck Company, Chicago, Ill. Roller side bearing. No. 1,396,094; Nov. 8.

Barbre Electric Specialty Company, The. (See Cutman, Samuel M., assignor.)

Barbier, Christian E., Chicago, Ill. Window-lock. No. 1,396,490; Nov. 8.

Barclay, Stokes, and F. W. Pasthill, Baltimore, Md. Starter for internal-combustion engines. No. 1,396,497; Nov. 8.

Barrett, Michael J., Brooklyn, N. Y. Automatic valve. No. 1,396,394; Nov. 8.

Barsaloux, Odille St., St. Paul, Minn. Sanitary appliance for closet-seats. No. 1,396,547; Nov. 8.

Bartlett, Ernest C., and J. E. Allison, Houston, Tex. Electrical testing-gage. No. 1,396,155; Nov. 8.

Bartlett, George H., Buffalo, Wyo. Bracket-support. No. 1,396,548; Nov. 8.

Barwood, Leonard, assignor to Reliance Machine & Specialty Co., Boston, Mass. Bearing-filling machine. No. 1,396,089; Nov. 8.

Bartlett, Leonard, assignor to Reliance Machine & Specialty Co., Boston, Mass. Punch-filler for bearings. No. 1,396,090; Nov. 8.

Barwick, James W., Pleasant, Ga. Automobile-lock. No. 1,396,091; Nov. 8.

Bassin, William H., Bowen, Ga. Tool for demountable rims. No. 1,396,617; Nov. 8.

Bauley, Harvey V., Jersey City, N. J. Safety-clasp. No. 1,396,311; Nov. 8.

Bastian Bros. Co. (See Mitchel, Charles F., assignor.)

Beach, Clarence E., Binghamton, N. Y. Controlling system for storage batteries. No. 1,396,642; Nov. 8.

Beatty, William M., Pittsburgh, Pa. Vehicle-spring. No. 1,396,749; Nov. 8.

Beaver, Milton S., Reading, Pa. Lock. No. 1,396,550; Nov. 8.

Beck, Arthur A., Bemidji, Minn. Attachment for pencils. No. 1,396,235; Nov. 8.

Beckwith, Leslie I., Boston, Mass. Hammock-support. No. 1,396,408; Nov. 8.

Beehler, Elmer G., Yuma, Colo. Automatic boat unit. No. 1,396,212; Nov. 8.

Beerbaum, Henry A., Milwaukee, Wis. Game apparatus. No. 1,396,290; Nov. 8.

Behs, Guido G., assignor to Essex Motors, Detroit, Mich. Vehicle-fender mounting. No. 1,396,351; Nov. 8.

Belknap, Wilber C., assignor to E. T. Miller, Inc., New York, N. Y. Rubber boot, shoe, galosh, sandal, &c. No. 1,396,513; Nov. 8.

Bell, Charles E., assignor of one-half to S. Hale Beaumont, W. Va. Check-holder. No. 1,396,499; Nov. 8.

Belott, Harry, Los Angeles, Calif. Deep-all-waif pocket. No. 1,396,241; Nov. 1.

Bennett, Hiram C., Rockford, Ill. Drawer. No. 1,396,500; Nov. 8.

Bennett, Arthur, Hollinwood, England. Machine for spinning and piecing up cotton, linen, or similar threads. No. 1,396,615; Nov. 8.

Bennett, Harry F. (See Wright, J. G., and Bennett.)

Berg, Joseph, Little Rock, Ark. Lifting-jack. No. 1,396,514; Nov. 8.

Bertenwerfer, August, Bladen, Nebr. Self-feeder for beehives, sliderframe, and cutters. No. 1,396,615; Nov. 8.

Berry, Frederick R., Hayes, England. Electrical transformer for regulating or varying the voltage of the current supplied therefrom. No. 1,396,521; Nov. 8.

Betchhaw, James F., Berlin, Wis., assignor to The Frey Switch & Manufacturing Company, Carlisle, Pa. Rock-crusher. No. 1,396,616; Nov. 8.

Bethlehem Steel Company. (See Lachman, Maurice, assignor.)

Bigge, Joseph F., Richmond, Va. Combination record rack and closer for cabinets. No. 1,396,156; Nov. 8.

Binns, Arthur E., Mansfield, Mass. Shower pipe. No. 1,396,462; Nov. 8.

Birch, Sydney, Mansfield, Mass. Sheet-guiding mechanism. No. 1,396,157; Nov. 8.

Bleede, Victor G., Catonsville, Md. Manufacture of vegetable glue. No. 1,396,515; Nov. 8.

Bloomfield, Henry E., assignor to Liquid Cleaning Stimulant Co. Inc., New York, N. Y. Filtering and cleansing composition. No. 1,396,244; Nov. 8.

Boettcher, Carl F., Henry, Nebr. Display-sign. No. 1,396,945; Nov. 8.

Boettcher, Abraham H., Hampton, N. J. Evaporator-heating-unit-removing attachment. No. 1,396,516; Nov. 8.

Bohn, Frank J., Baltimore, Md. Safety device. No. 1,396,617; Nov. 8.

Bonham, Guy L., West Hartford, Conn. Automobile-jack. No. 1,396,319; Nov. 8.

Bonner, William T., Trenton, N. J., assignor of one-half to M. Brown and one-half to M. Brown, trustee, Boston, Mass. Mold. No. 1,396,158; Nov. 8.

Boorum and Pease Company. (See Jackson, Mark P., assignor.)

Borst, Warren R., West Brighton, Staten Island, N. Y. Sewage treatment. No. 1,396,297; Nov. 8.

Bosley, D. W., Co., The. (See Wright, John G., assignor.)

Bosse, Pierre, Neuilly-sur-Seine, assignor to Societe Anonyme des Etablissements L. Blerlot, Paris, France. Voltage-controlling mechanism. No. 1,396,553; Nov. 8.

Bouvier, Leo P., Worcester, Mass. Self-serving table. No. 1,396,945; Nov. 8.

Bovy, John, Red Wing, Minn. Map-holder. No. 1,396,562; Nov. 8.

Bowers, Thomas A., Boston, Mass. Manufacturing tufts and article derived therefrom. No. 1,396,159; Nov. 8.

Boyman, Edwin L., Gardner, Mass. Amusement device. No. 1,396,247; Nov. 8.

Bowman, Newton K., North Lawrence, Ohio. Wall-anchor. No. 1,396,296; Nov. 8.

Boyter, Arthur J., Temple, Tex. Casing-elevator. No. 1,396,317; Nov. 8.

Bradley, Charles S., New York, N. Y. Production of carbon. No. 1,396,013; Nov. 8.

Brainin, Salomon. (See Heinman, H., and Brainin.)

Brandberry, Harry M., assignor to Piston Research Corporation, Norfolk, Va. Metallic piston-packing. No. 1,396,620; Nov. 8.

Branaky, Cesar E., assignor to Standard Oil Company, Whiting, Ind. - Purification of hydrocarbons. No. 1,396,320; Nov. 8.

Breen, Harold L., Hattan, N. D. Machine for treating grain, &c. No. 1,396,321; Nov. 8.

Breese, Charles O., Portsmouth, Ohio. Round rim-bound top for tables. No. 1,396,554; Nov. 8.

Bressen, Henry J., Detroit, Mich. Flushing apparatus. No. 1,396,460; Nov. 8.

Bresser, Eduard, Pilsen, Austria. Pneumatic tire. No. 1,396,497; Nov. 8.

Bright, Claude H., Jr., Memphis, Tenn. Numbering-machine. No. 1,396,248; Nov. 8.

Brignall, Richard H., et al. (See Curtis, O. D., assignor.)

Bristol Company, The. (See Bristol, William H., assignor.)

Bristol, William H., assignor to The Bristol Company, Waterbury, Conn. Synchronized entertainment apparatus. No. 1,396,401; Nov. 8.

Bristol, William H., Waterbury, Conn. Sound-selecting apparatus. No. 1,396,402; Nov. 8.

Brock, Matthias, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Softening apparatus. No. 1,396,160; Nov. 8.

Brosius, Ralph C., assignor to Multiplex Electric Company, Chicago, Ill. Fuse-plug. No. 1,396,552; Nov. 8.

Brooks, Robert A., Chicago, Ill. Flushing-valve. No. 1,396,521; Nov. 8.

Brooks, R. M. (See Gould, Edwin J., assignor.)

Brouillette, Albert J., assignor to Shawlow Shuttle Company, Woonsocket, R. I. Shuttle-eye. No. 1,396,565; Nov. 8.

Brown Company. (See Burningham, F. A., Richter, Van Arsdel, and White, assignors.)

Brown Company. (See Richter, G. A., Van Arsdel, and White, assignors.)

Brown Marketing Machinery Company, The. (See Scott, Harry E., assignor.)

Brown, Joseph H. (See Davison, Ernest G., assignor.)

Brown, Max, et al. (See Benner, William T., assignor.)

Brown, Max, et al., trustee. (See Benner, William T., assignor.)

Bryntesen, Bryntz, Odebolt, Iowa. Wireless corn-planter. No. 1,396,626; Nov. 8.

Buchsbaum, Samuel, Chicago, Ill. Clasp. No. 1,396,019; Nov. 8.

Buchsbaum, Samuel, Chicago, Ill. Belt-buckle. No. 1,396,020; Nov. 8.

Buckman, Elmer E., Stanton, Kans. Wire-stretcher. No. 1,396,969; Nov. 8.

Buckley, Harry H., assignor to Associated Engineers Company, Chicago, Ill. Separating carbon and similar packing. No. 1,396,249; Nov. 8.

Buckley, Lucius W., Indianapolis, Ind. Bifocal lens. No. 1,396,498; Nov. 8.

Bullen, Alfred E., and C. Jessyn, Auckland, New Zealand. Mechanism for printing-machines. No. 1,396,622; Nov. 8.

Burch, Jay, San Luis Obispo, Calif. Clamp. No. 1,396,321; Nov. 8.

Burger, Emil, Hoboken, N. J. Antistatic friction device. No. 1,396,318; Nov. 8.

Burch, Jay F., Laurel Springs, N. J. Distilling petroleum. No. 1,396,249; Nov. 8.

Burke, Michael, Mount Pleasant, Iowa. Derrick. No. 1,396,250; Nov. 8.

Burnham, George A., Saugus, assignor to S. R. Cundit, Jr., Brookline, Mass. Electrically-operated circuit-breaker. No. 1,396,994; Nov. 8.

Burningham, Foster A., G. A. Richter, W. B. Van Arsdel, and D. H. White, assignors to Brown Company, Berlin, N. H. Waterproof fiber tube and making the same. No. 1,396,251; Nov. 8.

Burroughs Adding Machine Company. (See Magnus, John, assignor.)

Burrows, Spencer F., et al. (See Badder, Harry C., assignor.)

Burton, Frank F., Mount Carmel, and T. D. Jacobs, New Haven, assignors to Winchester Repeating Arms Company, New Haven, Conn. Air-gun. No. 1,396,494; Nov. 8.

Busch-Sulzer Bros.-Diesel Engine Company. (See Rotter, Max, assignor.)

Butt, Hyman V., Ottawa, Ontario, Canada. Fur-nib cutter. No. 1,396,624; Nov. 8.

Cahill, William J., New Dorp, N. Y. Horseshoe. No. 1,396,495; Nov. 8.

Cameron, Roger W. and M. W. Ramsay, designers to Campbell Engineering Corporation, Kansas City, Mo. Butterfly-plate-turning rack. No. 1,396,168; Nov. 8.

Cameron Engineering Corporation. (See Campbell, H. W., and Ramsay, assignors.)

Carch, Charles C., Kansas City, Mo. Antifriction device for bearing-surfaces. No. 1,396,561; Nov. 8.

Carey, Thomas F. (See Coleman, Harry H., assignor.)

Carl, Victor F., Providence, Mass. Tagging-machine. No. 1,396,496; Nov. 8.

Carlson, August, Des Moines, S. D. Automobile-wheel sun-shield device. No. 1,396,566; Nov. 8.

Carmichael, Robert H., Houston, Tex. Pump-plunger. No. 1,396,774; Nov. 8.

Carriere, Donald E., Cayuga, Ontario, Canada. Clutch. No. 1,396,623; Nov. 8.

Carter, Clark E., assignor of one-half to A. E. McBeath, Montreal, Quebec, Canada. Target apparatus. No. 1,396,698; Nov. 8.

Carver, Walter L. (See Funk, T. E., and Carver.)

Carver, Richard G., assignor of one-half to F. J. Lawler, Pelham, N. Y. Automatic window-closing device. No. 1,396,252; Nov. 8.

Caumont, Louis F. (See Koch, T. E., and Caumont.)

Centerwall, Ivar W. Lidmar-Brevik, assignor of seventenths to H. M. Backstrom, Djursholm, and G. A. Kyhlberger, Stockholm, Sweden. Producing ammonia. No. 1,396,627; Nov. 8.

Challis, Philip, London, England. Trunk-piston. No. 1,396,161; Nov. 8.

Challis, Philip, London, England. Trunk-piston. No. 1,396,696; Nov. 8.

Champlin, Alvin B., Tuctahoe, assignor of one-half to R. McWilliam, New York, N. Y. Air-blast sprayer. No. 1,396,319; Nov. 8.

Chandelaine, Norbert, assignor to A. A. Magee, Montreal, Quebec, Canada. Rocking tricycle. No. 1,396,566; Nov. 8.

Charter, James A., Chicago, Ill. Gas-engine. No. 1,396,506; Nov. 8.

Chase Companies, The. (See Recker, Adolph C., assignor.)

Chicago Flue Mfg. Co. (See McDonald, Clarence T., assignor.)

Chicoine, Louis P., Vaudreuil, Quebec, Canada. Track-clearing equipment. No. 1,396,255; Nov. 8.

Child, Guy B., Chicago, Ill., assignor to American Stove Company, St. Louis, Mo. Combined gas and wood and coal range. No. 1,396,628; Nov. 8.

Christman, Charles. (See Messmer, Frank O., assignor.)

Chart & Hooker Milling Machine Company, The. (See Schmidt, Frank S., assignor.)

Clark, John G., Raleigh, Ontario, Canada. Safety-stop for motor-vehicles. No. 1,396,256; Nov. 8.

Clark, Robert G., Brooklyn, N. Y. Ratchet-jack. No. 1,396,320; Nov. 8.

Clark, Samuel A., Seattle, Wash. Sewing-cabinet. No. 1,396,634; Nov. 8.

Clark, Walter T., assignor to The Hazen Furnace Company, Cleveland, Ohio. Cleaning-door and chimney-valve. No. 1,396,676; Nov. 8.

Cleal, Joseph P., and R. H. Awde, Toronto, Ontario, Canada. Lock. No. 1,396,163; Nov. 8.

Clegheorn, Charles A., Webern Steele, England. Material or processing materials for coating substances to protect them or render them non-porous. No. 1,396,023; Nov. 8.

Clemens, John G., Buffalo, N. Y. Tube for fuses. No. 1,396,257; Nov. 8.

Clesett, Peabody & Co. (See Hess, J. W., and Hodgins, assignors.)

Cobey, Albert B. (See Hall, C. G., Devereaux, and Cobey.)

Cochran, John W. (See Hill, S. P., and Cochran.)

Cochran, Merit L. and M. B. Wood, Kansas City, Kans. Ball-joint. No. 1,396,253; Nov. 8.

Cochrane, William F., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Catalyzer apparatus. No. 1,396,954; Nov. 8.

Coenagen, Henry, Great Falls, Mont. Can-opener. No. 1,396,264; Nov. 8.

Coffman, Samuel M., Kansas City, Mo., assignor to The Barbers Electric Specialty Company. Barber's appliance. No. 1,396,507; Nov. 8.

Cohoby, George A. and M. D. Crawford, Garrett, Pa. Switch-lock. No. 1,396,606; Nov. 8.

Cole, Robert M., Sandusky, Ohio. Obtaining a sodium salt from a hydrocarbon monosulfonic acid. No. 1,396,520; Nov. 8.

Cole, Warren W., Portland, Me. Metal screen. No. 1,396,164; Nov. 8.

Coleman, Harry H., New York, N. Y., assignor, by mesne assignments, to L. F. Carey, Philadelphia, Pa. Walking doll. No. 1,396,321; Nov. 8.

Comas Cigarette Machine Company. (See Schodeld, Frederick C., assignor.)

Commercial Research Company, The. (See Eldred, Byron E., assignor.)

Candit, Sears B., Jr. (See Burnham, George A., assignor.)

Conner, George W., Rockdale, Mass. Fuse or cut-out. No. 1,396,255; Nov. 8.

Continental Motors Corporation. (See Fors, Arthur R., assignor.)

Converse, Tommy J., Bellingham, Wash. Steam-whistle-operating mechanism. No. 1,396,696; Nov. 8.

Cook, Richard W. (See Funk, Jacques S., assignor.)

Cooper, Joseph H., Chicago, Ill. Apparatus for utilising jump-fuel. No. 1,396,097; Nov. 8.

Corrington, James W., Fawcett, Mo. Breeding-crate. No. 1,396,246; Nov. 8.

Corrington, James W., Fawcett, Mo. Automatic deeer and self-feeder. No. 1,396,257; Nov. 8.

Cornelius, Cornelius E., Stockholm, Sweden. Electric rotating furnace. No. 1,396,677; Nov. 8.

Corrigan, Clyde S., Norwood, Ohio. Earth-boring machine. No. 1,396,325; Nov. 8.

Cory, Marcus M., assignor to Giddings & Lewis Machine Tool Company, Fond du Lac, Wis. Machine-tool. No. 1,396,165; Nov. 8.

Coryell, John, Detroit, Mich. Multiple-screw jack. No. 1,396,258; Nov. 8.

Coryell, John, Detroit, Mich. Multiple-screw jack. No. 1,396,259; Nov. 8.

Cowgill, David H., West Newton, Pa. Trap-nest. No. 1,396,407; Nov. 8.

Coze Traveling Grate Company. (See Lloyd, William, assignor.)

Crane Glen E., et al. (See Curtis, O. D., assignor.)

Crawford, Albert G., Chicago, Ill., assignor to H. W. Seaman, Clinton, Iowa. Refrigeration process. No. 1,396,074; Nov. 8.

Crawford, Michael D. (See Coboby, G. A., and Crawford.)

Creighton, Elmer E. F., Schenectady, N. Y., assignor to General Electric Company. Protective device. No. 1,396,559; Nov. 8.

Cromwell, Charles H., Georgetown, Ill. Bed-hinge for automobile-trucks. No. 1,396,675; Nov. 8.

Crook, John E. (See Crook, Julia H. and J. E.)

Crook, Julia H. and J. E., Remuera, Auckland, New Zealand. Window construction. No. 1,396,359; Nov. 8.

Curry, Frederick H., Detroit, Mich. Shipping-standard for automobiles. No. 1,396,969; Nov. 8.

Curtis & Mfg. Co. (See Ackermann, F., and Frese, assignors.)

Curtis, O. D., assignor of one-half to R. H. Brignall, two-fifths to G. E. Crane, Kalamazoo, and one-tenth to E. Myers, Bronsville, Mich. Hook or coupling for towlines. No. 1,396,066; Nov. 8.

Cutler-Hammer Mfg. Co., The. (See Stevens, William C., assignor.)

Dahlquist, Charles S., assignor to The Standard Parts Company, Cleveland, Ohio. Axle. No. 1,396,025; Nov. 8.

Dalcher, John T., Jersey City, N. J. Oil-burner for stoves, furnaces, &c. No. 1,396,166; Nov. 8.

Damiani, Godfrey E., Chicago, Ill. Door-silencer. No. 1,396,167; Nov. 8.

Danger, Hans H. P., Hamburg, Germany. Change-speed belt-drive. No. 1,396,168; Nov. 8.

Dangl, Adolf, Vienna, Austria. Machine for covering rings with threads, especially for making thread-buttons. No. 1,396,626; Nov. 8.

Darrah, William A., assignor to The Hoco Engineering Company, Chicago, Ill. Dough-mixing apparatus. No. 1,396,408; Nov. 8.

Davidson, Ernest G., assignor of one-half to J. H. Brown, Elyria, Ohio. Automobile-bumper. No. 1,396,626; Nov. 8.

Davidson, James L., Los Angeles, Calif. Cash and currency container. No. 1,396,361; Nov. 8.

Davis, Charles A., and H. L. Wolfe, San Jose, Calif. Shoe-fitting stool. No. 1,396,100; Nov. 8.

Davis, John P. T., Elk City, Kans. Bit-recovering means. No. 1,396,260; Nov. 8.

Davis, John P. T., Elk City, Kans. Pump. No. 1,396,261; Nov. 8.

Davis, John P. T., Elk City, Kans. Bailer. No. 1,396,262; Nov. 8.

Day, George W., Glenellyn, Ill. Display-stand. No. 1,396,027; Nov. 8.

De Reed, Antonius L., Watergraafsmeer, Netherlands. Transfer process. No. 1,396,409; Nov. 8.

Denham, Charles T., Massa, Italy. Haulage apparatus. No. 1,396,627; Nov. 8.

Devereaux, Francis A. (See Hall, C. G., Devereaux, and Cobey.)

Di Filippo, Silvio, Toledo, Ohio. Fireproofing composition. No. 1,396,264; Nov. 8.

Dickerson, Walter H., New York, N. Y. Recovering the solids of waste pulp liquors. No. 1,396,028; Nov. 8.

Dickinson, Thomas A., Youngstown, Ohio. Metering device. No. 1,396,560; Nov. 8.

Diephouse, Jacob W., Chicago, Ill. Vacuum-cleaner. No. 1,396,263; Nov. 8.

Dochnal, Mathias, St. Louis, Mo. Tile block. No. 1,396,265; Nov. 8.

Donnellan, Frank E., San Francisco, Calif. Cooking-retort. No. 1,396,266; Nov. 8.

Donnelley, R. R., & Sons Company. (See Kately, S. E., and Alger, assignors.)

Dorey, Sylvester, Gloversville, N. Y. Shaving-cup. No. 1,396,561; Nov. 8.

Dorman, William, assignor of one-half to Hazard & Miller, Los Angeles, Calif. Anvil. No. 1,396,679; Nov. 8.

Dorso, Gennaro, San Francisco, Calif. Making ornamental articles. No. 1,396,267; Nov. 8.

Dow Wire and Iron Works. (See Batterman, Ray G., assignor.)

Doyle, William P., assignor of one-half to F. P. Stolte, Reedsburg, Wis. Gearing. No. 1,396,029; Nov. 8.

Draper Corporation. (See Rhoades, Alonzo E., assignor.)

Draper Corporation. (See Snow, Isaac, assignor.)

Draper Corporation. (See Youngquist, Henry W., assignor.)

Draver, Emil R., Richmond, Ind. Exhaust cut-out. No. 1,396,410; Nov. 8.

Dreyer, Alfred J., assignor to Pawling & Harnischfeger Co., Milwaukee, Wis. Electric system. No. 1,396,101; Nov. 8.

Dry, Paul K., et al. (See Johnson, Charles H., assignor.)

Du Pont, E. I., de Nemours & Company. (See Woodbridge, Richard G., Jr., assignor.)

Dubilier, William, New York, N. Y. Variable condenser. No. 1,396,030; Nov. 8.

Dufford, Walter, Bartlesville, Okla. Strap-wrench. No. 1,396,411; Nov. 8.

Dull, Raymond W., La Grange, assignor to Link Belt Company, Chicago, Ill. Link for chain belts. No. 1,396,031; Nov. 8.

Dumanois, Emile P. Levallois-Perret, Seine, France. Carbureted-air distributer for explosion-engine starters. No. 1,396,322; Nov. 8.

Dunham, Charles W., Fairmont, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for the control of railway-switches. No. 1,396,562; Nov. 8.

Dunham, George W., and L. C. Freeman, assignors to The Militor Corporation, New York, N. Y. Axle construction for motor-vehicles. No. 1,396,102; Nov. 8.

Dunkley Company. (See Dunkley, Samuel J., assignor.)

Dunkley, Samuel J., Oakland, Calif., assignor to Dunkley Company, Kalamazoo, Mich. Apparatus and process for peeling fruit and vegetables. No. 1,396,268; Nov. 8.

Dunn, William H., Anderson, Ind. Automobile-steering-column lock. No. 1,396,506; Nov. 8.

Dunne, Patrick, San Francisco, Calif. Arch-support. No. 1,396,323; Nov. 8.

Duplexalite Corporation. (See White, Ernest C., assignor.)

Dutho Rubber Company. (See Sitzler, Guy A., assignor.)

Dybile, Julius A., Joliet, Ill. Signaling device. No. 1,396,169; Nov. 8.

Eastern Tube & Tool Company. (See Hansen, Hans, assignor.)

Eastman Kodak Company. (See Gaisman, Henry J., assignor.)

Eckart, Charles F., Olaa, Hawaii. Mulsh and making the same. No. 1,396,269; Nov. 8.

Eclipse Machine Company. (See McGrath, William L., assignor.)

Eclipse Machine Company. (See Whitney, Maurice P., assignor.)

Edeborg, Albert W., Jamestown, N. Y. Tire-chain fastener. No. 1,396,108; Nov. 8.

Hoco Engineering Company. (See Darrah, William A., assignor.)

Eldred, Byron E., New York, N. Y., assignor to The Commercial Research Company. Making stylt and products thereof. No. 1,396,412; Nov. 8.

Ellinger, William H., Wichita Falls, Tex. Well-drill wrench. No. 1,396,699; Nov. 8.

Ellis, Frank, Ames, Iowa. Automobile-bumper. No. 1,396,628; Nov. 8.

Emerse, William H., Chelsea, assignor to Simplex Pneumatic Tire Company, Boston, Mass. Pneumatic tire. No. 1,396,170; Nov. 8.

Greene, Glenn G., assignor to G. G. G. Metal Stamping Company, Warren, Pa. Caster for angle-bar furniture. No. 1,396,681; Nov. 8.

Greenwood, Anna G., Denver, Colo. Handy book and tray stand. No. 1,396,700; Nov. 8.

Gregory, Carl W., Petaluma, Calif. Chain. No. 1,396,701; Nov. 8.

Grierson, Benjamin H., Fort Davis, Tex. Attachment for gun-slings. No. 1,396,270; Nov. 8.

Grigsby, Bertram J., Park Ridge, Ill. Steering-column. No. 1,396,195; Nov. 8.

Grimsley, Isaac Lamar, Colo. Wheeled toy. No. 1,396,109; Nov. 8.

Grunig, Frédéric, Brooklyn, and M. L. Van Huele, New York, N. Y. Adjustable hat-lining. No. 1,396,421; Nov. 8.

Gulberson Corporation. (See Montgomery, Gustavus A., assignor.)

Gustafson, Charles, Instanter, Pa. Saw-dressing tool. No. 1,396,682; Nov. 8.

Hachenberg, Louis, New York, N. Y. Pipe-union. No. 1,396,196; Nov. 8.

Haeberlein, Max, Mountain Lakes, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Water-turbine and the like. No. 1,396,327; Nov. 8.

Hafemeister, William C., assignor to G. H. Scott Machine Company, Cleveland, Ohio. Thread-cutting apparatus. No. 1,396,572; Nov. 8.

Hale, Samuel. (See Bell, Charles E., assignor.)

Hall, Charles G., F. A. Devereaux, and A. R. Cobey, International Falls, Minn. Radiator-carrier. No. 1,396,328; Nov. 8.

Hall, William J., Ringgold, La. Planter. No. 1,396,683; Nov. 8.

Helm, Karl, Los Angeles, Calif. Toy cradle-bed wagon. No. 1,396,039; Nov. 8.

Hammond, Myron E., and H. H. Taylor, assignors to The Thos. F. Taylor Company, Bridgeport, Conn. Man's garter. No. 1,396,423; Nov. 8.

Hampden, Wellesley E., assignor of one-half to J. C. Kleist, and one-half to W. F. Woolard, Milwaukee, Wis. Trolley-retriever for street-cars. No. 1,396,367; Nov. 8.

Hand, John G., Kokomo, Ind., assignor of one-half to The Speed-Up Wrench and Manufacturing Company. Can-punch. No. 1,396,629; Nov. 8.

Haner, Carl, Jr., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Treating distillery waste. No. 1,396,368; Nov. 8.

Haner, Carl, Jr. (See Backhaus, A. A., and Haner.)

Hanna Furnace Company, The. (See Clark, Wilbur T., assignor.)

Hansen, Hans, Mespeth, assignor to Eastern Tube & Tool Company, Brooklyn, N. Y. Armor-winding machine. No. 1,396,197; Nov. 8.

Hansen, William C., Rock Island, Ill. Bake-pan. No. 1,396,684; Nov. 8.

Hanson, Walter M., Milwaukee, Wis. Razor-stropper roll. No. 1,396,434; Nov. 8.

Hardey, Virgil E., Chicago, Ill. Means for regulating time-pieces and the like. No. 1,396,198; Nov. 8.

Harding, Charles D. (See Harvey, V., and Harding.)

Harley, Orval K., Jenks, Okla. Shock-absorber. No. 1,396,573; Nov. 8.

Harlow, Thomas R., Benton City, Mo. Game-board. No. 1,396,425; Nov. 8.

Harrigan, Thomas M., Woodstock, Vt. Bundle-tape-applying device. No. 1,396,422; Nov. 8.

Harris, Morris C., San Jose, Calif. Type-cabinet and equipment therefor. No. 1,396,199; Nov. 8.

Harrison, John J., Portland, Oreg. Automobile-bumper lock. No. 1,396,263; Nov. 8.

Hartford, Edward V., Deal, N. J. Electrically-operated brake. No. 1,396,426; Nov. 8.

Harvey, Vivian, and C. D. Harding, Platteville, Mo. Puncture-proof-tube protector for automobile-tires. No. 1,396,200; Nov. 8.

Hatch, Orin E., Davenport, Iowa. Bull-holding instrument. No. 1,396,427; Nov. 8.

Hathaway, Charles H., assignor to Badger Manufacturing Corporation, Milwaukee, Wis. Automobile-bumper. No. 1,396,201; Nov. 8.

Hawkins, Wilford J. (See Steele, Archie W., assignor.)

Hazard & Miller. (See Dorman, William, assignor.)

Heath, Delos P., Detroit, Mich. Combined refrigerator and ice-cream freezer. No. 1,396,574; Nov. 8.

Heath, William O., Stafford, Kans. Draft-equaliser. No. 1,396,202; Nov. 8.

Heinrich, Mary E., Freeport, N. Y. Sport-costume. No. 1,396,203; Nov. 8.

Helsman, Herman, and S. Brainin, New York, N. Y. Paper or bill file. No. 1,396,428; Nov. 8.

Henderson, Yandell, New Haven, Conn. Mask for the inhalation of carbon dioxid. No. 1,396,429; Nov. 8.

Hennessey, John H., Providence, R. I. Pin-tongue. No. 1,396,575; Nov. 8.

Hentschel, Edward O., Cleveland, Ohio. Distributing-roller for printing-presses. No. 1,396,110; Nov. 8.

Hery, Park A., Hillside, N. J., assignor to The Singer Manufacturing Company. Loop-taker-actuating mechanism for sewing-machines. No. 1,396,040; Nov. 8.

Hess, John W., and F. S. Hodgins, Kitchener, Ontario, Canada, assignors to Cluett, Peabody & Co., Inc., Troy, N. Y. Collar. No. 1,396,204; Nov. 8.

Hielscher, John F., Seattle, Wash. Clock-controlled electric signal system. No. 1,396,370; Nov. 8.

Higbee, Le Grand, Cicero, Ill. Toothbrush-head. No. 1,396,630; Nov. 8.

Hill, George S., Stratford, N. H., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Buttonhole-sewing machine. No. 1,396,111; Nov. 8.

Hill, Samuel F., and J. W. Cochran, Indianapolis, Ind. Ventilating-sash fastener. No. 1,396,205; Nov. 8.

Hill, Walter G., Chicago, Ill. Sharpening device for lawn-mowers. No. 1,396,430; Nov. 8.

Hinchey, Harry J., Atlanta, Ga., assignor to Wright-Austin Company, Detroit, Mich. Steam-trap. No. 1,396,206; Nov. 8.

Hirsch, Feodor C., Bridgeport, Conn. Drier for can-covers. No. 1,396,431; Nov. 8.

Hitchcock, Ashland C., Tescott, Kans. Nest. No. 1,396,432; Nov. 8.

Hoag, George, Union Grove, N. Y. Antiskid device. No. 1,396,207; Nov. 8.

Höchstädter, Martin, Berlin, Germany, assignor to N. V. Lyn-Protectie, Maatschappij tot Exploitatie Van Electro-technische en Andere Octrooien, The Hague, Netherland. System for protecting electric-current-distributing mains against temporary interruptions. No. 1,396,112; Nov. 8.

Hodgins, Frank S. (See Hess, J. W., and Hodgins.)

Hoe, R., and Co. (See Raabe, Otto L., assignor.)

Hoffmann, George E. von, Evanston, Ill. Scraper. No. 1,396,702; Nov. 8.

Hoffmann, Gustav, Chicago, Ill. Quick-adjusting wrench. No. 1,396,576; Nov. 8.

Holcomb, Mollie W., Erie, Pa. Article-holder. No. 1,396,513; Nov. 8.

Holden & White. (See Bakstad, Johan E., assignor.)

Holm, Jens S., Cedar Falls, Iowa. Adjustable tabular device. No. 1,396,118; Nov. 8.

Holmes, Bradford B., U. S. Army, assignor to N. D. Baker, Secretary of War, United States of America, trustee. Recoil mechanism for guns. No. 1,396,114; Nov. 8.

Head, Harrison H., Battle Creek, Mich. Can-double-seaming machine. No. 1,396,433; Nov. 8.

Horton, Bryson D., Detroit, Mich. Metal box or receptacle for electrical switches. No. 1,396,434; Nov. 8.

Hosch, Greene C., St. Louis, Mo. Push-button-controlled shutter. No. 1,396,577; Nov. 8.

Hotchner, Fred, San Francisco, Calif. Cable-clamp. No. 1,396,115; Nov. 8.

Houck, John D., Chicago, Ill. Coffee-making device. No. 1,396,435; Nov. 8.

Howell, Evelyn L. V., assignor of one-half to H. M. Schroeder, Los Angeles, Calif. Shockless-rail-crossing. No. 1,396,686; Nov. 8.

Hubbard, Morris V., San Jose, Calif. Stretcher. No. 1,396,208; Nov. 8.

Hull, Burton E., Houston, Tex., assignor to The Texas Company. Explosion-hatch for oil-tanks. No. 1,396,719; Nov. 8.

Hultgren, Axel G. E., assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenberg, Sweden. Feeding device for annular bodies. No. 1,396,116; Nov. 8.

Humphrey, Alfred H., New York, N. Y. Gas-burner. No. 1,396,210; Nov. 8.

Humphrey, Alfred H., New York, N. Y., assignor to General Gas Light Company, Kalamazoo, Mich. Making firebacks for gas-stoves. No. 1,396,209; Nov. 8.

Humphrey, Hubert R., Kalamazoo, Mich. Gas-burner. No. 1,396,211; Nov. 8.

Hunt, Herbert H., Oakland, Calif. Vehicle-signal. No. 1,396,212; Nov. 8.

Hurley Machine Company. (See Wood, James J., assignor.)

Iliff, Lloyd G., Kansas City, Mo. Plug-micrometer. No. 1,396,117; Nov. 8.

Imperial Brass Manufacturing Company, The. (See Rudolph, Walter J., assignor.)

International Nitrogen Company. (See Reid, James H., assignor.)

Irving-Pitt Manufacturing Company. (See Fargo, C. R., and Unger, assignors.)

Isele, John, Oakland, Calif. Mechanical device. No. 1,396,578; Nov. 8.

Isono, Tatsuichiro, Tokyo, Japan, assignor to General Electric Company. Induction-motor. No. 1,396,579; Nov. 8.

Jackson, Frank P., Youngstown, Ohio. Treating natural stone. No. 1,396,118; Nov. 8.

Jackson, Lawrence S. (See Girvan, Charles S., assignor.)

Jackson, Mark P., Abbeville, Ga., assignor to Boorum and Pease Company, New York, N. Y. Loose-leaf binder. No. 1,396,631; Nov. 8.

Jackson, Robert E., Princeton, W. Va. Hand-brake. No. 1,396,119; Nov. 8.

Jackson, Robert H., Phoenix, Ariz. Connecting-rod. No. 1,396,435; Nov. 8.

Jacobs, Joseph, Brooklyn, N. Y. Oiling device for fiber silk and the like. No. 1,396,120; Nov. 8.

Jacobsen, Richard S., Chicago, Ill. Electric water-heater. No. 1,396,121; Nov. 8.

Jeayes, Charles. (See Bullen, A. S., and Jeayes.)

Jobb, Thomas B., Orillia, Ontario, Canada. Spectacle-frame. No. 1,396,213; Nov. 8.

Jensen, Aage, Portland, Oreg., assignor to Jensen Creamery Machinery Company, Inc. Method and apparatus for treating lumber. No. 1,396,623; Nov. 8.
Jensen Creamery Machinery Company. (See Jensen, Aage, assignor.)
Jensen, Henry N., Batherville, Iowa. Radiator for automobiles and the like. No. 1,396,633; Nov. 8.
Jensen, Lawrence H., St. Charles, Ill. Pump. No. 1,396,214; Nov. 8.
Joeck, Thomas D. (See Burton, F. F., and Joeck.)
Johantgen, Oliver D., assignor to Victor Adding Machine Co., Chicago, Ill. Clear-elgual-printing mechanism for listing-machines and the like. No. 1,396,215; Nov. 8.
Johnson, Charles H., Shelsbury, assignor of one-third to G. O. Lips and one-third to P. K. Dry, Landis, N. C. Drawing-roll mechanism for spinning-frames. No. 1,396,122; Nov. 8.
Johnson, Edward W., Chicago, Ill. Aerial torpedo or bomb. No. 1,396,624; Nov. 8.
Johnson, Robert, Sault Ste. Marie, Ontario, Canada. Internal-combustion engine. No. 1,396,271; Nov. 8.
Johnson, Robert W., Chicago, Ill. Collar-lint. No. 1,396,041; Nov. 8.
Johnston, George, Manchester, England. Apparatus for pulverising ore and the like. No. 1,396,711; Nov. 8.
Johnston, George, Manchester, England. Crushing. No. 1,396,712; Nov. 8.
Jones, Philip W., Newark, Ohio. Method and machine for producing metallic wedges. No. 1,396,642; Nov. 8.
Jones, Stine L., Baton Rouge, La. Railway-crossing gate. No. 1,396,635; Nov. 8.
Jones, Walter A., Columbus, Ohio. Coating device for glass-drawing apparatus. No. 1,396,216; Nov. 8.
Jones, William M., Jr., Rochester, N. Y. Tire making and repairing device. No. 1,396,517; Nov. 8.
Joseph, Harry P., Davenport, Iowa, assignor, by mesne assignments, to B. L. Schmitt Company. Internal-grinding machine. No. 1,396,122; Nov. 8.
Kahlgtieg, Bernard R., Oakland, Calif. Ammunitator. No. 1,396,636; Nov. 8.
Kahler, Charles F., Chicago, Ill. Slack-adjuster. No. 1,396,218; Nov. 8.
Kaiser, Louis H., assignor to The John Van Range Company, Cincinnati, Ohio. Wheeling service-cart. No. 1,396,713; Nov. 8.
Kalamazoo Loose Leaf Binder Co. (See Shaw, Frank H., assignor.)
Kanth, Henry J. (See Kemp, N. S., and Kanth.)
Kately, Samuel E., and H. C. Alger, Chicago, Ill., assignors to R. R. Donnelley & Sons Company. Jogging-machine. No. 1,396,436; Nov. 8.
Kehrer, Chase, Perth Amboy, N. J. Ignition apparatus. No. 1,396,637; Nov. 8.
Kellogg Switchboard & Supply Co. (See Sparks, Charles, assignor.)
Kelly, John A., Grantree, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. No. 1,396,124; Nov. 8.
Kemp, Nickios S., and H. J. Kauth, Washburn, Iowa. Rail connection. No. 1,396,043; Nov. 8.
Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,396,125; Nov. 8.
Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,396,126; Nov. 8.
Keogh, Thomas B., and L. F. Caumont, New York, N. Y. Seesaw and toy vehicle. No. 1,396,437; Nov. 8.
Kessler, Rudolph, Chicago, Ill. Device for making butter pads. No. 1,396,438; Nov. 8.
Keyes, Frank E., Pasadena, Calif. Means for separating solid substances from lubricating-oil. No. 1,396,219; Nov. 8.
Kilburn, Oliver J. (See Patterson, C. J., and Kilburn.)
Kilcullen, Patrick J., Philadelphia, Pa. Wave-operated device. No. 1,396,580; Nov. 8.
Kilgo, William A., Asheville, N. C. Poster-frame. No. 1,396,638; Nov. 8.
Kiml, Lada, Cleveland, Ohio. Laundry clip. No. 1,396,639; Nov. 8.
King, Anson, Boston, Mass. Typewriter. No. 1,396,329; Nov. 8.
King, Charles W., St. Louis, Mo. Advertising device. No. 1,396,640; Nov. 8.
King, Guy, Atlanta, and C. G. Adsit, Tallulah Falls, Ga. Medicated chewing-gum. No. 1,396,641; Nov. 8.
Kissel Motor Car Company. (See Palmer, Herman D., assignor.)
Klein, John O., Alliance, Ohio. Tie and rail-fastener. No. 1,396,581; Nov. 8.
Kleist, John C., *et al.* (See Hampden, Wellesley R., assignor.)
Knapp, William, Bayonne, N. J. Lamp. No. 1,396,439; Nov. 8.
Knox, Harley M., Penokee, Kans. Lifting-jack. No. 1,396,440; Nov. 8.
Koehring Machine Company. (See Sheck, Oscar, assignor.)
Kohler, Conrad, Zurich, Switzerland. Steam-turbine-driven locomotive. No. 1,396,220; Nov. 8.
Koppitz, Otto R., Marion, Tex. Stub-axle adjustment device. No. 1,396,128; Nov. 8.
Korthals-Altes, Willem C., Schenectady, N. Y., assignor to General Electric Company. Repulsion-motor. No. 1,396,582; Nov. 8.
Kratz, William, Fall River, Mass. Muffler. No. 1,396,586; Nov. 8.
Kukulka, Valentine, Muskegon Heights, Mich. Varnish-catcher. No. 1,396,584; Nov. 8.
Kuller, John A., Brooklyn, N. Y. Latch device. No. 1,396,441; Nov. 8.
Kunzler, John W., Pittsburgh, Pa. Casting plate-glass and separating therefor. No. 1,396,220; Nov. 8.
Kuzelek, Anthony, Latuda, Utah. Automatic pressure-releaser for crossover tipple-dumps. No. 1,396,127; Nov. 8.
Kwiwicz, Frank, Montreal, Quebec, Canada. Collapsible cane. No. 1,396,572; Nov. 8.
Kuhlberger, Gustav A., *et al.* (See Cederberg, Ivar W., assignor.)
Kyle, William, Bellville, Ontario, Canada. Locomotive driving-wheel. No. 1,396,129; Nov. 8.
Lachman, Maurice, assignor to Universal Electric Welding Company, New York, N. Y. Railing, gate, grille, &c. No. 1,396,442; Nov. 8.
Lachman, Maurice, New York, N. Y., assignor, by mesne assignments, to Bethlehem Steel Company, Bethlehem, Pa. Metal wheel. No. 1,396,443; Nov. 8.
Ladd, Lester L., assignor to Photometric Products Corporation, Lockport, Ill. Setting-machine. No. 1,396,221; Nov. 8.
Lail, Theodore K., Valley Mills, Tex. Broom-corn-cultivating machine. No. 1,396,221; Nov. 8.
Laird, Wesley R., Pittsfield, Mass., assignor to General Electric Company. Abrasive device. No. 1,396,585; Nov. 8.
Lake, St. Clair, Poughkeepsie, N. Y., assignor to Malleo Plow Company. Grinding-machine. No. 1,396,130; Nov. 8.
Lancaster, John T., Haverhill, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Pulling-over machine. No. 1,396,131; Nov. 8.
Lang, Henry T., Fremont, Ohio, assignor to National Carbon Company, Inc. Dry-cell-tamping apparatus. No. 1,396,643; Nov. 8.
Lankowski, Edward, Detroit, Mich. Box-opener. No. 1,396,575; Nov. 8.
Lathrop, Harry D. (See McEwan, Charles F., assignor.)
Laughlin, Elmyr A., Oregon, Ill. Vehicle-body bearing. No. 1,396,697; Nov. 8.
Laughlin, Elmyr A., Oregon, Ill. Vehicle-body bearing. No. 1,396,698; Nov. 8.
Laughlin, Elmyr A., Oregon, Ill. Vehicle-body bearing. No. 1,396,699; Nov. 8.
Lawlor, F. J. (See Cater, Richard G., assignor.)
Leader Iron Works. (See Eberb, William A., assignor.)
Lee, Harry P., Stonington, Conn. Winding device. No. 1,396,444; Nov. 8.
Lee, Nizon, Brooklyn, N. Y. Universal joint. No. 1,396,132; Nov. 8.
Leonard, John E., Los Angeles, Calif., assignor, by mesne assignments, to Mitchell Camera Co. Adjustable iris and curtain for cameras. No. 1,396,717; Nov. 8.
Levaire, Edmond F., Paris, France. Fastening means for vignette nails. No. 1,396,271; Nov. 8.
Levaire, Edmond F., Paris, France. Rail-joint. No. 1,396,272; Nov. 8.
Levinson, Louis. (See Scheim, Albert N., assignor.)
Libbey, Henry N., Boston, Mass. Valve for flushing-tanks. No. 1,396,133; Nov. 8.
Lindemann, William G., assignor to Osone Company of America, Milwaukee, Wis. Osoniser. No. 1,396,222; Nov. 8.
Linderman, Bert A., Chicago, Ill. Cabinet for domestic lighting plants. No. 1,396,223; Nov. 8.
Link Belt Company. (See Dull, Raymond W., assignor.)
Lipe, George O., *et al.* (See Johnson, Charles H., assignor.)
Liquid Cleaning Stimulant Co. (See Bloomfield, Henry B., assignor.)
List, Francis X., assignor to National Card Mounting Company, New York, N. Y. Display-folder. No. 1,396,224; Nov. 8.
Lloyd, William, Hasleton, assignor to Coxe Traveling Grate Company, Port Carbon, Pa. Furnace-bopper. No. 1,396,715; Nov. 8.
Logue, Charles H., and D. D. Ormsby, Syracuse, N. Y. Differential gearing. No. 1,396,225; Nov. 8.
Lohrey, Walter, Bloomfield, N. J., assignor to Magna Metal Corporation, New York, N. Y. Electric furnace. No. 1,396,574; Nov. 8.
Long, Charles H., *et al.* (See Thompson, Edward C. and W. H., assignors.)
Long, John J., Norfolk, Va. Reversible cuff. No. 1,396,643; Nov. 8.
Loomis, Everts G., Newark, N. J. Machine-tool. No. 1,396,332; Nov. 8.
Loping Horse & Novelty Co., The. (See Tracey, Daniel F., assignor.)

Loose, Richard S., Syracuse, N. Y. Pocket tobacco-can. No. 1,396,226; Nov. 8.
Lotte, Charles, Marion, Ohio. Power-shovel or excavating-machine. No. 1,396,575; Nov. 8.
Louden Machinery Company, The. (See Silver, Herman, assignor. (Reissue.)
Louden, Derr F., New York, N. Y. Plant-stand. No. 1,396,445; Nov. 8.

Lowe, William R., New York, N. Y. Vehicle spring suspension. No. 1,396,644; Nov. 8.
Lurry, Abner J., Baton Rouge, La. Press-cloth-repairing machine. No. 1,396,644; Nov. 8.
Lyndon, Lamar, Orange, N. J. System of electrical distribution. No. 1,396,445; Nov. 8.
M. S. Company. (See Bittel, Frederick W., assignor.)
Maag, Max, Zurich, Switzerland. Toothed gearing. No. 1,396,228; Nov. 8.
Mackenzie, Fred L. (See Goddu, G., and Mackenzie.)
Maclaren, James G., Mamaroneck, N. Y. Pneumatic-speech apparatus. No. 1,396,449; Nov. 8.
Maddox, Edwin C., New York, N. Y. Safety-razor. No. 1,396,645; Nov. 8.
Magee, Allan A. (See Chapdelaine, Norbert, assignor.)
Magma Metal Corporation. (See Lohrey, Walter, assignor.)
Magnan, John, assignor to Burroughs Adding Machine Company, Detroit, Mich. Adding-machine. No. 1,396,716; Nov. 8.
Marcelotte Hair Curler Co., The. (See Nattiel, Harry, assignor.)
Marr, Robert A., Norfolk, Va. Recovering used paper. No. 1,396,227; Nov. 8.
Marsden, John H. (See Millikin, John A., assignor.)
Martin, Anna, Cincinnati, Ohio. Desk-receptacle. No. 1,396,228; Nov. 8.
Martin, Sherman J., Woodlawn, Pa. Reel. No. 1,396,450; Nov. 8.
Martin, Walter S., Flint, Mich. Demountable rim. No. 1,396,134; Nov. 8.
Merrifield, Jacob V., Virginia, Minn. Showplow. No. 1,396,577; Nov. 8.
Mets, Rocco F., Wilkinsburg, assignor to Mine Safety Appliances Company, Pittsburgh, Pa. Gas-purifying composition and manufacturing same. No. 1,396,596; Nov. 8.
Massillon Steel Castings Company, The. (See Anthony, A. H., and Nordfeldt, assignors.)
Mathews, Fred, Chicago, Ill. Carline. No. 1,396,703; Nov. 8.
Mathews, Fred, Chicago, Ill. Latch for hoods of automobiles. No. 1,396,704; Nov. 8.
May, Adam J. (See Fertig, C. W., and May.)
McBeath, Allan B. (See Carter, Clark E., assignor.)
McCaffrey, Robert E. (See Miller, A. H., and McCaffrey.)
McCaskell, Vaspar, Salt Lake City, Utah. Clarifying solutions. No. 1,396,514; Nov. 8.
McClevey, Walter S., St. Louis, Mo. Pneumatic tire. No. 1,396,515; Nov. 8.
McDonald, Clarence T., assignor, by mesne assignments, to Chicago Fuse Mfg. Co., Chicago, Ill. Fuse. No. 1,396,233; Nov. 8.
McDonald, Francis A., College Point, N. Y. Stitching-guide. No. 1,396,447; Nov. 8.
McDonald, Leslie R., assignor to M. V. O'Leary, Montreal, Quebec, Canada. Electric motor. No. 1,396,334; Nov. 8.
McDonald, Leslie R., assignor to M. V. O'Leary, Montreal, Quebec, Canada. Constant-speed vibrating motor and method. No. 1,396,335; Nov. 8.
McDonald, Leslie R., assignor to M. V. O'Leary, Montreal, Quebec, Canada. Direct-current vibratory motor. No. 1,396,336; Nov. 8.
McDonald, Leslie R., assignor to M. V. O'Leary, Montreal, Quebec, Canada. Variable amplitude of vibration motor and method. No. 1,396,337; Nov. 8.
McEwan, Charles F., Oak Park, assignor to H. D. Lathrop, Chicago, Ill. Can-washing machine. No. 1,396,516; Nov. 8.
McFadden, James B., assignor to The Sharples Separator Co., West Chester, Pa. Apparatus for producing emulsions. No. 1,396,576; Nov. 8.
McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter. No. 1,396,517; Nov. 8.
McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter. No. 1,396,518; Nov. 8.
McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter. No. 1,396,519; Nov. 8.
McGuire, John J., Yonkers, N. Y. Door for automobiles. No. 1,396,448; Nov. 8.
McNair, Robert, *et al.* (See Thompson, Edward C. and W. H., assignors.)
McWilliam, Robert. (See Champlin, Alvin B., assignor.)
Meacham, Benjamin E., Lorain, Ohio, and C. Munsner, Chicago, Ill., assignors to American Stove Company, St. Louis, Mo. Thermostat fuel-regulating device for gas-stoves. No. 1,396,706; Nov. 8.
Mechano Gear Shift Co. (See Richardson, Bayard E., assignor.)
Megnulty, Ralph A., Kansas City, Mo. Concrete construction. (Reissue.) No. 15,221; Nov. 8.
Mellen, Grenville, Cranford, N. J. Internal-combustion engine. No. 1,396,045; Nov. 8.
Mellor, George S., Philadelphia, Pa. Inner-tube deflator. No. 1,396,646; Nov. 8.
Mercer, Walter M., *et al.* (See Anderson, George A., assignor.)
Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)
Meriwether, Coleman, assignor to P. C. Reilly, Indianapolis, Ind. Metaled-end concrete pipe. No. 1,396,135; Nov. 8.
Merk, Lawrence A., Los Angeles, Calif. Brush-holder. No. 1,396,451; Nov. 8.
Merle, Guido, Bristol, Pa. Music-roll cabinet. No. 1,396,578; Nov. 8.
Mihalic, Milos N., Kansas City, Mo. Trolley-wire switch. No. 1,396,580; Nov. 8.
Militor Corporation, The. (See Dunham, G. W., and Freeman, assignors.)
Miller, Andrew H., and R. R. McCaffrey, Detroit, Mich. Gage or indicator for fluid-holding tanks. No. 1,396,273; Nov. 8.
Miller-Argue, Robert A., Essendon, Melbourne, Victoria, Australia. Apparatus for cranking or starting internal-combustion engines. No. 1,396,647; Nov. 8.
Miller, Donald C., Cleveland, Ohio. Signaling device. No. 1,396,136; Nov. 8.
Miller, Harry A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Pneumatic-tire-removing apparatus. No. 1,396,707; Nov. 8.
Miller, Robert H., Inc. (See Belknap, Wilbur C., assignor.)
Millikin, John A., Bayonne, assignor to J. H. Marsden, Atlantic City, N. J. Ornamenting glass articles. No. 1,396,651; Nov. 8.
Mills, Reuben D., and H. Paul, Oklahoma, Okla. Automobile-tire filler. No. 1,396,648; Nov. 8.
Mine Safety Appliances Company. (See Mase, Rocoe P., assignor.)
Minshall, George S., Bowling Green, Ky. Well-drilling apparatus. No. 1,396,649; Nov. 8.
Mirgon, Frank J., San Francisco, Calif. Razor-bone holder. No. 1,396,587; Nov. 8.
Mitchel, Charles F., assignor to Bastian Bros. Co., Rochester, N. Y. Button or badge. No. 1,396,137; Nov. 8.
Mitchell Camera Co. (See Leonard, John E., assignor.)
Mogensen, Frank O., Brooklyn, assignor of one-half to C. Christmann, Queens, N. Y. Hose-mounting protector. No. 1,396,452; Nov. 8.
Moessing, Otto. (See Sande, H. B., and Moessing.)
Moffitt, Edward P., Minneapolis, Minn. Demonstrating device. No. 1,396,453; Nov. 8.
Moline Plow Company. (See Frank, T. B., and Carver, assignors.)
Moline Plow Company. (See Lake, St. Clair, assignor.)
Molloy, Edward, assignor to C. F. Stacey, Clapham Common, London, England. Submersible toy. No. 1,396,650; Nov. 8.
Moore, William L., assignor to Window Glass Machine Company, Pittsburgh, Pa. Drawing glass. No. 1,396,230; Nov. 8.
Monroe Calculating Machine Company. (See Phinney, Edgar E., assignor.)
Monroe Calculating Machine Company. (See White, Nelsee, assignor.)
Montgomery, Gustavus A., assignor of one-half to The Gulberson Corporation, Dallas, Tex. Dressing-block. No. 1,396,240; Nov. 8.
Montillo, Isidore, assignor of one-half to W. E. Thompson, Hollister, Calif. Engine-tester. No. 1,396,454; Nov. 8.
Moore, Edgar B., Los Angeles, Calif. Stereoscopic-motion-picture mechanism. No. 1,396,651; Nov. 8.
Moore, Edward L., Eureka, Calif. Educational device. No. 1,396,319; Nov. 8.
Moore, Edward S., Brooklyn, N. Y. Toy theater. No. 1,396,046; Nov. 8.
Moore, George A., Medford, Mass. Capstan-screw. No. 1,396,455; Nov. 8.
Morin, Hormidas, and F. Pothier, Sherbrooke, Quebec, Canada. Sanitary drinking-fountain. No. 1,396,580; No. 8.
Morrison, James, Cincinnati, assignor to The Trailmobile Company, Oakley, Cincinnati, Ohio. Combined motor and animal-draft vehicle. No. 1,396,652; Nov. 8.
Mosher, Clifford C., Lima, Ohio. Machine for treating rubber compound or other plastic materials. No. 1,396,138; Nov. 8.
Mouawad, John J., assignor of one-half to A. Nassour, Newark, N. J. Straw-delivering mechanism. No. 1,396,720; Nov. 8.
Mueller, Augusto E., Chicago, Ill. Washing-machine. No. 1,396,456; Nov. 8.
Mueller, Frederick M. (See Alvin, Alleyne D., assignor.)
Müertz, André, Copenhagen, Denmark. Apparatus for sterilisation or pasteurisation of liquids. No. 1,396,520; Nov. 8.
Multiple Electric Company. (See Bronson, Ralph C., assignor.)
Munsner, Charles. (See Meacham, B. E., and Munsner.)
Murray, John, London, England. Typographical printing-plate. No. 1,396,653; Nov. 8.
Myers, Ray, *et al.* (See Curtis, O. D., assignor.)
Myers, Romaine W., Oakland, Calif. Dynamo-electric machine. No. 1,396,521; Nov. 8.
N. V. Lyn-Protectie, Maatschappij tot Exploitatie Van Electro-technische en Andere Octvoolen. (See Hochstadter, Martin, assignor.)
Nassour, Adbo. (See Mouawad, John J., assignor.)
National Carbon Company. (See Lang, Henry T., assignor.)
National Carbon Company. (See Williams, Charles F. and I. C., assignors.)
National Card Mounting Company. (See List, Francis X., assignor.)
National Paper Can Corporation. (See Penn, George R., assignor.)

Bathiel, Harry, assignor to The Marcelette Hair Curler Co., Inc., New York, N. Y. Hair-waver. No. 1,396,706; Nov. 8.

Neiklirk, John O., Lombard, Ill. Locomotive washout and refilling apparatus. No. 1,396,120; Nov. 8.

Nelson, Arthur, Rock Falls, Ill. Detachable handle. No. 1,396,140; Nov. 8.

Neptune, Herman P., San Diego, Calif. Pneumatic-tire pressure-gage. No. 1,396,141; Nov. 8.

Neth, George, New York, N. Y. Wire-stretcher for packing-boxes. No. 1,396,229; Nov. 8.

Neumeister, Carl L., Scotland, S. D. Straight-edge. No. 1,396,274; Nov. 8.

Newman, Earl B., Findlay, Ohio. Lighting-fixture. No. 1,396,654; Nov. 8.

Newton, Richard T., New York, N. Y. Gage. No. 1,396,655; Nov. 8.

Niebaum, Nicholas A., Johnstown, Pa. Fire-protector. No. 1,396,656; Nov. 8.

Nieuwe, John, Jacksonville, Fla. Stump-puller. No. 1,396,657; Nov. 8.

Nistri, Umberto, Rome, Italy. Method of photogrammetric survey and apparatus therefor. No. 1,396,047; Nov. 8.

Nittal, Frederick W., assignor to M. S. Company, Attleboro, Mass. Jewelry catch or clasp. No. 1,396,658; Nov. 8.

Nordfeldt, Charles B. (See Anthony, A. H., and Nordfeldt.)

Northern Equipment Company. (See Andrews, Roger W., assignor.)

Northwestern Bakers Supply Co. (See Fogelquist, Alexander E., assignor.)

Novak, Alexander, assignor of one-half to J. G. Pinnell, Douglas, Ariz. Refrigerator. No. 1,396,457; Nov. 8.

Noyes Comb Company. (See Noyes, Thomas M., assignor.)

Noyes, Thomas M., assignor to Noyes Comb Company, Binghamton, N. Y. Comb. No. 1,396,276; Nov. 8.

O'Leary, Marguerite V. (See Macdonald, Lucile R., assignor.)

Oliver, Walter E. (See Shoen, W. C., and Oliver.)

Ollivier, Jocelyn B., St. Gervais, France. Runner attachment for motor-vehicles. No. 1,396,659; Nov. 8.

Ordine, Fred., New York, N. Y. Device for digging artificial fruit. No. 1,396,660; Nov. 8.

Ormsby, Donald D. (See Logue, C. H., and Ormsby.)

Orrgor, George, East St. Louis, Ill. Aeroplane. No. 1,396,459; Nov. 8.

Osborn, Frederick W., Newark, and I. F. Webb, Elizabeth, N. J., assignors to The Singer Manufacturing Company. Filled-sack-sewing apparatus. No. 1,396,045; Nov. 8.

Otis, Spencer, Chicago, Ill. Safety washout-plug. No. 1,396,659; Nov. 8.

Owens, Charles, Chattanooga, Tenn. Tractor-plow. No. 1,396,049; Nov. 8.

Owens Company of America. (See Lindemulan, William G., assignor.)

Pace, Aladar, Cleveland Heights, Ohio. Improving ferrous metals. No. 1,396,276; Nov. 8.

Paden, William L., assignor to American Cash Register Company, Saginaw, Mich. Cash-register. No. 1,396,277; Nov. 8.

Paine Company. (See Paine, M. H., and Williams, assignors.)

Paine Company, The. (See Paine, Mathew H., assignor.)

Paine, Mathew H., Glenellyn, and W. S. Williams, Chicago, Ill., assignors to Paine Company. Anchoring device. No. 1,396,278; Nov. 8.

Paine, Mathew H., Glenellyn, and W. S. Williams, Chicago, Ill., assignors to Paine Company. Anchoring device. No. 1,396,279; Nov. 8.

Paine, Mathew H., Glenellyn, Ill., assignor to The Paine Company, Chicago, Ill. Contractible core. No. 1,396,280; Nov. 8.

Palmer, Herman D., assignor to Kissel Motor Car Company, Hartford, Wis. Oil-basin. No. 1,396,060; Nov. 8.

Palmer, William H., Cleveland, Ohio. Sanitary mouthpiece for telephone-transmitters. No. 1,396,660; Nov. 8.

Paque, Edward J., assignor to The Pullak Steel Company, Cincinnati, Ohio. Forming metal articles. No. 1,396,281; Nov. 8.

Parkhill, Frederic W. (See Barclay, M., and Parkhill.)

Parr, Henry A., New York, N. Y. Spring device for chairs. No. 1,396,661; Nov. 8.

Patterson, Carl J., and O. J. Kilburn, Jackson, Mich. Automobile-heater. No. 1,396,522; Nov. 8.

Paul, Hiram. (See Mills, S. D., and Paul, assignor.)

Pawling & Harnischfeger Co. (See Dreyer, Alfred J., assignor.)

Peace, Frederick C., Harrisburg, Pa. Demountable rim. No. 1,396,589; Nov. 8.

Peacock, Samuel, assignor, by mesne assignments, to Wheeling Steel & Iron Company, Wheeling, W. Va. Coating steel sheets with tin. No. 1,396,051; Nov. 8.

Peerless Wire Goods Company, The. (See Snyder, Frank M., assignor.)

Pearson, James M., Florence, Ala. Hulling and cleaning feeder for cotton-gins. No. 1,396,142; Nov. 8.

Pemberton, Elmer, Hyde Park, Calif. Burner. No. 1,396,281; Nov. 8.

Penn, George E., Takoma Park, Md., assignor to National Paper Can Corporation, Washington, D. C. Paper-container. No. 1,396,282; Nov. 8.

Perkins Appliance Company. (See Perkins, Julian L., assignor.)

Perkins, Julian L., West Springfield, assignor to Perkins Appliance Company, Springfield, Mass. Broach-tooth. No. 1,396,525; Nov. 8.

Perry, Clarence A., Forest Hills, N. Y. Combined counter and weighing-scale. No. 1,396,524; Nov. 8.

Perry, Searal M., Roseland, assignor of one-half to J. J. Stoll, Chicago, Ill. Vehicle-wheel. No. 1,396,283; Nov. 8.

Peterson, John E., Newark, N. J. Trimming-die. No. 1,396,230; Nov. 8.

Payser, Joseph, Mount Vernon, N. Y., assignor, by mesne assignments, to Achermann Manufacturing Company, Wheeling, W. Va. Seaming mechanism. No. 1,396,231; Nov. 8.

Pfingstelder, Robert H., Chicago, Ill. Dealcoholizing apparatus. No. 1,396,232; Nov. 8.

Phinney, Edgar E., assignor to Monroe Calculating Machine Company, New York, N. Y. Calculating-machine. No. 1,396,662; Nov. 8.

Phinney, Edgar E., West Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Crank-handle latch. No. 1,396,663; Nov. 8.

Photometric Products Corporation. (See Ladd, Lester L., assignor.)

Pieper, Henri, Liege, Belgium. Coil-retainer for dynamo-electric machines. No. 1,396,525; Nov. 8.

Pierce Arrow Motor Car Company, The. (See Fergusson, David, assignor.)

Pieters, Louise, New York, N. Y. Sanitary bedpans. No. 1,396,284; Nov. 8.

Pimpell, J. G. (See Nowak, Alexander, assignor.)

Pinkerton, Andrew, Ben Avon, assignor to American Sheet and Tin Plate Company, Pittsburgh Pa. Making high-silicon sheets and plates. No. 1,396,663; Nov. 8.

Pipeless Research Corporation. (See Bramberry, Harry M., assignor.)

Plane, Frank W., London, England. Receptacle for vaccine, paint, and the like. No. 1,396,668; Nov. 8.

Podell, Morris, New York, N. Y. Renewable fuse. No. 1,396,460; Nov. 8.

Pollak Steel Company, The. (See Paque, Edward J., assignor.)

Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-gouging and lip-cutting machine. No. 1,396,143; Nov. 8.

Popper, Isaac C., assignor to The Theros Company, New York, N. Y. Railway-switch heater. No. 1,396,664; Nov. 8.

Porter, George G., Syracuse, N. Y. Tool-post. No. 1,396,461; Nov. 8.

Pothier, Frank. (See Morin, H., and Pothier.)

Potter, Harold C., Shreveport, La. Mixing device for internal-combustion engines. No. 1,396,054; Nov. 8.

Powell, John, Elwood, Ind. Transmission-gearing. No. 1,396,526; Nov. 8.

Pressed Prism Plate Glass Company. (See Ross, Myron A., assignor.)

Prescovot, Joseph, Detroit, Mich. Resilient wheel. No. 1,396,323; Nov. 8.

Puratsky, Max, and R. D. Von Rentsch, New York, N. Y. Garment. No. 1,396,462; Nov. 8.

Raabe, Otto L., Jersey City, N. J., assignor to R. Hoe and Co., New York, N. Y. Inking mechanism for printing-machines. No. 1,396,055; Nov. 8.

Raabe, Otto L., Jersey City, N. J., assignor to R. Hoe and Co., New York, N. Y. Impression-adjusting and blanket-ironing device. No. 1,396,056; Nov. 8.

Railway Signal & Equipment Company, The. (See Stotts, Elza S., assignor.)

Ramsey, Milton W. (See Campbell, E. W., and Ramsey.)

Ratterman, Ray G., assignor to Dow Wire and Iron Works, Louisville, Ky. Automobile-bumper. No. 1,396,057; Nov. 8.

Rautenbach, Arthur, Solingen, Germany. Casting and mold therefor. No. 1,396,341; Nov. 8.

Reavel, Clyde C., Marion, Ind. Wrench. No. 1,396,590; Nov. 8.

Recker, Adolph C., Oakville, assignor to The Chase Companies, Inc., Waterbury, Conn. Fastening means for the suspension-chains of electric fixtures. No. 1,396,468; Nov. 8.

Rees, Warren C., Somerville, assignor to Aseptic Service Company, Boston, Mass. Counter-operating mechanism for coin-controlled devices. No. 1,396,343; Nov. 8.

Reiber, Edward W., Adrian, Mich. Spotlight construction. No. 1,396,284; Nov. 8.

Reid, James H., Pittsburgh, Pa., assignor to International Nitrogen Company. Making carbid. No. 1,396,058; Nov. 8.

Reid, James J., South Bend, Ind. Indicator. No. 1,396,283; Nov. 8.

Reinhardt, Peter, St. Paul, Minn. Combination heater and cooker. No. 1,396,464; Nov. 8.

Reilly, Peter C. (See Meriwether, Coleman, assignor.)

Reliance Machine & Specialty Co. (See Bartlett, Leonard, assignor.)

Remington Accounting Machine Corporation. (See Goldberg, Hyman H., now by judicial change of name Hyman Golber, assignor.)

Renstrom, Bros A., administrator. (See Renstrom, Nils A., deceased.)

Renstrom, Nils A., deceased, Omaha, Nebr., B. A. Renstrom, administrator. Sprouting grain. No. 1,396,325; Nov. 8.

Reppetto, Harvey R., assignor to Whitaker-Glessner Company, Wheeling, W. Va. Collapsible sheet-metal oven. No. 1,396,059; Nov. 8.

Reter, Warren D., Williamsonville, N. Y. Double-grip-socket wrench. No. 1,396,591; Nov. 8.

Richberg, Julius, London, England. Light-sensitive collodion-coating mixture and film. No. 1,396,592; Nov. 8.

Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. No. 1,396,665; Nov. 8.

Rice, Harold G., Chicago, Ill. Bottle-capper. (Reissue.) No. 15,222; Nov. 8.

Rice, James M., Lineville, Ala. Machine for dressing stone. No. 1,396,144; Nov. 8.

Richards, Donald W., San Jose, Calif. Folding cot. No. 1,396,593; Nov. 8.

Richardson, Bayard H., assignor to Mechane Gear Shift Co., Grand Rapids, Mich. Clutch. No. 1,396,343; Nov. 8.

Richter, George A., W. B. Van Arsdel, and D. H. White, assignors to Brown Company, Berlin, N. H. Waterproof fibrous material and making the same. No. 1,396,060; Nov. 8.

Richter, George A., W. B. Van Arsdel and D. H. White, assignors to Brown Company, Berlin, N. H. Water-resistant composition. No. 1,396,527; Nov. 8.

Richter, George A. (See Burningham, F. A., Richter, Van Arsdel, and White.)

Riddle, Karl, West Palm Beach, Fla. Flat-tire alarm. No. 1,396,284; Nov. 8.

Ridinger, Frank V., Youngstown, Ohio, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Liquid-supply system. No. 1,396,061; Nov. 8.

Ritter Dental Manufacturing Company. (See Fertig, C. W., and May, assignors.)

Rix, Edward A., Oakland, Calif. Lubricating system for fluid-compressors. No. 1,396,666; Nov. 8.

Roberts, Frank M., Sharpsburg, Pa. Mandrel for making inner tubes. No. 1,396,145; Nov. 8.

Roever, August E., Brooklyn, N. Y. Clothes-washing machine. No. 1,396,465; Nov. 8.

Roever, August E., Brooklyn, N. Y. Dish-washing machine. No. 1,396,466; Nov. 8.

Romati, Cesare, Turin, Italy. Fastening for attaching braces and for other purposes. No. 1,396,344; Nov. 8.

Ross, Myron A., Chicago, Ill., assignor to Pressed Prism Plate Glass Company, Morgantown, W. Va. Handling abrasive material. No. 1,396,286; Nov. 8.

Ross, Robert C., Wilmette, assignor of one-half to S. Silverman, Chicago, Ill. Arch-support. No. 1,396,528; Nov. 8.

Rornbeck, Claude, Chicago Heights, assignor to American Manganese Steel Company, Chicago, Ill. Tractor-link. No. 1,396,285; Nov. 8.

Rotter, Max, Milwaukee, Wis., assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Marine-power installation. No. 1,396,287; Nov. 8.

Row, James, and C. F. Smith, Holborn, London, England. Clothes rack or hanger. No. 1,396,662; Nov. 8.

Roystone, William H., New York, N. Y. Sales-registration card. No. 1,396,288; Nov. 8.

Rudolph, Walter J., assignor to The Imperial Brass Manufacturing Company, Chicago, Ill. Pump for priming, &c. No. 1,396,529; Nov. 8.

Rugh, Harry O., Chicago, Ill. Novelty post-card. No. 1,396,698; Nov. 8.

Ruhmann, Grover C. (See Ryan, W. C., and Ruhmann.)

Ruppel, Henry, Cleveland, Ohio, assignor to American Stove Company, St. Louis, Mo. Blue-flame oil-burner. No. 1,396,594; Nov. 8.

Russell, Fred E. (See Faltermayer, Harry, assignor.)

Ryan, William C., and G. C. Ruhmann, Kensely, Tex. Insect-catcher. No. 1,396,345; Nov. 8.

Sachsel, Filartus, Kansas City, Mo. Shock-absorber for automobiles. No. 1,396,595; Nov. 8.

Sampson, Philip H., Waubegan, Ill. Railway-track construction. No. 1,396,596; Nov. 8.

Sande, Herman B., and O. Moessing, assignor to Moore Electric Corporation, Chicago, Ill. Hair-clipper. No. 1,396,599; Nov. 8.

Sanders, Harold C., Newport, Wales. Electrical apparatus for heating liquids. No. 1,396,597; Nov. 8.

Sanderson, Arthur L., Paluxy, Tex. Wire-stretcher. No. 1,396,062; Nov. 8.

Sawa, Josef. (See Gepack, Paul, assignor.)

Scheim, Albert N., assignor to L. Levinson, Philadelphia, Pa. Furniture-polish. No. 1,396,346; Nov. 8.

Schlosser, Arthur, New York, N. Y. Advertising-sign. No. 1,396,467; Nov. 8.

Schmid, Julius. (See Steiner, Hans, assignor.)

Schmidt, B. L., Company. (See Joseph, Harry F., assignor.)

Schmidt, Emil P., Boston, Mass. Canopy-support for canoes and other boats. No. 1,396,063; Nov. 8.

Schneider & Cie. (See Schneider, Eugène, assignor.)

Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Apparatus for increasing the range of elevation in single-trail guns. No. 1,396,064; Nov. 8.

Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Motor-car having four driving-wheels for the transport of guns. No. 1,396,598; Nov. 8.

Schneider, Eugène, assignor to Schneider & Cie., Paris, France. Motor-car having four driving-wheels for the transport of guns. No. 1,396,599; Nov. 8.

Schofield, Frederick C., assignor to Comas Cigarette Machine Company, Salem, Va. Coupon or card feeding device. No. 1,396,531; Nov. 8.

Schrader, Herbert, Wheeling, W. Va. Sanitary can. No. 1,396,065; Nov. 8.

Schroedter, Herman M. (See Howell, Evelyn L. V., assignor.)

Schwars, Richard E., Royal Oak township, Oakland county, Mich. Shingle-machine. No. 1,396,466; Nov. 8.

Scott, G. H., Machine Company. (See Hafvenmeister, William C., assignor.)

Scott, Harry E., assignor to The Brown Hoisting Machinery Company, Cleveland, Ohio. Means for braking cranes. No. 1,396,532; Nov. 8.

Scott, Walter B., Marblehead, Mass. Toy. No. 1,396,289; Nov. 8.

Seaman, Halleck W. (See Crawford, Albert G., assignor.)

Seely, Thomas H., Malden, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Thread gripping and cutting device for shoe-sewing machines. No. 1,396,066; Nov. 8.

Segschneider, Gustav, Yonkers, N. Y. Bread-slicing machine. No. 1,396,290; Nov. 8.

Setkowski, Edward, Clifton, N. J. Locking device for vehicles. No. 1,396,067; Nov. 8.

Shambow Shuttle Company. (See Brouillette, Albert J., assignor.)

Sharples Separator Co., The. (See McFadden, James R., assignor.)

Shaw, Bruce A., Oak Park, Ill. Automatic fowl-spray. No. 1,396,533; Nov. 8.

Shaw, Frank H., Chicago, Ill., assignor to Kalamazoo Loose Leaf Binder Co., Kalamazoo, Mich. Desk. No. 1,396,291; Nov. 8.

Sheck, Oscar, assignor to Koehring Machine Company, Milwaukee, Wis. Driving means for concrete-distributers. No. 1,396,534; Nov. 8.

Sheets, Harry A., Jr., New York, N. Y. Vulcanizer-igniter. No. 1,396,068; Nov. 8.

Sheets, Harry A., Jr., New York, N. Y. Vulcanizer. No. 1,396,069; Nov. 8.

Shields, Frank S., East Cleveland, assignor, by mesne assignments, to The Clark & Mesker Milling Machine Company, Cleveland, Ohio. Relieving-machine. No. 1,396,292; Nov. 8.

Shimer, Elmer S., Milton, Pa. Lead-pencil. No. 1,396,535; Nov. 8.

Shindoll, William H., Arlington, S. D. Automatic tally for dispensing-faucets. No. 1,396,536; Nov. 8.

Shorb, William A., assignor to Leader Iron Works, Decatur, Ill. Separating-trap. No. 1,396,384; Nov. 8.

Shoap, Walter C., Milburn township, Essex county, and W. E. Oliver, Woodcliff-on-Hudson, N. J., assignors to Autographic Register Company, New York, N. Y. Paper-feed device for autographic registers. No. 1,396,070; Nov. 8.

Sibley, Amos H., Ship Bottom, N. J. Artificial teeth. No. 1,396,071; Nov. 8.

Silver, Herman, assignor to The Louden Machinery Company, Fairfield, Iowa. Ventilating-cupola for barns and the like. (Reissue.) No. 15,223; Nov. 8.

Silverman, Samuel. (See Rees, Robert C., assignee.)

Simi, Bohuslav, Chicago, Ill. Dental amalgam or alloy mixer. No. 1,396,537; Nov. 8.

Simmons Company. (See Travis, Don C., assignor.)

Simms, Irwin B., Stockton, Calif. Combination lock and switch. No. 1,396,667; Nov. 8.

Simplex Pneumatic Tire Company. (See Emeno, William H., assignor.)

Simpson, Alfred M., Honolulu, Hawaii. Rotary cutter. No. 1,396,600; Nov. 8.

Singer Manufacturing Company, The. (See Herr, Park A., assignor.)

Singer Manufacturing Company, The. (See Ostrom, F. W., and Webb, assignors.)

Sitzler, Guy A., Tacoma, assignor to Dutho Rubber Company, Pierce county, Wash. Three-piece mold. No. 1,396,293; Nov. 8.

Smiley, Elmer, Moravia, Iowa. Shoe-capping last. No. 1,396,146; Nov. 8.

Smith, Charles F. (See Row, J., and Smith.)

Smith, David T., Mead, Nebr. Gun-searchlight. No. 1,396,147; Nov. 8.

Smith, Francis L., Denver, Colo. Tip for shoe-laces. No. 1,396,601; Nov. 8.

Smith, Richard H., Keighley, England. Shuttle-actuating mechanism for looms. No. 1,396,602; Nov. 8.

Smith Scale Company, The. (See Smith, Walter S., assignor.)

Smith, Walter S., assignor to The Smith Scale Company, Columbus, Ohio. Weighing-scale. No. 1,396,668; Nov. 8.

Snow, Eugene A., River Forest, Ill. Focusing-socket for electric lamps. No. 1,396,294; Nov. 8.

Snow, Isaac, Lawrence, assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. No. 1,396,669; Nov. 8.

Snow, Isaac, Lawrence, assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. No. 1,396,670; Nov. 8.

Snow, Isaac, Lawrence, assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. No. 1,396,671; Nov. 8.

Snow, Isaac, Lawrence, assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. No. 1,396,672; Nov. 8.
Snyder, Frank M., assignor to The Peerless Wire Goods Company, La Fayette, Ind. Supporting-leg for superposing trays. No. 1,396,148; Nov. 8.
Societe Anonyme des Etablissements L. Blériot. (See Bossu, Pierre, assignor.)
Soper, Ellis C., Chattanooga, Tenn. Treatment of phosphates. No. 1,396,149; Nov. 8.
Sparks, Charles, assignor to Kellogg Switchboard & Supply Co., Chicago, Ill. Relay. No. 1,396,072; Nov. 8.
Speed-Up Wrench and Manufacturing Company. (See Hand, John G., assignor.)
Spierer, Léon, Geneva, Switzerland. Bearing. No. 1,396,295; Nov. 8.
Sprague, Douglas, Mount Vernon, N. Y. Reel. No. 1,396,236; Nov. 8.
Springer, William J., Detroit, Mich. Pump. No. 1,396,296; Nov. 8.
St. Pierre, Octave J., Chicago, Ill. Game. No. 1,396,073; Nov. 8.
Stables, Arthur, Los Angeles, Calif. Cotton-list collector. No. 1,396,675; Nov. 8.
Stacey, Cyril F. (See Molloy, Edward, assignor.)
Standard Car Truck Company. (See Barber, Franklin L., assignor.)
Standard Oil Company. (See Branaky, Oscar E., assignor.)
Standard Parts Company, The. (See Dahlquist, Charles S., assignor.)
Stearly, Hattie, administratrix. (See Taggart, William P.)
Steele, Archie W., Bloomfield, assignor to W. J. Hawkins, Montclair, N. J. Electric fuse. No. 1,396,297; Nov. 8.
Steele, Mary J., San Francisco, Calif. Dispensing-container. No. 1,396,469; Nov. 8.
Steiner, Hans, Vienna, Austria, assigno rte J. Schmid, New York, N. Y. Producing imitations of galalith, celluloid, and the like. No. 1,396,075; Nov. 8.
Stemmons, Beverly L., Charlotte, N. C., assignor to General Electric Company. Protective device. No. 1,396,538; Nov. 8.
Stevens, William C., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Circuit-controller. No. 1,396,694; Nov. 8.
Stewart, Alexander, Waupaca, Wis. Clamshell-dumping device. No. 1,396,847; Nov. 8.
Stewart, Benjamin, Des Moines, Iowa. Glove and mitten structure. No. 1,396,539; Nov. 8.
Stewart-Warner Speedometer Corporation. (See Risinger, Frank V., assignor.)
Stewart-Warner Speedometer Corporation. (See Wood, Andrew C., assignor.)
Stice, Fred W., Tama, Iowa. Coin-controlled mechanism. No. 1,396,285; Nov. 8.
Stickney, Burnham C., Elisabeth, N. J., assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. No. 1,396,348; Nov. 8.
Stiglitz, William H., Louisville, Ky. Drain-cock-operating device. No. 1,396,540; Nov. 8.
Stockland, Arthur, Minneapolis, Minn. Screw-cap wrench. No. 1,396,298; Nov. 8.
Stoll, John J. (See Perry, Searal M., assignor.)
Stolte, Florence P. (See Doyle, William F., assignor.)
Stotts, Elsa S., assignor to The Railway Signal & Equipment Company, Des Moines, Iowa. Adjustable wheel-anchor. No. 1,396,076; Nov. 8.
Stotts, Elsa S., assignor to The Railway Signal & Equipment Company, Des Moines, Iowa. Drain-valve trap. No. 1,396,077; Nov. 8.
Stromberg, Oscar, Los Angeles, Calif. Trap-nest. No. 1,396,556; Nov. 8.
Stumpenhorst, John A., Wilkinsburg, Pa. Motor-vehicle driving mechanism. No. 1,396,074. Nov. 8.
Submarine Signal Company. (See Williams, Robert L., assignor.)
Summerfield, Benard, Chicago, Ill. Detachable heel. No. 1,396,299; Nov. 8.
Sylvestre, Charles, Winnepeg, Manitoba, Canada. Gas-controlling device for linotype-machines. No. 1,396,705; Nov. 8.
Taggart, William P., deceased, Reading, by H. Stearly, administratrix, Philadelphia, Pa., assignor to The United States Coal Manufacturing Company. Making briquets and products thereof. No. 1,396,603; Nov. 8.
Taylor, Henry H. (See Hammond, M. B., and Taylor.)
Taylor, Thomas, Chicago, Ill. Golf-club. No. 1,396,470; Nov. 8.
Taylor, Thos. P., Company, The. (See Hammond, M. B., and Taylor, assignors.)
Taper, Robert T., *et al.* (See Anderson, George A., assignor.)
Teuniss, William C., Grand Rapids, Mich. Phonograph-brake. No. 1,396,471; Nov. 8.
Texas Company, The. (See Hull, Burton E., assignor.)
Theros Company, The. (See Popper, Isaac C., assignor.)
Thomasson, Adam P., Chicago, Ill. Fuel-saving device. No. 1,396,472; Nov. 8.
Thomson, Elihu, Lynn, Mass., assignor to General Electric Company. Electric-battery system and operating the same. No. 1,396,541; Nov. 8.
Thompson, Charles W., Pensacola, Fla. Display-rack. No. 1,396,300; Nov. 8.
Thompson, Edward C. and W. H., assignors of one-fourth to R. McNair and one-fourth to C. H. Long, Seattle, Wash. Wrench. No. 1,396,387; Nov. 8.
Thompson, Joseph J., Los Angeles, Calif. Drilling-rig. No. 1,396,473; Nov. 8.
Thompson, William H. (See Montilije, Isidore, assignor.)
Thompson, William H. (See Thompson, Edward C. and W. H.)
Thum, Rudolf, Baldwin, N. Y. Gun. No. 1,396,849; Nov. 8.
Tibbetts, Raymond F., Chicago, Ill. Shaving-brush. No. 1,396,474; Nov. 8.
Tone, Fred I., assignor to Child H. Wills, Detroit, Mich. Steering mechanism for automobiles. No. 1,396,604; Nov. 8.
Tracey, Daniel F., assignor to The Loping Horse & Novelty Co., Huntington, W. Va. Hobbyhorse. No. 1,396,475; Nov. 8.
Tracy, David D., Jackson, Mich. Sectional conduit. No. 1,396,301; Nov. 8.
Trailmobile Company, The. (See Morrison, James, assignor.)
Travis, Doa C., assignor to Simmons Company, Kenosha, Wis. Bedstead. No. 1,396,476; Nov. 8.
Tufts, Robert B., Kirkwood, Ga. Installation of concrete footings for piles and the like. No. 1,396,542; Nov. 8.
Turnbull, David H., Mishawaka, Ind. Axle-gaging device. No. 1,396,477; Nov. 8.
Turney, Albert, Kansas City, Mo. Sash-lock. No. 1,396,478; Nov. 8.
Tyden, Emil, Evanston, Ill. Bag-tie seal-lock. No. 1,396,479; Nov. 8.
U. S. Industrial Alcohol Co. (See Backhaus, Arthur A., assignor.)
U. S. Industrial Alcohol Co. (See Backhaus, A. A., and Haner, assignors.)
U. S. Industrial Alcohol Co. (See Cochrane, William F., assignor.)
U. S. Industrial Alcohol Co. (See Haner, Carl, Jr., assignor.)
U. S. Industrial Alcohol Co. (See Whitaker, Milton C., assignor.)
Underwood Computing Machine Company. (See Stickney, Burnham C., assignor.)
Unger, Paul O. (See Fargo, C. R., and Unger.)
Union Switch & Signal Company, The. (See Dunham, Charles W., assignor.)
United Shoe Machinery Corporation. (See Ashton, Orrell, assignor.)

Yale Products Co., Fort Worth, Tex. Pickles. No. 120,470; Nov. 8.

York Milk Machinery Company, York, Pa. Bottle-washing machine. No. 149,309; Nov. 8.

Youth-Gland Chemical Laboratories, Ltd., Chicago, Ill. Medicine for lack of vitality, premature old age, and to stimulate energy, &c. No. 148,008; Nov. 8.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 8TH DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abrading device. W. E. Laird. No. 1,396,585; Nov. 8.
Abrasive material, Handling. M. A. Rees. No. 1,396,286; Nov. 8.
Acid, Obtaining sodium salt from hydrocarbon monosulfonic. R. M. Cole. No. 1,396,320; Nov. 8.
Acids, Producing organic. A. A. Backhaus. Nos. 1,396,008-10; Nov. 8.
Adding-machine. J. Magnus. No. 1,396,716; Nov. 8.
Advertising device. C. W. King. No. 1,396,640; Nov. 8.
Aerial apparatus. J. T. C. Williams. No. 1,396,469; Nov. 8.
Aerial torpedo or bomb. E. W. Johnson. No. 1,396,634; Nov. 8.
Aeroplane. G. Ortgier. No. 1,396,459; Nov. 8.
Aeroplane-wings, Joint for. A. H. G. Fokker. Nos. 1,396,176-7; Nov. 8.
Air-brakes, Graduated-release device for. G. A. Anderson. No. 1,396,392; Nov. 8.
Alarm: *See*—
Fire-alarm.
Alum, Making potash. T. H. Wright. No. 1,396,675; Nov. 8.
Ammonia, Producing. I. W. Cedarberg. No. 1,396,557; Nov. 8.
Amusement device. E. L. Bowman. No. 1,396,247; Nov. 8.
Anchor, Bolt-. C. S. Girvan. No. 1,396,569; Nov. 8.
Anchoring device. M. H. Paine and W. S. Williams. No. 1,396,278-9; Nov. 8.
Annular bodies, Feeding device for. A. G. E. Hultgren. No. 1,396,116; Nov. 8.
Annunciator. B. E. Eshigting. No. 1,396,636; Nov. 8.
Antiskid device. G. Heap. No. 1,396,207; Nov. 8.
Antiskid device. C. A. Prince. No. 1,396,567; Nov. 8.
Anvil. W. Dorman. No. 1,396,679; Nov. 8.
Arch-support. P. Dumbo. No. 1,396,323; Nov. 8.
Arch-support. E. C. Ross. No. 1,396,526; Nov. 8.
Armor-winding machine. H. Hansen. No. 1,396,197; Nov. 8.
Article-holder. M. W. Holcomb. No. 1,396,513; Nov. 8.
Autographic registers, Paper-feed device for. W. C. Sheup and W. E. Oliver. No. 1,396,070; Nov. 8.
Automobile-bumper. E. G. Davison. No. 1,396,026; Nov. 8.
Automobile-bumper. F. Ellis. No. 1,396,628; Nov. 8.
Automobile-bumper. C. H. Hathaway. No. 1,396,201; Nov. 8.
Automobile-bumper. E. G. Ratterman. No. 1,396,057; Nov. 8.
Automobile-heater. C. J. Patterson and O. J. Kilburn. No. 1,396,522; Nov. 8.
Automobile-lock. J. W. Barwick. No. 1,396,091; Nov. 8.
Automobile-steering-column lock. W. H. Dunn. No. 1,396,508; Nov. 8.
Automobiles, Adjustable knuckle-joint for. F. Gieseke. No. 1,396,324; Nov. 8.
Automobiles, Brake-actuating mechanism for. J., C. C., and H. Williams. No. 1,396,488; Nov. 8.
Automobiles, Door for. J. J. McGuire. No. 1,396,448; Nov. 8.
Automobiles, Latch for hoods of. F. Mathews. No. 1,396,704; Nov. 8.
Automobiles, &c., Radiator for. H. N. Jensen. No. 1,396,663; Nov. 8.
Automobiles, Shipping-standard for. F. H. Curry. No. 1,396,360; Nov. 8.
Automobiles Steering mechanism for. F. I. Tone. No. 1,396,604; Nov. 8.
Axle. C. S. Dahlquist. No. 1,396,025; Nov. 8.
Axle adjustment device, Stub-. O. E. Kopplin. No. 1,396,128; Nov. 8.
Axle-gaging device. D. H. Turnbull. No. 1,396,477; Nov. 8.
Bag-tie seal-lock. E. Tyden. No. 1,396,479; Nov. 8.
Baller. J. P. T. Davis. No. 1,396,262; Nov. 8.
Balloon while inflated, Obtaining samples from a. R. H. Upson. No. 1,396,709; Nov. 8.
Barber's appliance. S. M. Coffman. No. 1,396,507; Nov. 8.
Battery: *See*—
Storage battery.
Battery-plate-burning rack. E. W. Campbell and M. W. Ramsey. No. 1,396,162; Nov. 8.
Beans, Machine for snipping string-. A. P. Wolfe. No. 1,396,080; Nov. 8.
Bearing. L. Spierer. No. 1,396,295; Nov. 8.
Bearing, Roller side. F. L. Barber. No. 1,396,014; Nov. 8.
Bearing-filling machine. L. Bartlett. No. 1,396,089; Nov. 8.
Bearings, Punch-filler for. L. Bartlett. No. 1,396,090; Nov. 8.
Bedpan, Sanitary. L. Pieters. No. 1,396,382; Nov. 8.
Bedstead. D. C. Travis. No. 1,396,476; Nov. 8.
Belt-drive, Change-speed. H. H. F. Danger. No. 1,396,168; Nov. 8.
Belt-stretcher. W. R. Waters. No. 1,396,306; Nov. 8.
Belt-stretching device. W. R. Waters. No. 1,396,305; Nov. 8.
Belts, Link for chain. R. W. Dull. No. 1,396,031; Nov. 8.
Binder, Loose-leaf. M. P. Jackson. No. 1,396,631; Nov. 8.
Bit-recovering means. J. P. T. Davis. No. 1,396,260; Nov. 8.
Blank-feeding mechanism. G. Goddu. No. 1,396,191; Nov. 8.
Block: *See*—
Dressing-block. Tile block.
Drill-block.
Blow-out boot. G. G. Williams. No. 1,396,487; Nov. 8.
Board: *See*—
Game-board.
Bomb carrying and release system. H. D. Weed. No. 1,396,150; Nov. 8.
Book and tray stand, Handy. A. G. Greenwood. No. 1,396,700; Nov. 8.
Bottle-capper. H. G. Rice. (Reissue.) No. 15,222; Nov. 8.
Box: *See*—
Match-box.
Box-opener. E. Laskowski. No. 1,396,378; Nov. 8.
Braces, &c., Fastenings for attaching. C. Romati. No. 1,396,344; Nov. 8.
Bracket-support. G. S. Bartlett. No. 1,396,548; Nov. 8.
Brake: *See*—
Electrically-operated brake. Phonograph-brake.
Hand-brake.
Breeding-crate. J. W. Corington. No. 1,396,256; Nov. 8.
Briquets and products thereof, Making. W. P. Taggart. No. 1,396,603; Nov. 8.
Broach-tooth. J. L. Perkins. No. 1,396,523; Nov. 8.
Broom-corn-tabling machine. T. K. Ladd. No. 1,396,331; Nov. 8.
Brush-holder. L. A. Merk. No. 1,396,451; Nov. 8.
Brush, Shaving-. E. F. Tibbetts. No. 1,396,474; Nov. 8.
Buckle, Belt-. S. Buchsbaum. No. 1,396,020; Nov. 8.
Building construction. I. P. Walker. No. 1,396,543; Nov. 8.
Bull-holding instrument. O. E. Hatch. No. 1,396,427; Nov. 8.
Bumper lock, Automatic-. J. J. Harrison. No. 1,396,369; Nov. 8.
Bundle-tape-applying device. T. M. Harrigan. No. 1,396,422; Nov. 8.
Burner: *See*—
Fuel-oil burner. Oil-burner.
Gas-burner.
Burner. E. Pemberton. No. 1,396,381; Nov. 8.
Butter pads, Device for making. R. Kessler. No. 1,396,488; Nov. 8.
Button or badge. C. F. Mitchel. No. 1,396,137; Nov. 8.
Cabinet and equipments therefor, Type-. M. C. Harris. No. 1,396,199; Nov. 8.
Cabinet for domestic lighting plants. B. A. Linderman. No. 1,396,223; Nov. 8.
Cabinet, Music-roll. G. Merlo. No. 1,396,378; Nov. 8.
Cabinet, Sewing-. S. A. Clark. No. 1,396,624; Nov. 8.
Cabinets, Combination record rack and ejector for. J. F. Biggs. No. 1,396,156; Nov. 8.
Cable-clamp. F. Hotchner. No. 1,396,115; Nov. 8.
Calculating-machine. H. Golber. No. 1,396,326; Nov. 8.
Calculating-machine. E. E. Phinney. No. 1,396,662; Nov. 8.
Cameras, Adjustable iris and curtain for. J. E. Leonard. No. 1,396,717; Nov. 8.
Can: *See*—
Sanitary can. Tobacco-can.
Can-covers, Drier for. F. C. Hirsch. No. 1,396,481; Nov. 8.
Can-double-seaming machine. H. H. Hood. No. 1,396,433; Nov. 8.
Can-opener. H. Coensgen. No. 1,396,254; Nov. 8.
Can-punch. J. G. Hand. No. 1,396,629; Nov. 8.
Can-soldering machine. A. Alvarez. No. 1,396,011; Nov. 8.

Cane, Collapsible. F. Kntwics. No. 1,396,372; Nov. 8.
Canoes and other boats, Canopy-support for. E. P. Schmidt. No. 1,396,063; Nov. 8.
Capetan-screw. O. A. Moore. No. 1,396,455; Nov. 8.
Car, Freight-. A. I. Glinchfield. No. 1,396,420; Nov. 8.
Carbid, Making. J. H. Edd. No. 1,396,068; Nov. 8.
Carbon and similar papers, Renewing. H. H. Buckley. No. 1,396,403; Nov. 8.
Carbon dioxid, Masks for the inhalation of. Y. Henderson. No. 1,396,429; Nov. 8.
Carbon, Production of. C. S. Bradley. No. 1,396,018; Nov. 8.
Carbureter. F. M. Furber. No. 1,396,184; Nov. 8.
Card, Sales-registration. W. H. Roystone. No. 1,396,288; Nov. 8.
Carline. F. Mathews. No. 1,396,703; Nov. 8.
Carrier: *See*—
Radiator-carrier.
Carrier, Radiator-. C. G. Hall, F. A. Devereaux, and A. R. Cobey. No. 1,396,328; Nov. 8.
Cart, Wheeling service-. L. H. Kaiser. No. 1,396,718; Nov. 8.
Cash and currency container. J. L. Davidson. No. 1,396,361; Nov. 8.
Cash-register. W. L. Paden. No. 1,396,277; Nov. 8.
Casting and mold therefor. A. Rautenbach. No. 1,396,341; Nov. 8.
Catalysis, Apparatus for. A. A. Backhaus. No. 1,396,715; Nov. 8.
Catalyzer apparatus. W. F. Cochrane. No. 1,396,358; Nov. 8.
Catalyzer apparatus. W. C. Whitaker. No. 1,396,389; Nov. 8.
Chain. C. W. Gregory. No. 1,396,701; Nov. 8.
Chains of electric batteries, Fastening means for the suspension. A. C. Becker. No. 1,396,463; Nov. 8.
Chairs, Headrest for. C. W. Fertig and A. J. May. No. 1,396,175; Nov. 8.
Chairs, Spring device for. H. A. Parr. No. 1,396,661; Nov. 8.
Check-holder. C. E. Bell. No. 1,396,499; Nov. 8.
Chuck. D. E. Carriere. No. 1,396,022; Nov. 8.
Circuit-breaker, Electrically-operated. G. A. Burnham. No. 1,396,094; Nov. 8.
Circuit-controller. W. C. Stevens. No. 1,396,694; Nov. 8.
Clamp: *See*—
Rod-clamp.
Clamp. S. Bullum. No. 1,396,353; Nov. 8.
Clamshell-dumping device. A. Stewart. No. 1,396,347; Nov. 8.
Clarifying solutions. J. A. McCaskell. No. 1,396,514; Nov. 8.
Clasp: *See*—
Safety-clasp.
Clasp. S. Buchsbaum. No. 1,396,019; Nov. 8.
Clasp, Safety-. H. V. Basley. No. 1,396,511; Nov. 8.
Cleaner: *See*—
Vacuum-cleaner.
Cleaner, Vacuum-. J. W. Diephouse. No. 1,396,263; Nov. 8.
Clip: *See*—
Laundry-clip.
Closet-seats, Sanitary appliance for. N. N. Barmeos. No. 1,396,547; Nov. 8.
Cloth-repairing machine. Press-. A. J. Furry. No. 1,396,644; Nov. 8.
Clothes rack or hanger. J. Row and C. F. Smith. No. 1,396,692; Nov. 8.
Clutch. B. E. Richardson. No. 1,396,343; Nov. 8.
Coal-tar, Treating. W. Anderson. No. 1,396,003; Nov. 8.
Coating mixture and film, Light-sensitive collodion. J. Rheinberg. No. 1,396,592; Nov. 8.
Coating steel sheets with tin. S. Peacock. No. 1,396,661; Nov. 8.
Coating substances to protect them or render them nonporous; Material or producing materials for. C. A. Cleghorn. No. 1,396,023; Nov. 8.
Cock-operating device, Drain-. W. H. Stiglitz. No. 1,396,540; Nov. 8.
Coffee-making device. J. D. Houck. No. 1,396,695; Nov. 8.
Coin-controlled devices, Counter-operating mechanism for. W. C. Rees. No. 1,396,342; Nov. 8.
Coin-controlled mechanism. F. W. Stice. No. 1,396,395; Nov. 8.
Collar. J. W. Hess and F. S. Hodgins. No. 1,396,204; Nov. 8.
Collar-link. E. W. Johnson. No. 1,396,041; Nov. 8.
Collar, Soft. J. W. Fischer. No. 1,396,413; Nov. 8.
Comb. T. M. Noyes. No. 1,396,275; Nov. 8.
Compasses. P. Gepack. No. 1,396,417; Nov. 8.
Composition. A. J. Baerwinkle. No. 1,396,495; Nov. 8.
Compressor, Power-operated. F. Ackerman and C. W. Frees. No. 1,396,331; Nov. 8.
Compressors, Lubricating system for fluid-. R. A. Bix. No. 1,396,666; Nov. 8.
Concrete construction. R. A. Megenity. (Reissue.) No. 15,221; Nov. 8.
Concrete-distributers, Driving means for. O. Sheck, No. 1,396,534; Nov. 8.
Condenser, Variable. W. Dubilier. No. 1,396,030; Nov. 8.
Conduit, Sectional. D. D. Tracy. No. 1,396,301; Nov. 8.
Connecting-rod. E. H. Jackson. No. 1,396,485; Nov. 8.
Container, Dispensing-. M. J. Steele. No. 1,396,469; Nov. 8.
Cooker, Camper's. A. B. Wiley. No. 1,396,613; Nov. 8.
Cooking-retort. F. B. Donnellan. No. 1,396,266; Nov. 8.
Core, Contractible. M. H. Paine. No. 1,396,280; Nov. 8.
Costume, Sport-. M. E. Heinrich. No. 1,396,203; Nov. 8.
Cot, Folding. D. W. Richards. No. 1,396,593; Nov. 8.
Cotton-ging, Hulling and cleaning feeder for. J. M. Pearson. No. 1,396,142; Nov. 8.
Cotton, linen, or similar threads, Machine for splicing and piecing. A. Bennett. No. 1,396,618; Nov. 8.
Cotton-lint collector. A. Stables. No. 1,396,673; Nov. 8.
Cotton-picking apparatus. A. D. Alvis. No. 1,396,012; Nov. 8.
Coupon or card feeding device. F. C. Schofield. No. 1,396,531; Nov. 8.
Cuff, Reversible. J. J. Long. No. 1,396,643; Nov. 8.
Cup, Shaving-. S. Dorey. No. 1,396,561; Nov. 8.
Cranes, Means for braking. H. E. Scott. No. 1,396,532; Nov. 8.
Crushing. G. Johnston. No. 1,396,712; Nov. 8.
Cup: *See*—
Shaving-cup.
Current-distributing acts against temporary interruptions, System for protecting electric-. M. Hochstadter. No. 1,396,112; Nov. 8.
Current or tide motor. G. P. A. Weisenborn. No. 1,396,600; Nov. 8.
Current vibratory motor, Direct-. L. B. McDonald. No. 1,396,336; Nov. 8.
Cut-out, Exhaust. E. R. Draver. No. 1,396,410; Nov. 8.
Cutter: *See*—
Rotary cutter.
Cutter, Rotary. A. M. Simpson. No. 1,396,600; Nov. 8.
Cutting-tool. A. R. Fors. No. 1,396,180; Nov. 8.
Dealcoholizing apparatus. E. H. Faugfelder. No. 1,396,232; Nov. 8.
Demonstrating device. E. P. Moffit. No. 1,396,453; Nov. 8.
Dental amalgam or alloy mixer. B. Simi. No. 1,396,587; Nov. 8.
Derrick. M. Burke. No. 1,396,250; Nov. 8.
Design, Reproducing. J. W. Aston. No. 1,396,398; Nov. 8.
Desk. F. H. Shaw. No. 1,396,291; Nov. 8.
Desk-receptacle. A. Martin. No. 1,396,538; Nov. 8.
Despatch apparatus, Pneumatic. J. G. Maclaren. No. 1,396,449; Nov. 8.
Detachable handle. A. Nelson. No. 1,396,140; Nov. 8.
Die, Trimming. J. E. Peterson. No. 1,396,590; Nov. 8.
Direction-indicator. C. A. Warring. No. 1,396,394; Nov. 8.
Disintegrating-machine. T. Gilmore, Jr. No. 1,396,168; Nov. 8.
Display-folder. F. X. List. No. 1,396,224; Nov. 8.
Display-sign. C. F. Boettcher. No. 1,396,245; Nov. 8.
Display-stand. G. W. Day. No. 1,396,027; Nov. 8.
Distances, Device for estimating. R. L. Williams. No. 1,396,491; Nov. 8.
Distillery waste, Treating. A. A. Backhaus and C. Hiemer, Jr. No. 1,396,006; Nov. 8.
Distillery waste, Treating. A. A. Backhaus. No. 1,396,007; Nov. 8.
Distillery waste, Treating. C. Haner, Jr. No. 1,396,368; Nov. 8.
Doll, Walking. H. H. Coleman. No. 1,396,521; Nov. 8.
Door, Flexible. A. E. Fogelquist. No. 1,396,414; Nov. 8.
Door-silencer. G. E. Damiani. No. 1,396,167; Nov. 8.
Door-strip. J. G. Wright and H. F. Bennett. No. 1,396,085; Nov. 8.
Dower and self-feeder, Automatic. J. W. Corlington. No. 1,396,237; Nov. 8.
Dough-mixing apparatus. W. A. Darrah. No. 1,396,469; Nov. 8.
Draft-equaliser. W. O. Heath. No. 1,396,202; Nov. 8.
Drain-pan. W. I. Garrett. No. 1,396,416; Nov. 8.
Drawbar. N. C. Bennett. No. 1,396,549; Nov. 8.
Drawer-slide. J. G. Wright. No. 1,396,684; Nov. 8.
Dressing-block. G. A. Montgomery. No. 1,396,540; Nov. 8.
Drill-block. H. Faltermayer. No. 1,396,509; Nov. 8.
Drilling-rig. J. J. Thompson. No. 1,396,475; Nov. 8.
Dry-cell-tamping apparatus. H. T. Lang. No. 1,396,662; Nov. 8.
Dumps, Automatic gooseneck-releaser for crossover tipple-. A. Kuretich. No. 1,396,127; Nov. 6.
Dust-recovering machine. G. A. Giesaler. No. 1,396,126; Nov. 8.
Dynamo-electric machine. R. W. Myers. No. 1,396,521; Nov. 8.
Dynamo-electric machines, Coil-retainer for. H. Finger. No. 1,396,595; Nov. 8.
Dyestuff and making same, Green. V. Villiger and H. von Kraussichsfeldt. No. 1,396,483; Nov. 8.
Earth-boring machine. C. S. Corrigan. No. 1,396,635; Nov. 8.
Educational device. E. L. Mears. No. 1,396,579; Nov. 8.
Electric-battery system and operating the same. E. Thomson. No. 1,396,541; Nov. 8.
Electric furnace. W. Lohrey. No. 1,396,374; Nov. 8.
Electric motor. L. R. McDonald. No. 1,396,334; Nov. 8.
Electric rotating furnace. C. E. Cornelius. No. 1,396,617; Nov. 8.
Electric signal-switch. C. C. Bagnell. No. 1,396,698; Nov. 8.
Electric signal system, Clock-Controlled. J. F. Hinlocher. No. 1,396,510; Nov. 8.
Electric system. A. J. Dreyer. No. 1,396,101; Nov. 6.

Electrical apparatus. G. Fascioli. No. 1,396,543; Nov. 8.
Electrical distribution, System of. L. Lyndon. No. 1,396,446; Nov. 8.
Electrical switches, Metal box or receptacle for. B. D. Morton. No. 1,396,434; Nov. 8.
Electrical system. C. E. Young. No. 1,396,309; Nov. 8.
Electrical tank-gage. E. C. Bartlett and J. E. Allison. No. 1,396,155; Nov. 8.
Electrically-operated brake. E. V. Hartford. No. 1,396,426; Nov. 8.
Elevator: *See*—
Casing-elevator.
Elevator, Casing-. A. J. Boyter. No. 1,396,317; Nov. 8.
Elevator, conveyer, and crane. A. Godin. No. 1,396,193; Nov. 8.
Emulsions, Apparatus for producing. J. B. McFadden. No. 1,396,376; Nov. 8.
Engine: *See*—
Gas-engine.
Internal-combustion engine.
Engine-starter. W. L. McGrath. Nos. 1,396,517-10; Nov. 8.
Engine-starter. M. P. Whitney. Nos. 1,396,695-6; Nov. 8.
Engine starters, Carbureted-air distributer for explosive-. E. Dumanoir. No. 1,396,322; Nov. 8.
Engine-tester. F. Montilio. No. 1,396,454; Nov. 8.
Engines, Apparatus for cranking or starting internal-combustion. R. A. Miller-Argue. No. 1,396,647; Nov. 8.
Engines, Mixing device for internal-combustion. H. C. Potter. No. 1,396,054; Nov. 8.
Engines, Starter for internal-combustion. McK. Barclay and F. W. Parkhill. No. 1,396,497; Nov. 8.
Engines, Stove for intake-manifolds of internal-combustion. S. I. Febete. No. 1,396,263; Nov. 8.
Evaporator-heating-unit-removing attachment. S. E. Donnelly. No. 1,396,316; Nov. 8.
Exercises and weighing-scale, Combined. C. A. Perry. No. 1,396,524; Nov. 8.
Fastening device. S. G. Watt. No. 1,396,238; Nov. 8.
Faucets, Automatic tally for dispensing-. W. H. Shindell. No. 1,396,536; Nov. 8.
Filing-cabinet. P. F. Williams. No. 1,396,490; Nov. 8.
Filtering and cleansing composition. H. R. Bloomfield. No. 1,396,244; Nov. 8.

Shoe-polishes, kid-cleaners, and leather-dressings. Panrex Manufacturing Co. No. 151,560; Nov. 8.
Shoes. B. I. J. Stam. No. 146,038; Nov. 8.
Shoes, Boys' fabric and leather. E. Byrnes. No. 144,126; Nov. 8.
Shoes of leather, Boys'. Brown Shoe Company. No. 148,118; Nov. 8.
Shoes for children, Leather. Sanger Brothers. No. 147,849; Nov. 8.
Shoes, Ladies'. Smaltz-Goodwin Company. No. 146,036; Nov. 8.
Shoes, Leather. Hoerr-Adam Shoe Company. No. 147,783; Nov. 8.
Sheeting, sheets, and pillow-cases. Carter Dry Goods Co. No. 152,739; Nov. 8.
Sheets and pillow-cases. Ely & Walker Dry Goods Company. No. 150,141; Nov. 8.
Sheets and pillow-cases. Ely & Walker Dry Goods Company. No. 152,121; Nov. 8.
Signs, Traveling-belt. Odle Brothers. No. 149,419; Nov. 8.
Soap, Toilet. Los Angeles Soap Co. No. 152,259; Nov. 8.
Soap, Laundry. Los Angeles Soap Co. No. 152,265; Nov. 8.
Soaps, metal-polish, leather-dressing, &c. Sherwin-Williams Company. No. 137,046; Nov. 8.
Stove-polish. Kitchen Products Co. No. 152,508; Nov. 8.
Sugar, table and cooking syrups, and molasses. Salsburg Refining Company. No. 146,466; Nov. 8.
Suits, trousers, raincoats, &c., Men's and boys'. I. Frank. No. 147,158; Nov. 8.
Sweaters, jerseys, and baseball-suits. A. G. Spalding & Bros. No. 147,261; Nov. 8.
Sweaters, sweater-coats. Boynton Mills. No. 143,152; Nov. 8.
Syrup terebene compound. Ohio Valley Drug Company. No. 151,328; Nov. 8.
Syrups and flavorings and beverages made therefrom, Non-alcoholic, non-cereal maltless. McDaniel Drug Company. No. 123,213; Nov. 8.
Tanks, Metallic. Amco Sales Corporation. No. 139,601; Nov. 8.
Teats for feeding-bottles, baby-soothers, &c. S. Maw, Son and Sons Limited. No. 152,084; Nov. 8.
Textile machinery, Thread guides for. Mitchell-Bissell Company. No. 153,513; Nov. 8.
Tile and porcelain cleanser. Grady Mfg. Co. No. 152,011; Nov. 8.
Tires, Compound for sealing punctures and slow leaks in. Clinton & Cameron. No. 150,731; Nov. 8.
Toilet articles. Hannibal Pharmacal Company. No. 150,314; Nov. 8.
Toilet preparation. M. D. Billingsley. No. 141,940; Nov. 8.
Toilet preparations. Kailah Pharmacy. No. 150,150; Nov. 8.
Toilet-tweezers and finger-nail files. San Antonio Drug Co. No. 142,421; Nov. 8.
Tonic and blood preparation, General. A. C. Wilson. No. 150,837; Nov. 8.
Tonic, Female. National Herb Medicine Company of Missouri. No. 150,199; Nov. 8.
Tonic, General. E. Y. McCrackin. No. 140,344; Nov. 8.
Toy balloons, toy rubber balls, and rubber novelties. Toycraft Rubber Co. No. 141,475; Nov. 8.
Toys, particularly toy figures whittled out of wood, &c. K. W. Vidor. No. 131,679; Nov. 8.
Trusses for hernia, shoulder-braces, arch-supports, and abdominal supporters. L. M. Rehthaler. No. 133,496; Nov. 8.
Trypanocid. Société Chimique des Usines du Rhone. No. 151,484; Nov. 8.
Undergarments, One-piece women's textile fabric. C. L. Motta. No. 146,384; Nov. 8.
Union-suits and sleeping-garments, Children's textile. Thanhouser & Weiller. No. 147,379; Nov. 8.
Velvets in the piece. Bennett and Aspden Company. No. 141,761; Nov. 8.
Washing-powder. Los Angeles Soap Co. No. 152,266; Nov. 8.
Waterproofing straw, paper, and protecting brass, &c., from tarnish, Preparation for. J. E. Sims. No. 149,828; Nov. 8.
Wearing-apparel. A. De Pinna Co. No. 141,418; Nov. 8.
Window attachment for carrying and adjusting shades. Ventalite Shade Regulator Company. No. 131,455; Nov. 8.
Wiping, polishing, and cleaning cloths. Massasoit Manufacturing Company. No. 152,134; Nov. 8.
Wool-oil. U. S. Oil & Supply Co. No. 141,611; Nov. 8.
Wrenches. Shuster Engineering Corporation. No. 149,782; Nov. 8.
Wrenches, tool-holders, lathe-dogs, clamps. J. H. Williams & Co. No. 150,382; Nov. 8.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 8, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 2: 1,396,408
61: 1,396,192
2— 60: 1,396,204
1,396,413
79: 1,396,643
83: 1,396,249
102: 1,396,230
113: 1,396,431

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 15TH DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aannerud, Sigurd A., Asker, near Christiania, and B. F. Halvorsen, assignors to Norsk Hydro-Elektrisk Kvaelstofaktiemelskab, Christiania, Norway. Impregnating composition and the production thereof. No. 1,397,197; Nov. 15.

Abel, John W., Chicago, Ill. Rope-holder. No. 1,397,120; Nov. 15.

Adams, Granville, Hamilton, Ohio. Tie-plate and clamp. No. 1,396,805; Nov. 15.

Adams, James V., Yowell, Tex. Cutter and roller. No. 1,397,391; Nov. 15.

Adamson, David R., Brooklyn, N. Y. Violin-playing attachment for pianos, pipe-organs, or similar instruments. No. 1,397,479; Nov. 15.

Akitt, Norman B. (See Peters, John J., assignor.)

Aktiebolaget C. E. Johansson. (See Westerberg, Carl A., assignor.)

Aktiebolaget Svenska Kullagerfabriken. (See Palmgren, Nils A., assignor.)

Albany Boot Corporation. (See Gardner, Elliott, assignor.)

Albi, Frank. (See Copelli, A., and Albi.)

Alchin, Albert E., Perth Amboy, N. J. Machine for cutting blocks into smaller sizes. No. 1,397,198; Nov. 15.

Alldis, Frederick L. (See Crosby, O. J., and Alldis.)

Allen, Arthur M., New Brighton, N. Y. Multiple-geared velocipede. No. 1,397,068; Nov. 15.

Almstrum, Edwin B., Grand Island, Nebr. Chip-catcher for tools. No. 1,396,909; Nov. 15.

Amend, George C., Des Moines, Iowa. Combined cooler display-case and refrigerator. No. 1,397,392; Nov. 15.

American Balsa Company. (See Twombly, A. H., Lundin, and Marr, assignors.)

American Chain Company. (See Hoover, Thomas A., assignor.)

American District Telegraph Company. (See Hopkins, Richard M., assignor.)

American Laundry Machinery Company, The. (See Braley, Charles L., assignor.)

American Laundry Machinery Company, The. (See Snow, Arthur E., assignor.)

American Laundry Machinery Company. (See Waream, Charles E., assignor.)

American Mine Door Company, The. (See Dillon, James F., assignor.)

American Optical Company. (See Maynard, Albert E., assignor.)

American Paper Goods Company, The. (See Cooley, Henry B., assignor.)

American Platinum Works. (See Engel, Fred J., assignor.)

American Potash Corporation. (See Charlton, Harry W., assignor.)

American Pretzel Company. (See Robbins, James G., assignor.)

American Smelting & Refining Co. (See Mathers, Frank C., assignor.)

American Standard Tool Company. (See Wiard, Frederick, assignor.)

American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)

American Telephone and Telegraph Company. (See Gherardi, Bancroft, assignor.)

American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)

American Tobacco Company. (See Hill, George W., assignor.

American Valve & Meter Company, The. (See Anderson, Frank C., assignor.

Ames, Bradford L., Boston, assignor to T. H. Ames, Barnstable, Mass. Smoke-preventer. No. 1,397,155; Nov. 15.

Ames, Thankful H. (See Ames, Bradford L., assignor.)

Anderson-Barngrover Mfg. Co. (See Thompson, Albert E., assignor.)

Anderson, Frank C., assignor to The American Valve & Meter Company, Cincinnati, Ohio. Double automatic latch for switch-stands. No. 1,396,946; Nov. 15.

Angulo, Alexander, *et al.* (See Sanchez, Leonardo, assignor.)

Annable, George A., New York, N. Y. Book-frame and label-holder. No. 1,396,910; Nov. 15.

Anselmi, Carlos, and M. Viturro, Buenos Aires, Argentina. Means for intermittently feeding the films in cinematographic apparatus. No. 1,396,911; Nov. 15.

Apple, Vincent G., Dayton, Ohio. Dynamo-electric machine. No. 1,396,947; Nov. 15.

Arbuckle, Samuel F., Indianapolis, assignor to United States Automotive Corporation, Connersville, Ind. Automobile-headlight apparatus. No. 1,397,393; Nov. 15.

Arnold, George W., Denver, Colo. Ore-separator. No. 1,397,480; Nov. 15.

Asbury, Dorsey F., Washington, D. C. Explosive-engine. No. 1,396,912; Nov. 15.

Asbury, Harry E., assignor to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa. Bottle-capping machine. No. 1,397,394; Nov. 15.

Athol Manufacturing Company. (See Mitchell, Rowland B., assignor.)

Atwood, George F., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Cable-reeling apparatus. No. 1,396,721; Nov. 15.

Auto-Ordnance Corporation. (See Eickhoff, Theodore H., assignor.)

Auto-Ordnance Corporation. (See Graham, Oliver B., assignor.)

Auto-Ordnance Corporation. (See Payne, Oscar V., assignor.)

Automatic Electric Company. (See Truby, Franklin J., assignor.) (Reissue.)

Avery, Walter S., Knoxville, Tenn. Pincheock. No. 1,397,481; Nov. 15.

B-V Milking Machine Company. (See Bodeker, Henry F., assignor.)

Bachle, Andrew, Detroit, Mich. Manifold for internal-combustion engines. No. 1,397,482; Nov. 15.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Purification of crystals containing foreign materials of a different specific gravity therefrom. No. 1,397,121; Nov. 15.

Bacon, James, Los Angeles, Calif. Auxiliary air-intake for internal-combustion engines. No. 1,397,349; Nov. 15.

Bader, Walter, Manchester, assignor to Levinstein Limited, Blackley, Manchester, England. Production of aminoalkylesters and of alkylaminoalkylesters of para-aminobenzoic acid. No. 1,396,918; Nov. 15.

Baechtel, Warren M., *et al.* (See Myers, Jacob S., assignor.)

Baker, Charlie B., Amory, Miss. Toothbrush-holder. No. 1,397,350; Nov. 15.

Baker, Harold T., assignor to The Management, Engineering and Development Company, Dayton, Ohio. Hood-insulating means for drying-machines. No. 1,397,309; Nov. 15.

Baker, James H., Saratoga Springs, N. Y. Winder-shaft. No. 1,397,310; Nov. 15.

Balderson, David N., Philadelphia, Pa., assignor, by mesne assignments, to Electro Dynamic Company. Generator suspension. No. 1,397,122; Nov. 15.

Baldwin Locomotive Works, The. (See Wallace, Allen, assignor.)

Ballard, Herbert T., Norristown, Pa. Knitting-machine and fabric, (spot effect.) No. 1,397,069; Nov. 15.

Ballard, Herbert T., Norristown, Pa. Knitting-machine. No. 1,397,070; Nov. 15.

Balliet, Herbert S. (See Solan, P. F., and Balliet.)

Balmos, Edward J., Devine, Tex. Steering attachment for automobiles. No. 1,396,722; Nov. 15.

Barbe, Auguste L., Asnières, France. Manufacture of a white pigment. No. 1,396,914; Nov. 15.

Barber, Claire S. (See Richardson, B. J., and Barber.)

Barneck, Russell E., Minneapolis, Minn. Clothespin. No. 1,397,199; Nov. 15.

Barry, Garret J., Sandusky, Ohio. Electric train-signal. No. 1,397,351; Nov. 15.

Barta, Joseph, Martins Ferry, Ohio. Lamp-holder for miners' caps. No. 1,397,200; Nov. 15.

Barthels Manufacturing Company. (See Wiberley, Frank, assignor.)

Bass, Thomas G., Spur, Tex. Axle-lubricator. No. 1,397,352; Nov. 15.

Bastian Blessing Company, The. (See Bastian, C. L., and Mathisen, assignors.)

Bastian, Charles L., and H. Mathisen, assignors to The Bastian Blessing Company, Chicago, Ill. Combination draft-arm. No. 1,396,915; Nov. 15.

Bates, Harry E. (See Samuels, J. D., and Bates.)

Bauers, Clarence D. (See Miller, Frank W., assignor.)

Baumann, Alfred, Cassel, Germany. Optical instrument. No. 1,397,156; Nov. 15.

Beals, Charles C., St. Louis, Mo. Dimension indicator and marker. No. 1,396,806; Nov. 15.

Bebry, Percival B., assignor to The Englander Spring Bed Company, Brooklyn, N. Y. Hammock. No. 1,397,201; Nov. 15.

Beck, William H. (See Benbow, P. D., and Beck.)

Becker, Benjamin V., *et al.*, trustees. (See Stephenson, Leigh J., assignor.)

Becker, Rudolph, Roselle Park, N. J., assignor to The Singer Manufacturing Company. Feeding mechanism for sewing-machines. No. 1,397,071; Nov. 15.
Beehler, William H., Baltimore, Md. Detachable fastening for umbrellas and the like. No. 1,397,190; Nov. 15.
Benbow, Percy D., and W. E. Beck, Wheaton-Salem, N. C. Stopping device for steering apparatus. No. 1,397,511; Nov. 15.
Benedict, George H., Schenectady, N. Y. Extensometer. No. 1,397,080; Nov. 15.
Bennett, Conrad E., Worcester, Mass. Scale and grain-sampler. No. 1,396,916; Nov. 15.
Berg, Charles, Brooklyn, N. Y. Paint and making the same. No. 1,396,986; Nov. 15.
Berger, Fred, assignor of one-half to E. L. McManus, Jr., New York, N. Y. Electric drive for vehicles. No. 1,397,353; Nov. 15.
Bernard, Pierre B., *et al.* (See Miet, Hubert F. H. G., assignor.)
Bernstein, Harris, New York, N. Y. Reinforcing-plate for automobile-bumpers. No. 1,397,384; Nov. 15.
Berry, William G., London, England. Automatic multiple-spindle lathe. No. 1,396,907; Nov. 15.
Best, Alexander G., Vineland, N. C. Radius-rod connection. No. 1,397,157; Nov. 15.
Bickley, James C. (See Gray, E., and Bickley.)
Billon, Frédéric. (See Schneider, J., Hurlimann, and Billon.)
Birstler, Daniel, Westchester, N. Y. Dumping-wagon. No. 1,397,355; Nov. 15.
Bixler, William H. H., Philadelphia, Pa., assignor to de Sanno & Hoskins. Dental sealer. No. 1,397,305; Nov. 15.
Black, Walter G., Whittier, Calif. Oil-well machinery comprising the spring-bail elevator. No. 1,397,072; Nov. 15.
Blair, Chauncey M. (See Sabbatie, William M., assignor.)
Blessard, Richard E. (See Reynolds, R. H., and Blessard.)
Blood, Harold L., Plainfield, N. J., assignor to Nixo-Bement-Pond Company, New York, N. Y. Planer and system of motor control therefor. No. 1,397,206; Nov. 15.
Bodeker, Henry F., assignor to B.-V. Milking Machine Company, Milwaukee, Wis. Milking-machine. No. 1,396,987; Nov. 15.
Boerner, Arne, Scheveningen, Netherlands. Propeller for aircraft. No. 1,396,917; Nov. 15.
Bopp, Amos. (See Forsyth, J. L., and Bopp.)
Borelli, Dott. V., & Co., *et al.* (See Bruna, Giacomo, assignor.)
Bostian, Benjamin W., Pendleton, Ind. Windmill. No. 1,397,061; Nov. 15.
Botwright, Frederick C., Philadelphia, Pa. Bag-handle hinge. No. 1,397,250; Nov. 15.
Bowman, Joe M., Tipton, Iowa. Piston-groove-cleaning tool. No. 1,397,212; Nov. 15.
Boyce, John N., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Collapsible core. No. 1,397,078; Nov. 15.
Baynes, Nathan, Webster City, Iowa. Polish for stoves and other articles. No. 1,397,297; Nov. 15.
Brace, Porter H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Making seamless tubing. No. 1,396,916; Nov. 15.
Brace, Porter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic operation of electrolytic cells. No. 1,396,919; Nov. 15.
Bracken, Stanley. (See Jillard, A. G., and Bracken.)
Bradford Dyers Association Limited. (See Thornber, John, assignor.)
Bradnack, John H., New Haven, Conn. Fuse. No. 1,396,988; Nov. 15.
Brainard, William S., Rochester, assignor of one-half to J. L. Meader, Gonic, N. H. Door-lock. No. 1,397,074; Nov. 15.
Braley, Charles L., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Pressing-machine. No. 1,397,302; Nov. 15.
Brauch, Oscar. (See Smith, Edwin L., assignor.)
Braun Company, The. (See Braun, William F. H., assignor.)
Braun, William F. H., assignor to The Braun Company, Philadelphia, Pa. Slicing-machine. No. 1,397,158; Nov. 15.
Breitenstein, Albert F., assignor to The Geometric Tool Co., New Haven, Conn. Die-head for cutting taper and straight threads. No. 1,396,960; Nov. 15.
Bridgeport Brass Company. (See Limont, Alexander W., assignor.)
Bridges, Elzia B., Remmel, Ark. Gin-saw filer. No. 1,397,075; Nov. 15.
Briscoe Manufacturing Company. (See Groehn, O. J., and Alldis, assignors.)
Bronander, Wilhelm B., Montclair, N. J. Cutting-tool. No. 1,397,357; Nov. 15.
Bronander, Wilhelm B., Montclair, N. J. Die-press. No. 1,397,358; Nov. 15.
Brookshire, Elijah B., Eldorado, Kans. Resilient tire. No. 1,397,359; Nov. 15.
Brostrom, Edward E., Los Angeles, Calif. Measuring concealed objects. No. 1,396,920; Nov. 15.
Brown, Albert W., assignor to C. H. E. Brown, Fullerton, Calif. Drive-clamp. No. 1,396,921; Nov. 15.
Brown, Albert W., assignor to C. H. E. Brown, Fullerton, Calif. Pump-barrel. No. 1,396,922; Nov. 15.
Brown, Caroline H. E. (See Brown, Albert W., assignor.)
Brown Company. (See Parker, Howard, assignor.)
Brown, John W., Jr., assignor to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa. Meat-chopper. No. 1,397,398; Nov. 15.
Brown, Rollie A., Pacific Grove, Calif. Monument. No. 1,397,432; Nov. 15.
Browne, Rachel E. (See Jones, James I., assignor.)
Brumbaugh, John H., Chicago, Ill., assignor to General Fire Extinguisher Company, Providence, R. I. Valve-controlling device. No. 1,396,808; Nov. 15.
Bruna, Stephen J., U. S. Navy. Coin-handling apparatus. No. 1,396,946; Nov. 15.
Brunswick-Balke-Collender Company, The. (See Judd, Harriday C. B., assignor.)
Bruna, Giacomo, assignor to Giacomo Bruna and The Dott. V. Borelli & Co., Turin, Italy. Manufacture of mercuric oxid. No. 1,397,076; Nov. 15.
Bruna, Giacomo, *et al.* (See Bruna, Giacomo, assignor.)
Bubb, Harry A., Williamsport, Pa. Gas-burner. No. 1,397,077; Nov. 15.
Buchman, Henry H., Jacksonville, Fla. Producing composite titanium pigments. No. 1,396,924; Nov. 15.
Buda Company, The. (See Fowkes, W. H., and Harkless, assignors.)
Buda Company. (See Fowkes, William H., assignor.)
Buda Company, The. (See Harkless, Merl J., assignor.)
Bugbee, Lucian W., assignor to Ouopiece Mineral Lens Company, Indianapolis, Ind. Means for polishing multifocal lenses. No. 1,397,399; Nov. 15.
Bundy, Harry W., Detroit, Mich. Steering-wheel. No. 1,396,908; Nov. 15.
Burns, John F., St. Louis, Mo. Jar and apparatus for cold-pack canning fruits and vegetables. No. 1,396,723; Nov. 15.
Burrage, George B., *et al.*, trustees. (See Stephenson, Leigh J., assignor.)
Burrell, Ernest C., Chicago, Ill. Power-transmission belt. No. 1,396,925; Nov. 15.
Burrill, Elvyn F., Berkeley, Calif. Aerial apparatus or flying-machine. No. 1,397,400; Nov. 15.
Burroughs, Charles F., East Orange, assignor to Composition Machinery Corporation, Newark, N. J. Float for valve regulator and making the same. No. 1,396,926; Nov. 15.
Busch, Charles H., assignor to Simmons Company, Kenosha, Wis. Metal bedstead. No. 1,397,209; Nov. 15.
Busch-Sulzer Bros.-Diesel Engine Company. (See Tacchella, Adolf, assignor.)
Bushnell, James M., assignor to Kakichi Nakamura, Chicago, Ill. Can-opener. No. 1,396,961; Nov. 15.
Butt, Henry, Versailles, Ohio. Wrench. No. 1,397,262; Nov. 15.
Butterworth, Arthur, A., Jr., and H., Rochdale, England. Clutch. No. 1,397,401; Nov. 15.
Butterworth, Arthur, Jr. (See Butterworth, Arthur, A., Jr., and H.)
Butterworth, Harold. (See Butterworth, Arthur, A., Jr., and H.)
Cadillac Motor Car Company. (See White, D'Orsay M., assignor.)
California Alkali Company. (See Hirschkind, Wilhelm, assignor.)
Camoll, Ramon, Rhône, L. Cochet and J. Gritte, Lyon, assignors to Societe Lyonnaise Des Rechauds Catalytiques, Camoll, Cochet, Gritte & Cie. (Societe en commandite), Caluire, Rhône, France. Apparatus for heating by catalysis. No. 1,396,899; Nov. 15.
Cameron, James A., assignor to Taprell Loomis & Company, Chicago, Ill. Easel. No. 1,396,724; Nov. 15.
Campbell, Edward A., Kenosha, Wis. Combination gas stove and burner. No. 1,397,100; Nov. 15.
Campbell, Sterling H., St. Louis, Mo. Coupling-release rigging. No. 1,396,725; Nov. 15.
Campbell, Sterling H., St. Louis, Mo. Coupling-release rigging. No. 1,396,726; Nov. 15.
Campion, George W., Owen Sound, Ontario, Canada. License-plate. No. 1,397,032; Nov. 15.
Canniff, William L., Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich. Tractor-hitch. No. 1,396,927; Nov. 15.
Capewell Horse Nail Company. (See Cutter, Solomon M., assignor.)
Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Making handles and the like. No. 1,397,360; Nov. 15.
Carmody, Harold J., Brooklyn Manor, assignor of one-half to J. A. Faurot, New York, N. Y. Whistle. No. 1,397,263; Nov. 15.
Caroland, Stonewall J., Woodlawn, Tenn. Hoop-coiling machine. No. 1,397,402; Nov. 15.
Carpenter, Arthur H., assignor to The Colorado Vanadium Corporation, Sawpit, Colo. Recovering vanadium. No. 1,396,992; Nov. 15.
Carroll, Arthur W., and G. P. Steddard, Seattle, Wash. Trolley-pole. No. 1,396,928; Nov. 15.
Carson, Clarence, New Rochelle, N. Y., assignor to H. W. Johns-Manville Company. Roofing-clamp. No. 1,397,083; Nov. 15.
Carson, Geary E., Albany, N. Y. Running-board saddle. No. 1,396,727; Nov. 15.
Carter, Lionel A., assignor of one-third to J. J. Mullen and one-third to T. O. Moloney, St. Louis, Mo. Metal-severing apparatus. No. 1,396,998; Nov. 15.
Case & Martin Company. (See Ehrlich, William, assignor.)
Cate, Petrus Ten B., Arnhem, Netherlands. Hydraulic plant. No. 1,396,904; Nov. 15.

Catlin, Thomas S., Waveland, Ind. Animal-trap. No. 1,396,510; Nov. 15.
Champion Kerosene-Burner Company, The. (See Hill, Clarence A., assignor.)
Chapman, Pearsey R., St. Louis, Mo. Uncoiling and tension device. No. 1,397,253; Nov. 15.
Chastain, Harry W., New York, N. Y., assignor to American Potash Corporation. Reducing sludge to powder. No. 1,397,073; Nov. 15.
Chase, L. C., & Company. (See Vestine, Andrew O., assignee.)
Christenson, Edward. (See Miller, Andrew B., assignor.)
Christianson, Oscar L., and K. L. M. Gisiko; said Gisiko assignor of his entire right to E. A. Hedman, Stockholm, Sweden. Producing ammonium chlorid. No. 1,397,264; Nov. 15.
Christie, Alexander, Seattle, Wash. Pneumatic gun. No. 1,396,929; Nov. 15.
Christopher, William M., Tonawanda, N. Y. Clear-vision device for windshields. No. 1,396,729; Nov. 15.
Chrobak, Frank, Orient, Pa. Toilet article. No. 1,397,403; Nov. 15.
Chubb, Lewis W., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical precipitating system. No. 1,396,811; Nov. 15.
Churchward, Alexander, New York, N. Y., assignor to Wilson Welder & Metals Company, Inc. Pressure variable resistance. No. 1,397,241; Nov. 15.
Cincinnati Aluminum Casting Company. (See Kaefer, John G., assignor.)
Cincinnati Milling Machine Company, The. (See Haselton, Robert T., assignor.)
Clark Equipment Company. (See Williams, Alfred O., assignor.)
Clarke, John A., Jr., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. No. 1,396,812; Nov. 15.
Clarke, Michael J. (See Clarke, Peter J. and M. J.)
Clarke, Peter J. and M. J., Chicago, Ill. Leashing-cutter. No. 1,397,362; Nov. 15.
Clausen, Henry P., Mount Vernon, and C. L. Goodrum, assignors to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,396,730; Nov. 15.
Clausen, Henry P., Mount Vernon, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,397,034; Nov. 15.
Clemetson, Tobias, Duluth, Minn. Pack-sack. No. 1,397,161; Nov. 15.
Cochet, Laurent. (See Camoll, R., Cochet, and Gritte.)
Cohen, Leo, Mount Vernon, N. Y. Detachable indicator for merchandise. No. 1,397,079; Nov. 15.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric air-heater. No. 1,396,813; Nov. 15.
Cole, Arthur D. (See Geiger, David F., assignor.)
Cole, Lowell B., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Insulating end plate. No. 1,397,363; Nov. 15.
Cole, Robert C., assignor to The Johns-Pratt Company, Hartford, Conn. Cartridge-fuse. No. 1,396,731; Nov. 15.
Coles, Henry L., Hamilton, Ohio, assignor to Niles-Bement-Pond Company, New York, N. Y. Composition for the treatment of cast-iron. No. 1,397,404; Nov. 15.
Coles, Wilfred G., assignor to Madison Kipp Corporation, Madison, Wis. Lubricator. No. 1,397,036; Nov. 15.
Coles, Wilfred G., Madison, Wis. Lubricator. No. 1,397,037; Nov. 15.
Coleman, Charles S., Los Angeles, Calif. Boiler-tube and end-plate connection. No. 1,397,089; Nov. 15.
Colorado Vanadium Corporation, The. (See Carpenter, Arthur H., assignor.)
Colosimo, Thomas, Gary, Ind. Building-block. No. 1,397,038; Nov. 15.
Commercial Savings Bank and Trust Company, The. (See Edwards, George W., assignor.)
Composition Machinery Corporation. (See Burroughs, Charles F., assignor.)
Compton, James T., Pixley, Calif. Land scraping and leveling machine. No. 1,397,365; Nov. 15.
Concrete Piling Ltd. (See Leighton, John M., assignor.)
Consolidated Car-Heating Company. (See Hynes, Lee F., assignor.)
Consolidated Car-Heating Company. (See Oakley, George E., assignor.)
Continental Can Company. (See White, Edwin, assignor.)
Convert, Linus M., Peoria, Ill. Ferm-lifter. No. 1,397,241; Nov. 15.
Coo, Thomas J., Toronto, Ontario, Canada. System of locking automobiles. No. 1,397,484; Nov. 15.
Cook, Albert E., Evanston, Ill. Chain-cutter for reapers. No. 1,397,364; Nov. 15.
Cook, Albert E., Evanston, Ill. Circular-disk reaper. No. 1,397,365; Nov. 15.
Cook, Albert E., Evanston, and T. Van Tuyl, Kankakee, Ill.; said Van Tuyl assignor to said Cook. Speed-reduction wheel. No. 1,397,366; Nov. 15.
Cooley, Frank L., Brooklyn, N. Y. Commutator-brush. No. 1,396,948; Nov. 15.
Cooley, Henry B., assignor to The American Paper Goods Company, Kensington, Conn. Dispensing apparatus. No. 1,396,905; Nov. 15.
Cooper, Joseph H., Chicago, Ill. Burning comminuted fuel. No. 1,397,266; Nov. 15.
Copelli, Alfred, and F. Albi, Spokane, Wash. Register for firearms. No. 1,397,213; Nov. 15.
Copeman, Lloyd G., Flint, Mich. Refrigerating apparatus. No. 1,396,906; Nov. 15.
Cory, Charles, & Son. (See Wood, Frank W., assignor.)
Costello, Thomas J., Warren, Ohio. Continuous heating-furnace. No. 1,397,367; Nov. 15.
Cowell, Frank H., assignor to The Ralston Steel Car Company, Columbus, Ohio. Car-body. No. 1,397,081; Nov. 15.
Cox, Abraham B., Cherry Valley, N. Y. Tractor. No. 1,397,314; Nov. 15.
Cox Brass Manufacturing Company. (See Cox, William G., assignor.)
Cox, Claude E., Detroit, Mich. Liquid-level indicator. No. 1,397,267; Nov. 15.
Cox, Cyril C., Denver, Colo. Transportation system. No. 1,397,242; Nov. 15.
Cox, George B., Wilmington, Del. Replaceable facing and pins therefor. No. 1,397,082; Nov. 15.
Cox, William G., Cleveland, Ohio, assignor to Cox Brass Manufacturing Company, Albany, N. Y. Automobile-bumper. No. 1,397,215; Nov. 15.
Cramer, Louis W., St. Joseph, Mo. Flashlight. No. 1,396,732; Nov. 15.
Cramer, Morris, Cleveland, Ohio. Dieblock. No. 1,397,243; Nov. 15.
Crawford, Fred, Prosser, Wash. Guard-finger. No. 1,396,907; Nov. 15.
Cullin, Jasper F., assignor to W. J. Hartwig, Detroit, Mich. Coil-winder. No. 1,397,316; Nov. 15.
Cummings, John E., Wyoming, R. I. Cultivator-hoe. No. 1,396,733; Nov. 15.
Curley, Robert S., Lowell, assignor to Saco-Lowell Shops, Boston, Mass. Angular driving mechanism. No. 1,397,244; Nov. 15.
Curran, Edward T., Detroit, Mich. Water-heater. No. 1,397,268; Nov. 15.
Cutter, Solomon M., assignor to Capewell Horse Nail Company, Hartford, Conn. Nail-string machine. No. 1,397,204; Nov. 15.
Dake, Charles W., assignor to Smith Locomotive Adjustable Hub Company, Chicago, Ill. Adjustable hub-plate. No. 1,397,083; Nov. 15.
Dake, Charles W., assignor to Smith Locomotive Adjustable Hub Company, Chicago, Ill. Adjustable hub-plate. No. 1,397,084; Nov. 15.
Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Nozzle guide-passage. No. 1,397,085; Nov. 15.
Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Steam-turbine and governor. No. 1,397,086; Nov. 15.
Daree Corporation. (See Mumford, Russell W., assignor.)
Davidson, Ethan B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Apparatus for making sheets of plastic composition. No. 1,397,087; Nov. 15.
Davis, William H., *et al.* (See Rollins, William T., assignor.)
Dawson, Richard T. (See Scribner, William L., assignor.)
De Sanno & Hoskins. (See Bixler, William H. H., assignor.)
De Vane, William G., Trilby, Fla. Grip-shoe for vehicle-tires. No. 1,397,400; Nov. 15.
De Voe, Albert E., Westfield, N. J., assignor to The Singer Manufacturing Company. Power-transmitter. No. 1,397,085; Nov. 15.
Dean, Thomas, Indianapolis, Ind. Pasting device. No. 1,397,086; Nov. 15.
Dear, William Y., Jersey City, N. J. Calendar-pad and mount therefor. No. 1,396,814; Nov. 15.
Dedik, Yuraj, Boswell, Pa. Ship-protector. No. 1,397,305; Nov. 15.
Dee, William C., Cleveland, Ohio. Switch mechanism for X-ray machines. No. 1,396,815; Nov. 15.
Demarest, Thomas W., Pittsburgh, Pa. Journal-box lubricator. No. 1,396,734; Nov. 15.
Dentists' Supply Company, The. (See Williams, James L., assignor.)
Derrick, Horace M., Malheur, Oreg. Plow. No. 1,396,816; Nov. 15.
Desrange, Alphonse, assignor to Societe Anonyme Ateliers Otis-Pifre, Paris, France. Hope conveyor. No. 1,397,368; Nov. 15.
Devienne, Fernand, Paris, France. Apparatus for the rapid application of cupping-glasses, suction-cups, &c. No. 1,397,038; Nov. 15.
Desenderf, Richard L., Richmond Hill, N. Y. Means for and method of testing gas-meters. No. 1,396,817; Nov. 15.
Diamond, Morris, Caldwell, N. J. Handbag. No. 1,397,369; Nov. 15.
Dickerman, Walter H., Muskegon, Mich., assignor, by mesne assignments, to E. J. Koehler, New York, N. Y. Treating waste sulfite liquors and product obtained therefrom. No. 1,397,039; Nov. 15.
Diehl, Walter J., St. Louis, Mo. Auxiliary seat. No. 1,397,089; Nov. 15.
Dillon, James F., Crown City, Ohio, assignor to The American Mine Door Company. Cable-splice. No. 1,397,040; Nov. 15.
Dimas, Frederick M., Baltimore, Md. Device for adjustable mouth-mirrors. No. 1,397,090; Nov. 15.

Diskin, Moses B., New York, N. Y. Corrugated-board-making machine. No. 1,396,818; Nov. 15.

Dobbins, Michael G., Philadelphia, Pa. Soap-bubble device. No. 1,397,162; Nov. 15.

Dodds, Thomas, Thessalon, Ontario, Canada. Invalid-bed. No. 1,397,041; Nov. 15.

Dodge, Parker, Washington, D. C., assignor to The Johnson Service Co., Milwaukee, Wis. Thermostat and similar control device. No. 1,397,407; Nov. 15.

Dodge, Zenas U., New York, N. Y. Knockdown refrigerating-box. No. 1,397,269; Nov. 15.

Dolder, Edward H., Serena, Ill. Washing-machine. No. 1,397,270; Nov. 15.

Dory, Joseph, St. Maurice, La. Saw-clamp. No. 1,396,818; Nov. 15.

Douglass, Andrew C., Sonoma, Calif. Turbine-pump. No. 1,396,820; Nov. 15.

Douglass, Richard W., West New Brighton, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Heat-exchanger. No. 1,397,091; Nov. 15.

Dow Chemical Company, The. (See Putnam, Mark E., assignor.)

Dorford, Robert P. (See Keller, Karl O., assignor.)

Doyle, Ashton B., Johnson City, Tenn. Trousers-stretcher. No. 1,396,735; Nov. 15.

Drew, William F., and B. V. Korvin-Kroukovsky, San Francisco, Calif. Planetary transmission. No. 1,396,821; Nov. 15.

Drucker, William J., Woodhaven, assignor, by mesne assignments, to National Mayonnaise Machine Company, Inc., Brooklyn, N. Y. Coupling. No. 1,397,370; Nov. 15.

Du Pont, Francis I., Wilmington, Del. Smokeless shot-gun-powder. No. 1,397,042; Nov. 15.

Dudley, James R., Bessemer, Ala. Railway-switch-operating mechanism. No. 1,397,408; Nov. 15.

Dunlop Rubber Company, The. (See Macbeth, C., and Fellowes, assignors.)

Dunnebier, Max. (See Winkler, A., and Dunnebier.)

Dura Mechanical Hardware Company. (See Lawrence, John D., assignor.)

Duwellius, Walter S., Cincinnati, Ohio. Equalizing attachment for vise-jaws. No. 1,397,409; Nov. 15.

Dwyer, William P., West Flamboro, Ontario, Canada. Safety device for automobiles. No. 1,397,043; Nov. 15.

Dyer, Cecil M., Kew, Melbourne, Victoria, Australia. Starter for internal-combustion engines. No. 1,396,736; Nov. 15.

Eastman Kodak Company. (See Mees, Charles E. K., assignor.)

Eckart, George F., Cincinnati, Ohio. Worm-gear drive. No. 1,397,317; Nov. 15.

Eckenroth, John P., deceased, Chester, Pa.; M. A. Eckenroth, executrix. Rolling-mill for bending angle or channel iron into different angles. No. 1,397,271; Nov. 15.

Eckenroth, Mary A., executrix. (See Eckenroth, John P.)

Edwards, Ernest W., Carshalton, England. Body for motor-cars and other motor and railway vehicles. No. 1,396,737; Nov. 15.

Edwards, George W., assignor to The Commercial Savings Bank and Trust Company, Toledo, Ohio. Automatic train-stopping device. No. 1,397,123; Nov. 15.

Ehrlich, William, assignor to Case & Martin Company, Chicago, Ill. Pie-making machine. No. 1,397,272; Nov. 15.

Eickhoff, Theodore H., Cleveland, Ohio, assignor to Auto-Ordnance Corporation, New York, N. Y. Automatic gun. No. 1,396,949; Nov. 15.

Electro Dynamic Company. (See Balderston, David N., assignor.)

Ellinger, William H., Wichita Falls, Tex. Well-drill wrench. No. 1,397,044; Nov. 15.

Ellis, Carleton, Montclair, N. J. Making gasolene substitute. No. 1,396,999; Nov. 15.

Emerson-Brantingham Company. (See Traphagen, Harry R., assignor.)

Endicott, Claude H., Bayard, Nebr. Box-car-door hanger. No. 1,397,410; Nov. 15.

Engel, Albert W., Chicago, Ill. Loose-leaf envelop-album. No. 1,397,000; Nov. 15.

Engel, Fred J., assignor to American Platinum Works, Newark, N. J. Safety-catch for pins. No. 1,397,092; Nov. 15.

Englander Spring Bed Company, The. (See Behry, Percival E., assignor.)

Enright, John W., New Orleans, La. Stationary chemical-mixing fire-extinguisher system. No. 1,397,411; Nov. 15.

Enterprise Manufacturing Company of Pennsylvania, The. (See Asbury, Harry E., assignor.)

Enterprise Manufacturing Company of Pennsylvania, The. (See Brown, John W., Jr., assignor.)

Erickson, Claus E., Des Moines, Iowa. Thermometer protector and shipping-guard. No. 1,397,412; Nov. 15.

Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. Radiorepeating system. No. 1,397,093; Nov. 15.

Etchison, Eunice C., Fairfax, Ala. Safety attachment. No. 1,397,371; Nov. 15.

Ettinger, Wallace J., Chicago, Ill. Switch-operating device. No. 1,397,245; Nov. 15.

Eustis, Frederic A., Milton, Mass. Treating liquids used in industrial chemical processes. No. 1,397,094; Nov. 15.

Evans, Powell, Philadelphia, Pa. Casing for universal joints. No. 1,397,413; Nov. 15.

Everhart, Edgar, Atlanta, Ga. Purifying bauxite. No. 1,397,414; Nov. 15.

Fairbanks, Morse & Co. (See Hawthorne, Primm R., assignor.)

Faurot, Joseph A. (See Carmody, Harold J., assignor.)

Fellowes, Frank. (See Macbeth, C., and Fellowes.)

Fendry, Henry A., Ladysmith, Wis. Pulp-feed regulator. No. 1,397,415; Nov. 15.

Fenton, William T., et al., trustees. (See Stephenson, Leigh J., assignor.)

Ferraro, Michelangelo, Paterson, N. J. Hammer. No. 1,396,822; Nov. 15.

Fesler, Milton A., Oakland, Calif., assignor, by mesne assignments, to Petroleum Heat and Power Company. Oil-burner system. No. 1,396,823; Nov. 15.

Finley, Sam B., Atlanta, Ga. Apparatus for spraying binding media on roads. No. 1,397,045; Nov. 15.

Finn, Elmer E., Pocatello, Idaho. Egg-poacher. No. 1,397,318; Nov. 15.

Finn, Matthew J., Pittsburgh, Pa. Centrifugal pump. No. 1,397,273; Nov. 15.

Firman, Max, Brooklyn, N. Y. Lighting-fixture. No. 1,397,274; Nov. 15.

Fisher, Justine A., New York, N. Y. Hat-protector. No. 1,397,246; Nov. 15.

Fitzgerald, John J., Los Angeles, Calif. Gage device. No. 1,397,275; Nov. 15.

Fitzgerald, John W., Detroit, Mich. Storage-battery-testing instrument. No. 1,397,247; Nov. 15.

Flavell, Denis A., Jersey City, N. J. Work-supporting means for wire stitching or stapling machines. No. 1,396,950; Nov. 15.

Fleure, George J., Brooklyn, N. Y. Foot-operated pump for pneumatic tires. No. 1,397,416; Nov. 15.

Flexible Couplings Company. (See Thomas, George H., assignor.)

Fonline, Robert A., Martinsville, Va. Dump-truck. No. 1,396,738; Nov. 15.

Foote-Burt Company, The. (See Randles, George E., assignor.)

Forsyth, Joseph L., and A. Bopp, Baltimore, Md. Power mechanism. No. 1,396,824; Nov. 15.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Railway signaling system. No. 1,396,825; Nov. 15.

Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical distributing system. No. 1,396,826; Nov. 15.

Fowkes, William H., Chicago, Ill., assignor to Buda Company. Lifting-jack. No. 1,396,961; Nov. 15.

Fowkes, William H., Chicago, and M. J. Harkless, Harvey, Ill., assignors to The Buda Company. Lifting-jack. No. 1,396,962; Nov. 15.

Fowler, Clarence B., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,396,739; Nov. 15.

Frantz, Albert D., Battle Creek, Mich. Life-preserver. No. 1,397,248; Nov. 15.

French Battery & Carbon Co. (See Ruhoff, Otto E., assignor.)

French, Henry G., Schenectady, N. Y., assignor to General Electric Company. Protective device. No. 1,397,276; Nov. 15.

Frick, William J. (See Simmons, P. S., and Frick.)

Friedman, Louis, New York, N. Y. Multicolor-press. No. 1,396,827; Nov. 15.

Fulkerson, Joseph C., Marion, and L. B. Stuart, Cedar Rapids, Iowa. Bag-cleaner. No. 1,397,417; Nov. 15.

Fullem, Thomas J., Jr., et al. (See Heaton, John T., assignor.)

Futterer, Edward J., Buffalo, N. Y. System of operating safety appliances on electric cars and other vehicles. No. 1,397,205; Nov. 15.

Fynn, Valere A., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Ignition-switch. No. 1,397,277; Nov. 15.

Fynn, Valere A., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Speed-regulating apparatus. No. 1,397,278; Nov. 15.

Gallagher, George D., Washington, D. C., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp. No. 1,396,828; Nov. 15.

Gallagher, George D., Washington, D. C., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp-switch. No. 1,396,829; Nov. 15.

Gallagher, George D., Washington, D. C., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp-switch. No. 1,396,830; Nov. 15.

Ganelin, Solomon, Brooklyn, N. Y. Treating complex zinc-lead ores. No. 1,396,740; Nov. 15.

Gardner, Elliott, Colonie, assignor to Albany Boat Corporation, Watervliet, N. Y. Speed-boat. No. 1,396,831; Nov. 15.

Garner Gin Company, The. (See Garner, James C., assignor.)

Garner, James C., assignor, by mesne assignments, to The Garner Gin Company, Inc., Houston, Tex. Cotton-separator. No. 1,397,001; Nov. 15.

Garrett, Robert E., Nashville, Tenn. Gear-cutting machine. No. 1,397,372; Nov. 15.

Garrison, Perry J., Oxford, Mich. Means for cooling internal-combustion engines. No. 1,396,953; Nov. 15.

Gatchell, George S., Roselle Park, N. J., assignor to The Singer Manufacturing Company. Trimming mechanism for sewing-machines. No. 1,397,002; Nov. 15.

Geer, Harry R., Johnstown, Pa. Rolling-mill lubrication. No. 1,397,163; Nov. 15.

Geiger, David F., assignor of one-third to A. D. Cole, Minneapolis, Minn. Means for operating power-transmitters. No. 1,396,954; Nov. 15.

Geiger, William A., Chicago, Ill., assignor to W. H. Miner, Chasy, N. Y. Door-check. No. 1,397,206; Nov. 15.

Gelineau, Wilfrid, Wadena, Saskatchewan, Canada. Grain-door for box-cars. No. 1,397,279; Nov. 15.

Gemmer, George A., Newark, N. J. Automobile-brake adjuster. No. 1,397,373; Nov. 15.

General Electric Company. (See French, Henry G., assignor.)

General Electric Company. (See Seede, John A., assignor.)

General Fire Extinguisher Company. (See Brumbaugh, John H., assignor.)

General Motors Corporation. (See Canniff, William L., assignor.)

General Motors Corporation. (See Lea, John M., assignor.)

General Motors Corporation. (See Madison, George E., assignor.)

General Motors Company. (See Short, Charles R., assignor.)

General Petroleum Corporation. (See Prutzman, Paul W., assignor.)

Geometric Tool Co., The. (See Breitenstein, Albert F., assignor.)

Gherardi, Bancroft, Bayhead, N. J., assignor to American Telephone and Telegraph Company. System for the equalization of transmission-lines. No. 1,396,930; Nov. 15.

Gilbert, Wm. L., Clock Company. (See Hodge, Albert P., assignor.)

Gilliam, Manly M., Flushing, N. Y. Device for burning vaporous or gaseous fuel. No. 1,397,003; Nov. 15.

Gisiko, Karl I. M. (See Christenson, O. L., and Gisiko.)

Glass, Arnold F., Birmingham, Ala. Gas-stove and fireless cooker. No. 1,397,207; Nov. 15.

Glenn, Peter F., Philadelphia, Pa. Household article. No. 1,397,249; Nov. 15.

Godfrey, John F., Elkhart, Ind. Hoist mechanism. No. 1,397,164; Nov. 15.

Good Inventions Co. (See Good, John, assignor.)

Good, John, Garden City, assignor to Good Inventions Co., New York, N. Y. Automobile-engine fuel-supply. No. 1,397,492; Nov. 15.

Goodrich, B. F., Company, The. (See Davidson, Elias E., assignor.)

Goodrum, Charles L., assignor to Western Electric Company, Incorporated, New York, N. Y. Machine-switching telephone system. No. 1,396,741; Nov. 15.

Goodrum, Charles L. (See Clausen, H. P., and Goodrum.)

Goodyear, Edward T. P., Reigate Heath, England. Goggles. No. 1,397,250; Nov. 15.

Goodyear Tire & Rubber Company, The. (See Boyce, John N., assignor.)

Goodyear Tire & Rubber Company, The. (See Hartong, Robert C., assignor.)

Goodyear Tire & Rubber Company, The. (See Trogner, Roland S., assignor.)

Gow, Alexander M., Duluth, Minn. Locking mechanism for dump-cars. No. 1,397,165; Nov. 15.

Graf, Hubert M., Kansas City, Mo. Stepladder. No. 1,397,280; Nov. 15.

Graham, Oliver B., Cleveland, Ohio, assignor to Auto-ordnance Corporation, New York, N. Y. Gun. No. 1,396,832; Nov. 15.

Gram Headwear Mfg. Company. (See Yanow, Jacob, assignor.)

Gray, Albert J. (See Hebern, W., and Gray.)

Gray & Davis. (See Moses, William B., assignor.)

Gray, Clarence F. A., Montreal, Quebec, Canada. Pneumatic tire. No. 1,396,742; Nov. 15.

Gray, Eugene and J. C. Bickley, Stoughton, Wis.; said Bickley assignor to said Gray. Milk and cream testing apparatus. No. 1,396,743; Nov. 15.

Gray, Roy E., Philadelphia, Pa. Collar. No. 1,396,833; Nov. 15.

Griffiths, William U., Philadelphia, Pa. Valve-controlling means for water-closet apparatus. No. 1,397,208; Nov. 15.

Gritte, Joseph. (See Camell, R., Cochet, and Gritte.)

Groehn, Otto J., and F. L. Alidis, assignors to Briscoe Manufacturing Company, Detroit, Mich. Radiator. No. 1,396,931; Nov. 15.

Groesman, Simon, Pittsburgh, Pa. Suitcase. No. 1,397,374; Nov. 15.

Grunwald, Bertrand B., Seattle, Wash. Molding device. No. 1,397,375; Nov. 15.

Gurewitsch, Nathan, Weidling, near Klosterneuburg, Austria. Button-fastener. No. 1,397,376; Nov. 15.

Guy, Sydney S., Compton, near Wolverhampton, England, V-type internal-combustion engine. No. 1,396,744; Nov. 15.

H. & H. Patent Developing Company. (See Hebern, Edward H., assignor.)

Haas, Theron A., Toledo, Ohio. Foldable child's seat for automobiles. No. 1,397,281; Nov. 15.

Haddock, Arthur, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum-tube circuits. No. 1,396,745; Nov. 15.

Haines Products Company, The. (See Haines, Stacey A., assignor.)

Haines, Stacey A., assignor to The Haines Products Company, Cleveland, Ohio. Dripless faucet. No. 1,397,251; Nov. 15.

Hall, Arthur J., West Hartford, Conn. Coating reticulated forms. No. 1,396,834; Nov. 15.

Haller, John, Brooklyn, N. Y. Horseshoe. No. 1,397,046; Nov. 15.

Halter, Carl, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,396,746; Nov. 15.

Halvorsen, Birger F. (See Aannerud, S. A., and Halvorsen.)

Hamilton, Belton T., London, England. Mechanism for non-recoil breech-loading guns. No. 1,397,418; Nov. 15.

Hamilton, Harry B., Boston, Mass. Ankle-supporter. No. 1,397,005; Nov. 15.

Hammer, Cecil A., assignor of one-fourth to E. B. Sletmoe, Coeur d'Alene, Idaho. Ledger-sheet. No. 1,397,006; Nov. 15.

Hancock, Harry H., Swampscott, Mass. Extension furniture for printers. No. 1,397,485; Nov. 15.

Hancock, Harry H., Swampscott, Mass. Extension furniture for printers. No. 1,397,486; Nov. 15.

Hanff, Edward A., Irwin, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical system. No. 1,396,835; Nov. 15.

Hanley, John H., Jr., and J. L. Kreig, New York, N. Y. Fluid-heater. No. 1,397,282; Nov. 15.

Harasta, Joseph W., Los Angeles, Calif. Expanding-packing construction. No. 1,396,836; Nov. 15.

Harkless, Merl J., Harvey, Ill., assignor to The Buda Company. Brake mechanism for lifting-jacks. No. 1,396,955; Nov. 15.

Harkless, Merl J. (See Fowkes, W. H., and Harkless.)

Harkness, Newton L., Parsons, Kans. Railway-signal. No. 1,397,419; Nov. 15.

Harpham, George E., Los Angeles, Calif. Shock-absorber. No. 1,397,377; Nov. 15.

Harris, Daniel L., Wichita, Kans. Air-cooling systems for gas-engines. No. 1,397,047; Nov. 15.

Harrison, Henry C., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-receiver. No. 1,396,747; Nov. 15.

Harrison, James M., Cleveland, Ohio. Apparatus for heat-interchange. No. 1,397,097; Nov. 15.

Hartford, Edward V., Inc. (See Mayer, Arthur, assignor.)

Hartman, Ferdinand Q., Danville, Pa. Thread-breaking device for spinning-machines. No. 1,397,283; Nov. 15.

Hartong, Robert C., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Compounding of rubber compounds. No. 1,396,837; Nov. 15.

Hartwig, William J. (See Cullin, Jasper F., assignor.)

Haskelite Manufacturing Corporation. (See Meyercord, George R., assignor.)

Hatsings, Rolland T. R. (See Poppenhusen, H. A., and Hastings.)

Hawkinson, Paul E., Minneapolis, Minn. Process and apparatus for vulcanizing tires. No. 1,397,209; Nov. 15.

Hawley, Amos H., Norwood, Ohio, assignor to International Money Machine Company, Terre Haute, Ind. Accounting-machine with auxiliary printing appliance. No. 1,396,932; Nov. 15.

Hawthorne, Primm R., Milwaukee, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill. Tractor. No. 1,396,956; Nov. 15.

Hazelton, Robert T., Cincinnati, assignor to The Cincinnati Milling Machine Company, Oakley, Cincinnati, Ohio. Automatic table-lowering attachment. No. 1,397,210; Nov. 15.

Heaton, John T., assignor of one-half to T. J. Fullem, Jr., and one-half to P. P. Quinlan, Chicago, Ill. Mop. No. 1,397,284; Nov. 15.

Hebern, Edward H., assignor to H. & H. Patent Developing Company, Oakland, Calif. Turning-signal for automobiles. No. 1,397,211; Nov. 15.

Hebern, William, and A. J. Gray, Oakland, Calif., assignors to Security Anto Lock Co. Transmission-lock. No. 1,397,420; Nov. 15.

Hedman, Bros A. (See Christenson, O. L., and Gisiko, assignor.)

Heldbrink, Jay A., Minneapolis, Minn. Dental wax-warming device. No. 1,396,967; Nov. 15.

Heintsman, Edward A., Hoboken, N. J. Screwdriver. No. 1,396,748; Nov. 15.

Hellem, Nels, Portland, Oreg. Hand-truck. No. 1,397,098; Nov. 15.

Hellmund, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Damping windings for dynamo-electric machines. No. 1,396,838; Nov. 15.

Hellmund, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. High-voltage direct-current system. No. 1,396,839; Nov. 15.

Hensley, Charles G., Brooklyn, N. Y. Device for impressing sound-waves on diaphragms. No. 1,397,048; Nov. 15.

Herreshoff, Alexander G., and A. Lucand, assignor to International Motor Company, New York, N. Y. Wheel-brake. No. 1,396,958; Nov. 15.

Herskovits, Max, assignor to Peerless Light Company, Chicago, Ill. Electric-candle socket. No. 1,397,212; Nov. 15.

Heywood-Wakefield Company, et al. (See Travers, Lewis C., assignor.)

Higginbotham, Samuel H., Alhambra, Calif. Rupture appliance. No. 1,396,840; Nov. 15.

Hill, Clarence A., assignor to The Champion Enamel-Fuseur Company, Lima, Ohio. Non-refilling receptacle for kerosene-gas-generating apparatus. No. 1,397,048; Nov. 15.
Hill, Frank J., Sulphur, La. Method of and apparatus for treating sand hardening cotton. No. 1,397,227; Nov. 15.
Hill, George W., New York, N. Y., assignor to American Meter Company. Closure-seal. No. 1,396,700; Nov. 18.
Hill, Owen B., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling-generator. No. 1,396,750; Nov. 15.
Hirschfeld, Wilhelm, Cartaxo, assignor to California Alkali Company, San Francisco, Calif. Preparation of sodium sesquicarbonate. No. 1,396,841; Nov. 15.
Hodge, Albert P., assignor to Wm. L. Gilbert Clock Co., Winsted, Conn. Alarm-controlling mechanism. No. 1,396,942; Nov. 15.
Hoffer, John, Marianna, Pa. Safety mechanism for elevators. No. 1,396,781; Nov. 15.
Hoffer, John, Marianna, Pa. Safety device for elevator-cages. No. 1,396,782; Nov. 15.
Hoffer, John, Marianna, Pa. Safety device for elevator-cars. No. 1,396,783; Nov. 15.
Hofman, Joseph K., et al. (See Myers, Jacob S., assignor.)
Holden, David R., Peoria, Ill. Attaching means for broadcast distributers. No. 1,396,843; Nov. 15.
Holden, Joseph B., Utica, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting-machine. No. 1,397,105; Nov. 15.
Holliday, William J. (See Schaf, J. C., Jr., and Holliday.)
Holmes, Gwyllym R., and W. J. Wisch, Baltimore, Md. Nut-lock. No. 1,397,262; Nov. 15.
Holtorp, Wilhelm, Hamburg, Germany. Circulating lubrication. No. 1,397,050; Nov. 15.
Hoover, Thomas A., Fresno, Calif., assignor to American Chain Company, Inc. Clamp for attaching buffers to vehicles. No. 1,397,213; Nov. 15.
Hopkins, Gordon A., Bradford, Pa. Clothesline-holder. No. 1,397,051; Nov. 15.
Hopkins, Richard M., Rutherford, N. J., assignor to American District Telegraph Company, New York, N. Y. Electric signal. No. 1,397,421; Nov. 15.
Hopper, Charles, Los Angeles, Calif. Inlay for repair of sprayed engine-cylinders and making same. No. 1,397,167; Nov. 15.
Hose, Titus S., Little Falls, N. Y. Wrench. No. 1,397,214; Nov. 15.
Hosking, Charles, Belgravia, Johannesburg, South Africa. Two-wheeled draft-vehicle. No. 1,396,704; Nov. 15.
Hotchkiss, E. H., Company, The. (See Muth, John, assignor.)
Hotchkiss, William S., and J. E. W. Sheehan, Memphis, Tenn. Hand-fired furnace. No. 1,397,422; Nov. 15.
Housh, Axel, Janesville, Wis. Shade appliance. No. 1,397,215; Nov. 15.
Hudon, Arthur, and P. W. Ward, assignors to Spartan Electrical Products Company, Limited, Ottawa, Ontario, Canada. Fire-detector. No. 1,397,004; Nov. 15.
Hudson Motor Specialties Company. (See Spire, Walter J., assignor.)
Hudson, Warren R., assignor to The Troy Wagon Works Company, Troy, Ohio. Steering device. No. 1,396,755; Nov. 15.
Huffman, Edwin E., St. Louis, Mo. Depth-indicating device. No. 1,396,944; Nov. 15.
Hugues, Louis J., assignor of one-half to O. F. Marcotte, Topeka, Kans. Hydraulic transmission. No. 1,396,756; Nov. 15.
Humphries, Clinton C., Norfolk, Va. Device for moistening and wringing compresses. No. 1,397,439; Nov. 15.
Hurlimann, Ernst. (See Schneider, J., Hurlimann, and Billon.)
Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Door-control system. No. 1,396,757; Nov. 15.
Ingersoll-Rand Company. (See Douglass, Richard W., assignor.)
Ingle, Mark J., Washington, D. C. Carbonated ice-cream and making the same. No. 1,397,168; Nov. 15.
International Earth-Boring Machine Corporation. (See Moore, William E., assignor.)
International Money Machine Company. (See Bawley, Amos H., assignor.)
International Money Machine Company. (See Lutz, Belton L., assignor.)
International Motor Company. (See Horresheff, A. G., and Lucand, assignors.)
International Motor Company. (See Lucand, Alexander, assignor.)
Isachson, Norman, Albion, Idaho. Engine-timer. No. 1,397,608; Nov. 15.
Isenhour, Luther J., Indianapolis, Ind., assignor to J. Kim, Pittsburgh, and S. M. Sorber, Greensburg, Pa. Sanitary cover. No. 1,397,169; Nov. 15.
Jackson, Monroe, Lincoln, Ark. Conduit for timer-wires. No. 1,396,758; Nov. 15.
Jackson, Thomas B., Rogersville, Ala. Gun-sight. No. 1,397,378; Nov. 15.
Jackson, William O. (See Ray, Albert D., assignor.)
Jacobson, Jacob W., and J. E. Turja, Hancock, Mich. Cleaner for burners of carbid-lamps and the like. No. 1,397,170; Nov. 15.
Jacoby, Leo B., Winthrop, Mass., assignor, by mesne assignments, to Sanitary Products Corporation of America, Philadelphia, Pa. Sweeper-fastener. No. 1,396,935; Nov. 15.
James, Henry D., Riverside Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical switch. No. 1,396,845; Nov. 15.
Jarvis, Graham W., Charlottesville, Va. Automobile-signal. No. 1,397,424; Nov. 15.
Jarvis, Harold, Kenora, Ontario, Canada. Self-closing tap. (Reissue.) No. 15,229; Nov. 15.
Jex, John, Newark, Del. Pyrotechnic device. No. 1,397,425; Nov. 15.
Jesova, Mary, Wallis, Tex. Snowplow. No. 1,396,946; Nov. 15.
Jillard, Annis G., Berwyn, and S. Bracken, Cicero, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Manufacture of insulating supporting-blocks. No. 1,396,760; Nov. 15.
Johns-Manville, H. W., Company. (See Carson, Clarence, assignor.)
Johns-Pratt Company, The. (See Cole, Robert C., assignor.)
Johnson, August I., Medford, Mass. Oiling system for automobiles. No. 1,396,959; Nov. 15.
Johnson, Francis T., Chicago, Ill. Drier. No. 1,397,100; Nov. 15.
Johnson, George A., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Ladder. No. 1,397,216; Nov. 15.
Johnson, Kenneth S., Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., signaling-circuit. No. 1,396,760; Nov. 15.
Johnson Service Co., The. (See Dodge, Parker, assignor.)
Johnson, William C., Memphis, Tenn. Treating cotton fibers and products. No. 1,396,909; Nov. 15.
Jolla, Le Roy E., Elizabeth, N. J., assignor to Packard Motor Car Company, Detroit, Mich. Machine-tool. No. 1,397,006; Nov. 15.
Jonas, Otto W., Chicago, Ill. Stone-setting tool. No. 1,397,124; Nov. 15.
Jones, Frank E., San Diego, Calif., assignor to D. B. Red, Hattiesburg, Miss. Self-serving store. No. 1,397,379; Nov. 15.
Jones, James I., assignor of one-half to B. R. Browne, Washington, D. C. Concrete-mold. No. 1,397,253; Nov. 15.
Jones, Maurice F., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic train-stop system. No. 1,396,847; Nov. 15.
Judd, Hartley C. B., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Closet-seat fixture. No. 1,396,984; Nov. 15.
Jungling, Ernest R., New York, N. Y. Sheet-gages for addressing-machines. No. 1,397,126; Nov. 15.
Kaeser, John G., assignor to The Cincinnati Aluminum Casting Company, Norwood, Ohio. Vehicle-door handle. No. 1,397,426; Nov. 15.
Kahns, Walter R., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y. Device for connecting bowls and shades in lighting-fixtures. No. 1,397,385; Nov. 15.
Karlson, Henry C., et al. (See Townsend, Frederick E., assignor.)
Karschlits, Frank, Bridgeport, Conn. Adjustable holder. No. 1,397,254; Nov. 15.
Kashur, William, Meriden, Conn. Milk-bottle receptacle. No. 1,397,427; Nov. 15.
Kearney Combo & Novelty Co. (See Schroeder, Ernest C., assignor.)
Keenum, James A., Lovington, N. Mex. Noose-forming device. No. 1,397,126; Nov. 15.
Keithley, Theodore W., Bigtimber, Mont. Saddle attachment. No. 1,397,128; Nov. 15.
Kelso, Daniel B., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Refining caustic acid. No. 1,397,127; Nov. 15.
Kemp, Karl O., Durham, assignor of one-half to R. P. Dorford, Pailler Yard, Sunderland, England. Variable-lift feed-valve for oil-engines. No. 1,396,965; Nov. 15.
Kelly, James. (See Madsen, D. E., and Kelly.)
Kelly, Walter J., St. Louis, Mo. Metallic seal. No. 1,397,101; Nov. 15.
Kepner, Elmer E., Springfield, Oreg. Can-opener. No. 1,397,217; Nov. 15.
Kerr, Harry C., Kansas City, Mo. Polishing composition and making same. No. 1,397,102; Nov. 15.
Kerr, Isaac A., Memphis, Tenn. Self-disintegrator. No. 1,397,428; Nov. 15.
Kerr, Marshall B. (See Manire, Moses E., assignor.)
Kershaw, Grindrod, Whitworth, England. Suction device or rope-cleaner for creels for use in warping or beaming. No. 1,397,380; Nov. 15.
Kim, Julius, et al. (See Isenhour, Luther J., assignor.)
King, John G., Morristown, N. J. Frying-pan. No. 1,396,848; Nov. 15.
Klayon, Alexis G., assignor to Powdered Coal Engineering & Equipment Company, Chicago, Ill. Apparatus for using powdered fuel. No. 1,396,761; Nov. 15.
Kirby, Phillip S., Denver, Colo. Embroidery-needle. No. 1,396,849; Nov. 15.
Kirchner, Henry W., St. Louis, Mo. Clamp for freight-carriers. No. 1,396,941; Nov. 15.
Klein, Gustaf E., Chicago, Ill. Window-sash counterbalance. No. 1,397,129; Nov. 15.

Klingstedt, Gottlieb L. B., Omaha, Nebr. Adjustable extension-handle. No. 1,396,850; Nov. 15.
Klingberg, Walter H. (See Bingham, C., and Klingberg.)
Knierem, August, Binghamton, N. Y., assignor to The Tabulating Machine Company. Card-punching device. No. 1,397,007; Nov. 15.
Knox, Lester L., Bellevue, Pa. Valve mechanism for reversing regenerative furnaces. No. 1,397,256; Nov. 15.
Koehler, Edward J. (See Dickerson, Walter H., assignor.)
Koppe, Alexander T., Los Angeles, Calif., assignor to Oliver Dissectoplate Company, Chicago, Ill. Vacuum-pressure frame. No. 1,396,962; Nov. 15.
Korvin-Krouhowsky, Boris, V. (See Drew, W. F., and Korvin-Krouhowsky.)
Kraber, Arnat J., Pittsburgh, Pa. Shock-absorber. No. 1,396,851; Nov. 15.
Kraber, George L., Portland, Oreg., assignor, by mesne assignments, to The Turbine Air Tool Company, Cleveland, Ohio. Rotor for cutter-heads. No. 1,396,762; Nov. 15.
Kraling, Fred B., Lisbon, N. D. Device for grinding automobile-valves. No. 1,396,763; Nov. 15.
Kraly, Joseph J., Cleveland, Ohio. Airless tube for vehicle-tires. No. 1,396,853; Nov. 15.
Krieg, John L. (See Handley, J. H., Jr., and Krieg.)
La Fayette Motors Company. (See White, D'Orsay M., assignor.)
Lackie, William F., Opportunity, Wash. Insect-exterminator. No. 1,397,218; Nov. 15.
Laing, Sallie W., Shreveport, La. Infant's garment. No. 1,397,381; Nov. 15.
Lally, Eugene F., et al. (See Rollins, Williams T., assignor.)
Lammers, Edwin S., Jr., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical system. No. 1,396,853; Nov. 15.
Lancaster, John F., Philadelphia, Pa. Tile-anchoring device. No. 1,396,764; Nov. 15.
Landis, Frank F., Waynesboro, Pa. Shock-diffuser. No. 1,397,429; Nov. 15.
Langfeldt, Einar, Boston, Mass. Paint. No. 1,397,108; Nov. 15.
Lankheet, Sander, Hamilton, Mich. Brake. No. 1,397,430; Nov. 15.
Lapeden, John M., New York, N. Y. Power control for motor-vehicles. No. 1,397,130; Nov. 15.
Lauda, Joseph F., assignor of one-fifth to Scott Player Action Co., Racine, Wis., and four-fifths to The Northern Trust Company, trustee, Chicago, Ill. Player-piano-roll centralizer. No. 1,397,255; Nov. 15.
Law, James C., Scranton, assignor to Wilmot Engineering Company, Hazleton, Pa. Separable-link chain. No. 1,397,131; Nov. 15.
Lawler, James T. (See Smith, Hunter, Jr., assignor.)
Lawrence, Jay F., Chicago, Ill. Hydrocarbon-burner. No. 1,396,854; Nov. 15.
Lawrence, John D., assignor to Dura Mechanical Hardware Company, Toledo, Ohio. Counterbalance mechanism for vehicle-windows. No. 1,397,256; Nov. 15.
Lea, John M., assignor to General Motors Corporation, Detroit, Mich. Transmission-lock. No. 1,396,855; Nov. 15.
Ledbetter, Thomas F., Columbus, Ga. Drive mechanism. No. 1,397,219; Nov. 15.
Leighton, John M., assignor to Concrete Piling Ltd., Westminster, London, England. Keel-blocks for building ships. No. 1,397,437; Nov. 15.
Leonard, John P., Hawley, Pa. Footboard-holder for automobiles. No. 1,396,856; Nov. 15.
Levett, Alexander, New York, N. Y., assignor to E. D. Riegel, trustee, Fairfield, Conn. Buffing or polishing wheel. (Reissue.) No. 15,226; Nov. 15.
Levine, Abraham, Brooklyn, and L. Offerman, assignors to Presto Metal Stamping Corporation, New York, N. Y. Attaching means for separable fastener elements. No. 1,397,382; Nov. 15.
Levinstein Limited. (See Bader, Walter, assignor.)
Lewis, Abraham. (See Zearnay, Edis, assignor.)
Libbey-Owens Sheet Glass Company, The. (See Owens, Michael J., assignee.)
Liberty Auto Lock Co. (See Saegesser, Albert W., assignor.)
Limont, Alexander W., assignor to Bridgeport Brass Company, Bridgeport, Conn. Cap for electric-light sockets. No. 1,396,857; Nov. 15.
Linderman, Charles V. (See Weinberg, A., and Linderman.)
Litchfield, Lee J., Elsie, Mich. Spring-link. No. 1,397,431; Nov. 15.
Little, William F., Yonkers, and C. H. Sharp, White Plains, N. Y. Photometer. No. 1,396,963; Nov. 15.
Locke, Albert E., Chicago, Ill. Lighting-fixture. No. 1,396,936; Nov. 15.
Logwood, Charles V., New York, N. Y. Signaling system. No. 1,397,432; Nov. 15.
Lombard, Walter E., Arlington, Mass. Lifting-jack. No. 1,396,858; Nov. 15.
Long, Abram F., Buffalo, N. Y. Conveying-valve. No. 1,396,939; Nov. 15.
Long, Alexander H., Mobile, Ala. Photographic camera. No. 1,397,132; Nov. 15.
Lopitsky, John, Livingston, W. Va. Track-layer. No. 1,396,765; Nov. 15.
Lord, Lawrence S., Cleveland, Ohio. Faucet. No. 1,397,220; Nov. 15.
Lorimer, George W., Troy, assignor, by mesne assignments, to The Thomas Manufacturing Company, Dayton, Ohio. Automatic stop for phonographs. No. 1,396,994; Nov. 15.
Lorraine, David G., Los Angeles, Calif. Method and apparatus for separating oil and gas. No. 1,396,860; Nov. 15.
Love, Clyde D., Coshocton, Ohio. Sun-dial. No. 1,396,967; Nov. 15.
Lucand, Alexander. (See Horresheff, A. G., and Lucand.)
Lucand, Alexander, assignor to International Motor Company, New York, N. Y. Four-wheel-brake equalizer. No. 1,396,965; Nov. 15.
Lucks, William J., Columbus, Ohio. Valve-grinder. No. 1,396,861; Nov. 15.
Lukesh, Gustave R., U. S. Army. Railway-artillery. No. 1,397,485; Nov. 15.
Lundin, Andreas P. (See Twombly, A. H., Lundin, and Marr.)
Lutz, Belton L., assignor to International Money Machine Company, Reading, Pa. Type-carrier. No. 1,396,935; Nov. 15.
Lyon, Edmund, and A. F. Williams, assignors to North East Electric Company, Rochester, N. Y. Motor-mounting. No. 1,396,966; Nov. 15.
Lyons, William A., Litchfield, Minn. Time-indicating device. No. 1,397,319; Nov. 15.
McClelland, Bertha M., Walton, N. Y. Doll. No. 1,396,764; Nov. 15.
McCormick, John H., Creston, Iowa. Motor-support. No. 1,397,433; Nov. 15.
McDaniel, Charles L., Kansas City, Mo. Drip-cup attachment for brushes. No. 1,396,967; Nov. 15.
McGall, Albert, New York, N. Y. Preparing finely-divided metals. No. 1,397,006; Nov. 15.
McGee, Frank B., and G. W. Vreeland, Steubenville, Ohio. Dry-gas cleaner. No. 1,396,767; Nov. 15.
McKay, Augusta P., assignor to McKay Disk Plow Co., Rome, Ga. Disk plow and subsoiler. No. 1,397,434; Nov. 15.
McKay Disk Plow Co. (See McKay, Augusta P., assignor.)
McKay, John J. (See Mines, C. G., and McKay.)
McKelvey, John H., Kirkwood, and C. F. Lynn, St. Louis, Mo. Making plate-glass. No. 1,397,267; Nov. 15.
McManus, Edward L., Jr. (See Berger, Fred, assignor.)
McNabb, Ernest W., assignor to United Harrow Mfg. Co., Inc., Watertown, Tenn. Harrow. No. 1,397,104; Nov. 15.
Macbeth, Allan, assignor to S14 The Dunlop Rubber Co. Limited, Paris, France. Petrol-tank and the like. No. 1,397,383; Nov. 15.
Macbeth, Colin, and F. Fellowes, Birmingham, assignors to The Dunlop Rubber Company, Limited, Westminster, London, England. Machine for making pneumatic-tire covers or casings. No. 1,397,133; Nov. 15.
Macdonough, Raymond E., Minneapolis, Minn. Filler-cup and closure for pressure-tanks. No. 1,397,438; Nov. 15.
MacMillan, John R., Niagara Falls, N. Y., assignor to Niagara Alkali Company. Making trichlorethylene. No. 1,397,134; Nov. 15.
Madison, George E., Flint, assignor to General Motors Corporation, Detroit, Mich. Folding top for automobiles. No. 1,396,862; Nov. 15.
Madison Kipp Corporation. (See Coles, Wilfred G., assignor.)
Madsen, David E., and J. Kelly, Detroit, Mich. Scaffold-support. No. 1,396,968; Nov. 15.
Mahoney, E. H., Chair Company, et al. (See Travers, Lewis C., assignor.)
Maineri, Daniel L., assignor, by mesne assignments, to United Alloy Steel Corporation, Canton, Ohio. Metal-sheet-pack-opening device. No. 1,396,768; Nov. 15.
Maleuf, Jubert G., Niagara Falls, N. Y. Assessment device. No. 1,397,135; Nov. 15.
Management, Engineering and Development Company. (See Baker, Harold T., assignor.)
Mandalian, Sahatiel G., North Attleboro, Mass. Suspension-sleeve for mesh-machines. No. 1,397,283; Nov. 15.
Manire, Moses E., assignor of one-half to M. B. Kerr, Chapel Hill, Tenn. Neckband for shirts. No. 1,397,439; Nov. 15.
Marcotte, O. F. (See Hugues, Louis J., assignor.)
Margolin, George, New York, assignor to A. E. Mosler & Company, Mount Vernon, N. Y. Spark-plug. No. 1,397,321; Nov. 15.
Markovich, Mike, Bosevac, Jugo-Slavia, assignor of one-half to D. Stupich, South Wellington, British Columbia, Canada. Snow-gathering device. No. 1,397,436; Nov. 15.
Marr, Robert A. (See Twombly, A. H., Lundin, and Marr.)
Martel, Joseph, Montreal, Quebec, Canada. Means for compressing springs to remove same from trucks. No. 1,397,437; Nov. 15.
Martin, George A., Chicago, Ill. Window frame and sash structure. No. 1,397,221; Nov. 15.
Martino, Peter, Providence, R. I. Firearm. No. 1,396,969; Nov. 15.
Martin, William H., Detroit, Mich. House mail-receptacle. No. 1,397,438; Nov. 15.
Mather, George E., Morsemere, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Folding-door structure. No. 1,396,769; Nov. 15.

Mathers, Frank C., Bloomington, Ind., assignor to American Smelting & Refining Co. Electrolytic refining of tin. No. 1,397,222; Nov. 15.

Mathewson, Ernest T., Buffalo, N. Y. Bumper. No. 1,397,223; Nov. 15.

Mathewson, Ernest T., Buffalo, N. Y. Bumper. No. 1,397,224; Nov. 15.

Mathisen, Hjalmar. (See Bastian, C. L., and Mathisen.)

Maxwell, James G., Cleveland, Ohio. Means for regulating the temperature of rolls. (Reissue.) No. 15,227; Nov. 15.

Mayer, Arthur, Richmond Hill, N. Y., assignor to Edward P. Hartford, Inc., Brachet. No. 1,397,106; Nov. 15.

Mayhew, Joseph L., Williamstown, Mass., assignor to Mayhew Steel Products Inc., New York, N. Y. Pliers. No. 1,396,863; Nov. 15.

Mayhew Steel Products Inc. (See Mayhew, Joseph L., assignor.)

Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Grinding-machine. No. 1,397,289; Nov. 15.

Mayne, Samuel H. C., Winder, Ga. Detachable drawer sets and rollers. No. 1,396,864; Nov. 15.

Maynes, Emma G. (See Maynes, Hyla F., assignor.)

Maynes, Hyla F., assignor of one-half to E. G. Maynes, Gaines, Pa. Amusement apparatus. No. 1,397,009; Nov. 15.

Mead, Howard G., St. Louis, Mo., assignor, by mesne assignments, to Wirebounds Patents Company, Kittery, Me. Feed mechanism for wire-bound-box-blank machines. No. 1,397,439; Nov. 15.

Meader, John L. (See Brainard, William S., assignor.)

Mees, Charles E. K., assignor to Eastman Kodak Company, Rochester, N. Y. Method and apparatus for making photographic records. No. 1,396,770; Nov. 15.

Mees, Eberhard F., assignor of one-half to H. C. Schoene, Milwaukee, Wis. Paint. No. 1,396,970; Nov. 15.

Melnick, Karp, Plantsville, Conn. Animal-trap. No. 1,397,440; Nov. 15.

Melton, Roy R., Camden, Tenn. Automobile number-plate. No. 1,397,136; Nov. 15.

Merritt, Robert W., New York, N. Y. Garter. No. 1,397,106; Nov. 15.

Mertzanoff, André M., Buffalo, N. Y. Boiler. No. 1,397,010; Nov. 15.

Meuschke, William L., Lincoln, Mo. Carriage-return mechanism for typewriters. No. 1,396,865; Nov. 15.

Meyer, Harry E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. No. 1,396,966; Nov. 15.

Meyer, Katharine, assignor to O. Meyer, Carlstadt, N. J. Expanding frame for embroidery-machines. No. 1,397,322; Nov. 15.

Meyer, Oswald. (See Meyer, Katharine, assignor.)

Meyercord, George B., Chicago, Ill., assignor to Haskelite Manufacturing Corporation. Making long ply-wood panels. No. 1,396,971; Nov. 15.

Meyercord, George B., Chicago, Ill., assignor to Haskelite Manufacturing Corporation. Method of and apparatus for gluing sheets edge to edge. No. 1,397,489; Nov. 15.

Michaud, Joseph O., Fort Kent, Me. Internal expanding brake. No. 1,397,225; Nov. 15.

Michaud, Onesime E., St. Louis, Mo. Roller-bearing. No. 1,397,226; Nov. 15.

Miclaush, Alexander, Mattoon, Ill. Portable telephone apparatus. No. 1,397,137; Nov. 15.

Miess, Charles G., and J. J. McKay, Salamanca, N. Y. Concrete-form. No. 1,397,138; Nov. 15.

Miller, Andrew B., assignor of one-third to E. Christenson, Baldwin, Wis. Fruit-jar-cover remover. No. 1,396,867; Nov. 15.

Miller, Carl D., Rockville, Mass. Electrical measuring instrument. No. 1,397,441; Nov. 15.

Miller, Frank W., assignor of one-half to C. D. Bauers, Chicago, Ill. Separator. No. 1,396,939; Nov. 15.

Miller, Jesse E., Knoxville, Tenn. Sewing-machine. No. 1,397,052; Nov. 15.

Miller Train Control Corporation, The. (See Murray, William B., assignor.)

Millet, Charles W., Evansville, Ind. Caster-wheel and making same. No. 1,397,171; Nov. 15.

Mills, Claud E., Des Moines, Iowa. Transmission-gearing. No. 1,397,442; Nov. 15.

Milwaukee Press & Machine Co. (See Zetterlund, Theodor, assignor.)

Milwaukee Press & Machine Company. (See Ziska, Adam, Jr., assignor.)

Miner, William H. (See Geiger, William A., assignor.)

Miner, William H. (See Johnson, George A., assignor.)

Miner, William H. (See O'Connor, John F., assignor.)

Minor, Edward L., Birmingham, Ala. Brick-cleaning machine. No. 1,397,227; Nov. 15.

Minton, John P., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Receiver-shield. No. 1,396,771; Nov. 15.

Miot, Hubert F. H. G., Vanves, assignor to P. B. Bernard and A. L. Moutier, Paris, France. Mechanism for reversing the direction of motion of machinery. No. 1,397,172; Nov. 15.

Mitchell, Floyd A., Portland, Oreg. Truck attachment for tractors. No. 1,397,053; Nov. 15.

Mitchell, Robert G., Mount Vernon, N. Y. Glass-holder. No. 1,397,323; Nov. 15.

Mitchell, Rowland B., assignor to Athol Manufacturing Company, Athol, Mass. Pyroxylin solvent. No. 1,397,175; Nov. 15.

Mitchell, Rowland B., assignor to Athol Manufacturing Company, Athol, Mass. Pyroxylin solvent. No. 1,397,486; Nov. 15.

Miyagi, Takeo, Waipahu, Hawaii. Railway-brake. No. 1,397,443; Nov. 15.

Mohr, Arthur D., El Paso, Tex. Coin-wrapping device. No. 1,397,444; Nov. 15.

Moloney, Thomas O., et al. (See Carter, Lionel A., assignor.)

Monroe, Andrew J. (See Monroe, Nathaniel S. and A. J.)

Monroe, Nathaniel S. and A. J., Arthur, Ill. Road-working machine. No. 1,397,011; Nov. 15.

Moore, William E., Chicago, Ill., assignor, by mesne assignments, to International Earth-Boring Machine Corporation. Earth-boring machine. No. 1,397,324; Nov. 15.

Morgan, Porter S., Norwalk, Conn., assignor to Rotary Brake Company, Inc., New York, N. Y. Power-brake. No. 1,397,012; Nov. 15.

Moritz, Daniel A. and W. J. Peterson, McKeesport, Pa. Vending-machine. No. 1,396,772; Nov. 15.

Morrill, Alfred E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sewing-machine. No. 1,397,013; Nov. 15.

Morwood, Holton E., Welland, Ontario, Canada. Vehicle. No. 1,397,174; Nov. 15.

Moses, William B., Watertown, assignor to Gray & Davis, Inc., Cambridge, Mass. Ignition apparatus. No. 1,396,868; Nov. 15.

Mosler, A. B., & Company. (See Margolin, George, assignor.)

Moutier, Anatole L., et al. (See Miot, Hubert F. H. G., assignor.)

Mowry, Edward S., Middletown, Conn. Metal-coating metallic articles. No. 1,397,176; Nov. 15.

Muehk, Arthur, Oakland, Calif. Motor-vehicle axle. No. 1,396,869; Nov. 15.

Mullen, James J., et al. (See Carter, Lionel A., assignor.)

Müller, Philipp, Leipzig, Germany. Device for atomising and drying or evaporating milk and other liquid substances. No. 1,397,445; Nov. 15.

Mumford, Russell W., New York, N. Y., assignor, by mesne assignments, to Darco Corporation, Wilmington, Del. Making a purifying agent. No. 1,396,773; Nov. 15.

Murray, Thomas E., Brooklyn, N. Y. Steam or hot-water radiator. No. 1,397,325; Nov. 15.

Murray, William B., Danville, Ill., assignor to The Miller Train Control Corporation, Staunton, Va. Railway control system. No. 1,396,870; Nov. 15.

Muscott, Ray H., Swan Creek, Mich. Tread-belt attachment for trucks. No. 1,397,139; Nov. 15.

Muth, John, assignor to The E. H. Hotchkiss Company, Norwalk, Conn. Staple-driving machine. No. 1,397,176; Nov. 15.

Muth, John, assignor to The E. H. Hotchkiss Company, Norwalk, Conn. Staple-remover. No. 1,397,177; Nov. 15.

Myers, Jacob S., assignor to W. M. Baechtel and J. K. Hoffman, Hagerstown, Md. Wagon-hayrack carriage. No. 1,397,446; Nov. 15.

Nagayama, Tsunetaro, Hilo, Hawaii. Rat-trap. No. 1,397,294; Nov. 15.

Nagel, Harry C., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Expanded-metal resistor and making the same. No. 1,396,871; Nov. 15.

Nakamura, Kakichi. (See Butcher, James M., assignor.)

National Mayonnaise Machine Company. (See Drucker, William J., assignor.)

National Motor Car & Vehicle Corporation. (See Wall, William G., assignor.)

Navy Gear Manufacturing Corporation, The. (See Petrelli, Joseph V., assignor.)

Needham, Joseph, New York, N. Y. Soldering-iron heater. No. 1,397,178; Nov. 15.

Nein, William C. (See Varley, T. W., and Nein.)

Neiswender, Charles A., and W. C. Wenthe, Topeka, Kans. Convertible porch-swing and couch. No. 1,396,774; Nov. 15.

Nelson, August, Chicago, Ill. Transfer-clamp. No. 1,397,290; Nov. 15.

Nelson, Elmer F., Chicago, Ill., assignor to A. A. Weiss, St. Louis, Mo. Vulcanising-mold. No. 1,397,447; Nov. 15.

Nelson, Frederick D., Detroit, Mich. Vacuum fuel-feeding system. No. 1,396,940; Nov. 15.

Niagara Alkali Company. (See MacMillan, John E., assignor.)

Nichols, Henry, Newark, N. J. Resilient wheel. No. 1,397,140; Nov. 15.

Niles-Bement-Pond Company. (See Blood, Harold L., assignor.)

Niles-Bement-Pond Company. (See Coles, Henry L., assignor.)

Niles-Bement-Pond Company. (See Teas, D. H., and Wood, assignors.)

Nimmer, William A. (See Pilgrim, J. F., and Nimmer.)

Norris, William F., Kansas City, Mo. Spring-wheel. No. 1,397,448; Nov. 15.

Norsk Hydro-Elektrisk Kvaelstofaktieselskab. (See Aanerud, S. A., and Halvorsen, assignors.)

North East Electric Company. (See Lyon, E., and Williams, assignors.)

Northern Trust Company, trustee, The, et al. (See Lauda, Joseph F., assignor.)

Nouree, Frank C., Boise, Idaho. Device for separating seeds. No. 1,397,141; Nov. 15.

Nylund, Erik L., Detroit, Mich. Ball-joint. No. 1,397,107; Nov. 15.

Nyquist, Harry, Tabor, N. J., assignor to American Telephone and Telegraph Company. Electrical measuring apparatus. No. 1,397,226; Nov. 15.

Oakley, George E., assignor to Consolidated Car-Heating Company, Albany, N. Y. Train-line system for car-doors. No. 1,396,775; Nov. 15.

Oasis Manufacturing Co. (See York, Edgar L., assignor.)

Oberly, John L., Brooklyn, N. Y. Printing-press. No. 1,396,873; Nov. 15.

O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chasy, N. Y. Friction shock-absorbing mechanism. No. 1,397,229; Nov. 15.

O'Connor, John F., Chicago, Ill., assignor to W. H. Miner, Chasy, N. Y. Hand-brake. No. 1,397,230; Nov. 15.

Onepiece Bifocal Lens Company. (See Bugbee, Lucian W., assignor.)

Offerman, Louis. (See Levine, A., and Offerman.)

Offset Directoplate Company. (See Koppe, Alexander T., assignor.)

Oliver, Joseph W., Grand Rapids, Mich. Rotatable tool-carrier for planing-machines, &c. No. 1,397,014; Nov. 15.

Ortgies, George, East St. Louis, Ill. Aeroplane. No. 1,397,292; Nov. 15.

Owens, Michael J., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio. Sheet-glass-forming apparatus. No. 1,397,326; Nov. 15.

Oslek, Herman, Philadelphia, Pa. Swing. No. 1,396,776; Nov. 15.

Palmer, Miguel J., et al. (See Sanches, Leonardo, assignor.)

Palmgren, Nils A., assignor to Aktiebolaget Svenska Kullagerfabriken, Gottenborg, Sweden. Roller-bearing. No. 1,397,142; Nov. 15.

Paolicelli, Eustace, New York, N. Y. Pump. No. 1,397,179; Nov. 15.

Packard Motor Car Company. (See Jolls, Le Roy E., assignor.)

Parent, Wilfred A., Salem, Mass. Adjustable support. No. 1,396,777; Nov. 15.

Parham Auto Patents Corporation. (See Parham, William H., assignor.)

Parham, William H., assignor to Parham Auto Patents Corporation, Knoxville, Tenn. Vehicle-tire fastener. No. 1,396,778; Nov. 15.

Parker, Howard, assignor to Brown Company, Berlin, N. H. Core for rolls of paper. No. 1,397,143; Nov. 15.

Parnbin, Alexander, London, England. Electrically operating mechanism from a distance. No. 1,397,449; Nov. 15.

Parsons, George H., New York, N. Y. Doll. No. 1,396,873; Nov. 15.

Pastrengo, Vittorio, San Francisco, Calif. Aerial apparatus. No. 1,396,874; Nov. 15.

Patented Metalware Corporation. (See Rachlin, Max, assignor.)

Patterson, Arthur L., Washington, D. C. Focusing attachment. No. 1,397,231; Nov. 15.

Payne, Oscar V., Cleveland, Ohio, assignor to Auto-Ordnance Corporation, New York, N. Y. Gun-sight. No. 1,397,108; Nov. 15.

Pearson, George A. (See Wiggins, Edward J., assignor.)

Pedersen, John D., Jackson, Wyo. Firearm. No. 1,397,109; Nov. 15.

Peerless Light Company. (See Herskovitz, Max, assignor.)

Pennsylvania Wire Glass Company. (See Shuman, Arno, assignor.)

Penny, Lonnie T., Raleigh, N. C. Sash-fastener. No. 1,397,450; Nov. 15.

Peradotto, Antonio, Turin, Italy. Inclinometer. No. 1,397,490; Nov. 15.

Peters, John J., assignor of one-half to N. B. Akitt, Oelwein, Iowa. Lateral take-up for driving-boxes. No. 1,397,110; Nov. 15.

Peterson, William J. (See Moritz, D. A., and Peterson.)

Petrelli, Joseph V., assignor to The Navy Gear Manufacturing Corporation, New Haven, Conn. Reversing mechanism. No. 1,397,111; Nov. 15.

Petroleum Heat and Power Company. (See Fesler, Milton A., assignor.)

Pfeiffer, Adolph, Chicago, Ill. Clasp. No. 1,396,941; Nov. 15.

Pfeiffer, John F., Seattle, Wash. Continuous freeser. No. 1,396,972; Nov. 15.

Phelps, Leonard M., Philadelphia, Pa. Window-operating mechanism. No. 1,397,112; Nov. 15.

Pierce, Howard C., Harrodsburg, Ky. Refrigerator. No. 1,396,875; Nov. 15.

Pilger, William, Center, Colo. Grading-machine. No. 1,397,180; Nov. 15.

Pilgrim, John F., and W. A. Nimmer, Two Rivers, Wis. Map-case. No. 1,397,327; Nov. 15.

Platt, Clarence D., Bridgeport, Conn. Electric-cut-out box. No. 1,396,876; Nov. 15.

Plauson, Hermann, Hamburg, Germany, assignor to D. R. Rotman, New York, N. Y. Manufacture of artificial wood or other plastic bodies. No. 1,397,144; Nov. 15.

Ploen, Julius, Green Island, Iowa. Harrow-trailing seeder. No. 1,396,877; Nov. 15.

Plummer, Henry G., Oakland, Calif. Pipe-joint. No. 1,397,145; Nov. 15.

Plummer, Horace, Lawrence township, Marion county, Ind. Engraving-block. No. 1,397,293; Nov. 15.

Poore, Philip, London, England. Distillation of wood, woody fiber, and similar carbonaceous substances. No. 1,397,181; Nov. 15.

Pope, William L., Huntersville, N. C. Tractor. No. 1,397,015; Nov. 15.

Poppenhusen, Herman A., Hammond, Ind., and R. T. B. Hastings, Highland Park, assignors to Sanitax Brush Company, Chicago, Ill. Brush. No. 1,396,978; Nov. 15.

Post, Alvah L. and H. R., Kent, Ohio. Concrete-block-molding machine. No. 1,396,779; Nov. 15.

Post, Harry R. (See Post, Alvah L. and H. R.)

Post, Paul W., Algoma, Wis. Strapping device for dress-suit cases and the like. No. 1,397,016; Nov. 15.

Powdered Coal Engineering & Equipment Company. (See Kinyon, Alonzo G., assignor.)

Pratt, William E. (See Van Fleet, Elon J., assignor.)

Presto Metal Stamping Corporation. (See Levine, A., and Offerman, assignors.)

Price, Abner R., Toronto, Ontario, Canada. Attachment for spark-plugs. No. 1,397,017; Nov. 15.

Prickett, Clinton E., Fairmont, W. Va. Match-box holder. No. 1,397,232; Nov. 15.

Priestman, Edmund, Sheffield, England. Pocket-knife and tool-pad. No. 1,397,018; Nov. 15.

Prutzman, Paul W., Los Angeles, Calif., assignor to General Petroleum Corporation. Material for decolorising oil and producing the same. No. 1,397,113; Nov. 15.

Pugh, Harry W., assignor to Western Electric Company, Incorporated, New York, N. Y. Folding-door structure. No. 1,396,780; Nov. 15.

Putnam, Mark E., assignor to The Dow Chemical Company, Midland, Mich. Making cellulose esters. No. 1,396,878; Nov. 15.

Pyle-National Company, The. (See Dake, Charles W., assignor.)

Quick, Robert T., Pamplico, S. C. Portable veneer-rack. No. 1,397,328; Nov. 15.

Quinlan, Philip P., et al. (See Heaton, John T., assignor.)

Rachlin, Max, New York, assignor to Patented Metalware Corporation, Brooklyn, N. Y. Gutter-hanger. No. 1,397,328; Nov. 15.

Ralston Steel Car Company, The. (See Cowgill, Frank M., assignor.)

Randles, George E., Cleveland Heights, assignor to The Foote-Burt Company, Cleveland, Ohio. Multiple-spindle machine-tool. No. 1,396,781; Nov. 15.

Rathbun Manufacturing Company. (See Rathbun, Milo D., assignor.)

Rathbun, Milo D., Muncie, Ind., assignor to Rathbun Manufacturing Company, Muskegon, Mich. Fender device. No. 1,397,451; Nov. 15.

Ray, Albert D., Cleveland, Ohio, assignor to W. O. Jackson, New Castle, Ky. Thermostat for radiators. No. 1,396,782; Nov. 15.

Red, David B. (See Jones, Frank E., assignor.)

Reed, Andrew J., Wilkes-Barre, Pa. Apparatus for purifying water. No. 1,397,452; Nov. 15.

Reeder, Ernest B., Madison, Ind. Automatic raising and lowering step. No. 1,397,294; Nov. 15.

Reist, George K., Harrisburg, Pa. Floating storage-port. No. 1,397,385; Nov. 15.

Rekar, John J., Los Angeles, Calif. Lamp. No. 1,397,453; Nov. 15.

Remington Accounting Machine Corporation. (See Wahl, John C., assignor.)

Remington Typewriter Company. (See Holden, Joseph B., assignor.)

Reynolds, Edwin H., Brooklyn, N. Y., and E. E. Bleasard, Fall River, Mass. Attachment for typewriters. No. 1,397,454; Nov. 15.

Rhodes, M. M., & Sons Company. (See Tobey, Charles W., assignor.)

Richardson, Brodie J., and C. S. Barber, Waterbury, Conn. Bag-lock. No. 1,397,455; Nov. 15.

Riegel, Benjamin D., trustee. (See Levett, Alexander, assignor.) (Reissue.)

Riggs, Arthur N., Centralia, Wash. Box-nailing machine. No. 1,397,054; Nov. 15.

Ringham, Christopher, and W. H. Klingberg, Albert Lea, Minn. Tail-light and license-tag holder. No. 1,397,330; Nov. 15.

Rinne, Kalle, Norwood, Mass. Saw-set. No. 1,397,331; Nov. 15.

Ritz, George A., Rochester, N. Y. Office furniture. No. 1,397,295; Nov. 15.

Risek, John, Cudahy, Wis. Watch-movement. No. 1,396,879; Nov. 15.

Robbins, James G., Lancaster, assignor to American Pretzel Company, Philadelphia, Pa. Pretzel-making machine. No. 1,397,233; Nov. 15.

Roberton, Charles G., Barrow-in-Furness, England. Thrust-bearing. No. 1,396,880; Nov. 15.

Roberts, Walton C., Summit, Ga. Musical instrument. No. 1,397,019; Nov. 15.

Robinson, Charles H., Venice, Ill. Window-shade bracket. No. 1,397,456; Nov. 15.

Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)

Roessler, Emil G., Goldfield, Nev. Stove-grate. No. 1,397,386; Nov. 15.

Röhm, Otto, Darmstadt, Germany. Manufacture of imitation leather. No. 1,397,537; Nov. 15.

Rohn, Hyacinth, Chicago, Ill. Dough-cutting apparatus for making long loaves and like products. No. 1,396,921; Nov. 15.

Rolling, William H., assignor, of one-fourth, to W. H. Davis and one-half to E. F. Lally, Boston, Mass. Anti-skid attachment for elastic tires. No. 1,397,185; Nov. 15.

Rosenblatt, William, and J. J. Simon, Brooklyn, N. Y. Windshield for vehicles. No. 1,397,324; Nov. 15.

Rotary Brake Company. (See Morgan, Foster L., assignor.)

Rothman, D. E. (See Hartmann, Hermann, assignor.)

Rudzinski, Tony, Virginia, Minn. Spark-arrester. No. 1,396,862; Nov. 15.

Rüdy, Hermann, Jestetten, Germany. Motor-plow. No. 1,397,146; Nov. 15.

Rudolf, Otto E., assignor to French Battery & Carbon Co., Madison, Wis. Dry battery and manufacture. No. 1,397,152; Nov. 15.

Russell, Thomas C., Chicago, Ill. Hair-marcelling apparatus. No. 1,397,332; Nov. 15.

Ruthenis, Edward R., St. Louis, Mo. Shoe and making the same. No. 1,396,782; Nov. 15.

Ryalls, John H., Charlottesville, Va. Reversible transmission for spinning-mules. No. 1,396,628; Nov. 15.

Ryan, Charles F. (See McKelvey, J. H., and Ryan.)

Rykken, Harold P., Fort Orchard, Wash. Jar-holder. No. 1,397,457; Nov. 15.

Sabol, Sidney Ralph, Chicago, Ill. Dustcap for automobiles. No. 1,397,235; Nov. 15.

Sace-Lowell Shops. (See Carley, Robert S., assignor.)

Sacquenne, Albert W., Granite City, Ill., assignor to Liberty Auto Lock Co., St. Louis, Mo. Lock for hub-caps. No. 1,396,924; Nov. 15.

Sager, Erford, Hamilton, Ontario, Canada. Automatic train-stop. No. 1,397,055; Nov. 15.

Samuels, John D., and H. E. Bates, Idaho Falls, Idaho. Seed-beet planter. No. 1,396,784; Nov. 15.

Sanchez, Leonardo, assignor of one-half to A. Angulo, and twenty per cent. to M. J. Palmer, Habana, Cuba. Device for raising sunken vessels. No. 1,396,895; Nov. 15.

Sandquist, John V., Houston, Tex. Link. No. 1,397,456; Nov. 15.

Sanitary Products Corporation of America. (See Jacoby, Leo D., assignor.)

Sanitas Brush Company. (See Peppenhusen, H. A., and Hastings, assignors.)

Sauerwald, Irvin, York, assignor to United States Chain & Forging Co., Pittsburgh, Pa. Tire-grip-chain fastener. No. 1,397,056; Nov. 15.

Sawyer, Frank M., Los Angeles, Calif. Floor construction. No. 1,397,147; Nov. 15.

Schaefer, Fred S., South St. Paul, Minn. Hoisting apparatus. No. 1,397,067; Nov. 15.

Scharf, Joseph C., Jr., and W. J. Holliday, Indianapolis, Ind. Test-stand for testing generators. No. 1,397,290; Nov. 15.

Schaub, Jacob, Newark, N. J., assignor to The Thomas Company, New York, N. Y. Filling-machine. No. 1,397,134; Nov. 15.

Schaumleffel, Harry J., Marion, Ind. Vibrator. No. 1,397,058; Nov. 15.

Schenk, Edouard, Geneva, Switzerland. Safety-pin. No. 1,397,286; Nov. 15.

Schenk, Edouard, Geneva, Switzerland. Manually-operated safety coupling device. No. 1,397,287; Nov. 15.

Schinke, Edward C., and N. A. Sutherland, assignors to Typewriter Calculating Attachment Company, St. Louis, Mo. Calculating-machine. No. 1,396,880; Nov. 15.

Schmela, Carl, Newell, S. D. Gate-fastener. No. 1,397,409; Nov. 15.

Schmitt, Daniel W., Reno county, near Kingman, Kans. Cultivator. No. 1,397,333; Nov. 15.

Schmoeltzli, Adolph O., St. Louis, Mo. Piston-ring. No. 1,397,334; Nov. 15.

Schneider, Jacques, Solothurn, E. Hürlimann, Sachwil, and F. Billon, assignors to the Firm Scintilla, Solothurn, Switzerland. Cable-outlet of magneto-electric ignition-machines for internal-combustion engines. No. 1,397,169; Nov. 15.

Schoene, Emil C. (See Mees, Eberhard F., assignor.)

Schofield, George L., Kansas City, Mo. Cooling means for motor-vehicle engines. No. 1,396,795; Nov. 15.

Schroeder, Ernest C., New York, N. Y., assignor to Kearney Comb & Novelty Co., Kearney, N. J. Clasp-fastener for handbags and the like. No. 1,396,942; Nov. 15.

Schroetter, Arnold, New York, N. Y. Clasp. No. 1,396,897; Nov. 15.

Scintilla. (See Schneider, J., Hürlimann, and Billon, assignors.)

Scott, Charles F., New Haven, Conn., assignor to Westinghouse Electric and Manufacturing Company. Railway signaling system. No. 1,396,823; Nov. 15.

Scott, George L., Shawnee, Okla. Car-brake. No. 1,397,059; Nov. 15.

Scott Player Action Co. et. al. (See Landa, Joseph F., assignor.)

Scott, William, St. Louis, Mo. Combined auto jack and safety device. No. 1,397,135; Nov. 15.

Scribner, William L., assignor of one-half to R. T. Dawson, Toledo, Ohio. Roller-bearing. No. 1,397,227; Nov. 15.

Seaton, Edward O., assignor to Western Electric Company, Incorporated, New York, N. Y. System for transmission of intelligence. No. 1,397,112; Nov. 15.

Seaman, Robert C., Bloomsburg, Pa. Water-cock for the dampers of steam-boilers. No. 1,397,403; Nov. 15.

Security Auto Lock Co. (See Hebern, W., and Gray, assignor.)

Seely, John A., Schenectady, N. Y., assignor to General Electric Company. Efficiency indicating apparatus. No. 1,397,203; Nov. 15.

Semmelhack, August L., Whittier, Calif. Multiple-bit counterbore. No. 1,397,114; Nov. 15.

Sepenhelm, Hans, Gothenburg, Sweden. Apparatus for submerging and supplying greasy substances contained in water. No. 1,396,859; Nov. 15.

Sharp, Clayton H. (See Little, W. F., and Sharp.)

Shearer, George T., Waynesboro, Pa. Die-head. No. 1,397,228; Nov. 15.

Sheehan, John E. W. (See Hotchkiss, W. S., and Sheehan.)

Shepard, Charles C., Byer, Ohio. Flagman's outfit. No. 1,396,787; Nov. 15.

Shephardson, Abner E., Melrose, Mass. Archer's bow. No. 1,396,783; Nov. 15.

Short, Charles R., assignor to General Motors Company, Detroit, Mich. Hydrocarbon-motor. No. 1,396,890; Nov. 15.

Short, Charles R., assignor to General Motors Company, Detroit, Mich. Hydrocarbon-motor. No. 1,396,891; Nov. 15.

Short Electrical Mfg. Corp. (See Short, Henry M., assignor.)

Short, Henry M., assignor to Short Electrical Mfg. Corp., Penn Yan, N. Y. Electric conduit and making same. No. 1,396,789; Nov. 15.

Sherman, Arza, assignor to Pennsylvania Wire Glass Company, Philadelphia, Pa. Machine for and method of making corrugated wire-glass. No. 1,397,149; Nov. 15.

Shimada, Thomas J., Washington, D. C. Embryotomy device. No. 1,397,461; Nov. 15.

Shute, Frederick W., Amesbury, Mass. Paper-fastener. No. 1,396,790; Nov. 15.

Sickaff, Otto E., Livingston, Mont. Show-card holder. No. 1,396,892; Nov. 15.

Simmons Company. (See Busch, Charles H., assignor.)

Simmons, Peter S., and W. J. Frick, Paterson, N. J. Building umbrella. No. 1,396,886; Nov. 15.

Simon, Jacob J. (See Rosenblatt, W., and Simon.)

Singer Manufacturing Company, The. (See Becker, Rudolph, assignor.)

Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)

Singer Manufacturing Company, The. (See Gatchell, George A., assignor.)

Sisck, Ellsworth, Miamisburg, Ohio. Tobacco-packer. No. 1,397,060; Nov. 15.

Sister, Henry B., Riverside, Calif. Electrolytic production of hypochlorite solutions. No. 1,397,229; Nov. 15.

Sizemore, Edward R. (See Hammer, Cecil A., assignor.)

Smallwood, Alfred, Highgate, London, England. Furnace. No. 1,396,943; Nov. 15.

Smith, A. O., Corporation. (See Smith, Reuben S., assignor.)

Smith, Edwin L., assignor to O. Branch, Philadelphia, Pa. Loom-winding machine. No. 1,397,220; Nov. 15.

Smith, Harry J., Lakewood, Ohio. Self-oiling bearing. No. 1,397,115; Nov. 15.

Smith, Herbert M., assignor to Stanley Insulating Company, Great Barrington, Mass. Apparatus for filling receptacles or the like. No. 1,397,061; Nov. 15.

Smith, Hunter, Jr., assignor of one-half to J. T. Lanier, Seattle, Wash. Trench. No. 1,397,462; Nov. 15.

Smith, John W., Philadelphia, Pa. Flying-machine. No. 1,396,874; Nov. 15.

Smith, Joseph A., Edom, Tex. Aeroplane. No. 1,397,602; Nov. 15.

Smith Locomotive Adjustable Hub Company. (See Babe, Charles W., assignor.)

Smith, Reuben S., assignor to A. O. Smith Corporation, Milwaukee, Wis. Method of and apparatus for forming and assembling metal elements. No. 1,397,220; Nov. 15.

Smith, Charles A., Atlanta, Ga. Vehicle-wheel. No. 1,397,240; Nov. 15.

Snow, Arthur E., Erie, Pa., assignor to The American Laundry Machinery Company, Norwood, Ohio. Clothes-pressing apparatus. No. 1,397,300; Nov. 15.

Société Anonyme Ateliers Otto-Pitre. (See Durenge, Alphonse, assignor.)

Société Lyonnaise Des Recherche Catalytiques, Camail, Cochet, Gritte & Cie. (Societe en commandite.) (See Camail, E., Cochet, and Gritte, assignor.)

Solan, Patrick F., Brooklyn, and H. S. Balliet, New York, N. Y. Structural framework for walls, partitions, roofs, &c. No. 1,397,301; Nov. 15.

Sager, Ellis C., Chattanooga, Tenn. Treatment of phosphates. No. 1,396,975; Nov. 15.

Sorber, Samuel R., et al. (See Lambour, Luther J., assignor.)

Spardex Electrical Products Company Limited. (See Hudon, A., and Ward, assignors.)

Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Radiator. No. 1,397,116; Nov. 15.

Sparks-Withington Company, The. (See Sparks, William, assignor.)

Spelts, George A., Jr., assignor to Ulysses Engine Company, Ulysses, Nebr. Internal-combustion engine. No. 1,396,907; Nov. 15.

Spira, Walter J., White Plains, N. Y., assignor to Hudson Motor Specialties Company, Philadelphia, Pa. Spring-brush for timers. No. 1,397,150; Nov. 15.

Sprague, Douglas, et al. (See Townsend, Frederick H., assignor.)

Squier, William H., Bartlesville, Tex. Automobile-signal. No. 1,397,463; Nov. 15.

Stanowsky, George, Manistique, Mich. Fruit-gatherer. No. 1,397,464; Nov. 15.

Stark, Henry A., Milwaukee, Wis. Clip. No. 1,397,151; Nov. 15.

Stacy, Grover C., Dallas, Tex. Cotton-cleaner and boll-breaker. No. 1,397,257; Nov. 15.

Stallsmith, Joseph F., assignor of one-half to H. P. Utz, Kansas City, Mo. Carpet-cleaning machine. No. 1,396,977; Nov. 15.

Stanley Insulating Company. (See Smith, Herbert M., assignor.)

Ste The Dunlop Rubber Co. (See Macbeth, Allan, assignor.)

Stanley, Ernest B., Lawrenceville, Ill. Tire-changing tool. No. 1,397,465; Nov. 15.

Stein, Rudolph F., Minneapolis, Minn., assignor to United States Ordnance Company, Washington, D. C. Dismantling secondary batteries. (Reissue.) No. 15,230; Nov. 15.

Stephenson, Leigh J., assignor to W. T. Fenton, B. Y. Becker, L. A. Williams, G. B. Burrage, and L. J. Stephenson, trustees, Chicago, Ill. Motor-control system. No. 1,397,235; Nov. 15.

Stephenson, Leigh J., et al., trustees. (See Stephenson, Leigh J., assignor.)

Stevens, George C., Seattle, Wash. Aeroplane attachments. No. 1,396,854; Nov. 15.

Stimson, Herman B., Norman, Okla. Emergency-spar for vehicle-wheels. No. 1,397,136; Nov. 15.

Steddard, George P. (See Carrah, A. W., and Steddard.)

Sutter, Josiah H., Wichita, Kans. Crank-shaft-dressing machine. No. 1,397,153; Nov. 15.

Swimmer, Robert, New York, N. Y. Soap-dispensing apparatus. No. 1,397,244; Nov. 15.

Snyder, Leon A., Newark, N. J. Umbrella. No. 1,397,466; Nov. 15.

Symons, Wilson E., New York, N. Y. Shock-absorbing mechanism. No. 1,396,896; Nov. 15.

Szmyd, Frank, Waltersburg, Pa. Utensil implement. No. 1,397,345; Nov. 15.

Szmanski, Michael. (See Tworski, Martin, assignor.)

Tabulating Machine Company, The. (See Kabstrom, August, assignor.)

Tacchella, Adolf, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Engine injection-valve. No. 1,396,978; Nov. 15.

Taprell Loomis & Company. (See Cameron, James A., assignor.)

Taraseff, John, New York, N. Y. Cutting system. No. 1,397,302; Nov. 15.

Tarvin, John C., deceased, Maryville, Tenn.; M. C. Tarvin, administratrix. Pulveriser. No. 1,397,467; Nov. 15.

Tarvin, Mary C., administratrix. (See Tarvin, John C.)

Taussig, Gottlieb, New York, N. Y. Machine for coloring motion-picture films. No. 1,396,791; Nov. 15.

Taylor, Charles, Kearsley, near Manchester, England. Method of bleaching and apparatus therefor. No. 1,396,792; Nov. 15.

Tees, Daniel H., Chicago, Ill., and A. Wood, Hamilton, Ohio, assignors to Niles-Bement-Pond Company, New York, N. Y. Quartering and crank-pin-turning machine. No. 1,397,468; Nov. 15.

Thetos Company, The. (See Schaub, Jacob, assignor.)

Thomas, George H., assignor to Flexible Couplings Company, Westfield, N. Y. Flexible shaft-coupling. No. 1,396,979; Nov. 15.

Thomas Manufacturing Company, The. (See Lorimer, George W., assignor.)

Thomas, Phillips, Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company. Condenser. No. 1,396,897; Nov. 15.

Thompson, Albert E., assignor to Anderson-Barngrover Mfg. Co., San Jose, Calif. Can-drainer. No. 1,397,153; Nov. 15.

Thornber, John, assignor to Bradford Dyers Association Limited, Bradford, England. Apparatus for use in connection with machines for bleaching, dyeing, finishing, and otherwise treating fabrics. No. 1,396,980; Nov. 15.

Tiefel, Charles G., assignor to Todd Protectograph Company, Rochester, N. Y. Check-writer. No. 1,397,118; Nov. 15.

Tirrill, Allen A., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulating system. No. 1,396,898; Nov. 15.

Tobey, Charles W., Fairhaven, assignor to M. M. Rhodes & Sons Company, Taunton, Mass. Upholstery-nail. No. 1,397,388; Nov. 15.

Todd Protectograph Company. (See Tiefel, Charles G., assignor.)

Torgrsen, Bernt B., Seattle, Wash. Theater. No. 1,397,064; Nov. 15.

Tomasek, Frank, Chicago, Ill. Automobile bumper. No. 1,396,944; Nov. 15.

Torbensen Axle Company, The. (See Torbensen, Viggo V., assignor.)

Torbensen, Viggo V., assignor to The Torbensen Axle Company, Cleveland, Ohio. Driving mechanism for motor-vehicles. No. 1,397,491; Nov. 15.

Torbensen, Viggo V., assignor to The Torbensen Axle Company, Cleveland, Ohio. Motor-vehicle driving mechanism. No. 1,397,496; Nov. 15.

Townsend, Frederick H., New York, assignor of one-half to D. Sprague, Mount Vernon, N. Y., and one-half to H. C. Karlson, Hasbrouck Heights, N. J. Wrenching-implement. No. 1,397,023; Nov. 15.

Traphagen, Harry R., assignor to Emerson-Brantingham Company, Rockford, Ill. Power-lift plow. No. 1,396,793; Nov. 15.

Travell, Warren, New York, N. Y. Rope-grip. No. 1,397,259; Nov. 15.

Travers, Lewis C., assignor of one-half to E. H. Mahoney Chair Company, Gardner, and one-half to Heywood-Wakefield Company, Wakefield, Mass. Folding chair. No. 1,396,794; Nov. 15.

Trogner, Roland S., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire-making machine. No. 1,397,154; Nov. 15.

Trottier, John E., New York, N. Y. Garbage-can. No. 1,397,260; Nov. 15.

Troy Wagon Works Company, The. (See Hudson, Warren R., assignor.)

Truby, Franklin J., assignor to Automatic Electric Company, Chicago, Ill. Automatic trunking system. (Reissue.) No. 15,228; Nov. 15.

Tucker, Theddeus C., Oakland, Calif. Salting nuts in the shell. No. 1,397,187; Nov. 15.

Tunnell, Harry E., New York, N. Y. Liquid-projecting device. No. 1,397,023; Nov. 15.

Turbine Air Tool Company, The. (See Kraber, George L., assignor.)

Turja, John E. (See Jacobson, J. W., and Turja.)

Turner, Walter V., deceased, Wilkinsburg, by The Westinghouse Air-Brake Co., assignee, Wilmerding, Pa. Regenerative brake device. (Reissue.) No. 15,229; Nov. 15.

Twombly, Alexander H., New York, A. P. Lundin, Bayside, N. Y., and E. A. Marr, Norfolk, Va., assignors, by mesne assignments, to American Balsa Company, Inc. Treating wood. No. 1,396,899; Nov. 15.

Tworski, Martin, Vancouver, British Columbia, assignor of one-half to M. Szymanski, Winnipeg, Manitoba, Canada. Planting-machine. No. 1,396,900; Nov. 15.

Typewriter Calculating Attachment Company. (See Schinke, E. C., and Sutherland, assignors.)

U. S. Industrial Alcohol Co. (See Backhaus, Arthur A., assignor.)

U. S. Industrial Alcohol Co. (See Kalen, Denso E., assignor.)
Ulymes Engine Company. (See Speits, George A., Jr., assignor.)
United Alloy Steel Corporation. (See Maineri, Daniel L., assignor.)
United Harrow Mfg. Co. (See McNabb, Ernst W., assignor.)
United Shoe Machinery Corporation. (See Morrill, Alfred R., assignor.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Automatic Corporation. (See Arbuckle, Samuel F., assignor.)
United States Chain & Forging Co. (See Sauerwald, Irvin, assignor.)
United States Ordnance Company. (See Stein, Rudolph F., assignor.) (Reissue.)
Utz, Harvey F. (See Stallsmith, Joseph F., assignor.)
Van Fleet, Elon J., Joliet, assignor to W. E. Pratt, Chicago, Ill. Jack-lever connection. No. 1,396,901; Nov. 15.
Van Heusen, John M., Jamaica Plain, Mass. Collar. No. 1,397,261; Nov. 15.
Van Tuyl, Thomas. (See Cook, A. E., and Van Tuyl.)
Vandemberg, Clarence E., Cherrygrove, Pa. Wrench. No. 1,396,981; Nov. 15.
Varley, Thomas W., and W. C. Nein, New York, N. Y. Automatic train control. No. 1,397,024; Nov. 15.
Vaughn, Joseph D., Salt Lake City, Utah. Slicing-machine. No. 1,397,469; Nov. 15.
Ventress, Robert E., Sr., Mobile, Ala. Hydroplane. No. 1,397,470; Nov. 15.
Vestine, Andrew O., Watertown, assignor to L. C. Chase & Company, Boston, Mass. Liquid-fuel burner. No. 1,397,389; Nov. 15.
Viebrock, Carl H. and H. W., Douglas, Wash. Valve-grinder. No. 1,397,390; Nov. 15.
Viebrock, Henry W. (See Viebrock, Carl H. and H. W.)
Viturro, Marcelino. (See Anselmi, C., and Viturro.)
Vogel, Henry S., Grant City, Mo. Game. No. 1,396,795; Nov. 15.
Vreeland, George W. (See McGee, F. R., and Vreeland.)
Wagner Electric Manufacturing Company. (See Cole, Lovell E., assignor.)
Wagner Electric Manufacturing Company. (See Fynn, Valere A., assignor.)
Wahl, John C., Chicago, Ill., assignor, by mesne assignments, to Remington Accounting Machine Corporation, New York, N. Y. Calculating-machine. No. 1,397,188; Nov. 15.
Wainola, Matti, Los Angeles, Calif. Toy. No. 1,396,902; Nov. 15.
Walker, William, Fairbury, Ill. Tile and sewer trap. No. 1,397,471; Nov. 15.
Wall, William F., assignor to National Motor Car & Vehicle Corporation, Indianapolis, Ind. Brake. No. 1,396,796; Nov. 15.
Wallace, Allen, Moorestown, N. J., assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Electric-locomotive truck. No. 1,397,472; Nov. 15.
Ward, Otis A., Evanston, Ill. Wrench. No. 1,396,982; Nov. 15.
Ward, Percy W. (See Hudon, A., and Ward.)
Waream, Charles E., assignor to American Laundry Machinery Company, Norwood, Ohio. Collar-shaper. No. 1,397,303; Nov. 15.
Webb, John M., Flat, Tex. Pink-boll-weevil destroyer. No. 1,396,797; Nov. 15.
Weber, William W., Sacramento, Calif. Insulation-cutter. No. 1,396,903; Nov. 15.
Weinberg, Alexander, Pittsburgh, and C. V. Linderman, North Braddock, Pa. Baseball-game apparatus. No. 1,396,798; Nov. 15.
Weiss, Arnold A. (See Nelson, Elmer F., assignor.)
Wells, Cornelius L., Cumberstone, Md. Lubricating device. No. 1,397,085; Nov. 15.
Wenthe, William C. (See Neiswender, C. A., and Wenthe.)
Werlin, Charles H., Columbus, Ohio. Gas and air mixing device. No. 1,397,473; Nov. 15.
West, Chalmers A., Mangum, Okla. Draft-evener. No. 1,397,474; Nov. 15.
West, Horatio G., Harrisville, R. I. Picker. No. 1,397,475; Nov. 15.
Westerberg, Carl A., assignor to Aktiebolaget C. E. Johansson, Eskilstuna, Sweden. Base for holders for measuring-blocks. No. 1,397,189; Nov. 15.
Western Electric Company. (See Atwood, George F., assignor.)
Western Electric Company. (See Clausen, H. P., and Goodrum, assignors.)
Western Electric Company. (See Clausen, Henry P., assignor.)
Western Electric Company. (See Fowler, Clarence B., assignor.)
Western Electric Company. (See Goodrum, Charles L., assignor.)
Western Electric Company. (See Haddock, Arthur, assignor.)
Westhern Electric Company. (See Halter, Carl, assignor.)
Western Electric Company. (See Harrison, Henry C., assignor.)
Western Electric Company. (See Hill, Owen E., assignor.)
Western Electric Company. (See Jillard, A. G., and Bracken, assignors.)
Western Electric Company. (See Johnson, Kenneth S., assignor.)
Western Electric Company. (See Mather, George E., assignor.)
Western Electric Company. (See Minton, John P., assignor.)
Western Electric Company. (See Pugh, Harry W., assignor.)
Western Electric Company. (See Scriven, Edward O., assignor.)
Western Electric Company. (See Wilbur, Ray S., assignor.)
Westinghouse Air Brake Co., assignee. (See Turner, Walter V., assignor.) (Reissue.)
Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Chubb, Lewis W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Clarke, John A., Jr., assignor.)
Westinghouse Electric & Manufacturing Company. (See Colby, Ora A., assignor.)
Westinghouse Electric and Manufacturing Company. (See Fortescue, Charles L., assignor.)
Westinghouse Electric and Manufacturing Company. (See Hand, Edward A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hellmund, Rudolf M., assignor.)
Westinghouse Electric & Manufacturing Company. (See James, Henry D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jones, Maurice P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Lammers, Edwin S., Jr., assignor.)
Westinghouse Electric & Manufacturing Company. (See Meyer, Harry R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Nagel, Harry C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Scott, Charles F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Thomas, Phillips, assignor.)
Westinghouse Electric & Manufacturing Company. (See Tirrill, Allen A., assignor.)
White, D'Orsay M., assignor to Cadillac Motor Car Company, Detroit, Mich. Hydrocarbon-motor. No. 1,396,904; Nov. 15.
White, D'Orsay M., Indianapolis, Ind., assignor to La Fayette Motors Company. Detachable transmission construction. No. 1,397,304; Nov. 15.
White, Edwin, Baltimore, Md., assignor to Continental Can Company, Inc. Syracuse, N. Y. Sheet-feeding mechanism. No. 1,397,305; Nov. 15.
White, H., Manufacturing Company. (See Kahns, Walter R., assignor.)
White, Manley A., Beverly, Mass. Portable floating breakwater or bulkhead. No. 1,397,025; Nov. 15.
White, William C., Portsmouth, N. H. Egg-ehucker. No. 1,397,306; Nov. 15.
Whyte, Frederick M., Tarrytown, N. Y. Brake-hanger. No. 1,396,945; Nov. 15.
Wiard, Frederick, assignor to American Standard Tool Company, Detroit, Mich. Milling-cutter. No. 1,397,119; Nov. 15.
Wiberley, Frank, Jamaica, assignee to Barthels Manufacturing Company, Glendale, N. Y. Wearing-apparel. No. 1,396,799; Nov. 15.
Wiggins, Edward J., assignor of one-half to G. A. Pearson, Chicago, Ill. Fluid-controlling apparatus. No. 1,397,190; Nov. 15.
Wilbur, Ray S., Lyndhurst, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Testing systems. No. 1,396,800; Nov. 15.
Wilcox, Hiram J., Placerville, Calif. Revolving harrow. No. 1,396,905; Nov. 15.
Williams, Alfred O., South Bend, Ind., assignor to Clark Equipment Company, Buchanan, Mich. Differential gearing. No. 1,397,086; Nov. 15.
Williams, Anthony F. (See Lyon, E., and Williams.)
Williams, George C. F., Hartford, Conn. Nail-string machine. No. 1,397,191; Nov. 15.
Williams, James L., New York, N. Y., assignor to The Dentists' Supply Company. Crown-tooth. No. 1,397,087; Nov. 15.
Williams, James L., New York, N. Y., assignor to The Dentists' Supply Company. Denture and tooth therefor. No. 1,397,192; Nov. 15.
Williams, Lynn A., *et al.*, trustees. (See Stephenson, Leigh J., assignor.)
Williams, Milton F., assignor to Williams Patent Crusher and Pulverizer Company, St. Louis, Mo. Stirrup-hammer. No. 1,396,983; Nov. 15.
Williams Patent Crusher and Pulverizer Company. (See Williams, Milton F., assignor.)
Willis, George M., Chicago, Ill. Resilient wheel. No. 1,396,984; Nov. 15.)
Wilmot Engineering Company. (See Law, James C., assignor.)
Wilson, Ernest S., Garrison, Iowa. Advertising novelty. No. 1,397,476; Nov. 15.
Wilson, Minard A., Irvington, N. J. Combination-tail-piece for violins. No. 1,397,193; Nov. 15.
Wilson Welder & Metals Company. (See Churchward, Alexander, assignor.)

Winchester Repeating Arms Company. (See Gallagher, George D., assignor.)
Winkler, Alfred, and M. Dannecker, Neuwied, Germany. Envelop roller folding-machine, in combination with a closing-flap-gumming machine. No. 1,396,906; Nov. 15.
Winkley, Erastus E., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Shoe-bottom. No. 1,396,801; Nov. 15.
Winkley, Erastus E., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for molding heel-piles. No. 1,396,802; Nov. 15.
Wirebounds Patents Company. (See Mead, Howard G., assignor.)
Wisch, Walter J. (See Holmes, G. E., and Wisch.)
Wokoun, Frank, Baltimore, Md. Record-envelop. No. 1,397,477; Nov. 15.
Wolf, Charles, Portland, Oreg. Link saw. No. 1,397,026; Nov. 15.
Wolf, John L., Logansport, Ind. Adjustable shoe-last. No. 1,396,907; Nov. 15.
Wolf, Eugen, Tempelhof, near Berlin, Germany. Cinematographic arrangement. No. 1,397,346; Nov. 15.

Tuskeloid Company, Inc., The, New York, N. Y. Nail-polishers and atomizers. Nos. 140,692–3; Nov. 15.
Tuskeloid Company, Inc., New York, N. Y. Hair, nail, tooth, hat, and cloth brushes. No. 140,694; Nov. 15.
Tyler, W. S., Company, The, Cleveland, Ohio. Vibrated-screen separating-machines. No. 120,776; Nov. 15.
United States Playing Card Company, The, Cincinnati, Ohio. Playing-cards. No. 151,115; Nov. 15.
United States Playing Card Company, The, Cincinnati, Ohio. Playing-cards. No. 151,119; Nov. 15.
United States Rubber Company, New Brunswick, N. J., and New York, N. Y. Golf-balls. No. 153,023; Nov. 15.
Unity Cotton Mills, La Grange, Ga. Piece goods—namely, duck, canvas, and drilling. No. 144,005; Nov. 15.
Utility Compressor Company, The, Detroit, Mich. Artificial refrigerating units and household refrigerators. No. 141,199; Nov. 15.
Valker, Chas., & Son, Chicago, Ill. Liquid malt extract. No. 152,490; Nov. 15.
Wahl, M., & Son, New York, N. Y. Hair-nets. No. 152,665; Nov. 15.
Wanamaker, John, New York, New York, N. Y. Golf-balls. No. 153,271; Nov. 15.
Watson Paint and Glass Company, Pittsburgh, Pa. Paste paints. No. 143,111; Nov. 15.
Waverly Oil Works Company, Pittsburgh, Pa. Lubricating-oils. No. 149,570; Nov. 15.
Wawbeek Spring Water Co., The, Suffield, Conn. Ginger ale and beer, birch and root beers, &c. No. 146,176; Nov. 15.
Western Cartridge Company, East Alton and Springfield, Ill. Non-fouling bullets. Nos. 148,778–9; Nov. 15.
Weston, E. J., Los Angeles and San Francisco, Calif. Malt-syrup. No. 142,372; Nov. 15.
White & Wyckoff Manufacturing Company, Holyoke, Mass. Writing-tablets. No. 149,366; Nov. 15.
Wickwire Spencer Steel Corporation, Worcester, Mass. Wire-cloth, wire-netting, wire trellis, and plant-supports, &c. No. 145,143; Nov. 15.
Wilson-Jones Loose Leaf Company, Chicago, Ill. Note and memorandum books. No. 151,898; Nov. 15.
Wilson, Thos. E., & Co., Chicago, Ill. Baseballs. No. 152,972; Nov. 15.
Windsor Broom Company, Hamburg, Pa. Brooms. No. 150,049; Nov. 15.
Wonder Builder Toy Co., The, Gallopolis, Ohio. Building elements used in the construction of toy vehicles and parts thereof. No. 138,884; Nov. 15.
Wright, Barrett & Stilwell Company, St. Paul, Minn. Writing-paper. Nos. 152,454–5; Nov. 15.
Zellerbach Paper Company, San Francisco, Calif. Wrapping-paper. No. 150,089; Nov. 15.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 15TH DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid, Refining oxalic. D. E. Kelen. No. 1,397,127; Nov. 15.
Accounting-machine with auxiliary printing appliance. A. H. Hawley. No. 1,396,932; Nov. 15.
Addressing-machines, Sheet-gage for. E. R. Jungling. No. 1,397,125; Nov. 15.
Adjustable holder. F. Karuchits. No. 1,397,254; Nov. 15.
Advertising novelty. E. S. Wilson. No. 1,397,476; Nov. 15.
Aerial apparatus. V. Pastrengo. No. 1,396,874; Nov. 15.
Aerial apparatus or flying-mechanism. E. F. Burrill. No. 1,397,400; Nov. 15.
Aeroplane. G. Ostgier. No. 1,397,292; Nov. 15.
Aeroplane. J. A. Smith. No. 1,397,062; Nov. 15.
Aeroplane. B. Zsarnay. No. 1,397,196; Nov. 15.
Aeroplane attachment. G. C. Stevens. No. 1,396,894; Nov. 15.
Air-heater, Electric. O. A. Colby. No. 1,396,813; Nov. 15.
Aircraft, Propeller for. A. Boerner. No. 1,396,917; Nov. 15.
Alarm-controlling mechanism. A. P. Hodge. No. 1,396,842; Nov. 15.
Aminoalkylesters and of alkylaminoalkylesters of para aminobenzoic acid, Production of. W. Bader. No. 1,396,913; Nov. 15.
Ammonium chlorid, Producing. O. L. Christenson and K. I. M. Gisiko. No. 1,397,264; Nov. 15.
Amusement apparatus. H. F. Maynes. No. 1,397,009; Nov. 15.
Amusement device. J. G. Malouf. No. 1,397,135; Nov. 15.
Animal-trap. T. S. Catlin. No. 1,396,810; Nov. 15.
Animal-trap. K. Melnick. No. 1,397,440; Nov. 15.
Ankle-supporter. H. B. Hamilton. No. 1,397,095; Nov. 15.
Archer's bow. A. E. Shepherdson. No. 1,396,788; Nov. 15.
Automobile-brake adjuster. G. A. Gemmer. No. 1,397,373; Nov. 15.
Automobile-bumper. F. Towasek. No. 1,396,944; Nov. 15.
Automobile dust-cap. S. R. Sabel. No. 1,397,235; Nov. 15.
Automobile-engine fuel-supply. J. Good. No. 1,397,492; Nov. 15.
Automobile number-plate. R. R. Melton. No. 1,397,136; Nov. 15.
Automobile-signal. G. W. Jarvis. No. 1,397,424; Nov. 15.
Automobile-signal. W. E. Squier. No. 1,397,463; Nov. 15.
Automobile turning-signal. E. H. Hebern. No. 1,397,211; Nov. 15.
Automobiles, Foldable child's-seat for. T. A. Haas. No. 1,397,281; Nov. 15.
Automobiles, Folding top for. G. E. Madison. No. 1,396,968; Nov. 15.
Automobiles, Foot-board holder for. J. P. Leonard. No. 1,396,850; Nov. 15.
Automobiles, Safety device for. W. P. Dwyer. No. 1,397,043; Nov. 15.
Automobiles, Steering attachment for. E. J. Balmos. No. 1,396,722; Nov. 15.
Automobiles, System of locking. T. J. Coo. No. 1,397,484; Nov. 15.
Auxiliary seat. W. J. Diehl. No. 1,397,089; Nov. 15.
Axle-lubricator. T. G. Bass. No. 1,397,352; Nov. 15.
Axle, Motor-vehicle. A. Muenk. No. 1,396,809; Nov. 15.
Bag-cleaner. J. C. Fulkerson and L. B. Stuart. No. 1,397,417; Nov. 15.
Bag-lock. B. J. Richardson and C. S. Barber. No. 1,397,455; Nov. 15.
Battery and manufacture, Dry. O. E. Ruboff. No. 1,397,183; Nov. 15.
Bearing, Roller-. O. E. Michaud. No. 1,397,226; Nov. 15.
Bearing, Roller-. N. A. Palmgren. No. 1,397,142; Nov. 15.
Bearing, Roller-. W. L. Scribner. No. 1,397,297; Nov. 15.
Bearing, Self-oiling. H. J. Smith. No. 1,397,115; Nov. 15.
Bearing, Thrust-. C. G. Roberton. No. 1,396,880; Nov. 15.
Bed, Invalid-. T. Dodds. No. 1,397,041; Nov. 15.
Bedstead, Metal. C. H. Busch. No. 1,397,203; Nov. 15.
Belt, Power-transmission. E. L. Burrell. No. 1,396,925; Nov. 15.
Binding media on roads, Apparatus for spraying. S. E. Finley. No. 1,397,045; Nov. 15.
Bleaching and apparatus therefor, Method of. C. Taylor. No. 1,396,792; Nov. 15.
Block: *See*—
Building-block. Engraving-block.
Blocks into smaller sizes, Machine for cutting. A. E. Alchin. No. 1,397,198; Nov. 15.
Boat, Speed-. E. Gardner. No. 1,396,831; Nov. 15.
Boiler. A. M. Mertzanoff. No. 1,397,010; Nov. 15.
Boll-weevil destroyer, Pink-. J. M. Webb. No. 1,396,797; Nov. 15.
Book-frame and label-holder. G. A. Annable. No. 1,396,910; Nov. 15.
Bottle-capping machine. H. E. Asbury. No. 1,397,394; Nov. 15.
Bottle receptacle, Milk-. W. Kashur. No. 1,397,427; Nov. 15.
Box: *See*—
Electric-cut-out box. Refrigerating-box.
Box-blank machines, Feed mechanism for wire-bound-. H. G. Mead. No. 1,397,439; Nov. 15.
Box-nailing machine. A. N. Biggs. No. 1,397,054; Nov. 15.
Bracket: *See*—
Shade-bracket.
Bracket. A. Mayer. No. 1,397,105; Nov. 15.
Brake: *See*—
Car-brake. Railway-brake.
Power-brake. Wheel-brake.
Brake. S. Lankbeet. No. 1,397,430; Nov. 15.
Brake. W. G. Wall. No. 1,396,796; Nov. 15.
Brake equaliser, Four-wheel-. A. Lucand. No. 1,396,965; Nov. 15.
Brake-hanger. F. M. Whyte. No. 1,396,945; Nov. 15.
Breakwater or bulkhead, Portable floating. M. A. White. No. 1,397,025; Nov. 15.
Breech-loading guns, Mechanism for non-recoil. B. T. Hamilton. No. 1,397,418; Nov. 15.
Brick-cleaning machine. E. L. Minor. No. 1,397,227; Nov. 15.
Brush. H. A. Poppenhusen and R. T. R. Hastings. No. 1,396,973; Nov. 15.
Brush, Commutator. F. L. Cooley. No. 1,396,948; Nov. 15.
Brushes, Drip-cup attachment for. C. L. McDaniel. No. 1,396,967; Nov. 15.
Buffers to vehicles, Clamp for attaching. T. A. Hoover. No. 1,397,213; Nov. 15.
Buffing or polishing wheel. A. Levett. (Reissue.) No. 15,226; Nov. 15.
Building-block. T. Colosimo. No. 1,397,035; Nov. 15.
Bumper. E. T. Mathewson. Nos. 1,397,223–4; Nov. 15.
Bumper, Automobile-. W. G. Cox. No. 1,397,315; Nov. 15.
Bumpers, Reinforcing-plate for automobile-. H. Bernstein. No. 1,397,354; Nov. 15.
Burner: *See*—
Gas-burner. Liquid-fuel burner.
Button-fastener. N. Gurewitsch. No. 1,397,376; Nov. 15.
Cable-reeling apparatus. G. F. Atwood. No. 1,396,721; Nov. 15.
Cable-splice. J. F. Dillon. No. 1,397,040; Nov. 15.
Calculating-machine. E. C. Schinke and N. A. Sutherland. No. 1,396,886; Nov. 15.
Calculating-machine. J. C. Wahl. No. 1,397,188; Nov. 15.
Calendar-pad and mount therefor. W. Y. Dear. No. 1,396,814; Nov. 15.
Camera, Photographic. A. H. Long. No. 1,397,132; Nov. 15.
Can: *See*—
Garbage-can.
Can-drainer. A. R. Thompson. No. 1,397,153; Nov. 15.
Can-opener. J. M. Butcher. No. 1,396,991; Nov. 15.
Can-opener. E. E. Kepner. No. 1,397,217; Nov. 15.
Canning fruits and vegetables, Jar and apparatus for cold-pack. J. F. Burns. No. 1,396,723; Nov. 15.
Cap. J. Yanow. No. 1,396,985; Nov. 15.
Car-body. F. M. Cowgill. No. 1,397,081; Nov. 15.
Car-brake. G. L. Scott. No. 1,397,059; Nov. 15.
Car-door hanger, Box-. C. H. Endicott. No. 1,397,410; Nov. 15.
Car-doors, Tram-line system for. G. E. Oakley. No. 1,396,775; Nov. 15.
Cars and other motor and railway vehicles, Body for motor-. E. W. Edwards. No. 1,396,787; Nov. 15.
Cars, Grain-door for box-. W. Gelineau. No. 1,397,279; Nov. 15.
Cars, Locking mechanism for dump-. A. M. Gow. No. 1,397,165; Nov. 15.
Carbonising apparatus. F. W. Young. No. 1,397,029; Nov. 15.
Card holder, Show-. O. R. Sielaff. No. 1,396,892; Nov. 15.
Card-punching device. A. Knistrom. No. 1,397,007; Nov. 15.

Carpet-cleaning machine. J. F. Stallsmith. No. 1,396,977; Nov. 15.
Carrier: *See*—
Type-carrier.
Cartridge-fuse. R. C. Cole. No. 1,396,781; Nov. 15.
Casing for universal joints. P. Evans. No. 1,397,413; Nov. 15.
Cast-iron, Composition for the treatment of. H. L. Coles. No. 1,397,404; Nov. 15.
Caster-wheel and making same. C. W. Millet. No. 1,397,171; Nov. 15.
Catalysis, Apparatus for beating by. E. Camoll, L. Cochet, and J. Gritte. No. 1,396,809; Nov. 15.
Cellulose esters, Making. M. E. Putnam. No. 1,396,878; Nov. 15.
Chain, Separable-link. J. C. Law. No. 1,397,131; Nov. 15.
Chair: *See*—
Folding chair.
Check-writer. C. G. Tiefel. No. 1,397,118; Nov. 15.
Chopper: *See*—
Meat-chopper.
Cigarette-package. G. W. Hill. No. 1,396,749; Nov. 15.
Cinematographic arrangement. E. Wolff. No. 1,397,348; Nov. 15.
Cinematographic apparatus, Means for intermittently feeding the films in. C. Anselmi and M. Vitorro. No. 1,396,811; Nov. 15.
Circuits, Vacuum-tube. A. Haddock. No. 1,396,745; Nov. 15.
Clamp: *See*—
Drive-clamp. Saw-clamp.
Roofing-clamp. Transfer-clamp.
Clamp, Drive-. A. W. Brown. No. 1,396,921; Nov. 15.
Clasp. A. Pfeiffer. No. 1,396,941; Nov. 15.
Clasp. A. Schroetter. No. 1,396,887; Nov. 15.
Cleaner: *See*—
Bag-cleaner.
Clip. H. A. Staab. No. 1,397,151; Nov. 15.
Closet-seat fixture. R. C. B. Judd. No. 1,396,934; Nov. 15.
Clothes-pressing apparatus. A. E. Snow. No. 1,397,300; Nov. 15.
Clothesline-holder. G. A. Hopkins. No. 1,397,051; Nov. 15.
Clothespin. R. E. Barneck. No. 1,397,199; Nov. 15.
Clutch. A. A., Jr, and H. Butterworth. No. 1,397,401; Nov. 15.
Coating reticulated forms. A. J. Hall. No. 1,396,854; Nov. 15.
Coil-winder. J. F. Cullin. No. 1,397,316; Nov. 15.
Coiling machine, Hoop-. S. J. Caroland. No. 1,397,402; Nov. 15.
Coin-handling apparatus. S. J. Bruce. No. 1,396,923; Nov. 15.
Coin-wrapping device. A. D. Mohr. No. 1,397,444; Nov. 15.
Collar. R. E. Gray. No. 1,396,883; Nov. 15.
Collar. J. M. van Heusen. No. 1,397,261; Nov. 15.
Collar-shaper. C. E. Waream. No. 1,397,309; Nov. 15.
Compresses, Moistening and wringing. C. C. Humphries. No. 1,397,429; Nov. 15.
Concrete-block-molding machine. A. L. and H. R. Post. No. 1,396,779; Nov. 15.
Concrete-form. C. G. Miess and J. J. McKay. No. 1,397,138; Nov. 15.
Concrete-mold. J. I. Jones. No. 1,397,263; Nov. 15.
Condenser. P. Thomas. No. 1,396,897; Nov. 15.
Control, System of. J. A. Clarke, Jr. No. 1,396,812; Nov. 15.
Control, System of. H. R. Meyer. No. 1,396,866; Nov. 15.
Conveyer. W. T. Wood. No. 1,396,804; Nov. 15.
Cooler display-case and refrigerator, Combined. G. C. Amend. No. 1,397,392; Nov. 15.
Core, Collapsible. J. N. Boyce. No. 1,397,073; Nov. 15.
Corrugated-board-making machine. M. B. Diskin. No. 1,396,818; Nov. 15.
Cotton-cleaner and boll-breaker. G. C. Stacy. No. 1,397,257; Nov. 15.
Cotton fibers and products, Treating. W. C. Johnson. No. 1,396,960; Nov. 15.
Cotton-separator. J. C. Garner. No. 1,397,001; Nov. 15.
Coupling: *See*—
Shaft-coupling.
Coupling. W. J. Drucker. No. 1,397,370; Nov. 15.
Coupling device, Manually-operated safety. E. Schenk. No. 1,397,237; Nov. 15.
Coupling-release rigging. S. H. Campbell. Nos. 1,396,725–6; Nov. 15.
Crank-shaft-dressing machine. J. H. Sutter. No. 1,397,152; Nov. 15.
Creels for use in warping or beaming, Tension device or yarn-cleaner for. G. Kershaw. No. 1,397,286; Nov. 15.
Crosshead pitman connection. A. Ziska, Jr. No. 1,397,308; Nov. 15.
Crystals containing foreign materials of a different specific gravity therefrom, Purification of. A. A. Backhaus. No. 1,397,121; Nov. 15.
Cultivator. D. W. Schmitt. No. 1,397,333; Nov. 15.
Cultivator-hoe. J. E. Cummings. No. 1,396,733; Nov. 15.
Current system, High-voltage direct-. R. E. Hellmund. No. 1,396,839; Nov. 15.
Cushion construction, Spring-. L. A. Suckoff. No. 1,397,021; Nov. 15.
Cutter: *See*—
Insulation-cutter. Milling-cutter.
Lashing-cutter.
Cutter and roller. J. V. Adams. No. 1,397,391; Nov. 15.
Cutter-heads, Rotor for. G. L. Kraber. No. 1,396,762; Nov. 15.
Cutting system. J. Tarasoff. No. 1,397,302; Nov. 15.
Cutting-tool. W. R. Bronander. No. 1,397,357; Nov. 15.
Dental scaler. W. H. H. Bixler. No. 1,397,395; Nov. 15.
Dental tape-winding device. J. A. Heidbrink. No. 1,396,957; Nov. 15.
Denture and tooth therefor. J. L. Williams. No. 1,397,192; Nov. 15.
Depth-indicating device. E. E. Huffman. No. 1,396,844; Nov. 15.
Die-head. G. T. Shearer. No. 1,397,238; Nov. 15.
Die-press. W. B. Bronander. No. 1,397,358; Nov. 15.
Diestock. M. Cramer. No. 1,397,243; Nov. 15.
Dimension indicator and marker. C. G. Beals. No. 1,396,806; Nov. 15.
Disintegrator, Soil-. I. A. Kerr. No. 1,397,428; Nov. 15.
Dispensing apparatus. H. B. Cooley. No. 1,396,905; Nov. 15.
Distillation of wood, woody fiber, and similar carbonaceous substances. F. Poore. No. 1,397,161; Nov. 15.
Distributers, Attaching means for broadcast. D. R. Holden. No. 1,396,843; Nov. 15.
Doll. H. M. McClelland. No. 1,396,706; Nov. 15.
Doll. G. H. Parsons. No. 1,396,875; Nov. 15.
Door-check. W. A. Geiger. No. 1,397,200; Nov. 15.
Door-control system. L. P. Hynes. No. 1,396,757; Nov. 15.
Door-lock. W. S. Brainard. No. 1,397,074; Nov. 15.
Door structure, Folding-. G. E. Mather. No. 1,396,769; Nov. 15.
Door structure, Folding-. H. W. Pugh. No. 1,396,780; Nov. 15.
Dough-raising appliance. B. W. Wolters. No. 1,396,908; Nov. 15.
Draft-arm, Combination. C. L. Bastian and H. Mathisen. No. 1,396,915; Nov. 15.
Draft-evener. C. A. West. No. 1,397,474; Nov. 15.
Drawer sets and rollers, Detachable. S. H. C. Mayne. No. 1,396,864; Nov. 15.
Dress-suit cases, &c., Strapping for. P. W. Post. No. 1,397,016; Nov. 15.
Drier. F. T. Johnson. No. 1,397,100; Nov. 15.
Drive mechanism. T. F. Ledbetter. No. 1,397,219; Nov. 15.
Driving-boxes, Lateral take-up for. J. J. Peters. No. 1,397,110; Nov. 15.
Driving mechanism, Angular. R. S. Curley. No. 1,397,244; Nov. 15.
Drying-machines, Hood-insulating means for. H. T. Baker. No. 1,397,309; Nov. 15.
Earth-boring machine. W. E. Moore. No. 1,397,324; Nov. 15.
Easel. J. A. Cameron. No. 1,396,724; Nov. 15.
Egg-poacher. E. R. Finn. No. 1,397,318; Nov. 15.
Egg-shucker. W. C. White. No. 1,397,306; Nov. 15.
Electric-candle socket. M. Herskovits. No. 1,397,212; Nov. 15.
Electric cars, &c., System of operating safety appliances on. E. J. Futterer. No. 1,397,205; Nov. 15.
Electric conduit and making same. H. M. Short. No. 1,396,789; Nov. 15.
Electric-cut-out box. C. D. Platt. No. 1,396,876; Nov. 15.
Electric indicator. F. W. Wood. No. 1,396,803; Nov. 15.
Electric-light sockets, Cap for. A. W. Limoni. No. 1,396,857; Nov. 15.
Electric-locomotive truck. A. Wallace. No. 1,397,472; Nov. 15.
Electric machine, Dynamo-. V. G. Apple. No. 1,396,947; Nov. 15.
Electric machines, Damping windings for dynamo-. R. E. Hellmund. No. 1,396,838; Nov. 15.
Electric signal. R. M. Hopkins. No. 1,397,421; Nov. 15.
Electrical distributing system. C. L. Fortescue. No. 1,396,826; Nov. 15.
Electrical measuring apparatus. H. Nyquist. No. 1,397,238; Nov. 15.
Electrical measuring instrument. C. D. Miller. No. 1,397,441; Nov. 15.
Electrical precipitating system. L. W. Chubb. No. 1,396,811; Nov. 15.
Electrical system. E. A. Hanff. No. 1,396,835; Nov. 15.
Electrical system. E. S. Lammers, Jr. No. 1,396,853; Nov. 15.
Electrical switch. H. D. James. No. 1,396,843; Nov. 15.
Electrically operating mechanism from a distance, A. Parshin. No. 1,397,449; Nov. 15.
Electrolytic cells, Automatic operation of. P. H. Brace. No. 1,396,919; Nov. 15.
Elevator-cages, Safety device for. J. Hoffer. No. 1,396,752; Nov. 15.
Elevator-cars, Safety device for. J. Hoffer. No. 1,396,753; Nov. 15.
Elevators, Safety mechanism for. J. Hoffer. No. 1,396,751; Nov. 15.
Embroidery-machines, Expanding frame for. E. Meyer. No. 1,397,322; Nov. 15.
Embryotomy device. T. J. Shumate. No. 1,397,461; Nov. 15.
Engine: *See*—
Explosive-engine.
Internal-combustion engine.
Engine-cylinders and making same, Inlay for repair of scored. C. Hopper. No. 1,397,167; Nov. 15.

Engine, Internal-combustion. G. A. Spoltz, Jr. No. 1,396,976; Nov. 15.
Engine timer. M. Isachsen. No. 1,397,005; Nov. 15.
Engines, Air-cooling system for gas-. D. L. Harris. No. 1,397,047; Nov. 15.
Engines, Auxiliary air-intake for internal-combustion. J. Bacon. No. 1,397,349; Nov. 15.
Engines, Cooling means for motor-vehicle. G. L. Schofield. No. 1,396,755; Nov. 15.
Engines, Manifold for internal-combustion. A. Bachle. No. 1,397,462; Nov. 15.
Engines, Means for cooling internal-combustion. P. J. Garrison. No. 1,396,953; Nov. 15.
Engines, Starter for internal-combustion. C. M. Dyer. No. 1,396,736; Nov. 15.
Engines, Variable-lift fuel-valve for oil-. K. O. Keller. No. 1,396,935; Nov. 15.
Engraving-block. H. Plummer. No. 1,397,293; Nov. 15.
Envelop-album, Loose-leaf. A. W. Engel. No. 1,397,000; Nov. 15.
Envelop, Record-. F. Wokoun. No. 1,397,477; Nov. 15.
Envelop rubber folding-machine in combination with a closing-flap-gumming machine. A. Winkler and M. Dünnebier. No. 1,396,906; Nov. 15.
Extensometer. G. H. Benedict. No. 1,397,030; Nov. 15.
Extracting and refining greasy substances contained in water, Apparatus for. E. Sepulchre. No. 1,396,889; Nov. 15.
Explosive-engine. D. F. Asbury. No. 1,396,912; Nov. 15.
Fabrics, Apparatus for use in connection with machines for bleaching, dyeing, finishing, and otherwise treating. J. Thurber. No. 1,396,950; Nov. 15.
Facing and plug therefor, Replaceable. G. E. Cox. No. 1,397,082; Nov. 15.
Fastener elements, Attaching means for separable. A. Lovine and L. Offerman. No. 1,397,382; Nov. 15.

Frying-pan.
Panels, Making long ply-wood. G. B. Meyercord. No. 1,396,971; Nov. 15.
Paper, Core for rolls of. H. Parker. No. 1,397,143; Nov. 15.
Paper-fastener. F. W. Shute. No. 1,396,790; Nov. 15.
Pasting device. T. Dean. No. 1,396,998; Nov. 15.
Petrol-tank. A. Macbeth. No. 1,397,283; Nov. 15.
Phonographs, Automatic stop for. G. W. Lorimer. No. 1,396,964; Nov. 15.
Phosphates, Treatment of. E. C. Soper. No. 1,396,975; Nov. 15.
Photographic records, Method and apparatus for making. C. E. K. Mees. No. 1,396,770; Nov. 15.
Photometer. W. F. Little and C. H. Sharp. No. 1,396,963; Nov. 15.
Piano-roll centralizer, Player-. J. F. Lauda. No. 1,397,255; Nov. 15.
Pianos, pipe-organs, or similar instruments, Violin-playing attachment for. D. E. Adamson. No. 1,397,479; Nov. 15.
Picker. H. G. West. No. 1,397,475; Nov. 15.
Picture films, Machine for coloring motion-. G. Taussig. No. 1,396,791; Nov. 15.
Pie-making machine. W. Ehrlich. No. 1,397,272; Nov. 15.
Pigment, Manufacture of a white. A. L. Barbe. No. 1,396,914; Nov. 15.

Pigments, Producing composite titanium. H. H. Buckman. No. 1,396,924; Nov. 15.
Pincheck. W. S. Avery. No. 1,397,481; Nov. 15.
Pins, Safety-catch for. F. J. Engel. No. 1,397,002; Nov. 15.
Pipe-joint. H. G. Plummer. No. 1,397,145; Nov. 15.
Pipe-or-spout-cleaning tool. J. M. Bowman. No. 1,397,312; Nov. 15.
Piston-ring. A. O. Schmolinski. No. 1,397,334; Nov. 15.
Planer and system of motor control therefor. H. L. Blood. No. 1,397,396; Nov. 15.
Planing-machines, &c., Rotatable tool-carrier for. J. W. Oliver. No. 1,397,014; Nov. 15.
Plant, Hydraulic. P. ten B. Cate. No. 1,396,994; Nov. 15.
Planter, Seed-beet. J. D. Samuels and H. E. Bates. No. 1,396,784; Nov. 15.
Planting-machine. M. Tworski. No. 1,396,900; Nov. 15.
Pliers. J. L. Mayhew. No. 1,396,863; Nov. 15.
Plow. H. M. Derrick. No. 1,396,916; Nov. 15.
Plow and subsoiler, Disk. A. P. McKay. No. 1,397,434; Nov. 15.
Plow, Motor-. H. Riddy. No. 1,397,146; Nov. 15.
Plow, Power-lift. H. R. Traphagen. No. 1,396,793; Nov. 15.
Polishing composition and making same. H. C. Kerr. No. 1,397,102; Nov. 15.
Powder, Reducing sludge to. H. W. Charlton. No. 1,397,078; Nov. 15.
Powder, Smokeless shotgun-. F. I. du Pont. No. 1,397,042; Nov. 15.
Power-brake. P. S. Morgan. No. 1,397,012; Nov. 15.
Power mechanism. J. L. Forsyth and A. Bopp. No. 1,396,624; Nov. 15.
Power-transmitter. A. H. De Voe. No. 1,397,088; Nov. 15.
Power-transmitters, Means for operating. D. F. Geiger. No. 1,396,954; Nov. 15.
Press: *See*—
Die-press. Printing-press.
Multicolor-press.
Pressing-machine. C. L. Braley. No. 1,397,202; Nov. 15.
Pressure-tanks, Filler-cup and closure for. R. E. Macdonough. No. 1,397,320; Nov. 15.
Pressure variable resistance. A. Churchward. No. 1,397,361; Nov. 15.
Pretzel-making machine. J. G. Robbins. No. 1,397,233; Nov. 15.
Printing-press. J. L. Oberly. No. 1,396,872; Nov. 15.
Protective device. H. G. French. No. 1,397,276; Nov. 15.
Pulverizer. J. C. Tarvin. No. 1,397,467; Nov. 15.
Pump. E. Paoticelli. No. 1,397,179; Nov. 15.
Pump-barrel. A. W. Brown. No. 1,396,922; Nov. 15.
Pump, Centrifugal. M. J. Finn. No. 1,397,273; Nov. 15.
Pump, Turbine-. A. C. Douglass. No. 1,396,820; Nov. 15.
Punch-press chuck. T. Zetterlund. No. 1,397,307; Nov. 15.
Purifying agent, Making a. R. W. Mumford. No. 1,396,773; Nov. 15.
Purifying bauxite. E. Everhart. No. 1,397,414; Nov. 15.
Pyrotechnic device. J. Jex. No. 1,397,425; Nov. 15.
Pyroxylin solvent. R. B. Mitchell. No. 1,397,173; Nov. 15.
Pyroxylin solvent. R. B. Mitchell. No. 1,397,493; Nov. 15.
Quartering and crank-pin-turning machine. D. H. Teas and A. Wood. No. 1,397,468; Nov. 15.
Radiator. O. J. Groehn and F. L. Alldis. No. 1,396,931; Nov. 15.
Radiator. W. Sparks. No. 1,397,116; Nov. 15.
Radiator. Steam or hot-water. T. E. Murray. No. 1,397,325; Nov. 15.
Radiators, Thermostat for. A. D. Ray. No. 1,396,782; Nov. 15.
Radiorepeating system. L. Espenschied. No. 1,397,093; Nov. 15.
Radius-rod connection. A. G. Best. No. 1,397,157; Nov. 15.
Rail-joint. E. L. Nylund. No. 1,397,107; Nov. 15.
Railway-artillery. G. R. Lukeah. No. 1,397,483; Nov. 15.
Railway-brake. T. Miyagi. No. 1,397,443; Nov. 15.
Railway control system. W. B. Murray. No. 1,396,870; Nov. 15.
Railway-signal. N. L. Harkness. No. 1,397,419; Nov. 15.
Railway signaling system. C. L. Fortescue. No. 1,396,825; Nov. 15.
Railway signaling system. C. F. Scott. No. 1,396,888; Nov. 15.
Railway-switch operating mechanism. J. R. Dudley. No. 1,397,406; Nov. 15.
Raising and lowering steps, Automatic. E. B. Reeder. No. 1,397,294; Nov. 15.
Rat-trap. T. Nagayama. No. 1,397,384; Nov. 15.
Reaper, Circular-disk. A. E. Cook. No. 1,397,365; Nov. 15.
Reapers, Chain-cutter for. A. E. Cook. No. 1,397,364; Nov. 15.
Receiver-shield. J. P. Minton. No. 1,396,771; Nov. 15.
Receptacles or the like, Apparatus for filling. H. M. Smith. No. 1,397,061; Nov. 15.
Refrigerating apparatus. L. G. Copeman. No. 1,396,996; Nov. 15.
Refrigerating-box, Knockdown. Z. U. Dodge. No. 1,397,269; Nov. 15.
Refrigerator. H. C. Pierce. No. 1,396,875; Nov. 15.
Regenerative brake device. W. V. Turner. (Reissue.) No. 15,229; Nov. 15.
Register: *See*—
Firearms-register.
Regulating system. A. A. Tirrill. No. 1,396,896; Nov. 15.
Resilient wheel. H. Nichols. No. 1,397,140; Nov. 15.
Resilient wheel. G. M. Willis. No. 1,396,964; Nov. 15.

Metal-working tools. Société des Usines Curial. No. 149,152; Nov. 15.
Meters, water and oil gages, Flow-. Pemberthy Injector Company. No. 149,818; Nov. 15.
Milling-cutters, reamers, arbors, &c. New Britain Tool and Manufacturing Company. No. 147,119; Nov. 15.
Mops, brushes, brooms, daubers, dusters. Fuller Brush Company. No. 141,951; Nov. 15.
Muslin piece goods. Marshall Field & Company. No. 140,805; Nov. 15.
Nail-polishers and atomisers. Tuskeloid Company. Nos. 140,692-3; Nov. 15.
Nail-pullers. L. F. Grammes & Sons. No. 147,873; Nov. 15.
Oiled cloth. Standard Textile Products Company. No. 132,667; Nov. 15.
Oils, Lubricating-. Waverly Oil Works Company. No. 149,570; Nov. 15.
Ointment for rheumatism, after shaving, corns, &c. Arneth Company. No. 148,783; Nov. 15.
Paint for structural steel. Gobeen Corporation. No. 129,837; Nov. 15.
Paint for wood and metal, Enamel. American Enamel Company. Nos. 121,330-1; Nov. 15.
Paints. O'Brien Varnish Company. No. 152,576; Nov. 15.
Paints, Sherwin-Williams Company. No. 152,567; Nov. 15.
Paints, Paste. Watson Paint and Glass Company. No. 148,111; Nov. 15.
Paper, Adding-machine. Central Paper Company. No. 151,203; Nov. 15.
Paper and typewriter-ribbons, Carbon-. Carrib Mfg. Corporation. No. 147,277; Nov. 15.
Paper, Cover-. American Writing Paper Company. No. 153,325; Nov. 15.
Paper, Enamel-. Seaman-Patrick Paper Company. No. 149,822; Nov. 15.
Paper-handling machines, bundling-machines, &c. Dexter Folder Company. No. 149,391; Nov. 15.
Paper, Onion-skin. Chemical Paper Manufacturing Co. No. 152,514; Nov. 15.
Paper, Tissue toilet-. Graham Paper Company. No. 149,698; Nov. 15.
Paper, Toilet and wrapping. Industrial Paper Company. No. 150,012; Nov. 15.
Paper, Wrapping-. Zellerbach Paper Company. No. 150,089; Nov. 15.
Paper, Writing-. Wright, Barrett & Stillwell Company. Nos. 152,454-5; Nov. 15.
Papers and mailing-envelops, Writing and printing. American Writing Paper Company. No. 153,323; Nov. 15.
Papers, Ledger-. Alling and Cory Company. No. 147,180; Nov. 15.
Papers, Waxed and transparent. Package Paper & Supply Corporation. Nos. 149,949-50; Nov. 15.
Papers, Writing. Chemical Paper Manufacturing Company. No. 151,696; Nov. 15.
Paper, Writing. Chemical Paper Manufacturing Company. No. 151,705; Nov. 15.
Papers, Writing and printing. American Writing Paper Company. No. 153,324; Nov. 15.
Pencils, Lead-. Rapida Pencil Company. No. 149,424; Nov. 15.
Perfumes. Dainty Dame Importing Corp. No. 151,756; Nov. 15.
Perfumes, Containers for. Button & Shrand. No. 151,251; Nov. 15.
Petroleum and petroleum products. Compania Oil Company. No. 152,515; Nov. 15.
Photographic paper, Sensitized. Defender Photo Supply Company. No. 140,272; Nov. 15.
Pictures, films, Motion-. S. M. Hornig. No. 150,272; Nov. 15.
Pictures, Projecting-screens for moving. Mitroe Export & Import Co. No. 150,322; Nov. 15.
Pipes, cigar and cigarette holders and cases, &c. S. Gordon. No. 145,062; Nov. 15.
Pistols, Foreign Manufacturers Sales Corporation. No 145,262; Nov. 15.
Pistols, Automatic. F. G. Riva. No. 143,295; Nov. 15.
Pistols, rifles, and combination pistols and rifles. Fiala Arms Company. No. 143,434; Nov. 15.
Pomade, Hair-. J. H. Bishop. No. 152,960; Nov. 15.
Poultry, Compound for. I. E. Radcliff. No. 139,270; Nov. 15.
Powder-puffs. Marcus & Smith. No. 149,512; Nov. 15.
Powder, Talcum-. Bauer & Black. No. 151,747; Nov. 15.
Preparation used in the treatment of intestinal pains and disorders. Thorn & Company. No. 152,390; Nov. 15.
Pumps and pumping plants, Superior Manufacturing Company. No. 136,775; Nov. 15.
Razor strepping and honing machines, &c. Electrostrop Manufacturing Company. No. 144,900; Nov. 15.
Razors and blades, Safety. S. Isaacs. No. 148,800; Nov. 15.
Record-blank, Household and office inventory. M. Irwin. No. 149,970; Nov. 15.
Refrigerating units and household refrigerators, Artificial. Utility Compressor Company. No. 141,199; Nov. 15.
Ribbons and carbon sheets, Inked. Columbia Carbon Company. No. 144,449; Nov. 15.
Ribbons and carbon-sheets, Inked. A. M. Heck. No. 150,271; Nov. 15.
Rubber balls, Toy. Panther Rubber Manufacturing Company. No. 144,000; Nov. 15.
Rubber erasers. E. Hassinger. No. 124,405; Nov. 15.
Salve, cold and catarrh cream, &c., Corn and bunion. L. S. Osman. No. 147,678; Nov. 15.
Screen separating-machines, Vibrated-. W. S. Tyler Company. No. 120,776; Nov. 15.
Sewing-machines. Guhl & Harbeck. No. 144,716; Nov. 15.
Signals and trip mechanisms for automatically arresting operation of a machine, Twine-controlled. Measuregraph Company. No. 144,144; Nov. 15.
Soap, Toilet. Los Angeles Soap Co. No. 152,264; Nov. 15.
Spray, Nose and throat. Standard Oil Co., (Incorporated in New Jersey.) No. 152,484; Nov. 15.
Syrups, Chocolate and other malteds. Devoine Candy Company. No. 152,240; Nov. 15.
Tablets, Writing-. White & Wychoff Manufacturing Company. No. 149,366; Nov. 15.
Tackle-blocks. J. H. Flynn, Jr. No. 138,483; Nov. 15.
Thermometers, Clinical. B. Franklin. No. 146,305; Nov. 15.
Tonic, General. A. C. Ouness. No. 152,476; Nov. 15.
Toothbrushes, cloth, hair, &c., brushes. San Antonio Drug Co. No. 142,420; Nov. 15.
Toy banks. S. C. Patchett. No. 152,444; Nov. 15.
Toy Chemical sets. American Drug and Chemical Co. No. 152,494; Nov. 15.
Toy vehicles and parts thereof, Building elements used in the construction of. Wonder Builder Toy Co. No. 139,884; Nov. 15.
Trucks, Motor-. Service Motor Truck Company. No. 143,844; Nov. 15.
Turbines and condensers, pumps, blowers, &c., Steam. Metropolitan-Vickers Electrical Co. No. 141,726; Nov. 15.
Twine. Cayuga Linen & Cotton Mills. Nos. 153,126-7; Nov. 15.
Twine, Bender-. Indianapolis Cordage Company. No. 153,290; Nov. 15.
Valves, siphons, cocks, &c., Check. C. Schneider. No. 146,669; Nov. 15.
Varnish. McDougall-Butler Co. No. 152,952; Nov. 15.
Varnish. Benjamin Moore & Co. No. 153,207; Nov. 15.
Voiles in the piece, Cotton. Henry Glass & Co. No. 137,611; Nov. 15.
Wagons, Children's express and coaster. Marshall-Wells Company. No. 135,725; Nov. 15.
Washers, Dial-. Hammel, Riglander & Co. No. 148,685; Nov. 15.
Wire cloth, netting, trellis, &c. Wickwire Spencer Steel Corporation. No. 145,143; Nov. 15.
Woolens and worsteds in the piece. Blake & Stearns. No. 152,486; Nov. 15.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 15, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1—	2.3:	1,397,176	28—	4:	1,397,289	55—	76:	1,397,104	76—	78:	1,396,819	105—	457:	1,396,727	137—	79:	1,397,344

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 22d DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abbott, William J. (See McNeill, A. M., and Abbott.)
Abegg, Walter A., assignor of one-half to B. Reinhold, Los Angeles, Calif. Socket-wrench. No. 1,398,054; Nov. 22.
Acker, Julius J., et al. (See Kass, Peter, assignor.)
Ackermann Manufacturing Company. (See Peyser, Joseph, assignor.)
Allen, Adrian S., assignor of sixty per cent. to J. H. Taft, Chicago, Ill. Auxiliary lock for safes, vaults, &c. No. 1,397,999; Nov. 22.
Aktiebolaget Pump-Separator. (See Munters, Anders J. E., assignor.)
Aldrich, Thomas B., assignor to Parke, Davis & Company, Detroit, Mich. Benzoic-acid esters of tribromotertiary butyl alcohol. No. 1,397,918; Nov. 22.
Allais, Emile, Reims, France. Combined apparatus for taking and projecting pictures. No. 1,397,496; Nov. 22.
Allen, Claude N., Michigan City, Ind. Cleaning implement. No. 1,961,121; Nov. 22.
Allen, Herbert W., Sugar Pine, Calif. Manifold. No. 1,397,712; Nov. 22.
Allen, William R., Hutchinson, Kans. Automatic timing device. No. 1,398,000; Nov. 22.
Allington, John L., Joplin, Mo., assignor of one-third to O. M. Bilhars, Baxter Springs, Kans., and one-third to F. H. Gartung, Miami, Okla. Rock or dirt drag. No. 1,397,751; Nov. 22.
Allison, Albert K., Tappan, N. Y. System and apparatus for controlling motors. No. 1,398,056; Nov. 22.
Allstedt, John E., Hastings, Nebr. Tank-heater. No. 1,397,831; Nov. 22.
Alpine, John E., Green Bay, Wis. Carbureter. No. 1,397,711; Nov. 22.
American Coke & Chemical Company. (See Krippner, John, assignor.)
American Laundry Machy. Company, The. (See Dann, James E., assignor.)
American Machine & Foundry Company. (See Smith, Elberon D., assignor.)
American Manganese Steel Company. (See Swayze, William W. J., assignor.)
American Optical Company. (See Boutelle, William H., assignor.)
American Optical Company. (See Bugbee, Lucian W., assignor.)
American Radiator Company. (See Landon, Archer A., assignor.)
American Telephone and Telegraph Company. (See Kuhn, George W., assignor.)
American Telephone and Telegraph Company. (See Thompson, George K., assignor.)
Amsterdam Broom Company. (See Van Voast, George K., assignor.)
Anderson, Anton G. H., Springfield, Ill. Speed-regulator for windmills. No. 1,397,718; Nov. 22.
Anderson-Barngrover Mfg. Co. (See Thompson, Albert R., assignor.)
Anderson, George W., Elizabeth, N. J. Vehicle work-stand. No. 1,398,057; Nov. 22.
Anderson, Robert J., El Paso, Tex., assignor to International Fuel Conservation Co., Phoenix, Ariz. Converting sodium sulfate to sodium sulfid. No. 1,397,497; Nov. 22.
Appell, Samuel A., New Haven, Conn. Combined cigarette or like case and electric torch. No. 1,397,610; Nov. 22.
Arbetter Felling-Machine Company. (See Hayes, Thomas J., assignor.)
Armbruster, Alfred. (See Fokken, G. W., and Armbruster.)
Armstrong, Sir W. G., Whitworth and Company Limited. (See Lee, H. W., and Morrison, assignors.)
Armstrong, Walter, Chicopee, Mass. Type-making machine. No. 1,397,714; Nov. 22.
Aronson, Louis V., Newark, N. J. Shoe-form. No. 1,397,715; Nov. 22.
Astry, P. D., et al. (See Gable, Jacob W., assignor.)
Atlas Powder Company. (See Bacon, G. C., and Wilson, assignors.)
Augustin, Edwin J., Wauwatosa, and G. Bauer, Milwaukee, Wis. Ammonia-compressor. No. 1,397,914; Nov. 22.
Aurand, Edward L., Detroit, Mich. Portable electric plant. No. 1,398,058; Nov. 22.
Auto-Ordnance Corporation. (See Payne, Oscar V., assignor.)
Auto Radio Meter Company. (See Benson, A. A., and Barnes, assignors.)
Automatic Burglar Alarm Company. (See Sparks, Fred E., assignor.)
Automatic Electric Heater Company. (See Clark, Warren F., assignor.)
Automatic Temperature Control Co. (See Egar, L. E., and Wilhjelm, assignors.)
Automatic Weighing Machine Company. (See Mockridge, Joseph B., assignor.)
Bachmann, Robert Alexander, Pittsburgh, Pa. Sprayer. No. 1,397,851; Nov. 22.
Backer, Elmer F., assignor to Davenport Locomotive Works, Davenport, Iowa. Geared locomotive. No. 1,397,716; Nov. 22.
Bacon, Gilbert C., and W. C. Wilson, Tamaqua, Pa., assignors to Atlas Powder Company, Wilmington, Del. Treating nitrocellulose and to a valuable nitrocellulose product resulting therefrom. No. 1,397,915; Nov. 22.
Bailey, Horace E., Brookline, Mass. Bath-brush. No. 1,397,611; Nov. 22.
Baker, Newton D., Secretary of War, trustee. (See Ball, Benjamin H., assignor.)
Bakstad, Johan E., assignor to Holden & White Inc., Chicago, Ill. Electric heater. No. 1,398,167; Nov. 22.
Bakstad, Johan E., assignor to Holden & White, Inc., Chicago, Ill. Electric heater. No. 1,398,168; Nov. 22.
Balcke, Walter H., Winchester, and W. A. Ready, Brighton, assignors to National Company, Boston, Mass. Amusement apparatus. No. 1,397,832; Nov. 22.
Ball, Benjamin H., U. S. Army, assignor to N. D. Baker, Secretary of War, trustee. Firearm. No. 1,398,085; Nov. 22.
Ball, George S., assignor to E. R. Melton and J. C. Jenkins, Washington, D. C. Liner-trimming gage. No. 1,397,612; Nov. 22.
Barnebey, Oscar L., Cleveland, Ohio. Making cyanids. No. 1,397,613; Nov. 22.
Barnes, Horace. (See Benson, A. A., and Barnes.)
Barnette, John S., Jr., Broughton, Pa. Safety device for mine-elevators. No. 1,398,216; Nov. 22.
Barrett Company, The. (See Reeve, Charles S., assignor.)
Barriere, Wilfrid H., Worcester, Mass. Window. No. 1,397,671; Nov. 22.
Barriere, Wilfrid H., Worcester, Mass. Direction-indicator for automobiles. No. 1,397,672; Nov. 22.
Bartholomew, Bert E., Algona, Iowa. Railway-gate. No. 1,398,001; Nov. 22.
Bary, Edward M., Kansas City, Mo. Watchmaker's pliers. No. 1,397,614; Nov. 22.
Bassett, Fred E., Paw Paw, Mich. Vending-machine. No. 1,397,615; Nov. 22.
Baxter, Harry C., Benton Harbor, Mich. Loose-leaf-filing-system posting-tray. No. 1,397,616; Nov. 22.
Bauer, George. (See Augustin E. J., and Bauer.)
Bauer, John J., assignor to The Thrift Jar Company, Baltimore, Md. Jar-capping machine. No. 1,398,002; Nov. 22.
Bayuk, Meyer, Philadelphia, Pa. Metal cigar-box. No. 1,398,059; Nov. 22.
Beadon, Richard Ralph & Court, Agra, India. Elastic tire for wheels of vehicles. No. 1,398,169; Nov. 22.
Beck, Charles L., Lyon, assignor of one-half to A. Gehenniaux, Paris, France. Suspension for vehicles. No. 1,398,060; Nov. 22.
Beck, Jennings B., Covington, Ky., assignor, by mesne assignments, to Standard Oil Company. Air-service station for automobiles. No. 1,397,916; Nov. 22.
Behrman, Marcus B., New York, assignor to The Lox Seal Corporation, Brooklyn, N. Y. Lock-tag. No. 1,397,917; Nov. 22.
Belden, Clements G., Baltimore, Md., assignor to The Crown Cork and Seal Company of Baltimore City. Bottle-capping apparatus. No. 1,397,617; Nov. 22.
Bellamy, Edward W., Torrington, Conn. Permutation-padlock. No. 1,397,717; Nov. 22.
Bellwald, John N., Mexico, Mexico. Wire rope. No. 1,397,718; Nov. 22.
Bender, Carl J., Gnadenhutten, Ohio. Pedal-lock. No. 1,398,122; Nov. 22.
Bender, David G., Blue Island, Ill. Culinary apparatus. No. 1,397,852; Nov. 22.
Benjamin, Bert E., Oak Park, Ill., assignor, by mesne assignments, to International Harvester Company. Guard-finger for harvester-thresher. No. 1,397,942; Nov. 22.
Benjamin Electric Manufacturing Company. (See McLean, Philip S., assignor.)

Benson, Ary A., and H. Barnes, assignors to Auto Radio Meter Company, Seattle, Wash. Temperature-indicator for radiators. No. 1,398,218; Nov. 22.
Bergen, John F., and J. Marcus, Brooklyn, N. Y. Binder attachment for sewing-machines. No. 1,397,853; Nov. 22.
Best, William N., Brooklyn, N. Y. Connection of finely-subdivided material. No. 1,397,791; Nov. 22.
Best, William N., Brooklyn, N. Y. Apparatus for oxidation of finely-subdivided material. No. 1,397,792; Nov. 22.
Bethlehem Steel Company. (See Carey, R. B., Lukens, and Mixsell, assignors.)
Bibard, René A., Bellevue, France. Special fastening for ends of laces. No. 1,397,918; Nov. 22.
Bignan, Jacques, Puteaux, France. Lubricating system. No. 1,398,170; Nov. 22.
Bilhars, Oscar M., *et al.* (See Allington, John L., assignor.)
Bishop, George H., Calgary, Alberta, Canada. Cattle-guard. No. 1,397,752; Nov. 22.
Bishop, Joseph K. (See Hanable, Carl F., assignor.)
Blackett, Olin W., Brookline, Mass. Headlight. No. 1,397,793; Nov. 22.
Blaylock, Selwyn G. (See Thom, C., Diamond, and Blaylock.)
Bleick, William D. (See Doerr, Fred H., assignor.)
Bogaty, Hermann, assignor to The Philadelphia Textile Machinery Company, Philadelphia, Pa. Gear-box. No. 1,398,171; Nov. 22.
Bott, Alice K., Cincinnati, Ohio. Corset. No. 1,397,570; Nov. 22.
Boutelle, William H., assignor to American Optical Company, Southbridge, Mass. Forming temple end pieces. No. 1,397,819; Nov. 22.
Bowen, Richard, Cheltenham, assignor to Laminated Coal, Limited, London, England. Apparatus for the production of artificial fuel. No. 1,397,571; Nov. 22.
Bowen, Richard, Cheltenham, assignor to Laminated Coal, Limited, London, England. Production of artificial fuel. No. 1,397,572; Nov. 22.
Bowman, Charles, Washington, D. C. Cloth-gauge. No. 1,398,061; Nov. 22.
Boyle, John P., and W. A. Inman, Chicago, Ill.; said Inman assignor to said Boyle. Ice-manufacturing apparatus. No. 1,397,498; Nov. 22.
Brampton Brothers. (See Yeandl, H. S., and Richardson, assignors.)
Bremberg, Axel, Glasgow, Scotland. Hydraulic recoil apparatus for ordnance. No. 1,398,172; Nov. 22.
Brennan, Michael E., Hudson, N. Y. Chin-support. No. 1,397,499; Nov. 22.
Briggs, Frank A. (See Pierce, Harry, assignor.)
Brittain, Edward, *et al.* (See Kass, Peter, assignor.)
Brock, John O., Wilson, N. C. Spark-plug. No. 1,398,173; Nov. 22.
Brooks, Charles D., Brooklyn, N. Y. Centrifugal propeller. No. 1,398,062; Nov. 22.
Brown, Clifford C., Cartersville, Ga. Mixer for gas-engines. No. 1,398,063; Nov. 22.
Brown Company. (See Parker, Howard, assignor.)
Brown, Edmund N., and M. H. Shoemberg, assignors to Majestic Electric Development Company, San Francisco, Calif. Electric heater. No. 1,398,217; Nov. 22.
Brown, John W., Manufacturing Company, The. (See Pfeifer, Leo L., assignor.)
Brown Portable Conveying Machinery. (See Eriksen, Peter S, assignor.)
Brundage, James W., assignor to The Miller Rubber Company, Akron, Ohio. Machine for cutting sections from tire-casings. No. 1,398,123; Nov. 22.
Bryan, Edgar J., assignor to P. Stebler, Riverside, Calif. Hand-truck. No. 1,397,719; Nov. 22.
Bucheaberg, Alvin E., assignor to Electric Auto-Lite Corporation, Toledo, Ohio. Control for dynamo-electric systems. No. 1,398,064; Nov. 22.
Buchsbaum, Samuel, Chicago, Ill. Belt-buckle. No. 1,397,673; Nov. 22.
Burbee, Lucian W., assignor to American Optical Company, Southbridge, Mass. Bifocal lens. No. 1,397,920; Nov. 22.
Buhl, Cay P., Passaic, N. J. Carbureter. No. 1,397,800; Nov. 22.
Bunsel, Ernest, Plymouth Meeting, Pa. Quick-acting demountable rim. No. 1,397,573; Nov. 22.
Burgess Battery Company. (See Maisel, Lorenz, assignor.)
Burnett, Richard W., Chicago, Ill. End reinforcement for railway box-cars. No. 1,397,674; Nov. 22.
Burns, William A., London, England, Stair-rod. No. 1,397,618; Nov. 22.
Burroughs Adding Machine Company. (See Muller, Robert L., assignor.)
Buske, Frederick H., Toledo, Ohio. Jumper-seat. No. 1,397,675; Nov. 22.
Bywater, William H., Trenton, N. J. Registering apparatus. No. 1,397,854; Nov. 22.
Cahill, Daniel E. (See Gaede, S. A., and Cahill.)
Cake, Horace M., Philadelphia, Pa. Turntable. No. 1,398,124; Nov. 22.
Campbell, Archie S., St. Johnsbury, Vt. Thermometer attachment for faucets. No. 1,397,720; Nov. 22.
Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Tank-car construction. No. 1,397,676; Nov. 22.
Capron, Franklin S. (See Deruiseaux, D., and Capron.)
Carey, Robert B., Phillipsburg, N. J., W. L. Lukens and L. N. D. Mixsell, assignors to Bethlehem Steel Company, Bethlehem, Pa. Percussion-fuse. No. 1,397,855; Nov. 22.
Carleton, William A., and C. E. Yobo, Bellaire, Ohio. Wrench. No. 1,397,128; filed Nov. 22.
Carlson, Andrew J., Seattle, Wash., assignor of one-half to Andrew Wiland, Seattle, Wash. Hair-clipper. No. 1,397,721; Nov. 22.
Carlson, Sweed, Butte, Mont. Sash-fastener. No. 1,398,174; Nov. 22.
Carpenter, Cromwell C., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Preparing storage-battery separators. No. 1,398,065; Nov. 22.
Carpenter, Walter B., Bloomfield, Iowa. Flue-stopper. No. 1,397,794; Nov. 22.
Carstens, H., Manufacturing Company. (See Carstens, Herbert H., assignor.)
Carstens, Herbert H., assignor to H. Carstens Manufacturing Co., Chicago, Ill. Tensilestoma. No. 1,397,677; Nov. 22.
Carter, Charles D., New York, N. Y., assignor to The Floyd-Wells Co., Royersford, Pa. Stove or range. No. 1,397,853; Nov. 22.
Carter, William O. (See Magowan, O. F., and Carter.)
Casey, William A. (See McKone, Leo. J., assignor.)
Chandler-Fulton Manufacturing Company, The. (See Ralston, William, assignor.)
Chard, Lodge Y., Newcastle, Ind. Low-pressure signal for automobile-tires. No. 1,397,619; Nov. 22.
Chase, Edwin R., Sacramento, Calif. Umbrella. No. 1,397,794; Nov. 22.
Chevalier, Eugene F., assignor of one-half to W. G. Fields, San Dimas, Calif. Implement for making irrigating-channels. No. 1,397,722; Nov. 22.
Chicago Railway Equipment Company. (See Hawkins, Arthur W., assignor.)
Chicago Surgical & Electrical Company. (See Lidberg, Tiodolf, assignor.)
Chowdrow, Jacob, Buffalo, N. Y. Bell-ringer residence unit. No. 1,397,858; Nov. 22.
Clark, Elmer A., Joliet, Ill. Automatic trip mechanism. No. 1,397,857; Nov. 22.
Clark, Warren F., Cleveland, Ohio, assignor, by mesne assignments, to Automatic Electric Heater Company, Warren, Pa. Multiple-urn construction. No. 1,397,620; Nov. 22.
Clark, Wilbur T., Cleveland, assignor of one-half to F. J. Moran, East Cleveland, Ohio. Gas-burner. No. 1,397,501; Nov. 22.
Clarke, Bruce E., Kansas City, Mo. Food compound. No. 1,397,722; Nov. 22.
Clayton, William, Liverpool, and G. Nodder, Wallasey, England. Manufacture of butter substitutes, edible fats, and the like. No. 1,398,003; Nov. 22.
Clebo, Steve. (See Frank, J., and Clebo.)
Clemens, Harmon E., Pulaski, N. Y. Spark-plug. No. 1,398,175; Nov. 22.
Clifford-Farr, Walter T., Barnes, England. Rubber tire. No. 1,397,795; Nov. 22.
Clinton Refrigerator Company. (See Wishart, W., and Morrell, assignors.)
Clock, Fred A. (See Kessler, C. C., and Clock.)
Cluett, Peabody & Co. Inc. (See Cluett, Sanford L., assignor.)
Cluett, Sanford L., assignor to Cluett, Peabody & Co., Inc., Troy, N. Y. Collar, &c. No. 1,397,921; Nov. 22.
Cluf, Chester C., San Francisco, Calif. Embroidery-needle. No. 1,398,004; Nov. 22.
Coates, Daniel B., Payette, Idaho. Cattle-stanchion. No. 1,397,853; Nov. 22.
Cochrane, Arthur L., Toronto, Ontario, Canada. Clamp. No. 1,398,126; Nov. 22.
Cohagen, Donald R. (See Frahsmuth, W. J., and Cohagen.)
Colabrese, Francesco, Albert, W. Va. Trolley-wire protector. No. 1,398,005; Nov. 22.
Cole, Eugene M., Charlotte, N. C. Planter. No. 1,398,006; Nov. 22.
Collins, William H., Meriden, Conn. Broom-holder. No. 1,398,127; Nov. 22.
Composite Metal Lath Company. (See Nonnast, Frederik, assignor.)
Conlon, John, Plattsburg, N. Y. Radiator for automobile cooling systems. No. 1,398,176; Nov. 22.
Consolidated Mining & Smelting Company of Canada, The. (See Thom, C., Diamond, and Blaylock, assignors.)
Coomer, James J., Hoboken, N. J., assignor to Munson Supply Company, New York, N. Y. Pneumatic cushion for beds. No. 1,397,676; Nov. 22.
Cooney, Albert E., Detroit, Mich., assignor to Dodge Brothers. Automobile-support. No. 1,398,066; Nov. 22.
Cooper, William H. (See Kathcart, Samuel M., assignor.)
Corbin, John C., Seattle, Wash. Condenser. No. 1,397,621; Nov. 22.
Cormany, Ralph B., and A. F. Herring, Rome, Ga. Combined recorder and register. No. 1,397,502; Nov. 22.
Cornelison, Floyd, Milwaukee, Wis. Vehicle suspension means. No. 1,397,923; Nov. 22.
Cornelius, Carl-Oscar E., Stockholm, Sweden. Production of zinc. No. 1,398,006; Nov. 22.
Corrall, Herbert, Helensburgh, Scotland, assignor to The Singer Manufacturing Company. Sewing-machine. No. 1,397,622; Nov. 22.

Coryell, Charles N., Mamaroneck, N. Y. Flask. No. 1,398,067; Nov. 22.
Coryell, Charles N., Mamaroneck, N. Y. Flask. No. 1,398,068; Nov. 22.
Cosgray, Mark C., assignor to Matthews Engineering Company, Sandusky, Ohio. Engine-controller. No. 1,397,503; Nov. 22.
Costello, Frank J., assignor to Federal Tin Company, Inc., Baltimore, Md. Hose-clamp. No. 1,397,943; Nov. 22.
Coughlin, Arthur, *et al.* (See Gable, Jacob W., assignor.)
Coula, George R., Detroit, Mich. Tool-holder. No. 1,397,796; Nov. 22.
Cox Brass Manufacturing Company. (See Cox, William G., assignor.)
Cox, George, Black Earth, Wis. Dirigible headlight. No. 1,397,754; Nov. 22.
Cox Manufacturing Company. (See Cox, William G., assignor.)
Cox, William G., Cleveland, Ohio, assignor to Cox Manufacturing Company, Albany, N. Y. Attaching device for automobile-buffers. No. 1,398,080; Nov. 22.
Cox, William G., Cleveland, Ohio, assignor to Cox Brass Manufacturing Company, Albany, N. Y. Spring-bumper for automobiles. No. 1,398,177; Nov. 22.
Craig, Thomas J. L., assignor of one-half to Whipp Bros. & Tod Limited, Manchester, England. Fireproofing of textile fabrics and other porous articles. No. 1,397,858; Nov. 22.
Crandon, J. B., Company. (See Crandon, Joseph B., assignor.)
Crandon, Joseph B., assignor to J. B. Crandon Company, Portland, Me. Attachment for sulfur-burners. No. 1,397,724; Nov. 22.
Crawford, Miner. (See Northcutt, J. G., and Crawford.)
Crosby, John P., St. Louis, Mo. Window-sash fastener. No. 1,397,923; Nov. 22.
Crown Cork and Seal Company of Baltimore City, The. (See Belden, Clements G., assignor.)
Cru Patents Corporation. (See Wenderhold, W., and Uebelmesser, assignors.)
Csanyi, Henry, New York, N. Y. Carbureter. No. 1,398,007; Nov. 22.
Cunningham, James, Bathgate, assignor of one-half to Dickson and Mann Limited, Armadale, Linlithgowshire, Scotland. Handbrake for railway-vehicles. No. 1,397,797; Nov. 22.
Currier, Earl J., Ottumwa, Iowa. Safety foot-throttle for automobiles. No. 1,397,798; Nov. 22.
Curtis & Co., Mfg. Co. (See Steedman, Edwin H., assignor.)
Cutten, Elisha B., Minneapolis, Minn. Electrolytic cell. No. 1,397,799; Nov. 22.
D & L Mfg. Co. (See Dorn, H. C., and Luedke, assignors.)
Dahl, John L., Teaneck, N. J. Stake-pocket. No. 1,397,725; Nov. 22.
Daisell, Thomas J., Wakefield, Mass. Calculating device. No. 1,397,944; Nov. 22.
Dann, James E., Brooklyn, N. Y., assignor to The American Laundry Machinery Company, Norwood, Ohio. Washer-timing device. No. 1,397,726; Nov. 22.
Darby, John, assignor of one-half to E. F. Flindell, Summit, N. J. Intermittent drive and framing device for motion-picture machines. No. 1,398,128; Nov. 22.
Davenport Locomotive Works. (See Backer, Elmer F., assignor.)
Davis, Samuel S., Kentland, Ind. Drain. No. 1,398,007; Nov. 22.
Deckert, Virgil F., Minneapolis, Minn. Tractor. No. 1,397,755; Nov. 22.
Dederich, Joseph S., Racine, Wis. Device for loosening compressed material. No. 1,398,129; Nov. 22.
De Forest, Lee, assignor to De Forest Radio Telephone and Telegraph Company, New York, N. Y. Selective audion amplifier. No. 1,397,575; Nov. 22.
De Forest Radio Telephone and Telegraph Company. (See De Forest, Lee, assignor.)
Deitz, Abraham, *et al.* (See Franklin, Jacob M., assignor.)
Deitz, Emanuel, *et al.* (See Franklin, Jacob M., assignor.)
De Lavaud, Dimitri S., New York, N. Y. Rotary casting. No. 1,398,008; Nov. 22.
Delion Tire and Rubber Company. (See Kennedy, John F., assignor.)
DeLukacsevics, Charles, and E. Loffler, New York, N. Y. Piston. No. 1,398,178; Nov. 22.
DeMattos, Walter, Ottawa, Ontario, Canada. Means for supplying temporary table-covers. No. 1,397,800; Nov. 22.
Dennis, Samuel K., Chicago, Ill., assignor to International Harvester Company. Cultivator. No. 1,397,945; Nov. 22.
De Paoli, Bruno O. A., Palisade, N. J. Terrazzo flooring. No. 1,397,678; Nov. 22.
Derby Textile Co., The. (See Gager, Edwin B., Jr., assignor.)
Deri, Bruno, New York, N. Y. Swimming appliance. No. 1,398,130; Nov. 22.
Deruiseaux, Dolphis, and F. S. Capron, Taunton, Mass. Auto traction-chain. No. 1,398,009; Nov. 22.
De Stoutz, Robert. (See Juvet, R., and de Stoutz.)
De Tartas, Augustus R., *et al.* (See Mladinich, Frank, assignor.)
Detroit Pressed Steel Company. (See Flintermann, Gerhard, G. C., assignor.)
Diamond Electric Specialties Corp. (See Shaw, L. E., and Rosenfeld, assignors.)
Diamond, Ralph W. (See Thom, C., Diamond, and Blaylock.)
Dickens, Benjamin F., Vancouver, British Columbia, Canada. Window-wedge. No. 1,397,859; Nov. 22.
Dickson and Mann Limited. (See Cunningham, James, assignor.)
Dieckmann, Carl F., assignor to Eugene Dietzgen, Company, Chicago, Ill. Attachment for drawing-boards. No. 1,398,090; Nov. 22.
Dierks, John, Sulphur Springs, Tex. Stock-feeder. No. 1,398,179; Nov. 22.
Dietrich, Edward, Henryville, Ind. Socket-wrench. No. 1,398,180; Nov. 22.
Dietzgen, Eugene, Company. (See Dieckmann, Carl F., assignor.)
Dillard, William J., and J. D. Taylor, Portland, Oreg. Automatic weather-strip. No. 1,398,181; Nov. 22.
Diner, Jacob, New York, N. Y., assignor to Manila Sterilizing Corporation, Manila, Philippine Islands. Sterilizing process. No. 1,397,504; Nov. 22.
Dion Amédée, and D. Ste-Thérèse de Blainville, Quebec, Canada. Threshing-machine. No. 1,397,727; Nov. 22.
Dion, Bruno. (See Dion, Amédée and B.)
Dixon, Thomas B., New York, N. Y. Telegraphy. No. 1,397,576; Nov. 22.
Dodge Brothers. (See Cooney, Albert E., assignor.)
Doelckner, Max A., Louisville, Ky. Clamp. No. 1,398,091; Nov. 22.
Doerr, Fred H., Grand Rapids, Mich., assignor, by mesne assignments, to W. D. Bleick, Newark, N. J. Computing-machine. No. 1,398,068; Nov. 22.
Dorn, Henry C. and H. A. Luedke, assignors to D & L Mfg. Co., Milwaukee, Wis. Reinforcing-corner for receptacles. No. 1,397,623; Nov. 22.
Dossin, Charles G., Meriden, Conn. Tobacco-pipe. No. 1,397,946; Nov. 22.
Dover, Horace W., St. James, England. Hand-wheel. No. 1,398,069; Nov. 22.
Dow Chemical Company, The. (See Seaton, Max Y., assignor.)
Dow, Sam, Boston, Mass. Detachable rubber heel for shoes. No. 1,397,834; Nov. 22.
Doyle, Thomas G., Fall River, Mass. Adjustable bit. No. 1,398,070; Nov. 22.
Drake, Tom, Broadheath, assignor to Linotype and Machinery Limited, London, England. Keyboard mechanism of typographical composing and other key-controlled machines. No. 1,398,092; Nov. 22.
Draper Corporation. (See Rhoades, Alonzo E., assignor.)
Droppleman, William J., McWhorter, W. Va. Gas casing head. No. 1,398,093; Nov. 22.
Drotar, John, Washington, D. C. Direction-indicator for automobiles. No. 1,397,801; Nov. 22.
Drysdale, Henry, London, England. Paper container. No. 1,397,756; Nov. 22.
Dudley, Howard M., Philadelphia, Pa. Dyeing-machine. No. 1,397,860; Nov. 22.
Duff Manufacturing Company, The. (See Kopf, John C., assignor.)
Duff Manufacturing Company, The. (See Schwerin, Frank H., assignor.)
Duncan, Blain, *et al.* (See Gable, Jacob W., assignor.)
Duncan, Hayes H., and C. C. Willoughby, Philadelphia, Pa. Lock and seal for car-doors. No. 1,398,094; Nov. 22.
Dunlap, Lester G., Stockton, Calif. Digger-chain for ditch-digging machines. No. 1,397,679; Nov. 22.
Dunn, Frank B., Conneaut, Ohio. Paving-brick. No. 1,397,505; Nov. 22.
Durning, Charles, Philadelphia, Pa. Automobile-signal. No. 1,397,947; Nov. 22.
Dutreux, Auguste, Paris, assignor to Societe Anonyme pour l'Equipment Electrique des Vehicules, Issy les Moulineaux, France. Ignition apparatus for internal-combustion engines. No. 1,397,861; Nov. 22.
Dwyer, William, assignor to Four-In-One Safety Razor Company, Pittsburgh, Pa. Safety-razor. No. 1,398,182; Nov. 22.
Ebaugh, Thomas A., Kansas City, Mo. Confection apparatus. No. 1,397,757; Nov. 22.
Eckart, Charles F., Honolulu, Hawaii. Method and means for enhancing the growth of plants. (Reissue.) No. 15,231; Nov. 22.
Egar, Lorentz E., and N. C. L. Wilhjelm, Brooklyn, N. Y., assignor to Automatic Temperature Control Co. Automatic valve-regulators. No. 1,397,680; Nov. 22.
Ege, Alfred, Sioux Falls, S. D. Controlling device for windmills. No. 1,397,802; Nov. 22.
Ehrhart, Raymond N., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Co. Multiple-stage ejector. No. 1,397,924; Nov. 22.
Elsman, Adam J., Buffalo, N. Y. Door-check. No. 1,398,010; Nov. 22.
Ekas, Levi B., Williamstown, W. Va. Well-drilling machine. No. 1,397,758; Nov. 22.
Electric Auto-Lite Corporation. (See Buchenberg, Alvin E., assignor.)
Electric Auto-Lite Corporation. (See Wollenweber, Paul F., assignor.)
Electro-Thermophore Company. (See Lidberg, Tiodolf, assignor.)
Elektrizitätswerk Lonza. (See Lichtenhahn, Theodor, assignor.)
Elliott, Otto A. (See Fetzer, W., Freres, and Elliott.)

Elmer, Martin, Hastings, Mich. Styling-holder for phonograph-reproducers. No. 1,397,835; Nov. 22.

Emeloid Company, The. (See Madan, E. K., and Levine, assignors.)

Engel, William C., assignor of one-third to E. L. Hohenstein and one-third to F. Schott, St. Louis, Mo. Lifting-jack. No. 1,397,925; Nov. 22.

Engelland, Julius, St. Louis, Mo. Loose-leaf binder. No. 1,397,577; Nov. 22.

Ensor, C. Frank. (See Stansbury, Harry S., assignor.)

Ensor, Harold E., Canterbury, and J. Sampson, Sydenham, Christchurch, New Zealand. Headlight. No. 1,397,803; Nov. 22.

Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)

Epling, Giles T., Welch, W. Va. Hand-guard. No. 1,397,624; Nov. 22.

Eriksson, Peter S., assignor to Brown Portable Conveying Machinery Company, Chicago, Ill. Bearing. No. 1,397,948; Nov. 22.

Errington, Thomas A. E., Seattle, Wash. Extension-light for automobiles. No. 1,398,011; Nov. 22.

Essex Motors. (See Fekete, Stephen I., assignor.)

Evans, Fred, Summit, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Pressure-gage. No. 1,397,728; Nov. 22.

Evans, Marvin, Pharr, Tex. Dredge. No. 1,398,131; Nov. 22.

Evansville Arbor Press Company. (See Taylor, Robert W., Sr., assignor.)

Explorer Manufacturing Corporation. (See Geddes, Charles A., assignor.)

Fafnir Bearing Company, The. (See Sellew, Roland W., assignor. (Reissue.)

Fagrie, Philip T., Seattle, Wash. Adjustable straightedge, plumb and level. No. 1,398,183; Nov. 22.

Farnes, Matthew H., Logan, Utah. Stove. No. 1,397,506; Nov. 22.

Fedders, John M., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Radiator unit. No. 1,397,625; Nov. 22.

Fedders Manufacturing Company. (See Fedders, John M., assignor.)

Federal Stamping Company. (See Olinger, Thomas, assignor.)

Federal Tin Company Inc. (See Costello, Frank J., assignor.)

Fekete, Stephen I., assignor to Essex Motors, Detroit, Mich. Transmission-lock. No. 1,397,926; Nov. 22.

Feldkamp, Frederick A., Newark, N. J. Duplex-fuse cartridge. No. 1,397,804; Nov. 22.

Feldkamp, Frederick A., Newark, N. J. Fuse-cartridge. No. 1,397,805; Nov. 22.

Fessenden, Reginald A., Brookline, Mass., assignor to Submarine Signal Company, Portland, Me. Method and apparatus for submarine signaling. No. 1,397,949; Nov. 22.

Fessenden, Reginald A., Chestnut Hill, Mass., assignor to Submarine Signal Company, Portland, Me. Stop-clock. No. 1,397,950; Nov. 22.

Fetzer, William, J. G. Freres, Springfield, and O. A. Elliott, Marion, assignors to International Sanitation & Development Company, Springfield, Ill. Incinerating-furnace. No. 1,398,184; Nov. 22.

Fields, Will G. (See Chewning, Eugene F., assignor.)

Fischer, Ferdinand, Berlin, Germany. Universal joint. No. 1,397,951; Nov. 22.

Fitch, Albert L., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission system. No. 1,397,862; Nov. 22.

Fitzgerald, Fred. (See Jewett, C. E., and Fitzgerald.)

Fleck, Albert H., Lakewood, Ohio. Bobbin-holder. No. 1,397,927; Nov. 22

Flindell, Edwin F. (See Darby, John, assignor.)

Flintermann, Gerhard G. C., Detroit, Mich., assignor to Detroit Pressed Steel Company, Wilmington, Del. Demountable-wheel support. No. 1,397,626; Nov. 22.

Flitcraft, John M., Elkhart, Iowa. Jar-fountain waterer. No. 1,397,627; Nov. 22.

Flitcraft, John M., Elkhart, Iowa. Clothes-tongs. No. 1,397,628; Nov. 22.

Flour City Plow Company. (See Hartsough, Ralph B., assignor.)

Floyd-Wells Co., The. (See Carter, Charles D., assignor.)

Fokken, George W., and A. Armbruster, Detroit, Mich. Attachment for motors. No. 1,398,095; Nov. 22.

Forester, James, New York, N. Y. Sanitary wardrobe-shelf. No. 1,398,071; Nov. 22.

Forsberg, Albin L., Chicago, Ill., assignor to Thomson and Taylor Spice Company. Pouring-spout. No. 1,397,952; Nov. 22.

Foss, W. H., Co. (See Foss, Wallace H., assignor.)

Foss, Wallace H., Cambridge, assignor to W. H. Foss Co., Inc., Boston, Mass. Shank-stiffener. No. 1,397,681; Nov. 22.

Foster, Claud H., Wickliffe-on-the-Lake, Ohio. Liquid-fuel-heating device. No. 1,398,012; Nov. 22.

Foster, Walter H. (See Woods, Norman E., assignor.)

Four-in-One Safety Razor Company. (See Dwyer, William, assignor.)

Frair, Chester, Seattle, Wash. Work-holding stand. No. 1,398,006; Nov. 22.

Franklin, Frederick W., Syracuse, N. Y. Automobile-hood clip. No. 1,397,759; Nov. 22.

Franklin, Jacob M., Brooklyn, assignor of one-third to E. Deitz and one-third to A. Deitz, New York, N. Y. Garment-pocket. No. 1,397,729; Nov. 22.

Freres, John G. (See Fetzer, W., Freres, and Elliott.)

Freud, Bernard. (See Rozowski, Edmund, assignor.)

Fried, John, Peoria, Ill. License-tag holder. No. 1,397,730; Nov. 22.

Frohmuth, William J., and D. E. Cohagen, Fort Wayne, Ind. Reel. No. 1,398,185; Nov. 22.

Fry, Henry E., Dorchester, England. Manure. No. 1,397,629; Nov. 22.

Fuerth, William G., Newark, N. J., assignor, by mesne assignments, to Underwood Typewriter Company, New York, N. Y. Stenciling. No. 1,398,013; Nov. 22.

Fulton, Clarence E., Tarentum, Pa., assignor to Pittsburgh Plate Glass Company. Manufacture of earthenware. No. 1,398,014; Nov. 22.

Gable, Jacob W., assignor of two-thirds to A. Coughlin and B. Duncan and one-third to A. W. Hutton and P. D. Astry, Cleveland, Ohio. Self-locking damper-regulator. No. 1,397,953; Nov. 22.

Gager, Edwin B., Jr., assignor to The Derby Textile Co., Derby, Conn. Reel for strip material. No. 1,397,954; Nov. 22.

Gallo, Thomas, New York, N. Y. Camera. No. 1,398,072; Nov. 22.

Gandion, Louis D., San Francisco, Calif. Truss. No. 1,397,863; Nov. 22.

Gartung, Frederick H., *et al.* (See Allington, John L., assignor.)

Gas Research Company, The. (See Smith, Harry F., assignor.)

Gasda, Stephen A., and D. R. Cahill, Bethlehem, Pa. Graphic recording mechanism for spinning-machines. No. 1,397,578; Nov. 22.

Gatchell, George S., Roselle Park, N. J., assignor to The Singer Manufacturing Company. Thread-controlling mechanism for multiple-needle sewing-machines. No. 1,397,507; Nov. 22.

Gansenhuber, John N., Altoona, Pa. Combined shade-roller and curtain-supporting bracket. No. 1,397,806; Nov. 22.

Geddes, Albert H., Brooklyn, N. Y. Auxiliary traction device for motor-vehicles. No. 1,398,015; Nov. 22.

Geddes, Charles A., assignor to Explorer Manufacturing Corporation, Philadelphia, Pa. Carbonator and draft-arm for soda-water. No. 1,397,929; Nov. 22.

Gehenniaux, Arthur. (See Beck, Charles L., assignor.)

Geier, Philip A., and Frank E. Robertson, assignors to The P. A. Geier Company, Cleveland, Ohio. Handle member. No. 1,397,682; Nov. 22.

Gibbons, Archie W., Kansas City, Mo. Automobile flow-line protector. No. 1,397,630; Nov. 22.

Gibson, Norman R., Niagara Falls, Ontario, Canada. Measurement of the flow of fluids in closed conduits. No. 1,398,097; Nov. 22.

Gibson, Preston C., Girard, Ill. Automobile-lifting device. No. 1,398,186; Nov. 22.

Gifford, Bert L., and E. B. Gifford, Barker, assignors, by mesne assignments, to The Rex Company, Rochester, N. Y. Assorting-machine. No. 1,397,955; Nov. 22.

Gifford, Edgar B. (See Gifford, Bert L. and E. B.)

Gillet, Alexis F., assignor to Jubilee Manufacturing Company, Omaha, Nebr. Clamp. No. 1,397,508; Nov. 22.

Gilliland, Orra L., assignor to National Shock Loader Co., Minneapolis, Minn. Loader. No. 1,397,956; Nov. 22.

Gilson, Henry R., New Rochelle, N. Y., assignor to The Hartford Rubber Works Company. Duplex mold. No. 1,398,073; Nov. 22.

Gisholt Machine Company. (See McCabe, Horace B., assignor.)

Godfrey, John F., Elkhart, Ind. Reclaiming and conveying buckets. No. 1,397,509; Nov. 22.

Goetz, John, Wauwatosa, and F. A. Parsons, Milwaukee, assignors to The Kempsmith Manufacturing Co., West Allis, Wis. Table-operating mechanism for machine-tools. No. 1,397,731; Nov. 22.

Goldberg, Hyman E., (now by judicial change of name H. Golber,) Chicago, Ill., assignor, by mesne assignments, to Remington Accounting Machine Corporation, New York, N. Y. Algebraic-total calculating-machines. No. 1,398,074; Nov. 22.

Goodchild, Walter, Hoboken, N. J., assignor, by mesne assignments, to Nips, Incorporated. Apparatus and process for filling and closing capillary containers. No. 1,397,631; Nov. 22.

Goodloe, Aarciel E., Chattanooga, Tenn. Surgical instrument. No. 1,397,732; Nov. 22.

Grassl, Joseph G., Dayton, Ohio. Depositor for mashed potatoes and other plastic materials. No. 1,397,510; Nov. 22.

Green, Charles F., assignor to The Willys-Overland Co., Toledo, Ohio. Windshield-cleaner. No. 1,397,511; Nov. 22.

Greener, Herman M., Chicago, Ill. Culinary implement. No. 1,397,512; Nov. 22.

Griffith, Evan J., Riverton, Wyo. Safety-key for drilling-rigs. No. 1,397,864; Nov. 22.

Griffith, Richard H., assignor to The Ohio Cultivator Company, Bellevue, Ohio. Soil-pulverizer implement. No. 1,397,683; Nov. 22.

Guest, James J., London, England. Cutter-grinding machine. No. 1,398,187; Nov. 22.

Guinsburg, George E., assignor to I. B. Kleinert Rubber Company, New York, N. Y. Garment-protector. No. 1,397,579; Nov. 22.

Gullet, Stanley, Barnes, London, England. Button. No. 1,397,597; Nov. 22.

Gutwaller, Joseph L., and F. W. Kublin, St. Louis, Mo. Trolley. No. 1,397,760; Nov. 22.

Hagenstrom, John A., Cranford, N. J., assignor to Victor Typewriter Company, Scranton, Pa. Ribbon-movement for typewriters. No. 1,397,515; Nov. 22.

Hahn, Albert W., New York, N. Y. Cyanid process. No. 1,397,684; Nov. 22.

Haines, Frederick W., township of Sandwich East, Ontario, Canada, and F. L. Sorensen, assignors, by direct and mesne assignments, to The Metal Protection Laboratory, Detroit, Mich. Depositing a metallic coating on various metal articles or objects. No. 1,397,514; Nov. 22.

Hammond, William P. (See Moses, Edmund Q., assignor.)

Hanable, Carl F., Negley, Ohio, assignor of one-half to J. K. Bishop, Beaver Falls, Pa. Smoking-pipe. No. 1,397,958; Nov. 22.

Hand, Jay A. (See Pelton, C. R., and Hand.)

Hargood, Harry W., Seattle, Wash. Valve mechanism. No. 1,397,685; Nov. 22.

Harrington, George F., and A. J. Podawiltz, Eau Claire, Wis. Coupon-carrying device. No. 1,397,515; Nov. 22.

Hart, David B., New York, N. Y. Trunk construction. No. 1,398,016; Nov. 22.

Hart, Harry S., assignor to Badger Ballast Car Company, Chicago, Ill. Convertible-car construction. No. 1,397,686; Nov. 22.

Hartford Rubber Works Company, The. (See Gilson, Henry R., assignor.)

Hartsough, Ralph B., assignor to Flour City Plow Company, Minneapolis, Minn. Plow. No. 1,398,075; Nov. 22.

Hauser, Henry J. (See Leonard, C. D., and Hauser.)

Hawkins, Arthur W., assignor to Chicago Railway Equipment Company, Chicago, Ill. Third-point support for brake-beams. No. 1,397,560; Nov. 22.

Hawkins, Arthur W., assignor to Chicago Railway Equipment Company, Chicago, Ill. Safety-guard, release, and support for brake-beams. No. 1,397,561; Nov. 22.

Hawkins, Thomas, assignor of one-half to C. R. H. Rex, Slatington, Pa. Manufacture of explosives. No. 1,398,098; Nov. 22.

Hayes, Thomas J., Roslindale, assignor to Arbetter Felling Machine Company, Boston, Mass. Presser-foot for blindstitch sewing-machines. No. 1,397,516; Nov. 22.

Hausser, Edgar W., New York, N. Y. Electric signal. No. 1,397,582; Nov. 22.

Hazlewood, John J., Pittsburgh, Pa. Transfer means. No. 1,398,188; Nov. 22.

Healy, Frank C., South Boston, Mass. Jack. No. 1,398,122; Nov. 22.

Heath, Samuel, Philadelphia, Pa. Bread-toaster. No. 1,397,959; Nov. 22.

Hecht, Charles E., Irvington, N. J. Brush-hanger. No. 1,397,807; Nov. 22.

Heineke, Emil M., Springfield, Ill. Car-check holder. No. 1,397,889; Nov. 22.

Heitman, John, Seattle, Wash. Phonograph-record cabinet. No. 1,397,517; Nov. 22.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Predetermined-weight scale. No. 1,397,518; Nov. 22.

Herring, Albert F. (See Cormany, R. B., and Herring.)

Hersog, John, Saginaw, Mich., assignor to Sonora Phonograph Company, Inc., New York, N. Y. Resonator. No. 1,397,733; Nov. 22.

Hewitt, William J., Bloomfield, N. J. Window-screen. No. 1,398,017; Nov. 22.

Heyman, Benjamin, assignor to Oxweld Acetylene Company, Newark, N. J. Nozzle for oxyacetylene and similar torches. No. 1,397,519; Nov. 22.

Highfield, George A., Scranton, Pa. Smoking-pipe. No. 1,397,832; Nov. 22.

Hill, Hugh G., assignor, by mesne assignments, to Whitaker-Glessner Company, Wheeling, W. Va. Can-seaming machine. No. 1,398,018; Nov. 22.

Hilliard, Lena C., Boston, Mass. Measuring apparatus for corsets. No. 1,397,865; Nov. 22.

Hines, Joseph H., Auburn, Calif. Rock-drill-sharpening device. No. 1,397,960; Nov. 22.

Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Glass-drawing apparatus. No. 1,398,019; Nov. 22.

Hite, Alva L., Pomeroy, Ohio. Reel for electric-wire connections. No. 1,397,638; Nov. 22.

Hodges, Walter E., and C. F. Larsclere, Flint, Mich. Fishing-line reel. No. 1,398,189; Nov. 22.

Hoelscher, Edwin W., St. Louis, Mo. Combined ticket-holder and lid-sustainer. No. 1,397,734; Nov. 22.

Hohenstein, Edward L., *et al.* (See Engel, William C., assignor.)

Holden & White Inc. (See Bakstad, Johan R., assignor.)

Holland, Charles E., Brooklyn, N. Y. Recovering coal, held in suspension, from coal-bearing water and streams. No. 1,397,735; Nov. 22.

Holland, Newman H., assignor to New Jersey Patent Company, West Orange, N. J. Transmitter and circuits therefor No. 1,397,687; Nov. 22.

Holley, Henry E., Otisville, N. Y. Demountable wheel. No. 1,398,020; Nov. 22.

Holley, William V., assignor to New York Bath Manufacturing, Inc., New York, N. Y. Collapsible seat for children. No. 1,398,021; Nov. 22.

Holmes, Mary J. (See Horne, Carl R., assignor.)

Holmquist, Sven A., Tacoma, Wash. Cabinet-maker's clamp. No. 1,397,961; Nov. 22.

Holybee, Charles F., Hotchkiss, Colo. Chain-fastener. No. 1,398,099; Nov. 22.

Homewood, Fred A., Glendo, Wyo. Spark-plug. No. 1,397,634; Nov. 22.

Honsinger, Orman A., Tacoma, Wash. Folding davenport-bed. No. 1,397,962; Nov. 22.

Honsinger, Orman A., Tacoma, Wash. Davenport-back. No. 1,397,963; Nov. 22.

Hooper, Harris G., Los Angeles, Calif. Flying-machine. No. 1,397,761; Nov. 22.

Hopkins, Mark A., Brooklyn, N. Y. Dish-washing machine. No. 1,398,022; Nov. 22.

Horne, Carl R., assignor to M. J. Holmes, Philadelphia, Pa. Nozzle. No. 1,398,133; Nov. 22.

Hornlack, John G., Hawley, Pa. Railway-tie. No. 1,397,964; Nov. 22.

Hotson, John H., Mount Vernon, N. Y. Attachment for desk-drawers and the like. No. 1,398,023; Nov. 22.

Howard, Alfred A., Waddy, Ky. Planter. No. 1,398,190; Nov. 22.

Howarth, William, Devon, Conn. Nut-lock. No. 1,397,808; Nov. 22.

Howe, Harold C., Rutland, Vt., assignor to Sealright Co., Inc., Fulton, N. Y. Filling containers with ice-cream. No. 1,397,520; Nov. 22.

Huber, William C., Fostoria, Ohio. Chick-box. No. 1,397,583; Nov. 22.

Hudson Motor Specialties Company. (See Hudson, William F., assignor.)

Hudson, William F., assignor to Hudson Motor Specialties Company, Philadelphia, Pa. Clutch-band and casing therefor. No. 1,398,191; Nov. 22.

Huntington, Henry J., *et al.* (See Lippitt, Elihu, assignor.)

Hurlburt, Watson, Chicago, Ill. Electrode for annealing and heating systems. No. 1,398,192; Nov. 22.

Hurt, Samuel N., assignor to Toledo Scale Company, Toledo, Ohio. Weighing-scale. No. 1,397,521; Nov. 22.

Hutchinson, Joseph, Montreal, Quebec, Canada. Restaurant service device. No. 1,397,809; Nov. 22.

Hutton, A. W., *et al.* (See Gable, Jacob W., assignor.)

Illinois Tool Works. (See Olson, Carl G., assignor.)

Industrial Chemical Company. (See Wickenden, Leonard, assignor.)

Inman, Walter A. (See Boyle, J. P., and Inman.)

International Fuel Conservation Co. (See Anderson, Robert J., assignor.)

International Harvester Company. (See Benjamin, Bert R., assignor.)

International Harvester Company. (See Dennis, Samuel K., assignor.)

International Sanitation & Development Company. (See Fetzer, W., Freres, and Elliott, assignors.)

Jaciuk, George, Chicago, Ill. Combined mop and scrubber. No. 1,397,584; Nov. 22.

Jackson, Charles C. (See Shand, W. L. and A. M., assignors.)

Jacobs, Isidor M., Kansas City, assignor, by mesne assignments, to Truck, Tractor and Manufacturing Company, St. Louis, Mo. Means for suspension of engines in motor-vehicles. No. 1,398,024; Nov. 22.

Jacobs, Joseph, Brooklyn, N. Y. Oiling device for fiber silk and the like. No. 1,397,522; Nov. 22.

James, Robert L., Birmingham, Ala. Brake-holding device. No. 1,397,866; Nov. 22.

James, William A., London, England. Valve mechanism for internal-combustion engines. No. 1,397,585; Nov. 22.

James, William F., Honolulu, Hawaii. Oil-tank valve. No. 1,398,025; Nov. 22.

Janesville Machine Company, The. (See Krotz, Alvaro S., assignor.)

Jannoch, Paul W., Pasadena, Calif. Glass-house roofing. No. 1,397,762; Nov. 22.

Jefferies, John L., St. Louis, Mo. Clamp. No. 1,397,930; Nov. 22.

Jeffrey Manufacturing Company. (See Leggett, William K., assignor.)

Jenkins, John C., *et al.* (See Ball, George S., assignor.)

Jenks & Muir Manufacturing Company. (See Muir, William H., assignor.)

Jerdone, Francis, Jr., assignor to The Willys-Overland Company, Toledo, Ohio. Fuel-reserve-supply system for self-propelled vehicles. No. 1,397,523; Nov. 22.

Jewett, Charles E., North Andover, and F. Fitzgerald, Lawrence, Mass. Brush. No. 1,397,586; Nov. 22.

Johnson, Carter J., Green Bay, Wis. Turnbuckle-wrench. No. 1,397,810; Nov. 22.

Johnson, Edward, Burslem, Stroke-upon-Trent, England. Power-driven press. No. 1,397,890; Nov. 22.

Johnson, James G., Chicago, Ill. Garment-press. No. 1,397,635; Nov. 22.

Johnson, Thomas W., Denver, Colo. Cuspidor. No. 1,397,636; Nov. 22.

Johnston, Albert W. (See Stevenson, Albert F., assignor.)

Johnston, Andrew L., Jr., Richmond, Va. Safety-razor. No. 1,398,193; Nov. 22.

Jones, Raymond H., Marysville, Calif. Seal-lock. No. 1,397,587; Nov. 22.

Jones, Robert P., Port Arthur, Tex. Oil-trap. No. 1,397,891; Nov. 22.

Jones, Robert P., Port Arthur, Tex. Oil-trap. No. 1,397,892; Nov. 22.

Jones, Thomas G., Philadelphia, Pa. Valve. No. 1,397,867; Nov. 22.

Joyce, William H., Leadville, Colo. Water-rigging for stoping-drills. No. 1,398,100; Nov. 22.

Jubilee Manufacturing Company. (See Gillet, Alexis F., assignor.)

Jurowski, Edward, Baltimore, Md. Igniting device. No. 1,397,637; Nov. 22.

Juvet, de Stoutz, & Meyer. (See Juvet, R., and de Stoutz, assignors.)

Juvet, Roger, and D. de Stoutz, assignors to the Firm of Juvet, de Stoutz & Meyer, Zurich, Switzerland. Exhibition-car. No. 1,397,965; Nov. 22.

Karns, Ira A., Tulsa, Okla. Sand-settler. No. 1,397,836; Nov. 22.

Kass, Peter, assignor of one-third to E. Brittain and one-third to J. A. Acker, Chicago, Ill. Upper buffer for vestibule-cars. No. 1,397,588; Nov. 22.

Kathcart, Samuel M., assignor of one-half to W. H. Cooper, Leadwood, Mo. Wrench. No. 1,397,638; Nov. 22.

Kay, Harry, Bury, England. Driving-gear especially for groups of rolls. No. 1,397,693; Nov. 22.

Keesler, Clyde C., and F. A. Clock, assignors to Watson Wagon Company, Canastota, N. Y. Fifth-wheel construction. No. 1,397,688; Nov. 22.

Kehoe, Thomas J., assignor to The Willys-Overland Company, Toledo, Ohio. Automobile-lock. No. 1,397,524; Nov. 22.

Kelday, Arthur H., London, England. Signaling apparatus for use on road-vehicles. No. 1,397,639; Nov. 22.

Kelly Button Machine Company. (See Kelly, John, assignor.)

Kelly, John, assignor to Kelly Button Machine Company, Inc., Norfolk, Va. Button-feeding instrumentality for button-setting machines. No. 1,398,026; Nov. 22.

Kelly, John, assignor to Kelly Button Machine Company, Inc., Norfolk, Va. Button-setting machine. No. 1,398,027; Nov. 22.

Kelly, Pascal M., Imlhart, Tex. Spur. No. 1,397,966; Nov. 22.

Kempsmith Manufacturing Co., The. (See Goetz, J., and Parsons, assignors.)

Kendall, Donald S. (See Novotny, E. E., and Kendall.)

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,397,967; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical distributing-machine. No. 1,397,968; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,397,969; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Keyboard mechanism for typographical machines. No. 1,397,970; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,397,971; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical distributing-machine. No. 1,397,972; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical composing-machine. No. 1,397,973; Nov. 22.

Kennedy, David S., Brooklyn, N. Y., assignor to Mergenthaler Linotype Company. Typographical machine. No. 1,397,974; Nov. 22.

Kennedy, John E., Glens Falls, N. Y., assignor to The Willys-Overland Company, Toledo, Ohio. Means for measuring vibrations. No. 1,397,525; Nov. 22.

Kennedy, John F., assignor to Delion Tire and Rubber Company, Baltimore, Md. Adjustable banding-board. No. 1,397,763; Nov. 22.

Kimball, Don L., Portland, Oreg., assignor to Universal Transmission Co., Seattle, Wash. Transmission mechanism. No. 1,398,101; Nov. 22.

Kincaid, Archibald S., assignor to L. L. Patterson, Seattle, Wash. Charge-humidifying device for internal-combustion engines. No. 1,397,837; Nov. 22.

King, Edward F., assignor, by direct and mesne assignments, to What Cheer Braid Company, Providence, R. I. Tip for lacings. No. 1,397,526; Nov. 22.

King, John O. (See Pohl, Charles, assignor.)

Kirk, Thomas S. (See Pringle, A., and Kirk.)

Kleinert, I. B., Rubber Co. (See Guinzburg, George K., assignor.)

Knepper, George E., Altoona, Pa. Car-door mounting. No. 1,397,811; Nov. 22.

Knight, James H., Westtown, Pa. Framing and miter gage. No. 1,397,589; Nov. 22.

Knight, Stephen. (See Rasmussen, Peter, assignor.)

Kobert, Frank P., Amityville, assignor to Kobert Machine Company, Inc., New York, N. Y. Process and apparatus for working metals. No. 1,398,028; Nov. 22.

Kobert Machine Company. (See Kobert, Frank P., assignor.)

Kocjan, Louis, Calumet, Mich. Fire-escape. No. 1,397,640; Nov. 22.

Kolff, Petrus van S., Philadelphia, Pa. Means for detecting changes of resistance in electric currents. No. 1,397,641; Nov. 22.

Kopf, John C., Bellevue borough, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Self-lowering jack. No. 1,397,867; Nov. 22.

Kopf, John C., Bellevue borough, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Self-lowering jack. No. 1,397,869; Nov. 22.

Kopf, John C., Bellevue borough, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Lifting-jack. No. 1,397,870; Nov. 22.

Kopf, John C., Bellevue borough, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Jack. No. 1,397,871; Nov. 22.

Koppers Company, The. (See van Ackeren, Joseph, assignor.)

Krag, Franz K. (See Nelson, John V., assignor.)

Krippner, John, assignor to American Coke & Chemical Company, Chicago, Ill. Coke-oven-door machine. No. 1,397,736; Nov. 22.

Krotz, Alvare S., assignor to The Janesville Machine Company, Janesville, Wis. Planting-machine. No. 1,397,669; Nov. 22.

Kublin, Frederick W. (See Gatweiler, J. I., and Kublin.)

Kuhlemeier, Frederick J. (See Prell, Henry, assignor.)

Kuhn, George W., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Electrical testing system. No. 1,397,975; Nov. 22.

Kulman, Charles, Brooklyn, N. Y., assignor of one-half to A. E. Thomas, West New York, N. J. Scow. No. 1,397,537; Nov. 22.

Kunishige, Keishiro, Los Angeles, Calif. Takedown table. No. 1,397,764; Nov. 22.

Kurts, Carl A., Sac City, Iowa. Radiator-repair stand. No. 1,397,931; Nov. 22.

Kutner, Solomon, assignor, by mesne assignments, to Rapid Roller Co., Chicago, Ill. Manufacturing printers' rollers. No. 1,397,528; Nov. 22.

Lacy, Benjamin B., Houston, Tex. Turbine governor-valve. No. 1,397,812; Nov. 22.

Lalor, John C. (See Middleton, Percy R., assignor.)

Laminated Coal, Limited. (See Bowen, Richard, assignor.)

Lancia & C. (See Zoppegno, Rodolfo, assignor.)

Landers, Upton S., Bakersfield, Calif. Wheel-rim-clamping device for automobile-tires. No. 1,397,813; Nov. 22.

Landon, Archer A., Buffalo, N. Y., assignor to American Radiator Company, Chicago, Ill. Locking mechanism for rotary casting-machines. No. 1,398,134; Nov. 22.

Lang, Elmer L. (See Lang, George H. and E. L.)

Lang, George H. and E. L., Boston, Mass. Marking-machine. No. 1,398,076; Nov. 22.

Lansden, John M., New York, N. Y. Brake. No. 1,397,380; Nov. 22.

Lanyon, Samuel H., Oakland, Calif. Jack. No. 1,397,894; Nov. 22.

Larzelere, Charles F. (See Hodges, W. E., and Larzelere.)

Lauritsen, Charles C., assignor to The Ohio Body & Blower Company, Cleveland, Ohio. Valve. No. 1,397,591; Nov. 22.

Lavoie, Joseph, Montreal, Quebec, Canada. Electric heater. No. 1,397,872; Nov. 22.

Lawrance, Charles L., Bayshore, N. Y. Big-end construction for radial motors. No. 1,398,104; Nov. 22.

Lawrence, William, Chicago, Ill. Auxiliary starter-control device. No. 1,397,690; Nov. 22.

Layman, Hebron B., New York, N. Y., assignor to Never-skid Manufacturing Co., Incorporated. Non-skid and traction chain. No. 1,397,529; Nov. 22.

Leard, Denton, Summerside, Prince Edward Island, Canada. Light-extinguisher. No. 1,397,873; Nov. 22.

Lee, Hugh W. and R. Morrison, assignors to Sir W. G. Armstrong, Whitworth and Company, Limited, Newcastle-upon-Tyne, England. Sighting-gear for guns. No. 1,397,765; Nov. 22.

Lee, John P., Pleasantville, N. Y. Telephone attachment. No. 1,398,029; Nov. 22.

Lefebvre, Regis, Upper Lake, N. Y. Parting-knife. No. 1,397,691; Nov. 22.

Lehman, Charles F., Minneapolis, Minn. Time-controlled electric device. No. 1,397,692; Nov. 22.

Leonard, Charles D. and H. J. Hauser, Rochester, N. Y. Wheeling-coop. No. 1,397,693; Nov. 22.

Levine, Myer P. (See Madan, E. K., and Levine.)

Lewandowski, Jacob. (See Wojcik, Stefan, assignor.)

Lichtenhahn, Theodor, Basel, assignor to Elektrizitätswerk Lonza, Gampel and Basel, Switzerland. Working up residuary ammonium-chlorid liquors from the ammonia-soda process. No. 1,398,135; Nov. 22.

Lidberg, Tiodolf, assignor to Electro-Thermophore Company, Chicago, Ill. Means for controlling temperatures. No. 1,397,694; Nov. 22.

Lidberg, Tiodolf, assignor to Chicago Surgical & Electrical Company, Chicago, Ill. Constant-temperature water-bath. No. 1,397,766; Nov. 22.

Liggett, William K., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Excavating-machine. No. 1,398,195; Nov. 22.

Lindberg, Peter A., Mount Pleasant, Utah. Railway-mail-transferring device. No. 1,398,136; Nov. 22.

Lindenfield, William H., Lexington, Tenn. Oil-cup. No. 1,397,838; Nov. 22.

Ling, Francis E. (See Reif, Joseph, assignor.)

Linotype and Machinery Limited. (See Drake, Tom, assignor.)

Linquist, William, Cleveland, Ohio. Auto-body. No. 1,398,102; Nov. 22.

Lippitt, Elihu, Lakewood, Ohio, assignor, by direct and mesne assignments, of one-half to H. J. Huntington and one-third to S. W. Lippett. Yarn-guide mechanism for knitting-machines. No. 1,398,103; Nov. 22.

Lippitt, Stephen W., et al. (See Lippitt, Elihu, assignor.)

Littman Loxair Valve Corporation. (See Littman, Zeno, assignor.)

Littman, Zeno, New York, N. Y., assignor to Littman Loxair Valve Corporation. Valve. No. 1,397,737; Nov. 22.

Livings, James A., Spring, Tex. Spring-wheel. No. 1,397,839; Nov. 22.

Ljung, John, Alexandria, Minn. Spring suspension for vehicles. No. 1,398,104; Nov. 22.

Lochow, Curt F., Seattle, Wash. Dish-washing machine. No. 1,397,767; Nov. 22.

Loffler, Edmund. (See de Lukacsovics, C., and Loffler.)

Loft Incorporated. (See Wallace, Harvey R., assignor.)

Low, Frank K., Milwaukee, Wis. Blowtorch-valve. No. 1,397,814; Nov. 22.

Lowery, E. P. (See Peden, Francis M., assignor.)

Lox Seal Corporation, The. (See Behrman, Marcus B., assignor.)

Lilbeck, Hilding, Heserud, Sweden. Coupling-key. No. 1,397,530; Nov. 22.

Lucius, Joseph, Champion, Mich. Hatpin-guard. No. 1,397,531; Nov. 22.

Luckenbach Processes Co. (See Luckenbach, Royer, assignor.)

Luckenbach, Royer, Philadelphia, Pa., assignor to Luckenbach Processes Co. (Inc.), San Francisco, Calif. Apparatus for concentrating ore. No. 1,397,815; Nov. 22.

Luedke, Herman A. (See Spera, E. C., and Luedke.)

Luelien, Lawrence W., Mountain Lakes, N. J. Dispensing apparatus for sanitary drinking-cups. No. 1,398,030; Nov. 22.

Lukens, William L. (See Carey, R. R., Lukens, and Mixsell.)

Lumbard, Wiley, Levasy, Mo. Despatch-holder. No. 1,398,137; Nov. 22.

Lund, Clemmen. (See Muhleisen, H. W., and Lund.)

Lundgren, Edwin, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Co. Automatic stoker. No. 1,397,642; Nov. 22.

Lyle, Sarah M., Bridgeport, Ohio. Fire-escape. No. 1,397,643; Nov. 22.

Lynch, Thomas, Jefferson, Iowa. Hog-eating poultry-protector or hog-muzzle. No. 1,398,031; Nov. 22.

McAvoy, Charles F., Brooklyn, and D. E. McAvoy, New York, N. Y. Portable building or structure. No. 1,397,976; Nov. 22.

McAvoy, Daniel E. (See McAvoy, C. F. and D. E.)

McCabe, Horace B., assignor to Gisholt Machine Company, Madison, Wis. Ribbon-reversing mechanism for time-recording registers. No. 1,397,895; Nov. 22.

McChesnie, Daniel, Webbwood, Ontario, Canada. Track-walker's jack. No. 1,397,644; Nov. 22.

McClaire, Katherine, Chicago, Ill. Curler. No. 1,397,532; Nov. 22.

McCormick, Andrew. (See Wallis, Thomas M., assignor.)

McCoskrie, Reuben G., Goodland, Kans. Antirattling device. No. 1,398,105; Nov. 22.

McCoy, John D., Kirksville, Mo. Tire-chain tool. No. 1,397,592; Nov. 22.

McCullough, Henry L. (See Ripley, Edward G., assignor.)

McCune, Roy A., East Pittsburgh, Pa. Suspension-bearing. No. 1,398,138; Nov. 22.

McGee, Wilbert R., Seattle, Wash. Cartridge-reloading machine. No. 1,398,106; Nov. 22.

McIntyre, Albert A., Bonners Ferry, Idaho. Making a die. No. 1,398,196; Nov. 22.

McIntyre, Allan. (See Williams, F. P., and McIntyre.)

McKee, Thomas, Portland, Oreg. Perforated and other sheet-music. No. 1,398,107; Nov. 22.

McKone, Leo J., assignor to W. A. Casey, Kansas City, Mo. Valve remover and lifter for internal-combustion engines, &c. No. 1,397,768; Nov. 22.

McLean, Philip S., Bloomfield, N. J., assignor, by mesne assignments, to Benjamin Electric Manufacturing Company, Chicago, Ill. Swivel attachment-plug. No. 1,398,077; Nov. 22.

McMahon, Alexander P., Chicago, Ill. Curtain-stretcher. No. 1,397,533; Nov. 22.

McNeill, Alan M., and W. J. Abbott, Auckland, New Zealand. Binder-case for document and like files. No. 1,397,645; Nov. 22.

McQuinn, John K., Brockton, Mass. Moccasin-slipper. No. 1,398,108; Nov. 22.

Macartney, Arthur C., Syracuse, N. Y. Teat-cup. No. 1,397,840; Nov. 22.

Madan, Edward K., Brooklyn, and M. P. Levine, Mount Vernon, assignors to The Emeloid Company, Brooklyn, N. Y. Sanitary cap. No. 1,398,078; Nov. 22.

Magee, Chauncey L. C., Chicago, Ill. Wagon-lifting apparatus. No. 1,397,893; Nov. 22.

Maisel, Lorenz, assignee to Burgess Battery Company, Madison, Wis. Battery-handlamp. No. 1,397,646; Nov. 22.

Majestic Electric Development Company. (See Brown, E. N., and Shoenberg, assignors.)

Mandalian, Sabatiel G., North Attleboro, Mass. Making bag-tops. No. 1,397,874; Nov. 22.

Manila Sterilizing Corporation. (See Diner, Jacob, assignor.)

March, George E., Muskegon, Mich. Irrigating or sprinkling system. No. 1,397,769; Nov. 22.

Marconet, Orlan P., and W. O. Carter, Clarksburg, W. Va. Sheet-glass-drawing machine. No. 1,398,109; Nov. 22.

Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Register for water-meters, &c. No. 1,397,534; Nov. 22.

Marks, Herbert E., Sewickley, Pa. Roof structure. No. 1,398,079; Nov. 22.

Marquette, Ira G., Wheeling, W. Va. Gas-burner. No. 1,397,977; Nov. 22.

Marsden, Mark W., Philadelphia, Pa. Trespass-sign for automobiles. No. 1,397,770; Nov. 22.

Martin, John H., New Hartford, N. Y. Measuring and describing instrument. No. 1,397,816; Nov. 22.

Matthews Engineering Company. (See Cosgray, Mark C., assignor.)

Maurer, Oscar V., East Cleveland, Ohio. Incandescent lamp and making the same. No. 1,398,032; Nov. 22.

Maurer, Oscar V., East Cleveland, Ohio. Making incandescent lamps. No. 1,398,033; Nov. 22.

Mays, Vernice M., Ketcham, Okla. Plow. No. 1,397,841; Nov. 22.

Meister, Jacob, Basel, Switzerland. Degumming textile fibers. No. 1,397,875; Nov. 22.

Meldal, Edward, London, England. Nut, bolt, screw, and the like. No. 1,397,876; Nov. 22.

Melton, Edward R., et al. (See Ball, George S., assignor.)

Mergenthaler Linotype Company. (See Kennedy, David S., assignor.)

Mero, Frank K., Malden, Mass. Loose-leaf binder. No. 1,398,034; Nov. 22.

Merrell, Irving S., assignor to Merrell-Soule Company, Syracuse, N. Y. Treating juice and product. No. 1,398,080; Nov. 22.

Merrell, Irving S., assignor to Merrell-Soule Company, Syracuse, N. Y. Treating juice and product. No. 1,398,081; Nov. 22.

Merrell-Soule Company. (See Merrell, Irving S., assignor.)

Metal Protection Laboratory, The. (See Haines, F. W., and Sorensen, assignors.)

Metals Recovery Company. (See Robbins, Hallet R., assignor.)

Mettler, Clyde M. (See Smith, Charles, assignor.)

Middleton, Percy R., Los Angeles, Calif., assignor of one-half to J. C. Lalor, New York, N. Y. Electrolysis of copper-bearing solutions. No. 1,397,647; Nov. 22.

Milam, Willie, Winston, Ga. Compressed-air pump. No. 1,397,877; Nov. 22.

Miller Rubber Company, The. (See Brundage, James W., assignor.)

Miller, Tony S., Ryde, Calif. Snap-pocket for truck-stakes. No. 1,398,110; Nov. 22.

Milner, Leslie C., Indianapolis, Ind. Automobile heater. No. 1,397,648; Nov. 22.

Mills, Clarence A., Cincinnati, Ohio. Blood-coagulation medium. No. 1,397,896; Nov. 22.

Miner, William H. (See O'Connor, John F., assignor.)

Minor, Charles G., Duluth, Minn. Spark-plug. No. 1,397,535; Nov. 22.

Mitchell, John C., East Orange, N. J. Form for concrete-pipe molds. No. 1,397,649; Nov. 22.

Mixsell, Leighton N. D. (See Carey, R. R., Lukens, and Mixsell.)

Mladinich, Frank, New York, N. Y., assignor of fifteen one-hundredths to E. Pontin, Elizabeth, N. J., and forty-two and one-half one-hundredths to A. R. de Tartas, Rockwell Center, Long Island, N. Y. Camera box or cabinet for combined moving-picture cameras and projectors. No. 1,397,817; Nov. 22.

Mockridge, Joseph B., assignor to Automatic Weighing Machine Company, Newark, N. J. Feeding apparatus for weighing-machines and the like. No. 1,397,962; Nov. 22.

Mohn, Arnold, Chicago, Ill. Waterproofing. No. 1,397,738; Nov. 22.

Moore, Richard, Ossining, N. Y. Pen or pencil clip. No. 1,397,818; Nov. 22.

Moork, Alfred C. (See Moork, Hartwig A., assignor.)

Moork, Hartwig A., assignor of one-half to A. C. Moork, Chicago, Ill. Kettle. No. 1,397,536; Nov. 22.

Moran, Patrick J. (See Clark, Wilbur T., assignor.)

Morrell, Albert H. (See Wishart, W., and Morrell.)

Morrison, Robert. (See Lee, H. W., and Morrison.)

Morrison, William, Troy, N. Y. Brush-back. No. 1,398,035; Nov. 22.

Mort, George F., deceased, by J. C. Mort, Ealing, England, executor. Adjustable work-carrying table for drilling and other machines. No. 1,397,771; Nov. 22.

Mort, John C., executor. (See Mort, George F.)

Moses, Edmund O., New York, N. Y., assignor of one-half to W. P. Hammond, Passaic, N. J. Vehicle construction. No. 1,397,594; Nov. 22.

Moses, Robert S., Kendallville, Ind. Fishing-reel. No. 1,398,197; Nov. 22.

Moyer, Malcolm B., Montevideo, Minn. Fresh-air valve for buildings. No. 1,397,739; Nov. 22.

Moyer, Virgil W., Pawhuska, Okla. Temper-screw yoke. No. 1,397,595; Nov. 22.

Muhleisen, Henry W., and C. Lund, assignors to W. S. Rush & Co., Los Angeles, Calif. Adjustable internal brake-shoe. No. 1,397,772; Nov. 22.
Muir, William H., assignor to Jenks & Muir Manufacturing Company, Detroit, Mich. Bed. No. 1,397,773; Nov. 22.
Muller, Henry, East Orange, N. J. Calculating device. No. 1,397,596; Nov. 22.
Muller, Robert L., assignor to Burroughs Adding Machine Company, Detroit, Mich. Adding-machine. No. 1,397,774; Nov. 22.
Munsing, George D., New York, N. Y. Can-opener. No. 1,397,537; Nov. 22.
Munson, Howard B., St. Louis, Mo., assignor of one-half to Wilder and Company, Chicago, Ill. Heel-breasting machine. No. 1,397,897; Nov. 22.
Munson Supply Company. (See Coomber, James J., assignor.)
Munters, Anders J. E., assignor to Aktiebolaget Pump-Separator, Stockholm, Sweden. Driver for wheels, shafts, and the like. No. 1,397,819; Nov. 22.
Marcus, Jacob. (See Bergen, J. F., and Marcus.)
National Company. (See Baleke, W. H., and Ready, assignors.)
National Shock Loader Co. (See Gilliland, Orra L., assignor.)
Neikirk, John O., Lombard, assignor to Rodger Ballast Car Co., Chicago, Ill. Convertible-car construction. No. 1,397,695; Nov. 22.
Nelson, Charles A., assignor to Savage Arms Corporation, Utica, N. Y. Magazine-loader. No. 1,397,538; Nov. 22.
Nelson, Edwin. (See Zettermen, Axel, assignor.)
Nelson, John V., Maywood, assignor to F. K. Krag, Chicago, Ill. Drilling attachment for milling-machines. No. 1,397,696; Nov. 22.
Nelson, Morton E., Albert Lea, Minn. Luggage-carrier. No. 1,398,140; Nov. 22.
Neptune Meter Company. (See Marden, William L., assignor.)
Netzel, Frank M., assignor to Velvet Rubber Company, Chicago, Ill. Making tire-casing fillers. No. 1,397,842; Nov. 22.
Neumeister, May B., Los Angeles, Calif. Sectional pie-pan. No. 1,397,775; Nov. 22.
Neverskid Manufacturing Co. (See Layman, Hebron B., assignor.)
New Jersey Patent Company. (See Holland, Newman H., assignor.)
New York Bath Manufacturing Inc. (See Holley, William V., assignor.)
Newcomb, Delancy E., Sydney, Nova Scotia, Canada. Nut-lock. No. 1,397,820; Nov. 22.
Nichols, Charles W., St. Louis, Mo. Sash-fastener. No. 1,398,036; Nov. 22.
Niemela, Jack, Fort Bragg, Calif. Wire-stretcher. No. 1,397,878; Nov. 22.
Niland, Andrew. (See Carlson, August J., assignor.)
Nipe, Incorporated. (See Goodchild, Walter, assignor.)
Nitsch, Charles H., assignor to Stokes and Smith Company, Philadelphia, Pa. Machine for pressing necks in boxes. No. 1,397,597; Nov. 22.
Nodder, Gerald. (See Clayton, W., and Nodder.)
Nordberg, Bruno V., Milwaukee, Wis. Support for rocker-shafts and the like. No. 1,397,598; Nov. 22.
Norris, Emma M., executrix. (See Norris, John H.) (Reissue.)
Norris, John H., deceased, New York, N. Y., by E. M. Norris, executrix. Meter. (Reissue.) No. 15,232; Nov. 22.
Northcutt, John G., and M. Crawford, Silverton, Tex. Agricultural machine. No. 1,398,188; Nov. 22.
Nossaqk, Frederik, assignor to Composite Metal Lath Company, New York, N. Y. Machine for producing composite metal laths. No. 1,398,141; Nov. 22.
Novotny, Emil E., Logan, assignor to J. S. Stokes, Philadelphia, Pa. Printing-plate matrix and making same. No. 1,398,142; Nov. 22.
Novotny, Emil E., Logan, assignor to J. S. Stokes, Philadelphia, Pa. Moldable composition and making same. No. 1,398,143; Nov. 22.
Novotny, Emil E., assignor to J. S. Stokes, Logan, Philadelphia, Pa. Manufacture of sound-records. No. 1,398,144; Nov. 22.
Novotny, Emil E., assignor to J. S. Stokes, Philadelphia, Pa. Sound-record. No. 1,398,145; Nov. 22.
Novotny, Emil E., Logan, Pa., and D. S. Kendall, Glen Ridge, N. J., assignors to J. S. Stokes, Philadelphia, Pa. Synthetic resin composition. No. 1,398,146; Nov. 22.
Novotny, Emil E., Logan, assignor to J. S. Stokes, Philadelphia, Pa. Moldable composite body. No. 1,398,147; Nov. 22.
Novotny, Emil E., Logan, assignor to J. S. Stokes, Philadelphia, Pa. Sound-record. No. 1,398,148; Nov. 22.
Novotny, Emil E., Logan, Philadelphia, assignor to J. S. Stokes, Philadelphia, Pa. Molding articles. No. 1,398,149; Nov. 22.
Oates, William, Jr., Lead, S. D. Cooling system. No. 1,398,199; Nov. 22.
O'Brien, James B., Hartford, Wis. Rag-holder. No. 1,397,898; Nov. 22.
O'Connor, John P., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. No. 1,398,037; Nov. 22.
Odell, Risdon M., Decatur, Ill. Egg-carton. No. 1,397,539; Nov. 22.
Odell, Risdon M., Decatur, Ill. Receptacle and carrier for eggs. No. 1,397,540; Nov. 22.
Ohio Body & Blower Company, The. (See Lauritsen, Charles C., assignor.)
Ohio Cultivator Company, The. (See Griffith, Richard H., assignor.)
Olinger, Thomas, assignor to Federal Stamping Company, Holland, Mich. Damper construction. No. 1,398,068; Nov. 22.
Olsen, Ben F., Marcus, Wash. Tea or coffee pot. No. 1,397,978; Nov. 22.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Hob for generating bevel-gears. No. 1,397,697; Nov. 22.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Cutter for generating skew bevel-gears. No. 1,398,039; Nov. 22.
O'Neil, Edward, Wakefield, Mich. Shears. No. 1,398,111; Nov. 22.
Osborn, James H., Mount Vernon, Ill. Weather-strip. No. 1,397,979; Nov. 22.
Ouellette, John B., New Bedford, Mass. Bending attachment for vises. No. 1,397,980; Nov. 22.
Overstrud, Melvin, assignor to Twin City Forge & Foundry Company, Stillwater, Minn. Combination tie-plate and anticreeper for rails. No. 1,397,776; Nov. 22.
Owen, Harry, Roosevelt, Utah. Tire. No. 1,398,200; Nov. 22.
Owen, William O., Washington, D. C. Production of "Dissolve" effects in moving-picture films. No. 1,397,600; Nov. 22.
Owen, William O., Washington, D. C. Device for use in fade-printing. No. 1,397,601; Nov. 22.
Owen, William O., Washington, D. C. Production of insets on moving-picture films. No. 1,397,602; Nov. 22.
Owens, Charles, Chattanooga, Tenn. Agricultural implement. No. 1,397,599; Nov. 22.
Owens, James W., Cradock, Va., assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa. Method for use in connection with the testing of materials. No. 1,397,541; Nov. 22.
Oxweld Acetylene Company. (See Heyman, Benjamin.)
P. A. Geier Company, The. (See Geier, P. A., and Robertson, assignors.)
Palmer, John F., Milwaukee, Wis. Brush-handle connection. No. 1,397,899; Nov. 22.
Panik, Joseph, and S. Clebo, West Park, Ohio. Churn-operating mechanism. No. 1,398,112; Nov. 22.
Paper Products Machine Co. (See Shepherd, Joe V. R., assignor.)
Parke, Davis & Company. (See Aldrich, Thomas B., assignor.)
Parker, Howard, Berlin, N. H., assignor to Brown Company, Portland, Me. Core for rolls of paper and the like. No. 1,397,542; Nov. 22.
Parrish, Stephen E., Grand Rapids, Mich. Ribbon-meter. No. 1,398,040; Nov. 22.
Parsons, Fred A. (See Geets, J., and Parsons.)
Pate, William T. S., Indianapolis, Ind. Mortising-machine. No. 1,397,900; Nov. 22.
Patterson, L. L. (See Kincaid, Archibald S., assignor.)
Payne, Oscar V., Cleveland, Ohio, assignor to Auto-Ordnance Corporation, New York, N. Y. Gun. No. 1,397,698; Nov. 22.
Peden, Francis M., assignor of one-half to E. P. Lowery, Loco, Okla. Binder attachment. No. 1,397,821; Nov. 22.
Pedersen, Waldemar J., Floral Park, N. Y. Building construction. No. 1,397,650; Nov. 22.
Peirce, Clifford G., Jersey City, N. J. Spark-plug. No. 1,397,901; Nov. 22.
Peirce, William B., North Tonawanda, N. Y. Method and apparatus for heating long blanks to forging temperature. No. 1,397,603; Nov. 22.
Pelton & Crane Company, The. (See Pelton, C. B., and Hand, assignors.)
Pelton, Chauncey B., and J. A. Hand, assignors to The Pelton & Crane Company, Detroit, Mich. Electric switch. No. 1,397,777; Nov. 22.
Penn Publishing Company. (See Rhoads, William M., assignor.)
Pereira, Ricardo G., Valparaiso, Chile. Line-making attachment for typewriting-machines. No. 1,397,740; Nov. 22.
Perkins, Chester A., South Bend, Ind. Vehicle-signal. No. 1,397,778; Nov. 22.
Peppin, Albert, Ishpeming, Mich. Digging-machine. No. 1,397,543; Nov. 22.
Peters, Chauncey G., Washington, D. C. Headlight diffraction-lenses. No. 1,397,822; Nov. 22.
Peters, Walter, Chicago, Ill. Cake-machine. No. 1,397,981; Nov. 22.
Peterson, Edwin A., Madison, Wis., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,397,544; Nov. 22.
Petsche, Gustav B., Yonkers, N. Y. Non-return valve for pumps and similar uses. No. 1,397,700; Nov. 22.
Petsche, Gustav B., Yonkers, N. Y. Rotary pump. No. 1,397,699; Nov. 22.
Peyser, Joseph, Mount Vernon, N. Y., assignor, by mesne assignments, to Ackermann Manufacturing Company, Wheeling, W. Va. Heading-machine. No. 1,397,651; Nov. 22.
Pfau, Albert E., Rockford, Ill. Vending-machine. No. 1,397,604; Nov. 22.

Pfeifer, Constant J., Calicoon, N. Y. Poultry-feeder. No. 1,398,041; Nov. 22.
Pfeifer, Leo L., assignor to The John W. Brown Manufacturing Company, Columbus, Ohio. Power-press. No. 1,397,779; Nov. 22.
Philadelphia Textile Machinery Company, The. (See Bogaty, Hermann, assignor.)
Phillips, Will H., Chicago, Ill., assignor to Worthington Pump and Machinery Corporation. Condenser. No. 1,397,545; Nov. 22.
Pierce-Arrow Motor Car Company, The. (See Sheppy, Charles L., assignor.)
Pierce, Harry, assignor of one-half to F. A. Briggs, Oakland, Calif. Automatic pneumatic lock. No. 1,397,933; Nov. 22.
Pierce, Jefferson F., Tampa, Fla. Washing-machine. No. 1,397,652; Nov. 22.
Piggly Wiggly Corporation. (See Saunders, Clarence, assignor.)
Pillmore, William F., Westernville, N. Y. Attachment for automobiles. No. 1,397,879; Nov. 22.
Pirwitz, Friedrich A. G. (See Wollensak, A., and Pirwitz.)
Pittsburgh Plate Glass Company. (See Fulton, Clarence E., assignor.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Plate Glass Company. (See Soderberg, Jacob, assignor.)
Pittsburgh Plate Glass Company. (See Taylor, William H., assignor.)
Podawiltz, Arthur J. (See Harrington, G. F., and Podawiltz.)
Pohl, Charles, assignor to J. O. King, Los Angeles, Calif. Fuel-feeding system. No. 1,397,780; Nov. 22.
Pollard, Charles E., Champaign, Ill. Osteopathic instrument. No. 1,398,150; Nov. 22.
Pontin, Elmer, *et al.* (See Mladinich, Frank, assignor.)
Posson, Edward, Chicago, Ill. Door-fastener for railway-cars. No. 1,397,934; Nov. 22.
Powers Regulator Company, The. (See Snediker, Morton O., assignor.)
Poynor, Camp L., North Fort Worth, Tex. Fertilizer and producing the same. No. 1,398,113; Nov. 22.
Prell, Henry, Cleveland, Ohio, assignor, by mesne assignments, to F. J. Kuhlemeier, Burlington, Iowa. Apparatus for heating, roasting, and cooling food products. No. 1,398,114; Nov. 22.
Prell, Henry, Cleveland, Ohio, assignor to F. J. Kuhlemeier, Burlington, Iowa. Roasting coffee. No. 1,398,115; Nov. 22.
Prendergast, Thomas A., Milbank, S. D. Earthworking-machine. No. 1,397,653; Nov. 22.
Price, William G., Yakima, Wash. Friction-clutch. No. 1,397,902; Nov. 22.
Pringle, Alexander, and T. S. Kirk, Belfast, Ireland. Artificial limb. No. 1,397,654; Nov. 22.
Procunier, Frank B., assignor of one-half to L. N. Turner and one-fourth to J. C. Stryker, Chicago, Ill. Automobile-lamper. No. 1,397,741; Nov. 22.
Pullar, James, Hartford, Conn. Apparatus for removing snow. No. 1,398,042; Nov. 22.
Quartana, Peter J., Milwaukee, Wis. Fender attachment for automobiles. No. 1,397,903; Nov. 22.
Rabinowitz, Henry, New York, N. Y. Means for locking window-sashes in position. No. 1,397,935; Nov. 22.
Ralston, William S., assignor to The Chaplin-Fulton Manufacturing Company, Pittsburgh, Pa. Valve. No. 1,398,151; Nov. 22.
Ramsay, John C., Baltimore, Md. Oven attachment. No. 1,398,152; Nov. 22.
Rand, James H., Jr., Tonawanda, N. Y. Card-index system. No. 1,397,982; Nov. 22.
Rapid Roller Co. (See Kutner, Solomon, assignor.)
Rapp, Adolph P., New York, N. Y. Chewing-gum or chewing-gum substitutes. No. 1,397,742; Nov. 22.
Rapp, Fred, West Albany, N. Y. Support for signal-lamp brackets. No. 1,397,843; Nov. 22.
Rapp, John W., Flushing, and J. Vanorio, Brooklyn, N. Y.; said Vanorio assignor to said Rapp. Airplane-rib construction. No. 1,397,701; Nov. 22.
Rasmussen, Carl L., Butte, Mont. Alarm-clock attachment. No. 1,397,702; Nov. 22.
Rasmussen, Peter, assignor of one-half to S. Knight, Denver, Colo. Automatically-operating cake receiving, separating, dividing, and centralizing machine. No. 1,397,655; Nov. 22.
Rasmussen, Peter, assignor of one-half to S. Knight, Denver, Colo. Multiple-guide-row stacked-cake receiving and assembling machine. No. 1,397,656; Nov. 22.
Rasmussen, Peter, assignor of one-half to S. Knight, Denver, Colo. Transversely-adjustable chute for cake-stacking machines. No. 1,397,657; Nov. 22.
Rasmussen, Peter, Denver, Colo. Automatically-operating material-sprinkling hopper for marshmallow or other material-depositing machines. No. 1,397,658; Nov. 22.
Rau, Albert, Clifton, N. J., assignor to United Piece Dye Works, Inc. Cloth-handling device. No. 1,398,043; Nov. 22.
Ready, William A. (See Baleke, W. H., and Ready.)
Rebelski, August, Brooklyn, N. Y., and M. Torre, Hoboken, N. J. Oval chuck. No. 1,397,546; Nov. 22.
Reeve, Charles S., Grantwood, N. J., assignor to The Barrett Company, Bituminous emulsion. No. 1,398,201; Nov. 22.
Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Predetermined-weight scale. No. 1,397,547; Nov. 22.
Rehrauer, Randolph A. (See Rhein, L. J., and Rehrauer.)
Reichard, Walter V., Paola, Kans. Thermal circuit-closer. No. 1,398,153; Nov. 22.
Reid, Walter W., New York, N. Y. Box. No. 1,398,154; Nov. 22.
Reif, Joseph, assignor of forty-five per cent. to F. E. Ling, Hebron, Ind. Car-coupling. No. 1,397,781; Nov. 22.
Reinhold, Baldwin. (See Abegg, Walter A., assignor.)
Remington Accounting Machine Corporation. (See Golber, Hyman, assignor.)
Rennie, John B., Manchester, England. Metal-cutting tool. No. 1,397,983; Nov. 22.
Rex, Chauncey R. H. (See Hawkins, Thomas, assignor.)
Rex Company, The. (See Gifford, Bert L. and E. B., assignors.)
Rhein, Louis J., and R. A. Rehrauer, Two Rivers, Wis. Retaining means for hairpins, combs, and the like. No. 1,397,804; Nov. 22.
Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Spinning or winding machine. No. 1,397,905; Nov. 22.
Rhoads, William M., assignor to Penn Publishing Company, Philadelphia, Pa. Book-cover. No. 1,397,605; Nov. 22.
Rhodes, Ernest, assignor to Standard Furniture Company, Herkimer, N. Y. Stop for desk-slides and the like. No. 1,397,782; Nov. 22.
Richardson, John J. (See Yoxall, H. S., and Richardson.)
Rieff, Clinton W., West Fork, Ark. Tool-handle. No. 1,397,783; Nov. 22.
Ripley, Edward G., assignor of one-half to H. L. McCullough, Minneapolis, Minn. Pump-lubricator. No. 1,397,548; Nov. 22.
Robbins, Hallet R., Washington, D. C., assignor to Metals Recovery Company, New York, N. Y. Concentration of ores. No. 1,397,703; Nov. 22.
Robertson, Frank E. (See Geier, P. A., and Robertson.)
Rockwood, George I., Worcester, Mass. Dry-pipe valve. No. 1,397,704; Nov. 22.
Rodger Ballast Car Company. (See Hart, Harry S., assignor.)
Rodger Ballast Car Co. (See Neikirk, John O., assignor.)
Roeseler, Emil A., Juneau, Wis. Cable-guard for carrier pulleys or trolleys. No. 1,397,659; Nov. 22.
Rogers, W. H., Company. (See Scherfer, Jacob, assignor.)
Rogowski, Edmund, assignor of one-half to B. Freud, Chicago, Ill. Demountable rim. No. 1,397,823; Nov. 22.
Root, Carlton T., Orland, Ind. Angle-wrench. No. 1,398,116; Nov. 22.
Ropp, John F., Blythe, Calif. Leveler. No. 1,397,784; Nov. 22.
Rork, James B., Tacoma, Wash. Chimney-cleaner. No. 1,398,155; Nov. 22.
Rose, George U., Jr., Washington, D. C. Electrotype material and forming same. No. 1,397,785; Nov. 22.
Rosenfeld, Francis M. (See Shaw, L. E., and Rosenfeld.)
Ross, Charles, Blair, Nebr. Adjustable open-top horse-collar. No. 1,397,743; Nov. 22.
Rouse, Ardra L., Kansas City, Kans. Polishing-tool. No. 1,397,660; Nov. 22.
Ruprecht, Frank D., Midway, Fla. Screening apparatus. No. 1,397,906; Nov. 22.
Rush, W. S., & Co. (See Muhleisen, H. W., and Lund, assignors.)
Ryan, Thomas J., Tulsa, Okla. Oil-distilling apparatus. No. 1,397,984; Nov. 22.
Sampson, John. (See Ensor, H. E., and Sampson.)
Sanborn, George A., Fox Lake, Wis. Envelop. No. 1,397,880; Nov. 22.
Santon, Joseph C., Worcester, Mass. Boring-tool holder. No. 1,397,786; Nov. 22.
Sark, Elmer J., Bartlesville, Okla. Shield or protector for photographic cameras. No. 1,397,661; Nov. 22.
Saunders, Clarence, assignor to Piggly Wiggly Corporation, Memphis, Tenn. Self-serving store. No. 1,397,824; Nov. 22.
Savage Arms Corporation. (See Nelson, Charles A., assignor.)
Scarborough, John H., assignor to D. Weber, Philadelphia, Pa. Slotting-machine. No. 1,398,202; Nov. 22.
Scherfer, Jacob, assignor to W. H. Rogers Company, Chicago, Ill. Manufacturing ladies' ready-to-wear clothing. No. 1,398,117; Nov. 22.
Schmidt, Henry A., Long Island City, N. Y. Convertible bed-spring. No. 1,398,203; Nov. 22.
Schmidt, John, Jr., Philadelphia, Pa., assignor of one-third to A. R. Thompson, San Jose, Calif. Cooker. No. 1,397,985; Nov. 22.
Schmidt Lithograph Company. (See Schmidt, Max A., assignor.)
Schmidt, Max A., San Francisco, Calif., assignor to Schmidt Lithograph Company. Box-printing machine. No. 1,397,881; Nov. 22.
Schnittker, Henry A., St. Louis, Mo. Resilient wheel. No. 1,397,907; Nov. 22.
Schott, Frederick, *et al.* (See Engel, William C., assignor.)
Schowalter, Jacob A., near Newton, Kans. Headed-grain stacker. No. 1,398,204; Nov. 22.
Schrader's, A., Son, Incorporated. (See Evans, Fred, assignor.)
Schroder, Frank P., Philadelphia, Pa. Tap. No. 1,398,156; Nov. 22.

Schutz Hawley Co. (See Schutz, Joseph M., assignor.)
Schutz, Joseph M., assignor to Schutz Hawley Company, Chicago, Ill. Carbureting air for internal-combustion engines. No. 1,397,744; Nov. 22.
Schwerin, Frank R., Westview borough, assignor to The Duff Manufacturing Company, Pittsburgh, Pa. Self-lowering jack. No. 1,397,852; Nov. 22.
Scott, Charles S., Chicago, Ill. Vending-machine. No. 1,397,549; Nov. 22.
Scott, Guy E., Delhi, Mian. Shovel-scraper. No. 1,396,082; Nov. 22.
Scutright Co. Inc. (See Howe, Harold C., assignor.)
Seaton, Max Y., assignor to The Dow Chemical Company, Midland, Mich. Cellulose-ester solvent and resulting cellulosic composition. No. 1,397,986; Nov. 22.
Seder, Frank, San Francisco, Calif. Cuspidor. No. 1,398,118; Nov. 22.
Segar, John M., Liverpool, England. Griller. No. 1,398,157; Nov. 22.
Sellew, Roland W., assignor to The Fafnir Bearing Company, New Britain, Conn. Antifriction-bearing. (Reissue.) No. 15,253; Nov. 22.
Shadle Automatic Train Signal Company. (See Shadle, Clinton F., assignor.)
Shadle, Clinton F., Indianapolis, Ind., assignor to Shadle Automatic Train Signal Company. Signal system for railways. No. 1,397,883; Nov. 22.
Shand, Alexander M. (See Shand, W. L., and A. M.)
Shand, William L., and A. M., Caulfield, near Melbourne, assignors of one-half to C. C. Jackson, Melbourne, Victoria, Australia. Gas-burner for heating, cooking, and other purposes. No. 1,397,662; Nov. 22.
Shaw, Louis E., East Orange, N. J., and F. M. Rosenfeld, New York, N. Y., assignors, by mesne assignments, to Diamond Electric Specialties Corp. of Newark, N. J. Portable electric lamp. No. 1,397,705; Nov. 22.
Shejaman, Morris, New York, N. Y. Lock. No. 1,398,044; Nov. 22.
Shepherd, Joe V. R., Hollister, Mass., assignor to Paper Products Machine Company, Boston, Mass. Container. No. 1,397,908; Nov. 22.
Sheppy, Charles L., assignor to The Pierce-Arrow Motor Car Company, Buffalo, N. Y. Actuating means for throttle-valves of carburetors. No. 1,397,987; Nov. 22.
Shoenberg, Milton H. (See Brown, E. N., and Shoenberg.)
Sibley, Cedric P., Detroit, Mich. Fastener for papers and other materials. No. 1,397,787; Nov. 22.
Simpson, Arthur M. (See Simpson, George N., A. M., and W. H.)
Simpson, George N., A. M., and W. H., Chicago, Ill. Rotary car-dumper. No. 1,397,936; Nov. 22.
Simpson, Walter H. (See Simpson, George N., A. M., and W. H.)
Sinclair, George, Taylors Falls, Minn. Treating liquids. No. 1,397,550; Nov. 22.
Singer Manufacturing Company, The. (See Corrall, Herbert, assignor.)
Singer Manufacturing Company, The. (See Gatchell, George S., assignor.)
Sipe, James B., Pittsburgh, Pa. Egg-carrier. No. 1,398,045; Nov. 22.
Sirch, Charles W., Los Angeles, Calif. Filter. No. 1,398,205; Nov. 22.
Skelton, Charles E., East Onondaga, N. Y. Reamer. No. 1,397,706; Nov. 22.
Skremka, Henry, New York, N. Y. Stage-costume appliance. No. 1,398,158; Nov. 22.
Slaughter, Joseph W., Brooklyn, N. Y., assignor to Standard Tobacco Stemmer Company. Tobacco-stemming machine. No. 1,397,551; Nov. 22.
Smith, Charles, assignor, by mesne assignments, of one-half to C. M. Mettler, St. Louis, Mo. Intensifier. No. 1,397,788; Nov. 22.
Smith, Christian N., Elgin, Ill. Safety-shield for circular saws. No. 1,397,606; Nov. 22.
Smith, Christian N., Elgin, Ill. Making metallic printing-plates. No. 1,397,607; Nov. 22.
Smith, Elberon D., Brooklyn, N. Y., assignor to American Machine & Foundry Company, Cigarette-packaging machine. No. 1,397,552; Nov. 22.
Smith, Harry B., Brooklyn, N. Y. Paper-box construction. No. 1,397,608; Nov. 22.
Smith, Harry F., Lexington, assignor, by mesne assignments, to The Gas Research Company, Dayton, Ohio. Method of and apparatus for distributing material. No. 1,397,553; Nov. 22.
Smith, Harry F., Lexington, assignor, by mesne assignments, to The Gas Research Company, Dayton, Ohio. Moisture regulation. No. 1,397,555; Nov. 22.
Smith, Harry F., Lexington, assignor, by mesne assignments, to The Gas Research Company, Dayton, Ohio. Moisture control. No. 1,397,556; Nov. 22.
Smith, Harry F., Lexington, assignor, by mesne assignments, to The Gas Research Company, Dayton, Ohio. Steam regulation. No. 1,397,554; Nov. 22.
Smith, Harry F., assignor, by mesne assignments, to The Gas Research Company, Dayton, Ohio. Spraying mechanism. No. 1,397,557; Nov. 22.
Smith, Nelson E., Dallas, Tex. Wrench. No. 1,397,984; Nov. 22.
Smith, Rowland H., Brantford, Ontario, Canada. Organ-blower. No. 1,397,988; Nov. 22.
Smurr, Harry M. B., Armona, Calif. Toy aeroplane. No. 1,397,989; Nov. 22.
Snediker, Morton O., assignor to The Powers Regulator Company, Chicago, Ill. Thermostatic water-mixer. No. 1,397,707; Nov. 22.
Snelling, Walter O., Long Island City, N. Y. Performing chemical reactions. No. 1,397,609; Nov. 22.
Societe Anonyme pour L'Equipement Electrique des Vehicules. (See Dutreux, Auguste, assignor.)
Societe Les Petits Fils de Francois De Wendel et Cie. (See Weber, Guillaume, assignor.)
Soderberg, Jacob, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Glass-rolling mechanism. No. 1,398,046; Nov. 22.
Sonora Phonograph Company. (See Herzog, John, assignor.)
Sontow, Herman, Wilmington, Del. Locking device. No. 1,398,159; Nov. 22.
Sorensen, Frank L. (See Haines, F. W., and Sorensen.)
Sparks, Fred E., Akron, Ohio, assignor to Automatic Burglar Alarm Company, Charleston, W. Va. Burglar-alarm. No. 1,398,160; Nov. 22.
Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Fuel-feeding device. No. 1,396,206; Nov. 22.
Sparks-Withington Company, The. (See Sparks, William, assignor.)
Spencer, Warren W. C., Brookline, Mass. Windlass-clamp for sucker-rods and tube-hoists. No. 1,397,937; Nov. 22.
Spicer Brothers, Limited. (See Wycherly, Sydney R., assignor.)
Spinks, Virgil H., Ruston, La. Counter and bin. No. 1,398,161; Nov. 22.
Stack, Elmer S. (See Tibbetts, Frank L., assignor.)
Standard Furniture Company. (See Rhodes, Ernest, assignor.)
Standard Oil Company. (See Beck, Jennings B., assignor.)
Standard Tobacco Stemmer Company. (See Slaughter, Joseph W., assignor.)
Stansbury, Harry S., Ashland, assignor of one-half to C. F. Ensor, Verona, Md. Grain-cleaning machine. No. 1,398,162; Nov. 22.
Stebler, Fred. (See Bryan, Edgar J., assignor.)
Steedman, Edwin H., St. Louis, assignor to Curtis & Co. Mfg. Co., Wellston, Mo. Overhead crane. No. 1,397,558; Nov. 22.
Steinkeller, Thomas J., Berkeley, Calif. Automatic re-tather-valve. No. 1,397,909; Nov. 22.
Stevens, Richard H., Philadelphia, Pa. Bin-gate. No. 1,398,047; Nov. 22.
Stevens, William L., Minneapolis, Minn. Music turner and carrier. No. 1,397,885; Nov. 22.
Stevenson, Albert F., Ridgewood, N. J., assignor to A. W. Johnston, New York, N. Y. Treatment of butter-fats. No. 1,397,663; Nov. 22.
Stevenson, Albert F., Ridgewood, N. J., assignor to A. W. Johnston, New York, N. Y. Manufacture of milk-fat. No. 1,397,664; Nov. 22.
Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,398,048; Nov. 22.
Stimson, Claude J., Brunswick, Ga., assignor of one-half to H. R. Van Deventer, Sumter, S. C. Printing and calculating machine. No. 1,397,559; Nov. 22.
Stokes and Smith Company. (See Nitch, Charles H., assignor.)
Stokes, John S. (See Novotny, E. E., and Kendall, assignors.)
Stokes, John S. (See Novotny, Emil E., assignor.)
Stokes, Robert J., Trenton, assignor to Thermoid Rubber Company, Hamilton township, N. J. Flexible disk-coupling. No. 1,398,163; Nov. 22.
Stone, Andrew H., Kansas City, Mo. Extension-table. No. 1,398,665; Nov. 22.
Stonestreet, Clarence G., Akron, Ohio. Umbrella. No. 1,397,789; Nov. 22.
Stowell, Augustus H., Spokane, Wash. Wall structure. No. 1,397,708; Nov. 22.
Strange, Charles H., Minersville, Pa. Mining self-loading and unloading scraper. No. 1,397,560; Nov. 22.
Stryker, Jesse C., et al. (See Procunier, Frank R., assignor.)
Stuart, Francis L., New York, N. Y. Apparatus for conveying, delivering, and gathering material. No. 1,397,561; Nov. 22.
Submarine Signal Co. (See Fessenden, Reginald A., assignor.)
Swayze, William W., Jr., Wilmington, Del., assignor to American Manganese Steel Company, Augusta, Me. Dredge-frame bushing. No. 1,398,040; Nov. 22.
Taft, John H. (See Allen, Adrian S., assignor.)
Taylor, John D. (See Dillard, W. J., and Taylor.)
Taylor, Robert W., Sr., Kalamazoo, Mich., assignor to Evansville Arbor Press Company, Evansville, Ind. Mandrel-press. No. 1,397,910; Nov. 22.
Taylor, William H., Charleroi, Pa., assignor to Pittsburgh Plate Glass Company. Method for producing flat parallel-sided glass sheets. No. 1,398,050; Nov. 22.
Taylor, William H., and W. B. Watts, Bonner Springs, Kans. Railway-tie. No. 1,398,119; Nov. 22.
Tegner, Folke W., Rockford, Ill. Fishing-tackle holder. No. 1,397,790; Nov. 22.
Terry, Walter J., Seattle, Wash. Milling-machine. No. 1,397,709; Nov. 22.
Tesla, Jacque, Brooklyn, N. Y. Plane-washing machine. No. 1,397,745; Nov. 22.

Thatcher, Charles J., New York, N. Y. Oxidation and reduction process and apparatus therefor. No. 1,397,562; Nov. 22.
Thermoid Rubber Company. (See Stokes, Robert J., assignor.)
Thom, Clarence, R. W. Diamond, and S. G. Blaylock, Trail, British Columbia, assignors to The Consolidated Mining & Smelting Company of Canada, Limited, Montreal, Quebec, Canada. Magnetic separation of ores. No. 1,398,051; Nov. 22.
Thomas, Albert E. (See Kuhman, Charles, assignor.)
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Combined brake-valve and switch. No. 1,397,563; Nov. 22.
Thomas, William M., Los Angeles, Calif. Metal frame construction. No. 1,397,746; Nov. 22.
Thompson, Albert R., assignor to Anderson-Barngrover Mfg. Co., San Jose, Calif. Can-extractor. No. 1,397,990; Nov. 22.
Thompson, Albert R. (See Schmidt, John, Jr., assignor.)
Thompson, Drew B., Blakely, Ga. Disk field or road plow. No. 1,398,164; Nov. 22.
Thompson, George K., Maplewood, N. J., assignor to American Telephone and Telegraph Company. Message-registering system. No. 1,397,991; Nov. 22.
Thompson, Joseph F., Marietta, Ohio. Car-wheel feader. No. 1,397,825; Nov. 22.
Thomson and Taylor Spice Company. (See Forsberg, Albin L., assignor.)
Thralkill, James C., Chicago, Ill. Embroidery-needle. No. 1,398,207; Nov. 22.
Thrift Jar Company, The. (See Bauer, John J., assignor.)
Tibbetts, Frank L., assignor, by mesne assignments, to E. S. Stack, Somerville, Mass. Pipe-coupling. No. 1,398,083; Nov. 22.
Tinius Olsen Testing Machine Company. (See Owens, James W., assignor.)
Toledo Scale Company. (See Hem, Halvor O., assignor.)
Toledo Scale Company. (See Hurt, Samuel N., assignor.)
Toledo Scale Company. (See Reeves, Orwell C., assignor.)
Torre, Mathew. (See Rebelski, A., and Torre.)
Tossizza, Constantin, Paris, France. Apparatus for severing cables. No. 1,397,911; Nov. 22.
Towner, Heber F., Santa Ana, Calif. Vehicle construction. No. 1,397,747; Nov. 22.
Towner, Heber F., Santa Ana, Calif. Depth-regulating draft device for ground-working tools. No. 1,397,748; Nov. 22.
Trial, Lelia A., Los Angeles, Calif. Portable shower-bath apparatus. No. 1,398,206; Nov. 22.
Trosien, Charles G., Pontiac, Mich. Automobile-lock. No. 1,397,564; Nov. 22.
Truck, Tractor and Mfg. Company. (See Jacobs, Isidor M., assignor.)
Trumbull, Annie S., Yakima, Wash. Hose-supporter. No. 1,397,992; Nov. 22.
Turner, Louis N., et al. (See Procunier, F. R., assignor.)
Twin City Forge & Foundry Company. (See Overstrud, Melvin, assignor.)
Tyler, Alva W., assignor, by mesne assignments, to W. Young, Los Angeles, Calif. Concentrator. No. 1,397,749; Nov. 22.
U. S. Light & Heat Corporation. (See Carpenter, Campbell C., assignor.)
Uebelmesser, Charles. (See Winderhold, W., and Uebelmesser.)
Underwood Typewriter Company. (See Puerth, William G., assignor.)
Underwood Typewriter Company. (See Peterson, Edwin A., assignor.)
Underwood Typewriter Co. (See Stickney, Burnham C., assignor.)

Weinberg, Florence, New York, N. Y. Ladies' brassières. No. 153,966; Nov. 22.

Werle et Compagnie, Reims, France. Champagne-wines. No. 148,004; Nov. 22.

Werle et Compagnie, Reims, France. Champagne-wines. No. 148,005; Nov. 22.

Whelan, Robert B., New York, N. Y. Phonograph-record disks. No. 149,781; Nov. 22.

Wheeling Machine Products Company, Wheeling, W. Va. Screws and bolts. No. 150,492. Nov. 22.

Whitman, Clarence, & Son, Inc., Katonah and New York, N. Y. Cotton sheets and pillow-cases. No. 153,751; Nov. 22.

Whitrow, Floyd G., Grand Rapids, Mich. Automobile parts and accessories. No. 141,090; Nov. 22.

Wilkinson Bros. & Co. Inc., New York, N. Y. Cigarette-paper and cigarette-tubes made of paper. No. 150,419; Nov. 22.

Wilkinson Bros. & Co. Inc., New York, N. Y. Cigarette-paper and cigarette-tubes made of paper. No. 150,422; Nov. 22.

Williams, William G., Elgin, Ill. Adjustable tables for use by doctors, &c., and parts of such tables. No. 150,576; Nov. 22.

Winfield Barnes Company, The, Philadelphia, Pa. Automobiles. No. 135,455; Nov. 22.

Winship, Bolt & Co., Wakefield, Mass., and New York, N. Y. Underwear, bathing-suits, shawls, &c. No. 146,472; Nov. 22.

Wood, John B., Irvington, N. J., assignor to New Process Multi-Castings Company, Newark, N. J. Molds for shaping molten metal. No. 139,690; Nov. 22.

Wright, John, & Eagle Range, Ltd., Birmingham, England. Gas-heated metallurgical furnaces. No. 117,760; Nov. 22.

Wright, John, & Eagle Range, Ltd., Birmingham, England. Radiants or refractory heating elements for gas-pipes. Nos. 150,645–6; Nov. 22.

Waerts, O. W., Co., New York, N. Y. Grand, upright, player, and electrically-operated pianos. Nos. 150,750–4; Nov. 22.

Wyo-Col Chemical Company, Denver, Colo. Medicine for gonorrhea. No. 152,195; Nov. 22.

Yellow Duck Pub. Co., New York, N. Y. Magazines issued from time to time. No. 141,640; Nov. 22.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 22D DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid esters of tribromotertiary butyl alcohol, Benzoic-. T. B. Aldrich. No. 1,397,913; Nov. 22.

Adding-machine. E. L. Muller. No. 1,397,774; Nov. 22.

Adjustable bit. T. G. Doyle. No. 1,398,070; Nov. 22.

Agricultural implement. C. Owens. No. 1,397,599; Nov. 22.

Agricultural machine. J. G. Northcutt and M. Crawford. No. 1,398,198; Nov. 22.

Air-service station for automobiles. J. B. Beck. No. 1,397,916; Nov. 22.

Airplane-rib construction. J. W. Rapp and J. Vanorio. No. 1,397,707; Nov. 22.

Alarm: *See*—
Burglar-alarm.

Ammonium-chlorid liquors from the ammonia-soda process, Working up residuary. T. Lichtenhahn. No. 1,398,135; Nov. 22.

Amusement apparatus. W. H. Balcke and W. A. Ready. No. 1,397,832; Nov. 22.

Amusement device. M. Unger. No. 1,397,939; Nov. 22.

Amusement device. M. Unger, B. S. Veasie, and J. W. Zarro. No. 1,397,938; Nov. 22.

Angle-wrench. C. T. Root. 1,398,116; Nov. 22.

Annealing and heating systems, Electrode for. W. Hurlburt. No. 1,398,192; Nov. 22.

Antirattling device. B. G. McCoskrie. No. 1,398,105; Nov. 22.

Assorting machine. B. L. and E. B. Gifford. No. 1,397,955; Nov. 22.

Audion-amplifier, Selective. L. de Forest. No. 1,397,575; Nov. 22.

Auto-body. W. Linquist. No. 1,398,102; Nov. 22.

Automobile-buffers, Attaching device for. W. G. Cox. No. 1,398,089; Nov. 22.

Automobile-bumper. F. R. Procunier. No. 1,397,741; Nov. 22.

Automobile cooling systems, Radiator for. J. Comlon. No. 1,398,176; Nov. 22.

Automobile flow-line protector. A. W. Gibbons. No. 1,397,630; Nov. 22.

Automobile-heater. L. C. Milner. No. 1,397,648; Nov. 22.

Automobile-hood clip. F. W. Franklin. No. 1,397,759; Nov. 22.

Automobile-lifting device. P. C. Gibson. No. 1,398,186; Nov. 22.

Automobile-lock. T. J. Kehoe. No. 1,397,524; Nov. 22.

Automobile-lock. C. G. Trosien. No. 1,397,564; Nov. 22.

Automobile-signal. C. Durning. No. 1,397,947; Nov. 22.

Automobile-support. A. E. Cooney. No. 1,398,086; Nov. 22.

Automobile-wheel rim and tire. R. Wright. No. 1,397,996; Nov. 22.

Automobiles, Air-pumps for. W. A. Wilson. No. 1,397,829; Nov. 22.

Automobiles, Attachment for. W. F. Pilmore. No. 1,397,879; Nov. 22.

Automobiles, Direction-indicator for. W. H. Barriere. No. 1,397,672; Nov. 22.

Automobiles, Direction-indicator for. J. Drotar. No. 1,397,807; Nov. 22.

Automobiles, Direction-indicator for. M. E. Wilson. No. 1,397,666; Nov. 22.

Automobiles, Extension-light for. T. A. E. Errington. No. 1,398,011; Nov. 22.

Automobiles, Fender attachment for. P. J. Quartana. No. 1,397,903; Nov. 22.

Automobiles, Safety foot-throttle for. E. J. Currier. No. 1,397,796; Nov. 22.

Automobiles, Spring-bumper for. W. G. Cox. No. 1,398,177; Nov. 22.

Automobiles, Trespass-sign for. M. W. Marsden. No. 1,397,770; Nov. 22.

Bag-holder. J. B. O'Brien. No. 1,397,898; Nov. 22.

Bag-tops, Making. S. G. Mandalian. No. 1,397,874; Nov. 22.

Banding-board, Adjustable. J. F. Kennedy. No. 1,397,763; Nov. 22.

Battery. D. H. Wilson. No. 1,398,213; Nov. 22.

Bearing. P. S. Erikson. No. 1,397,948; Nov. 22.

Bearing, Antifriction. R. W. Sellen. (Reissue.) No. 15,218; Nov. 22.

Bearing, Suspension-. R. A. McCune. No. 1,398,138; Nov. 22.

Bed. W. H. Muir. No. 1,397,773; Nov. 22.

Bed, Folding davenport. O. A. Honsinger. No. 1,397,962; Nov. 22.

Bed-spring, Convertible. H. A. Schmidt. No. 1,398,203; Nov. 22.

Bell-ringer resistance unit. J. Chodrow. No. 1,397,886; Nov. 22.

Belt connection. W. Wenderhold and C. Uebelmesser. No. 1,397,750; Nov. 22.

Bin-gate. R. H. Stevens. No. 1,398,047; Nov. 22.

Bin structure. E. J. Walker, Jr. No. 1,397,887; Nov. 22.

Binder attachment. F. M. Peden. No. 1,397,521; Nov. 22.

Binder, Loose-leaf. J. Engelland. No. 1,397,577; Nov. 22.

Binder, Loose-leaf. F. K. Mero. No. 1,398,034; Nov. 22.

Binder, Loose-leaf. S. R. Wycherley. Nos. 1,398,214–15; Nov. 22.

Bituminous emulsion. C. S. Reeve. No. 1,398,201; Nov. 22.

Blood-coagulation medium. C. A. Mills. No. 1,397,804; Nov. 22.

Board: *See*—
Banding-board.

Bobbin-holder. A. H. Fleck. No. 1,397,927; Nov. 22.

Book-cover. W. M. Rheads. No. 1,397,605; Nov. 22.

Boring-tool holder. J. C. Stanton. No. 1,397,786; Nov. 22.

Bottle-capping apparatus. C. G. Belden. No. 1,397,617; Nov. 22.

Box: *See*—
Chick-box. Gear-box.
Cigar-box.

Box. W. W. Reid. No. 1,398,154; Nov. 22.

Box-printing machine. M. A. Schmidt. No. 1,397,881; Nov. 22.

Boxes, Machine for pressing necks in. C. H. Nitsch. No. 1,397,597; Nov. 22.

Brake. J. M. Lansden. No. 1,397,590; Nov. 22.

Brake-beams, Safety-guard, release, and support for. A. W. Hawkins. No. 1,397,581; Nov. 22.

Brake-beams, Third-point support for. A. W. Hawkins. No. 1,397,580; Nov. 22.

Brake-holding device. R. L. James. No. 1,397,886; Nov. 22.

Brake-shoe, Adjustable internal. H. W. Muhleisen and C. Lund. No. 1,397,772; Nov. 22.

Brick, Paving-. F. B. Dunn. No. 1,397,505; Nov. 22.

Broom. W. B. Wansor. No. 1,398,052; Nov. 22.

Broom-holder. W. H. Collins. No. 1,398,127; Nov. 22.

Broom, Whisk-. G. K. Van Voast. No. 1,398,210; Nov. 22.

Brush. C. E. Jewett and F. Fitzgerald. No. 1,397,586; Nov. 22.

Brush-back. W. Morrison. No. 1,398,035; Nov. 22.

Brush, Bath-. H. E. Bailey. No. 1,397,611; Nov. 22.

Brush-handle connection. J. F. Palmer. No. 1,397,899; Nov. 22.

Brush-hanger. C. E. Hecht. No. 1,397,807; Nov. 22.

Bucket, Reclaiming and conveying. J. F. Godfrey. No. 1,397,609; Nov. 22.

Buckle, Belt-. S. Buchsbaum. No. 1,397,673; Nov. 22.

Building construction. W. J. Pedersen. No. 1,397,950; Nov. 22.

Burglar-alarm. F. E. Sparks. No. 1,398,160; Nov. 22.

Burner: *See*—
Gas-burner. Oil-burner.

Butt and set gage. A. Zetterman. No. 1,397,569; Nov. 22.

Butter substitutes, edible fats, and the like, Manufacture of. W. Clayton and G. Nodder. No. 1,398,003; Nov. 22.

Button. S. Gulick. No. 1,397,957; Nov. 22.

Button-feeding instrumentality for button-setting machines. J. Kelly. No. 1,398,026; Nov. 22.

Button-setting machine. J. Kelly. No. 1,398,027; Nov. 22.

Cabinet-maker's clamp. S. A. Holmquist. No. 1,397,961; Nov. 22.

Cables, Apparatus for severing. C. Tosselsa. No. 1,397,911; Nov. 22.

Cake-machine. W. Peters. No. 1,397,981; Nov. 22.

Cake receiving, separating, dividing, and centralising machine, Automatically-operating. P. Rasmussen. No. 1,397,655; Nov. 22.

Cake receiving and assembling machine, Multiple-guide-row stacker-. P. Rasmussen. No. 1,397,656; Nov. 22.

Cake-stacking machines, Transversely-adjustable chute for. P. Rasmussen. No. 1,397,657; Nov. 22.

Calculating device. T. J. Dalsell. No. 1,397,944; Nov. 22.

Calculating device. H. Muller. No. 1,397,596; Nov. 22.

Calculating-machine, Algebraic-total. H. Gaither. No. 1,396,074; Nov. 22.
Calculator. H. Gaither. No. 1,396,072; Nov. 22.
Camera and projector, Camera lens or cabinet for combined moving-picture. F. Miedtank. No. 1,397,317; Nov. 22.
Camera, Shield or guide-bar for photographic. R. P. Hart. No. 1,397,451; Nov. 22.
Can-cutting machine. A. E. Thomas. No. 1,397,530; Nov. 22.
Can-opener. Q. D. Hamilton. No. 1,397,377; Nov. 22.
Capping machine, Jar-. J. J. Bauer. No. 1,396,602; Nov. 22.
Car-check holder. E. M. Mahaney. No. 1,397,600; Nov. 22.
Car construction, Convertible. H. S. Hart. No. 1,397,466; Nov. 22.
Car construction, Convertible-. J. O. Nesbitt. No. 1,397,382; Nov. 22.
Car construction, Tank-. A. Campbell. No. 1,397,676; Nov. 22.
Car-coupling. J. Retz. No. 1,397,731; Nov. 22.
Car-door mounting. G. H. Hooper. No. 1,397,811; Nov. 22.
Car-fastener, Lock and seal for. H. H. Duncan and C. C. Wilkinson. No. 1,396,424; Nov. 22.
Car-fastener, Rotary. G. H. A. M., and W. H. Simpson. No. 1,397,385; Nov. 22.
Car, Refrigerator-. E. Jarvet and E. de Stuers. No. 1,397,668; Nov. 22.
Car-wheel bracket. J. P. Thompson. No. 1,397,535; Nov. 22.
Cars, Door-fastener for railway-. H. Peters. No. 1,397,594; Nov. 22.
Cars, Seal recording-mechanism for railway box-. R. W. Barnett. No. 1,397,674; Nov. 22.
Cars, Safety device for. T. M. Wallis. No. 1,396,130; Nov. 22.
Cars, Upper buffer for vestibule-. P. Kass. No. 1,397,566; Nov. 22.
Carburetor and draft-gage for soda-water. C. A. Geddes. No. 1,397,520; Nov. 22.
Carburetor. J. B. Alger. No. 1,397,712; Nov. 22.
Carburetor. C. P. Hall. No. 1,397,549; Nov. 22.
Carburetor. H. Cumyn. No. 1,396,607; Nov. 22.
Carrier: *See*—
Egg-carrier. Luggage-carrier.
Cartridge-reloading machine. W. R. McGee. No. 1,396,100; Nov. 22.
Casting-machine, Locking mechanism for rotary. A. A. Landon. No. 1,396,124; Nov. 22.
Casting, Rotary. D. E. de Lavaud. No. 1,396,608; Nov. 22.
Cattle-guard. G. H. Bishop. No. 1,397,752; Nov. 22.
Cellulose-ester solvent and resulting cellulosic composition. M. Y. Benton. No. 1,397,389; Nov. 22.
Centrifugal propeller. C. D. Brooks. No. 1,396,063; Nov. 22.
Chain: *See*—
Auto traction-chain.
Chain, Auto traction-. D. Dorbeneaux and F. S. Capron. No. 1,396,609; Nov. 22.
Chain-fastener. C. F. Hairston. No. 1,396,629; Nov. 22.
Chain-fastener. C. J. Williams. No. 1,397,509; Nov. 22.
Chemical reactions, Performing. W. O. Snelling. No. 1,397,600; Nov. 22.
Chick-box. W. C. Hiker. No. 1,397,562; Nov. 22.
Chimney-cleaner. J. B. Rork. No. 1,396,155; Nov. 22.
Chin-support. M. E. Bowman. No. 1,397,409; Nov. 22.
Chuck, Oval. A. Rebiskl, and M. Terre. No. 1,397,546; Nov. 22.
Chuck-operating mechanism. J. Faulk and S. Clebo. No. 1,396,112; Nov. 22.
Cigar-box, Metal. M. Bayuk. No. 1,396,050; Nov. 22.
Cigarette or like case and electric torch, Combined. S. A. Appell. No. 1,397,610; Nov. 22.
Cigarette-packaging machine. R. D. Smith. No. 1,397,552; Nov. 22.
Circuit-closer, Thermal. W. V. Reichard. No. 1,396,153; Nov. 22.
Clamp: *See*—
Cabinet-maker's clamp. Hose-clamp.
Clamp. A. L. Cochrane. No. 1,396,126; Nov. 22.
Clamp. M. A. Doelkner. No. 1,396,091; Nov. 22.
Clamp. A. F. Gilbert. No. 1,397,502; Nov. 22.
Clamp. J. L. Jefferies. No. 1,397,580; Nov. 22.
Cleaner: *See*—
Chimney-cleaner. Windshield-cleaner.
Cleaning implement. C. N. Allen. No. 1,396,121; Nov. 22.
Clip: *See*—
Automobile-hood clip.
Clock attachment, Alarm-. C. L. Rasmussen. No. 1,397,709; Nov. 22.
Clock, Electric-. B. A. Fessenden. No. 1,397,560; Nov. 22.
Cloth-handling device. A. Rau. No. 1,396,045; Nov. 22.
Clothes-pounder. C. Bowman. No. 1,396,061; Nov. 22.
Clothes-tongs. J. M. Fitzgraft. No. 1,397,538; Nov. 22.
Clothing, Manufacturing ladies' ready-to-wear. J. Scheffer. No. 1,396,117; Nov. 22.
Clutch-band and casing therefor. W. F. Hudson. No. 1,396,191; Nov. 22.
Clutch, Friction-. W. G. Price. No. 1,397,663; Nov. 22.
Coal-bearing water and streams, Recovering coal, held in suspension, from. C. B. Holland. No. 1,397,735; Nov. 22.
Coffee, Roasting. H. Preil. No. 1,396,115; Nov. 22.
Coke-oven-door machine. J. Kreppner. No. 1,397,726; Nov. 22.
Coking, Apparatus for [illegible]. C. Rein. No. 1,397,[illegible]; Nov. 22.
[illegible]. A. F. Gilbert. No. 1,397,631; Nov. 22.
[illegible] Forms for. J. C. Mitchell. No. [illegible]
[illegible] Constructing pedestrail. E. Van [illegible]
[illegible]. No. 1,397,[illegible]; Nov. 22.
[illegible]. No. 1,397,[illegible]; Nov. 22.
[illegible]. No. 1,397,[illegible]; Nov. 22.
[illegible] A. Blough. No. 1,397,757; Nov. 22.
[illegible]. J. V. R. Sheppard. No. 1,397,666; Nov. 22.
[illegible] Apparatus and Process for filling and closing [illegible]. W. Goodsell. No. 1,397,621; Nov. 22.
[illegible] Apparatus for treating material, Apparatus for. F. A. Gilbert. No. 1,397,630; Nov. 22.
[illegible]. J. Jr. No. 1,397,[illegible]; Nov. 22.
[illegible]. W. Cohen, Jr. No. 1,396,199; Nov. 22.
[illegible]. G. K. Leonard and E. J. Hamner. No. 1,397,[illegible]; Nov. 22.
[illegible] Electrolyte of. P. E. Middleton. No. 1,397,[illegible]; Nov. 22.
[illegible] device. G. F. Harrington and A. J. Fellowes. No. 1,397,518; Nov. 22.
Corset. A. E. Bott. No. 1,397,570; Nov. 22.
Corset-fastening apparatus for. L. C. Hilliard. No. 1,397,[illegible]; Nov. 22.
Counter and the like, V. H. Spinks. No. 1,396,161; Nov. 22.
Coupling: *See*—
Car-coupling. Pipe-coupling.
Dog-coupling.
Coupling-key. H. Lilley. No. 1,397,530; Nov. 22.
Covering, Protective. H. M. Whiteside. No. 1,396,165; Nov. 22.
Cover, Means for supplying temporary table-. W. de Matias. No. 1,397,550; Nov. 22.
Crane, Overhead. M. H. Steadman. No. 1,397,558; Nov. 22.
Crusher and pulverizer. M. F. Williams. No. 1,397,622; Nov. 22.
Culinary apparatus. D. G. Bender. No. 1,397,552; Nov. 22.
Culinary implement. H. M. Greener. No. 1,397,512; Nov. 22.
Cultivator. S. K. Dennis. No. 1,397,545; Nov. 22.
Cup: *See*—
Oil-cup. Test-cup.
Curler. K. McClaire. No. 1,397,553; Nov. 22.
Curtain-stretcher. A. P. McMahon. No. 1,397,533; Nov. 22.
Cushion. T. W. Johnson. No. 1,397,626; Nov. 22.
Cushion. F. Soder. No. 1,396,118; Nov. 22.
Cutter: *See*—
Grinding-machine cutter.
Cyanid process. A. W. Hahn. No. 1,397,624; Nov. 22.
Cyanide, Making. O. L. Barnebey. No. 1,397,613; Nov. 22.
Damper construction. T. Olinger. No. 1,396,068; Nov. 22.
Damper-regulator, Self-locking. J. W. Gable. No. 1,397,[illegible]; Nov. 22.
Davenport-bed. O. A. Hennings. No. 1,397,963; Nov. 22.
Dehorning cattle Shears. J. Meister. No. 1,397,575; Nov. 22.
Demountable wheel. H. B. Holley. No. 1,396,020; Nov. 22.
Desk-drawers and the like, Attachment for. J. H. Hetson. No. 1,396,082; Nov. 22.
Desk, Metal. S. P. Williams and A. McIntyre. No. 1,397,537; Nov. 22.
Desk-slides, Loop for. H. Rhoden. No. 1,397,782; Nov. 22.
Dewatch-holder. A. A. Lombard. No. 1,396,127; Nov. 22.
Die, Making a. A. A. McIntyre. No. 1,396,106; Nov. 22.
Digging-machine. A. Pepple. No. 1,397,543; Nov. 22.
Digging-machine, Digger-chain for ditch-. L. G. Dunlap. No. 1,397,670; Nov. 22.
Disk-washing machine. M. A. Hopkins. No. 1,396,022; Nov. 22.
Disk-washing machine. C. F. Lochow. No. 1,397,767; Nov. 22.
Disk-washing machine. W. R. Walker. No. 1,397,846; Nov. 22.
Disk-coupling, Flexible. R. J. Stobee. No. 1,396,163; Nov. 22.
Distilling apparatus, Oil-. T. J. Ryan. No. 1,397,984; Nov. 22.
Distributing material, Method and apparatus for. H. F. Smith. No. 1,397,[illegible]; Nov. 22.
Document and like filing, Binder-case for. A. M. McNeill and W. J. Abbott. No. 1,397,645; Nov. 22.
Door-check. A. J. Ehman. No. 1,396,010; Nov. 22.
Drag, Road or dirt. J. L. Allington. No. 1,397,761; Nov. 22.
Drain. S. S. Davis. No. 1,396,067; Nov. 22.
Draining-compounder, Device for. H. R. Wallace. No. 1,396,111; Nov. 22.
Drawing-board, Attachment for. C. F. Dieckmann. No. 1,396,[illegible]; Nov. 22.
Dredge. M. Stone. No. 1,396,131; Nov. 22.

Dredge-frame bushing. W. W. Swayne, jr. No. 1,396,040; Nov. 22.
Drilling and other machines, Adjustable work-carrying table for. G. F. Mertz. No. 1,397,771; Nov. 22.
Drilling-rigs, Safety-key for. H. J. Griffith. No. 1,397,664; Nov. 22.
Duplex mold. H. E. Gibson. No. 1,396,073; Nov. 22.
Dyeing-machine. H. M. Dudley. No. 1,397,660; Nov. 22.
Earthenware, Manufacturing of. C. E. Fulton. No. 1,396,014; Nov. 22.
Earthworking-machine. T. A. Prendergast. No. 1,397,653; Nov. 22.
Egg-carrier. J. B. Sipe. No. 1,396,045; Nov. 22.
Egg-carton. E. M. Odell. No. 1,397,539; Nov. 22.
Egg receptacle and carrier. E. M. Odell. No. 1,397,540; Nov. 22.
Ejector, Multiple-stage. R. N. Ehrhart. No. 1,397,924; Nov. 22.
Electric circuits, Means for detecting changes of resistance in. P. van S. Kolff. No. 1,397,641; Nov. 22.
Electric devices, Time-controlled. C. P. Lehman. No. 1,397,692; Nov. 22.
Electric heater. J. R. Bakstad. Nos. 1,392,167-8; Nov. 22.
Electric heater. E. N. Brown and M. H. Shoemberg. No. 1,396,517; Nov. 22.
Electric heater. J. Lavoie. No. 1,397,572; Nov. 22.
Electric plant, Portable. R. L. Asraad. No. 1,396,058; Nov. 22.
Electric signal. E. W. Hanaser. No. 1,397,562; Nov. 22.
Electric switch. C. R. Felton and J. A. Hand. No. 1,397,777; Nov. 22.
Electric switch. P. F. Wollenweber. No. 1,396,053; Nov. 22.
Electric systems, Control for dynamo-. A. E. Buchenberg. No. 1,396,064; Nov. 22.
Electric-wire connections, Reel for. A. L. Hite. No. 1,397,633; Nov. 22.
Electrical testing system. G. W. Kuhn. No. 1,397,975; Nov. 22.
Electrical tool. C. S. Weyandt. No. 1,397,567; Nov. 22.
Electrolytic cell. E. B. Cutten. No. 1,397,709; Nov. 23.
Electrotype material and forming same. G. U. Rose, jr. No. 1,397,785; Nov. 22.
Engine-controller. M. C. Cosgray. No. 1,397,503; Nov. 22.
Engines, &c., Valve remover and lifter for internal-combustion. L. J. McKone. No. 1,397,768; Nov. 22.
Engines, Carbureting air for internal-combustion. J. M. Schutz. No. 1,397,744; Nov. 22.
Engines, Charge-humidifying device for internal-combustion. A. S. Kincaid. No. 1,397,837; Nov. 22.
Engines, Ignition apparatus for internal-combustion. A. Dutreux. No. 1,397,861; Nov. 22.
Engines, Mixer for gas-. C. C. Brown. No. 1,396,063; Nov. 22.
Engines, Valve mechanism for internal-combustion. W. A. James. No. 1,397,585; Nov. 22.
Envelop. G. A. Sanborn. No. 1,397,830; Nov. 22.
Excavating-machine. W. K. Liggett. No. 1,396,195; Nov. 22.
Explosive. G. Weber. No. 1,397,826; Nov. 22.
Explosives, Manufacture of. T. Hawkins. No. 1,396,098; Nov. 22.
Extension-table. A. H. Stone. No. 1,397,665; Nov. 22.
Fastening for ends of laces, Special. R. A. Bibard. No. 1,397,916; Nov. 22.
Fat, Manufacture of milk-. A. F. Stevenson. No. 1,397,664; Nov. 22.
Fats, Treatment of butter-. A. F. Stevenson. No. 1,397,663; Nov. 22.
Faucets, Thermometer attachment for. A. S. Campbell. No. 1,397,720; Nov. 22.
Fertilizer and producing the same. C. L. Poynor. No. 1,396,113; Nov. 22.
Filing-system posting-tray, Loose-leaf-. H. C. Baster. No. 1,397,616; Nov. 22.
Filter. C. W. Birch. No. 1,396,205; Nov. 22.
Fire-escape. L. Kocjan. No. 1,397,640; Nov. 22.
Fire-escape. S. M. Lyle. No. 1,397,643; Nov. 22.
Firearm. B. H. Ball. No. 1,396,065; Nov. 22.
Fireproofing of textile fabrics and other porous articles. T. J. I. Craig. No. 1,397,558; Nov. 22.
Fishing-line reel. W. B. Hodges and C. F. Larsclere. No. 1,396,169; Nov. 22.
Fishing-reel. E. S. Moses. No. 1,396,197; Nov. 22.
Fishing-tackle holder. F. W. Tegner. No. 1,397,790; Nov. 22.
Flask. C. N. Coryell. Nos. 1,396,067-8; Nov. 22.
Flooring, Terrazzo. B. O. A. De Paoli. No. 1,397,678; Nov. 22.
Flue-stopper. W. R. Carroll. No. 1,397,753; Nov. 22.
Fluids in closed conduits, Measurement of the flow of. N. R. Gibson. No. 1,396,097; Nov. 22.
Flying-machine. H. G. Hooper. No. 1,397,761; Nov. 22.
Flying-machine of the helicopter type, Captive. V. Zurovec, Jr. No. 1,397,906; Nov. 22.
Food compound. E. B. Clarke. No. 1,397,723; Nov. 22.
Food products, Apparatus for heating, roasting, and cooking. H. Preil. No. 1,396,114; Nov. 22.
Forging temperature, Method and apparatus for heating long blanks to. W. B. Pelrce. No. 1,397,603; Nov. 22.
Framing and miter gage. J. H. Knight. No. 1,397,589; Nov. 22.
Fuel, Apparatus for the production of artificial. R. Bowen. No. 1,397,571; Nov. 22.
Fuel-feeding device. W. Sparks. No. 1,396,206; Nov. 22.
Fuel-feeding system. C. Pohl. No. 1,397,760; Nov. 22.
Fuel-heating device, Liquid-. C. H. Foster. No. 1,396,012; Nov. 22.
Fuel, Production of artificial. R. Bowen. No. 1,397,572; Nov. 22.
Fuel-reserve-supply system for self-propelled vehicles. F. Jardone, Jr. No. 1,397,522; Nov. 22.
Furnace: *See*—
Hot-air furnace. Incinerating-furnace.
Fuse-cartridge. F. A. Feldkamp. No. 1,397,805; Nov. 22.
Fuse-cartridge, Duplex. F. A. Feldkamp. No. 1,397,804; Nov. 22.
Fuse, Percussion-. R. R. Carey, W. L. Lukens, and L. N. D. Mixsell. No. 1,397,855; Nov. 22.
Gage: *See*—
Liner-trimming gage. Pressure-gage.
Garment-holder. D. W. York. No. 1,397,670; Nov. 22.
Garment-press. J. G. Johnson. No. 1,397,635; Nov. 22.
Garment-protector. G. K. Guinsburg. No. 1,397,579; Nov. 22.
Gas-burner. W. T. Clark. No. 1,397,501; Nov. 22.
Gas-burner. I. G. Marquette. No. 1,397,977; Nov. 22.
Gas casing head. W. J. Droppleman. No. 1,396,068; Nov. 22.
Gas-main controller. J. van Ackeren. No. 1,396,055; Nov. 22.
Gate: *See*—
Bin-gate. Railway-gate.
Gear-box. H. Begaty. No. 1,396,171; Nov. 22.
Gears, Hob for generating bevel-. C. G. Olson. No. 1,397,697; Nov. 22.
Gears, Cutter for generating skew-bevel. C. G. Olson. No. 1,398,039; Nov. 22.
Glass-drawing apparatus. H. K. Hitchcock. No. 1,396,019; Nov. 22.
Glass-drawing machine, Sheet-. O. P. Marconet and W. O. Carter. No. 1,398,109; Nov. 22.
Glass-rolling mechanism. J. Soderberg. No. 1,396,046; Nov. 22.
Glass sheets, Producing flat parallel-sided. W. H. Taylor. No. 1,398,050; Nov. 22.
Grain-cleaning machine. H. S. Stansbury. No. 1,396,162; Nov. 22.
Griller. J. M. Segar. No. 1,398,157; Nov. 22.
Grinding machine, Cutter-. J. J. Guest. No. 1,398,187; Nov. 22.
Ground-working tools, Depth-regulating draft device for. H. F. Towner. No. 1,397,748; Nov. 22.
Gum or chewing-gum substitute, Chewing-. A. P. Rapp. No. 1,397,742; Nov. 22.
Gun. O. V. Payne. No. 1,397,698; Nov. 22.
Guns, Sighting-gear for. H. W. Lee and R. Morrison. No. 1,397,765; Nov. 22.
Hair-clipper. A. J. Carlson. No. 1,397,721; Nov. 22.
Hairpins, combs, &c., Retaining means for. L. J. Rhein and R. A. Rehrauer. No. 1,397,604; Nov. 22.
Hand-guard. G. T. Epling. No. 1,397,624; Nov. 22.
Handlamp, Battery-. L. Maisel. No. 1,397,646; Nov. 22.
Handle: *See*—
Tool-handle.
Handle member. P. A. Geier and F. E. Robertson. No. 1,397,662; Nov. 22.
Harvester-threshers, Guard-finger for. B. R. Benjamin. No. 1,397,942; Nov. 22.
Hatpin-guard. J. Lacina. No. 1,397,531; Nov. 22.
Heading-machine. J. Peyser. No. 1,397,651; Nov. 22.
Headlight. O. W. Blackett. No. 1,397,798; Nov. 22.
Headlight. H. E. Ensor and J. Sampson. No. 1,397,803; Nov. 22.
Headlight, Dirigible. G. Cox. No. 1,397,754; Nov. 22.
Heater: *See*—
Automobile-heater. Tank-heater.
Electric heater.
Heating, cooking, and other purposes, Gas-burner for. W. L. and A. M. Shand. No. 1,397,662; Nov. 22.
Heel-breasting machine. H. B. Munson. No. 1,397,897; Nov. 22.
Heel-turning-machine block-holder. J. H. Vinton. No. 1,397,944; Nov. 22.
Hog-eating poultry-protector or hog-muzzle. T. Lynch. No. 1,398,031; Nov. 22.
Hose-clamp. F. J. Costello. No. 1,397,943; Nov. 22.
Hose-supporter. A. S. Trumbull. No. 1,397,902; Nov. 22.
Ice-cream, Filling containers with. H. C. Howe. No. 1,397,520; Nov. 22.
Ice-manufacturing apparatus. J. P. Boyle and W. A. Iamen. No. 1,397,498; Nov. 22.
Igniting device. B. Jurkowski. No. 1,397,637; Nov. 22.
Impregnator. J. R. Wheeler. No. 1,398,212; Nov. 22.
Incinerating-furnace. W. Fetzer, J. G. Frerea, and O. A. Elliott. No. 1,398,184; Nov. 22.
Index system, Card-. J. H. Rand, Jr. No. 1,397,982; Nov. 22.
Intensifier. C. Smith. No. 1,397,788; Nov. 22.
Irrigating-channels, Implement for making. E. F. Chewning. No. 1,397,772; Nov. 22.
Irrigating or sprinkling system. G. E. March. No. 1,397,769; Nov. 22.
Jack: *See*—
Lifting-jack. Lowering-jack.
Jack. F. C. Healy. No. 1,398,182; Nov. 22.
Jack. J. C. Kopf. No. 1,397,871; Nov. 22.

Jack. S. H. Lanyon. No. 1,297,894; Nov. 22.
Joint: *See*—
Universal joint.
Juice and product, Treating. I. S. Merrell; Nos. 1,296,060–1; Nov. 22.
Jumper-seat. F. H. Bucks. No. 1,297,675; Nov. 22.
Kettle. H. A. Moerk. No. 1,297,536; Nov. 22.
Key: *See*—
Coupling-key.
Keys, Pneumatic cushion for. J. J. Coomber. No. 1,297,574; Nov. 22.
Knitting-machine, Yarn-guide mechanism for. E. Lippitt; No. 1,296,103; Nov. 22.
Lacings, Tip for. E. P. King. No. 1,297,520; Nov. 22.
Lamp and making same, Incandescent. O. V. Maurer. No. 1,296,082; Nov. 22.
Lamp brackets, Support for signal-. F. Rapp. No. 1,297,843; Nov. 22.
Lamp, Portable electric. L. E. Shaw and F. M. Rosenfeld. No. 1,297,705; Nov. 22.
Lamps, Making incandescent. O. V. Maurer. No. 1,296,033; Nov. 22.
Lathe, Machines for producing composite metal. F. Neesage. No. 1,296,141; Nov. 22.
Lens, Bifocal. L. W. Hughes. No. 1,297,920; Nov. 22.
Lenses, Headlight diffraction-. C. G. Peters. No. 1,297,822; Nov. 22.
Leveler. J. F. Rapp. No. 1,297,784; Nov. 22.
License-tag holder. J. Fried. No. 1,297,780; Nov. 22.
Lifting-jack. W. C. Engel. No. 1,297,925; Nov. 22.
Lifting-jack. J. C. Kopf. No. 1,297,870; Nov. 22.
Light-extinguisher. D. Leard. No. 1,297,878; Nov. 22.
Limb, Artificial. A. Pringle and T. S. Kirk. No. 1,297,654; Nov. 22.
Liner-trimming gage. G. S. Ball. No. 1,297,612; Nov. 22.
Liquids, Treating. G. Sinclair. No. 1,297,560; Nov. 22.
Loader. O. L. Gilliland. No. 1,297,956; Nov. 22.

Pianos. O. W. Wuertz Co. Nos. 150,792–4; Nov. 22.
Pianos and player-pianos. Price and Teeple Piano Company. No. 153,630; Nov. 22.
Pickles, vinegar, fruit jellies and preserves, &c. Roscoe Haegelin Co. No. 152,276; Nov. 22.
Picture and stereopticon films, Motion-. Affiliated Distributors Inc. No. 148,524; Nov. 22.
Pipes for smoking. Manhattan Briar Pipe Company. No. 152,182; Nov. 22.
Piston-rings, Engine. Indiana Piston Ring Company. No. 150,018; Nov. 22.
Plastic mastic material. Insulite Chemical Company. No. 151,371; Nov. 22.
Post-card. Arthur W. Stedman, Inc. No. 148,842; Nov. 22.
Powder, Liquid face-. Lam-T-6 Manufacturing Co. No. 151,983; Nov. 22.
Powders and perfume, Face and talcum. Andrew Jergens Company. No. 152,168; Nov. 22.
Preparation for cleaning the hands. S. J. Danjean. No. 153,451; Nov. 22.
Preparation for skin-poisoning, open wounds, &c. J. Politis. No. 152,090; Nov. 22.

Printing on indigo and vat dies, Chemicals used in. Rohm & Haas Company. No. 151,959; Nov. 22.
Publication, Periodical. W. W. Crook. No. 133,570; Nov. 22.
Publication, Weekly. Allen-Nugent Co. No. 152,734; Nov. 22.
Publications, Weekly. Metropolitan Church Association. No. 147,791; Nov. 22.
Pulp, Wood-. Finnish Cellulose Union. No. 145,745; Nov. 22.
Pumps, Air-. W. M. Ingram. No. 149,403; Nov. 22.
Radiants or refractory heating elements for gas-fires. John Wright & Eagle Range Ltd. Nos. 150,645–6; Nov. 22.
Radiators, Leak-stopping compound for automobile-. T. Dolan. No. 151,985; Nov. 22.
Razors and safety-razors and blades. American Safety Razor Corporation. No. 149,436; Nov. 22.
Remedy for amenorrhea, leuchorrea, &c. Rosol Laboratories. No. 152,847; Nov. 22.
Remedy for chlorosis, anemia, &c. Blanding & Blanding. No. 150,727; Nov. 22.
Remedy for dandruff. S. S. Marks. No. 151,836; Nov. 22.
Remedy, Headache and neuralgia. Agol Chemical Company. No. 152,116; Nov. 22.
Roofing and shingles, sheathing-paper, &c., Asphalt. Irwin Paper Company. No. 148,228; Nov. 22.
Rugs and carpets, Woven. John Bromley & Sons. No. 153,496; Nov. 22.
Salt. International Salt Co. of New York. No. 151,580; Nov. 22.
Salve for colds, catarrh, croup, &c. R. V. Turner. No. 149,251; Nov. 22.
Sandpaper. Wausau Abrasives Company. No. 153,706; Nov. 22.
Sash, doors, blinds, &c. Wm. Cameron & Co. No. 144,498; Nov. 22.
Sash, doors, mill and cabinet work. Goshen Sash and Door Company. No. 146,312; Nov. 22.
Screens and bolts. Wheeling Machine Products Company. No. 150,492; Nov. 22.
Sheets and pillow-cases, Cotton. Clarence Whitman & Son. No. 153,751; Nov. 22.
Shock-absorbers for vehicles. A. N. Anthes. No. 149,574; Nov. 22.
Shoe-dressing. A. V. Oxley. No. 153,470; Nov. 22.
Shoes. Mrs. A. R. King, Inc. No. 125,089; Nov. 22.
Shoes and slippers, Felt. Lind Shoe and Slipper Co. No. 148,446; Nov. 22.
Shoes, Women's leather. Brown Shoe Company. No. 147,816; Nov. 22.
Showcases and store furniture. G. M. Schwartz. No. 151,226; Nov. 22.
Silk piece goods, Broad-. Duplan Silk Corporation. No. 154,502; Nov. 22.
Silks, Broad. J. A. Migel, Inc. Nos. 153,673–5; Nov. 22.
Soap. Manna Products Co. No. 153,311; Nov. 22.
Soap, Washing-machine. Los Angeles Soap Co. No. 153,463; Nov. 22.
Soaps. Colgate & Company. No. 152,986; Nov. 22.
Soaps, soap cakes and flakes, Liquid, &c. Crystal Soap & Chemical Co. No. 151,752; Nov. 22.
Stove-lining, Plastic. Rutland Fire Clay Co. No. 150,769; Nov. 22.
Stove-polish. C. Devlin. No. 150,662; Nov. 22.
Suits, Ladies', misses', and children's. Joseph Eckstein, Inc. No. 148,537; Nov. 22.
Suits, Ladies' three-piece. A. A. Frankel. No. 148,324; Nov. 22.
Syrup for the manufacture of a beverage. J. Macauley. No. 151,327; Nov. 22.
Syrup, Malt-. Perfection Products Co. No. 151,592; Nov. 22.
Syrup, Malt-. W. L. Tribble. No. 152,870; Nov. 22.
Syrups, fruit punch, &c., Fountain-. Marston-Greening Co. No. 153,521; Nov. 22.
Tables for use by doctors, &c., and parts of such tables, Adjustable. W. G. Williams. No. 150,576; Nov. 22.
Theobromin sodium acetate. Societeit voor Chemische Industrie "Katwijk." No. 147,742; Nov. 22.
Tire-pumps, grease-guns, &c. Kentucky Tire Pump Co. No. 146,830; Nov. 22.
Tires, inner tubes, reliners, patches, Automobile. Times Square Auto Supply Co. No. 125,919; Nov. 22.
Tires, reliners, repair-patches, &c., Vehicle-. Federal Rubber Company. No. 146,884; Nov. 22.
Tires, packing, inner tubes, &c., Vehicle-. Federal Rubber Company. No. 146,891; Nov. 22.
Tires, outside and inside tire-sleeves, &c., Vehicle-. Federal Rubber Company. No. 146,898; Nov. 22.
Tonic, Blood and nerve. Clausen Zoller Company. No. 149,540; Nov. 22.
Tooth-paste. M. Kerbel. No. 148,390; Nov. 22.
Toys, Wheeled riding. Richards Mfg. Company. No. 119,869; Nov. 22.
Trucks, Motor-. International Motor Company. No. 152,959; Nov. 22.
Trucks, Motor-drawn tractor-. Equipment Corporation of America. No. 146,819; Nov. 22.
Umbrellas. Advertising Distributors Ass'n. No. 154,009; Nov. 22.
Underwear, bathing-suits, shawls, &c. Winship, Bolt & Co. No. 146,473; Nov. 22.
Underwear, Ladies' silk. Rosenberg & Chatillon. No. 148,350; Nov. 22.
Violin-strings. C. Bruno & Son. No. 151,140; Nov. 22.
Watches. J. Daving. No. 148,981; Nov. 22.
Water bottles and bags, fountain-syringes, &c. Miller Rubber Company. No. 142,635; Nov. 22.
Well-drilling machines, steam-engines, &c. Keystone Driller Company. No. 135,856; Nov. 22.
Welting. Brockton Rand Company. No. 147,702; Nov. 22.
Wines, Champagne-. Werle et Compagnie. No. 148,004; Nov. 22.
Wines, Champagne-. Werle et Compagnie. No. 148,006; Nov. 22.
Wines, Champagne-. Werle et Compagnie. No. 148,008; Nov. 22.
Wire cable, Insulated. United States Rubber Company. No. 151,242; Nov. 22.
X-ray tables and stands. Wm. Meyer Company. No. 138,991; Nov. 22.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 22, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 18: 1,397,729
42: 1,397,117
60: 1,397,105
97: 1,397,921

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 29TH DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abrams, Joseph, Sturgis, S. D. Artificial-limb socket. No. 1,398,624; Nov. 29.

Accessories Manufacturing Company. (See Bramming, Carl, assignor.)

Acheson, Edward G., Jr., Niagara Falls, N. Y. Bearing. No. 1,398,219; Nov. 29.

Acheson, Edward G., Jr., Niagara Falls, N. Y. Bearing. No. 1,398,220; Nov. 29.

Acme Die Casting Corporation. (See Bungay, George W., assignor.)

Adenot, Marius, Caluire, France, assignor to Société Lyonnaise D'Industrie Mecanique. Compressed-air mechanism for motor-cars and the like. No. 1,398,355; Nov. 29.

Ailis, Harry W., Cincinnati, Ohio. Automobile tool-box. No. 1,398,824; Nov. 29.

Ailis, Harry W., Cincinnati, Ohio. Vehicle-curtain container. No. 1,398,585; Nov. 29.

Aker, Smith N., Newbern, Tenn. Cotton-picker's sack. No. 1,398,826; Nov. 29.

Akers, Joseph B., New York, N. Y. Curtain-rod. No. 1,398,411; Nov. 29.

Akin, Earl V. (See Allyn, Walter S., assignor.)

Albro, George F., Los Angeles, Calif. Combined office and drophead-typewriter desk. No. 1,398,618; Nov. 29.

Allen, Bernard J., Blythe Bridge, England. Means for casting pottery and like articles. No. 1,398,760; Nov. 29.

Allen, S. L., & Co. (See Mader, Joseph, assignor.)

Allyn, Harley H., assignor to Standard Rubber Company, Houston, Tex. Pneumatic tire. No. 1,398,482; Nov. 29.

Allyn, Walter S., Logan, assignor of one-half to E. V. Akin, Benton, Ill. Car-stopping attachment for elevators. No. 1,398,619; Nov. 29.

Aman, George A., et al. (See Becker, Hugo A., assignor.)

American Can Company. (See Graf, Henry G., assignor.)

American Cellulose and Chemical Manufacturing Company. (See Bregga, J. F., and Palmer, assignors.)

American Cyanamid Company. (See Washburn, Frank S., assignor.)

American District Telegraph Company. (See Hopkins, Richard M., assignor.)

American La France Fire Engine Company. (See Hawley, William G., assignor.)

American Laundry Machinery Company, The. (See Andrée, William R., assignor.)

American Laundry Machinery Company, The. (See Braley, Charles L., assignor.)

American Laundry Machinery Company, The. (See Waream, C. E., and Benjamin, assignors.)

American Telephone and Telegraph Company. (See Hitchcock, Harry W., assignor.)

American Telephone and Telegraph Company. (See Thompson, George K., assignor.)

American Thermophone Company. (See Gray, Budd D., assignor.)

American Well Works, The. (See Kerr, Charles V., assignor.)

Anderson-Barngrover Mfg. Co. (See Thompson, Albert R., assignor.)

Anderson, Charles H., assignor of one-third to C. H. Anderson, one-third to J. T. Hughes, and one-third to E. L. Bozarth, Oklahoma, Okla. Polishing-brush. No. 1,398,772; Nov. 29.

Anderson, Edwin O., Jersey City, N. J. Switch. No. 1,398,823; Nov. 29.

Andrée, William R., Chicago, Ill., assignor to The American Laundry Machinery Company, Norwood, Ohio. Tandem attachment for garment-presses. No. 1,398,827; Nov. 29.

Angle, E. H., Pasadena, Calif., and S. R. Atkinson, Atlanta, Ga. Orthodontic appliance. No. 1,398,761; Nov. 29.

Arbuckle, Samuel F., Indianapolis, Ind. Fluid-controlled actuating means. No. 1,398,291; Nov. 29.

Arbuckle, Samuel F., Indianapolis, assignor to United States Automotive Corporation, Connersville, Ind. Two-way-tilting reflector for lamps. No. 1,398,292; Nov. 29.

Armstrong, Constance D., Gisborne, New Zealand. Dish-cleaner. No. 1,398,664; Nov. 29.

Armstrong, Sir W. G., Whitworth and Company Limited. (See Chicken, C. B., and Scott, assignors.)

Arnold, Harold D., Maplewood, N. J. Thermionic amplifier. No. 1,398,665; Nov. 29.

Apgar, Stanley, assignor to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Plow-point. No. 1,398,762; Nov. 29.

Appleton, Henry J., Detroit, Mich. Air-compressing apparatus. No. 1,398,251; Nov. 29.

Athol Manufacturing Company. (See Mitchell, Rowland B., assignor.)

Atkinson, Spencer R. (See Angle, E. H., and Atkinson.)

Atwood, A. L. (See Bennett, Oscar L., assignor.)

Atwood, A. L. (See Parmenter, Brady, assignor.)

Autarit-Gesellschaft M. b. H. (See Rechnitzer, Alexander, assignor.)

Automatic Electric Company. (See Kuhl, George H., assignor.)

Avery, W. & T., Limited. (See Timson, William, assignor.)

Avery Drilling Machine Company, The. (See Mirrielees, James F., assignor.)

Babcock, Howard L. (See Tarkington, Harry E., assignor.)

Bamboo Paper Company. (See Jardine, James L., assignor.)

Barger, Newton L., Braeholm, and J. P. Donaldson, Morgantown, assignors, by direct and mesne assignments, to Ford-Barger Machinery Co., Braeholm, W. Va. Loading-machine. (Reissue.) No. 15,234; Nov. 29.

Barkschat, Henry, Los Angeles, Calif. Mold. No. 1,398,412; Nov. 29.

Bartholdy, Max, Karlskoga, Sweden, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Gage. No. 1,398,311; Nov. 29.

Bartlemay, Arlie, assignor to Red Cross Manufacturing Company, Bluffton, Ind. Cider-press. No. 1,398,252; Nov. 29.

Bassick Company, The. (See Cummins, Norman W., assignor.)

Bates, Arthur, Leicester, England, assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fastenings. No. 1,398,293; Nov. 29.

Baumgartner, John A. (See Raich, John B., assignor.)

Bayrer, Homer H., administrator. (See Bayrer, William J.)

Bayrer, William J., deceased, Hartford, Conn.; H. H. Bayrer, administrator, assignor to R. G. Henry, West Hartford, Conn. Lubricating means. No. 1,398,836; Nov. 29.

Beach, Herbert H., Balham, London, England. Combined sifter and shovel. No. 1,398,666; Nov. 29.

Beard, James R., Newcastle-upon-Tyne, England. Protecting device for multiphase alternating-current apparatus. No. 1,398,620; Nov. 29.

Bearens, Claude, New York, N. Y. Transmission-gear. No. 1,398,763; Nov. 29.

Beals, Erl V., Arlington Heights, Mass. Internal-combustion engine. No. 1,398,667; Nov. 29.

Beaumont, R. H., Company. (See Hale, William E., assignor.)

Becker, Hugo A., assignor of forty-five per cent. to G. A. Aman and twenty-five per cent. to F. Huart, Baltimore, Md. Combination spring and shock-absorber. No. 1,398,929; Nov. 29.

Beker, Steven, assignor of one-half to C. B. Eckfeld, Unionville, Mich. Antiskid device. No. 1,398,556; Nov. 29.

Bellony, Alexander M., U. S. Army. Wheel blocking and jacking device. No. 1,398,534; Nov. 29.

Belluche, Frank R. (See Upham, B. F., and Belluche.)

Benjamin, Dana H. (See Waream, C. E., and Benjamin.)

Bennett, George R., Glen Osborne, Pa. Cotton picking and cleaning. No. 1,398,930; Nov. 29.

Bennett, Oscar L., assignor of one-half to A. L. Atwood, Birmingham, Ala. Penholder. No. 1,398,535; Nov. 29.

Bennington, Russell L., Lake City, Iowa. Releasing device for poultry-house doors. No. 1,398,829; Nov. 29.

Bensel, Fritz H. (See Szarvassy, I., and Bensel.)

Berggren, John, Idaho Falls, Idaho. Wrench. No. 1,398,886; Nov. 29.

Bernhart, Charles B. (See Kirby, J., Hopkins, and Bernhart.)

Bethlehem Steel Company. (See Lachman, Maurice, and L. S., assignors.)

Björklund, Gustav. (See Schwars, J. O., and Björklund.)

Black, John O., Nashville, Tenn. Hitch structure. No. 1,398,312; Nov. 29.
Blakeman, Joseph T., Richland Center, Wis. Steam-generator. No. 1,398,562; Nov. 29.
Blando, Frank, New York, N. Y. Folding chair and bed. No. 1,398,253; Nov. 29.
Blaw-Knox Company. (See Venable, William M., assignor.)
Bliss, William L., assignor to U. S. Light and Heat Corporation, Niagara Falls, N. Y. Generator-mounting. No. 1,398,830; Nov. 29.
Bliss, William L., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Generator-mounting. No. 1,398,831; Nov. 29.
Blum, Morris, Los Angeles, Calif. Valve. No. 1,398,764; Nov. 29.
Boardman, Charles S., Buffalo, assignor to Lackawanna Steel Company, Lackawanna, N. Y. Construction of caissons, cofferdams, and the like. No. 1,398,221; Nov. 29.
Bochmert, Otto, assignor to Vitanola Talking Machine Company, Chicago, Ill. Indicator or measuring-gage for disk records. No. 1,398,710; Nov. 29.
Bofsky, Frank J., Detroit, Mich. Paper-cutter. No. 1,398,711; Nov. 29.
Bofsky, Frank J., Detroit, Mich. Powder-puff. No. 1,398,712; Nov. 29.
Bond, Frederick W., Ransomville, N. Y. Excavating-bucket and operating means therefor. No. 1,398,222; Nov. 29.
Bond, Thomas J., Gadsden, Ala. Hook. No. 1,398,587; Nov. 29.
Bonham, William K., Coffeyville, Kans. Dome-cover for oil-cars. No. 1,398,832; Nov. 29.
Booth Fisheries Company. (See Koehler, Carl W., assignor.)
Bordsen, Evandor K. M., Wedderburn, Oreg. Pavertser attachment for tractors. No. 1,398,668; Nov. 29.
Bouldin, Samuel L., Oswego, Kans. Train-coaler. No. 1,398,888; Nov. 29.
Bournous, George S., et al. (See Jonas, Edward S., assignor.)
Bovee, Ransom Y., Maywood, Ill. Folding combination toilet article. No. 1,398,583; Nov. 29.
Bowen, David R., and C. F. Schauck, assignors to Farrel Foundry and Machine Company, Ansonia, Conn. Machine for treating rubber and similiar material. No. 1,398,765; Nov. 29.
Boykin, Burwell, Jr., Beaumont, Tex. Well-boring apparatus. No. 1,398,413; Nov. 29.
Bozarth, Edgar L., et al. (See Anderson, Charles H., assignor.)
Braddick, Bernard L., San Diego, Calif. Dough-roll and rolling-pin. No. 1,398,621; Nov. 29.
Braden, William A., assignor of one-half to T. H. Eichhoff, Cleveland, Ohio. Track construction. No. 1,398,932; Nov. 29.
Bradford, William D., Sewickley, Pa. Box for pouring steel ingots. No. 1,398,584; Nov. 29.
Braley, Charles L., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Tandem attachment for ironing-presses. No. 1,398,824; Nov. 29.
Bramming, Carl, Chicago, Ill., assignor to Accessories Manufacturing Company. Dash-lamp. No. 1,398,313; Nov. 29.
Brereton, John W., deceased; by Robert K. Brereton, executor, Athlone, Ireland. Pneumatic shock-absorber. No. 1,398,933; Nov. 29.
Brereton, Robert K., executor. (See Brereton, John W.)
Bridges, Edward G., assignor to Lynch Glass Machinery Company, Anderson, Ind. Mold-clamp for glass-forming machines. No. 1,398,670; Nov. 29.
Briggs, John F., and C. W. Palmer, Speedon, near Derby, England, assignors to American Cellulose and Chemical Manufacturing Company Limited. Dyeing fibers, threads, or fabrics. No. 1,398,357; Nov. 29.
Brill, J. G., Company, The. (See Shipper, Isaac D., assignor.)
Bristol Aeroplane Company. (See Fedden, A. H. R. and B., assignors.)
Broman, Peter, assignor to Brown Safety Ladder Mfg. Co., Chicago, Ill. Extension-ladder stop. No. 1,398,622; Nov. 29.
Brooker, Henry, Goodmayes, England. Coin-feed delivery apparatus. No. 1,398,704; Nov. 29.
Brown & Sharpe Manufacturing Company. (See Goguen, C. J., and Provost, assignors.)
Brown, Carl B., Columbus, assignor to Parker Manufacturing Company, Dayton, Ohio. Oil-burner. No. 1,398,254; Nov. 29.
Brown, Elmer K., Seattle, Wash. Automatic road-map. No. 1,398,623; Nov. 29.
Brown, Harvey O., Easton, Pa. Filling stop-motion for looms. No. 1,398,718; Nov. 29.
Brown, James D. (See Hohnsbeen, George H., assignor.)
Brown, J. D. (See Hohnsbeen, George H., assignor.)
Brown, John F. (See Wagner, Ira W., assignor.)
Brown, John G., Newport, England. Upright photographic enlarging, copying, and reducing apparatus. No. 1,398,671; Nov. 29.
Brown, Ray M., Yonkers, assignor to H. L. Ingersoll, White Plains, N. Y. Controlling mechanism for locomotive booster-motors. No. 1,398,586; Nov. 29.
Brown Safety Ladder Mfg. Co. (See Broman, Peter, assignor.)
Brownstein, Jesse B., Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y. Manufacture of nitrostarch explosives. No. 1,398,931; Nov. 29.
Brown, William J., Newark, N. J. Suspension drive for sewing-machines. No. 1,398,486; Nov. 29.
Brubaker, William, Tolsa, N. D. Coating. No. 1,398,255; Nov. 29.
Brucker, Ferdinand F., assignor to The Miller Rubber Company, Akron, Ohio. Half-sole for pneumatic tires. No. 1,398,414; Nov. 29.
Buchner, Leopold B., Fitzroy, Melbourne, Victoria, Australia. Luminous display apparatus. No. 1,398,835. Nov. 29.
Budd Wheel Company. (See Fine, Lewis, assignor.)
Bullot, Louis, F., Sydney, New South Wales, Australia. Preserving meat and alimentary substances. No. 1,398,836; Nov. 29.
Bungay, George W., Brooklyn, N. Y., assignor to Acme Die Casting Corporation. Die-casting machine. No. 1,398,514; Nov. 29.
Bundy, Glenn J., assignor to Detroit Battery Company, Detroit, Mich. Battery-cover. No. 1,398,558; Nov. 29.
Burnham, George A., Saugus, assignor to Sears B. Condit, Jr., Brookline, Mass. Cover-lock. No. 1,398,499; Nov. 29.
Burman, Olof S., Minneapolis, Minn. Faucet and attaching-bracket. No. 1,398,767; Nov. 29.
Burtis, Walter L., Tuckahoe, N. Y. Casement-holder. No. 1,398,768; Nov. 29.
Burton Page Company, The. (See Endorf, Charles, Jr., assignor.)
Buschino, Charles, Long Island City, assignor of one-half to W. C. St. Clair, New Rochelle, N. Y. Internal-combustion engine. No. 1,398,953; Nov. 29.
Bush, Green O., Luverne, Ala. Refrigerator. No. 1,398,769; Nov. 29.
Butcher, James M., assignor to Sentinel Alarm Co., Chicago, Ill. Alarm. No. 1,398,585; Nov. 29.
Butler, Leonard P. G. (See Fedden, A. H. R., and Butler.)
Byrd, Turner, Lansing, Mich. Eaves-trough. No. 1,398,415; Nov. 29.
Cadigan, John R., New York, N. Y. Safety attachment for gas-stoves. No. 1,398,585; Nov. 29.
Caesar, Ambrose, Mosman, near Sydney, New South Wales, Australia. Hand clipper-mower. No. 1,398,672; Nov. 29.
Cain, James W., Detroit, Mich. Acetylene-generator. No. 1,398,673; Nov. 29.
Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Railway draft-rigging. No. 1,398,674; Nov. 29.
Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Convertible box-car. No. 1,398,675; Nov. 29.
Campbell, Samuel M., Rock Island, Ill. Connecting-rod aligner. No. 1,398,589; Nov. 29.
Canby, Albert E., Hubbard, Ohio. Windshield-cover. No. 1,398,714; Nov. 29.
Caracristi, Virginius Z., Bronxville, N. Y. Valve-cut-off correction instrument for locomotives. No. 1,398,256; Nov. 29.
Carkey, George M., Bloomington, Calif. Weeder. No. 1,398,500; Nov. 29.
Carleton, Francis B., Boston, Mass. Alcohol-torch. No. 1,398,676; Nov. 29.
Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Adjustable pipe-hanger. No. 1,398,294; Nov. 29.
Carlson-Westrom Co. (See Lundgren, Jacob, assignor.)
Carner, Henry E., Anaheim, Calif. Drawbar for tractors. No. 1,398,416; Nov. 29.
Carolus, Max, Teltow, near Berlin, Germany. Suspension-insulator. No. 1,398,937; Nov. 29.
Carter, Joseph, Saskatoon, Saskatchewan, Canada. Game. No. 1,398,837; Nov. 29.
Carroll, William P., Portland, Me. Signal device for automobiles. No. 1,398,677; Nov. 29.
Carson, Harry L., and R. A. Hunter, Fort Worth, Tex. Detachable mangle. No. 1,398,501; Nov. 29.
Carver, Thomas A. B., Glasgow, Scotland. Picture or design having motion effect. No. 1,398,838; Nov. 29.
Cawthra, Ernest H., assignor to Curtiss Aeroplane and Motor Corporation, Buffalo, N. Y. Fuel supply and regulating system for aircraft-engines. No. 1,398,315; Nov. 29.
Central Railway Signal Company. (See Dutcher, Frank, assignor.)
Central Steel Company, The. (See McNally, T., and Orr, assignors.)
Chaitt, Jacob. (See Smiler, J. M., Segal, Chaitt, and Rudin.)
Chapman, Albert K., assignor to Eastman Kodak Company, Rochester, N. Y. Film-holder. No. 1,398,928; Nov. 29.
Chapman, Frederick E., Middletown, Conn. Pipe-rest. No. 1,398,223; Nov. 29.
Chase Companys, Inc., The. (See Becker, Adolph C., assignor.)
Chauvette, Victor E. L., Paris, France. Printing-machine. No. 1,398,360; Nov. 29.
Chicken, Christopher B., and G. Scott, assignors to Sir W. G. Armstrong, Whitworth and Company, Limited, Newcastle-upon-Tyne, England. Variable-speed gearing. No. 1,398,417; Nov. 29.

Christensen, Magnus C., assignor of one-half to Randolph F. Beckbeart, Tacoma, Wash. Gate-valve. No. 1,398,678; Nov. 29.
Chrzastek, Mike, Passaic, N. J. Cabbage-slicer. No. 1,398,257; Nov. 29.
Church, Harold D., assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon-motor. No. 1,398,861; Nov. 29.
Church, Herbert E., Oneonta, N. Y. Combined shade-bracket and pole-support. No. 1,398,418; Nov. 29.
Clapp, Albert L., Marblehead, Mass. Transferring or embossing paper. No. 1,398,770; Nov. 29.
Clarke, Algernon, Ed, Grand Rapids, Mich. Undergarment. No. 1,398,624; Nov. 29.
Clarke, Hans T., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose-ester composition. No. 1,398,930; Nov. 29.
Clarke, William H., Sydney, New South Wales, Australia. Incubator-alarm. No. 1,398,537; Nov. 29.
Clarke, William L., Jr., assignor of one-half to J. A. Grant, Tallahassee, Fla. Street-indicator. No. 1,398,771; Nov. 29.
Clark, Charles J., Lakewood, Ohio. Tool-holder. No. 1,398,679; Nov. 29.
Clary, John, Oakland, Calif. Burner. No. 1,398,839; Nov. 29.
Clark, Joseph M., Apollo, Pa. Wrench. No. 1,398,869; Nov. 29.
Clayton, Joseph, New York, N. Y. Take-up mechanism for winding devices. No. 1,398,680; Nov. 29.
Clinton Refrigerating Company. (See Wishart, W., and Morrell, assignors.)
Cloud, James, Columbus, Ohio. Tank. No. 1,398,934; Nov. 29.
Clough, William B., Redondo Beach, Calif. Hand and foot accelerator for carburetors of automobile-engines. No. 1,398,826; Nov. 29.
Coatsworth, William, Highland Park, Mich. Truck-wheel shoe. No. 1,398,860; Nov. 29.
Cole, William H., Newark, N. J. Non-resonant phonograph-cabinet. No. 1,398,626; Nov. 29.
Collins, Elbe O., Chillicothe, Ohio. Dust-cap and sleeve for fastating valve-tubes. No. 1,398,316; Nov. 29.
Collins, Thomas E., Chicago, Ill. Door-closer. No. 1,398,317; Nov. 29.
Columbia Machine & Stopper Co. (See Kendall, Carl W., assignor.)
Columbia Machine Works & Malleable Iron Co. (See Wenaldis, Joseph T., assignor.)
Cook, William H., Toledo, Ohio. Detonating alarm. No. 1,398,862; Nov. 29.
Cott-a-lap Co. (See Stirling, Charles, assignor.)
Combination Machine Company. (See Peterson, Jonathan, assignor.)
Combs, James M., Akron, assignor of one-half to V. R. Smithfield, Cleveland, Ohio. Inner tube and making same. No. 1,398,940; Nov. 29.
Combs, James M., Akron, assignor of one-half to V. R. Smithfield, Cleveland, Ohio. Resilient cushion for heels. No. 1,398,627; Nov. 29.
Concrete Silo Company. (See Pearson, James H., assignor.)
Condit, Sears B., Jr. (See Burnham, George A., assignor.)
Condon, David J., Kenwood Park, Iowa. Emergency vault and safe lock. No. 1,398,628; Nov. 29.
Conley, Edwin J., New York, N. Y. Package and forming the same. No. 1,398,840; Nov. 29.
Connecticut Aircraft Company. (See Smith, Rexford M., assignor.)
Connecticut Valley Manufacturing Company, The. (See Hayden, Louis S., assignor.)
Connor, George H., St. Louis, Mo. Portable piercing device. No. 1,398,419; Nov. 29.
Cooke, Frank V., Highland Park, Mich. Nut-locking means. No. 1,398,681; Nov. 29.
Cooley, Herbert E., West Bend, Wis. Nailing and tacking machine. No. 1,398,258; Nov. 29.
Conover, Courtney, Philadelphia, Pa. Liquid-container. No. 1,398,841; Nov. 29.
Consolidating Car-Heating Company. (See Hynes, Lee P., assignor.)
Corona Typewriter Company, Inc. (See Ely, Alonzo B., assignor.)
Cortese, Nicola A., Bovey, Minn. Railway-frog. No. 1,398,420; Nov. 29.
Courchene, Henry B., Chicago, Ill. Toilet-seat cover. No. 1,398,318; Nov. 29.
Cox, Walter, Provo, Utah. Casement-window adjuster. No. 1,398,629; Nov. 29.
Crane, William H., Davenport, Iowa. Antiskid device for vehicle-wheels. No. 1,398,588; Nov. 29.
Cranston, John T., and W. D. Le Bar, Wyandotte, Mich. Electrolytic cell. No. 1,398,784; Nov. 29.
Crawford, Edgar J., assignor to J. E. Jordan, Seattle, Wash. Automatic speed control. No. 1,398,589; Nov. 29.
Cressler, Will T., Cincinnati, Ohio. Hand-stamp. No. 1,398,265; Nov. 29.
Cribben & Sexton Company. (See Harter, Augustus F., assignor.)
Crocker, Ernest B. (See Graessar, C. H., and Crocker.)
Cruse, George M., Stockton, Calif. Skull-cap frame and guide. No. 1,398,842; Nov. 29.
Cullen, Andrew, Massillon, Ohio. Guide-box for rolling-mills. No. 1,398,843; Nov. 29.
Culleny, Henriette. (See Johnson, F. D., and Culleny.)
Cummins, Norman W., assignor to The Bassick Company, Bridgeport, Conn. Hood-catch. No. 1,398,319; Nov. 29.
Cuper, John, Nelta, Ohio. Direction-indicator. No. 1,398,715; Nov. 29.
Curtis Aeroplane and Motor Corporation. (See Kirkham, Charles B., assignor.)
Curtis, Theron S., assignor to T. I. Smith Company, North Attleboro, Mass. Pin for holding soft collars. No. 1,398,483; Nov. 29.
Curtiss Aeroplane and Motor Corporation. (See Cawthra, Ernest H., assignor.)
Curry, Patrick, Chicago, Ill. Combined door-joint protector and name-plate for automobiles. No. 1,398,586; Nov. 29.
Damon, William H., Chicago, Ill. Polish and making the same. No. 1,398,891; Nov. 29.
Danforth, George L., Jr., Chicago, Ill. Ingot-stripping mechanism. No. 1,398,844; Nov. 29.
Daniels, Felix F., Jersey City, N. J. Snow-remover. No. 1,398,454; Nov. 29.
Davidson, Jacob, New York, N. Y. Sample-display device. No. 1,398,564; Nov. 29.
Davison, Daniel O. (See Trusty, J. F., and Davison.)
Davis, Robert H., London, England. Valve for controlling flow of gases. No. 1,398,845; Nov. 29.
Davis Sewing Machine Company, The. (See Meyer, William H., assignor.)
Dawe, Philip H., London, England. Electrical resistance apparatus. No. 1,398,630; Nov. 29.
Day, Schuyler E., New York, N. Y. Loose-leaf binder. No. 1,398,540; Nov. 29.
De Chairmont, Adolfo, Toledo, Ohio. Transmission-lock for motor-vehicles. No. 1,398,455; Nov. 29.
De Dragic, Theodore, and Albert Schwarz, assignors to U. S. Armor Corporation, New York, N. Y. Bullet-proof armor. No. 1,398,682 Nov. 29.
De Forest Radio Telephone and Telegraph Company. (See Gowen, Robert F., assignor.)
De Grazia, Samuel, Washington, D. C. Rubber heel. No. 1,398,631; Nov. 29.
Deam, Henry D., Benton Harbor, Mich., assignor of one-half to F. J. Petrovics, Chicago, Ill. Ship-salvaging apparatus. No. 1,398,541; Nov. 29.
Dean, Daniel A., Enid, Okla. Oil-distilling apparatus. No. 1,398,587; Nov. 29.
De Laval Separator Company, The. (See Hall, Selden H., assignor.)
De Olaneta, Harold, assignor to Winchester Repeating Arms Company, New Haven, Conn. Dry cell. No. 1,398,366; Nov. 29.
Denning, Ansel C., Johnson City, N. Y. Substitute material for making box-toes for shoes. (Reissue.) No. 15,235; Nov. 29.
Dennis, Arthur C., Seattle, Wash. Material-loading machine. No. 1,398,265; Nov. 29.
Detroit Battery Company. (See Bundy, Glenn J., assignor.)
Detroit Pressed Steel Company. (See Putnam, Alden L., assignor.)
Dewey, Haywood G., and F. H. Knapp, assignors to Fred H. Knapp Company, Westminster, Md. Labeling-machine. No. 1,398,421; Nov. 29.
Dougan, Kennedy, Minneapolis, Minn. Apparel-belt buckle. No. 1,398,632; Nov. 29.
Dougan, Kennedy, Minneapolis, Minn. Apparel-belt buckle. No. 1,398,633; Nov. 29.
Douglas, John J. (See Payne, L. M., Miller, and Douglas.)
Donaldson, James P. (See Barger, N. L., and Donaldson. (Reissue.)
Dorsey, Herbert G., Granville, Ohio. Telegraphy. No. 1,398,892; Nov. 29.
Dow Chemical Company, The. (See Jones, Coulter W., assignor.)
Downing, Ira S., and E. S. Pearce, Indianapolis, Ind. Journal-lubricating device. No. 1,398,502; Nov. 29.
Draper Corporation. (See Youngquist, Henry W., assignor.)
Dronsfield, James, Oldham, England. Means for applying garnett or like wire to rollers or cylindrical surfaces. No. 1,398,716; Nov. 29.
Dube, Harry S., New York, N. Y. Tire-cover. No. 1,398,259; Nov. 29.
Dubets, Louis L., Asnières, France. Tractor. No. 1,398,683; Nov. 29.
Dunham, Arthur L., New York, N. Y. Apparatus for and method of sterilizing milk-cans and other containers. No. 1,398,503; Nov. 29.
Dunaing, William F., Washington, D. C. Loose-leaf binder. No. 1,398,422; Nov. 29.
Dunstan, William E., Modesto, Calif. Valve-lifter. No. 1,398,456; Nov. 29.
Dunsworth, George W., Houston, Tex. Pipe-perforator. No. 1,398,320; Nov. 29.
Dura Construction Company. (See Hoenemann, Theodor H., assignor.)
Durkon Company Inc., The. (See Schenck, Pierce D., assignor.)
Dutcher, Frank, Versailles, assignor to Central Railway Signal Company, Pittsburgh, Pa. Railway signal-torpedo. No. 1,398,846; Nov. 29.

Dye, Glen M., Minneapolis, Minn. Film-clip and order-tab holder. No. 1,398,423; Nov. 29.
Earle, Richard T., Portland, Oreg. Flour-sifter. No. 1,398,367; Nov. 29.
Eastman, Joseph P., assignor to Eastman Manufacturing Company, Manitowoc, Wis. Means and method for connecting tubing of dissimilar materials. No. 1,398,494; Nov. 29.
Eastman Kodak Company. (See Chapman, Albert K., assignor.)
Eastman Kodak Company. (See Clarke, Hans T., assignor.)
Eastman Kodak Company. (See Seel, Paul C., assignor.)
Eastman Kodak Company. (See Sulzer, Albert F., assignor.)
Eastman Kodak Company. (See Tessier, Julien, assignor.)
Eastman Manufacturing Company. (See Eastman, Joseph P., assignor.)
Eccard, John F., assignor to The Troy Wagon Works Company, Troy, Ohio. Steering device for vehicles. No. 1,398,588; Nov. 29.
Eckfeld, Charles B. (See Beber, Steven, assignor.)
Eggers, John H., Company. (See Steele, Herbert H., assignor.)
Eickhoff, Theodore H. (See Braden, William A., assignor.)
Ely, Alonzo B., assignor to Corona Typewriter Company, Inc., Groton, N. Y. Typewriting-machine. No. 1,398,321; Nov. 29.
Ely, Alonzo B., assignor to Corona Typewriter Company, Inc., Groton, N. Y. Typewriting-machine. No. 1,398,322; Nov. 29.
Enache, Cociu, Dallas, Tex. Door closer and check. No. 1,398,504; Nov. 29.
Endorf, Charles, Jr., assignor to The Burton Page Company, Chicago, Ill. Milking-machine. No. 1,398,368; Nov. 29.
Engel, Frank, assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Storage-battery cell. No. 1,398,847; Nov. 29.
Enfield Cycle Company, Limited, The. (See Smith, Robert W., assignor.)
Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)
Erik, Emil, assignor of two-tenths to E. I. Quick, Ossining, and three-tenths to A. W. Harvey, New York, N. Y. Ground-gripper detachable tread. No. 1,398,893; Nov. 29.
Erné, George, Kreuzlingen, Switzerland. Door-lock. No. 1,398,369; Nov. 29.
Erskine-Murray, James and J. Robinson, Biggin Hill, England. Wireless receiving and transmitting apparatus. No. 1,398,848; Nov. 29.
Eustis, George P., Washington, D. C. Liquid-fuel vaporizer. No. 1,398,370; Nov. 29.
Evans, Morgan, Pittston, Pa. Vise-stand. No. 1,398,424; Nov. 29.
Fallenstein, Ernest H., Mankato, Minn., assignor of one-half to V. E. Gill, Boulder, Colo. Cableway excavating-bucket. No. 1,398,425; Nov. 29.
Faltin, Bernard P., Bareville, Pa. Quick-return pump-head gearing. No. 1,398,684; Nov. 29.
Farrel Foundry and Machine Company. (See Bowen, D. R. and Schnuck, assignors.)
Faulkner, James S., Petersburg, Va. Spark-cap attachment for spark-plugs. No. 1,398,457; Nov. 29.
Fedden, Alfred H. R. and Leonard F. G. Butler, assignors to The Bristol Aeroplane Company, Limited, Bristol, Gloucester County, England. Cylinder for internal-combustion engines. No. 1,398,849; Nov. 29.
Fidelity Machine & Manufacturing Co. (See Larkin, Walter, assignor.)
Fine, Lewis, assignor, by mesne assignments, to Budd Wheel Company, Philadelphia, Pa. Apparatus for assembling wire wheels. No. 1,398,227; Nov. 29.
Firestone Tire & Rubber Company, The. (See McDonald, Frank J., assignor.)
Firestone Tire and Rubber Company, The. (See Stevens, William C., assignor.)
Flintkote Company, The. (See Overbury, Frederick C., assignor.)
Fogwell, Harrison H., and John M. Morris, Los Angeles, Calif. Thermostat. No. 1,398,635; Nov. 29.
Foster, George, Bicknell, Ind. Mine-car-controlling mechanism. No. 1,398,896; Nov. 29.
Ford-Barger Machinery Co. (Reissue.) (See Barger, N. L., and Donaldson, assignors.)
Ford, Eugene A., Newton, Mass., assignor to R. H. D. Engine Company, Inc., New York, N. Y. Engine-drive. No. 1,398,260; Nov. 29.
Forlander, Morris, New York, N. Y. Lock. No. 1,398,630; Nov. 29.
Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Arrangement of heaters in electric ovens. No. 1,398,543; Nov. 29.
Fowler, Clarence B., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,398,592; Nov. 29.
Fox, Thomas S. (See Grover, J. P., and Fox.)
Francke Co., The. (See Francke, William J., assignor.)
Francke, William J., assignor to The Francke Co., Highland Park, N. J. Power-transmitting device. No. 1,398,773; Nov. 29.
Franco, Maurice, New York, N. Y. Weed-puller. No. 1,398,850; Nov. 29.
Fredriksson, John, Elizabeth, N. J., assignor to The Kalbfleisch Corporation, New York, N. Y. Producing highly-concentrated hydrochloric acid. No. 1,398,224; Nov. 29.
Fretter, Nathan F., Cleveland, Ohio. Turret-lathe. No. 1,398,225; Nov. 29.
Fretter, Nathan F., Cleveland, Ohio. Lathe. No. 1,398,226; Nov. 29.
Freyder, Frank X., Iowa City, Iowa. Combination-tool. No. 1,398,223; Nov. 29.
Fried. Krupp Aktiengesellschaft. (See Bartholdy, Max, assignor.)
Fried. Krupp Aktiengesellschaft. (See Klobe, Werner, assignor.)
Fried. Krupp Aktiengesellschaft. (See Sundhaussen, Hermann, assignor.)
Fried. Krupp Aktiengesellschaft. (See Vollmer, John, assignor.)
Fried. Krupp Aktiengesellschaft. (See von Appen, August, assignor.)
Fuchs-Mauter, Carolina, Zurich, Switzerland. Hair-undulator. No. 1,398,637; Nov. 29.
Fuld, Katherine B., assignor to W. Fuld, Baltimore, Md. Figure wheeled toy. No. 1,398,426; Nov. 29.
Fuld, William. (See Fuld, Katherine B., assignor.)
Fuld, William. (See Knowles, Frank, assignor.)
Furber, Frederick M., Revere, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Grinding apparatus. No. 1,398,295; Nov. 29.
Fürst, Alexander, assignor of one-half to C. E. Pobe, New York, N. Y. Automobile-radiator. No. 1,398,774; Nov. 29.
Gable, Benjamin F., San Francisco, Calif. Bath combination and nozzle. No. 1,398,841; Nov. 29.
Gaede, Frans, Fort Wuerttemberg, near Metz, Germany. Drip-guard for brushes. No. 1,398,894; Nov. 29.
Galebach, Edwin R., Lebanon, Pa. Cotter-pin extractor. No. 1,398,542; Nov. 29.
Garbe, Lester G., San Francisco, Calif. Frame for printers' form. No. 1,398,544; Nov. 29.
Garven, Elmer, Coulterville, Ill. Paint-pail-supporting device. No. 1,398,551; Nov. 29.
Geisler, Hugo P., New York, N. Y. Metal container. No. 1,398,261; Nov. 29.
General Railway Signal Company. (Reissue.) (See Howe, Winthrop K., assignor.)
George Heard, Paris, France. Mercury-lamp. No. 1,398,545; Nov. 29.
Gerhart, Bayless W., assignor to United States Spray Company, San Bernardino, Calif. Tree-spray. No. 1,398,505; Nov. 29.
Gerleman, Oscar W., St. Louis, Mo. Treating cylinders and pistons. No. 1,398,775; Nov. 29.
Gilbert, Albert P., Durham, N. C. Building toy. No. 1,398,852; Nov. 29.
Gill, Vergil E. (See Fallenstein, Ernest H., assignor.)
Gillen, Daniel A., Flushing, N. Y. Non-siphonable trap. No. 1,398,427; Nov. 29.
Gillette, Edward E., Bloomfield, N. J. Fishing appliance. No. 1,398,717; Nov. 29.
Ginsbourg, Leo, Jersey City, N. J. Range-finder. No. 1,398,853; Nov. 29.
Glasser, Charles T. (See Whitmore, H. G., and Glasser.)
Gleason, James E., trustee. (See Tibbetts, Milton, assignor.)
Goder, Joseph, Chicago, Ill. Incinerator. No. 1,398,718; Nov. 29.
Goedeke, Frederick W., Evansville, Ind. Corner-iron for baskets, boxes, &c. No. 1,398,571; Nov. 29.
Goforth, James E., Des Moines, Iowa. Sewing-machine. No. 1,398,540; Nov. 29.
Gorgues, Charles J., Worcester, and J. J. Provost, Auburn, Mass., assignors to Brown & Sharpe Manufacturing Company, Providence, R. I. Micrometer taper gage. No. 1,398,296; Nov. 29.
Golle, Edward A., Grand Beach, Mich. Corn-planter. No. 1,398,428; Nov. 29.
Gordon, John A., assignor of one-half to C. E. Hose, Kansas City, Mo. Air-filter. No. 1,398,685; Nov. 29.
Gourlay, Clarence H. and W. E., Jamaica, N. Y. Combination-lock. No. 1,398,509; Nov. 29.
Gourlay, Walter E. (See Gourlay, Clarence H. and W. E.)
Gowen, Robert F., assignor to De Forest Radio Telephone and Telegraph Company, New York, N. Y. Coil-mounting. No. 1,398,872; Nov. 29.
Graesser, Carl H., Fairfield, and E. B. Crocker, Stratford, Conn., assignors to Manning, Maxwell, & Moore, Inc., New York, N. Y. Retaining device for gage-cases. No. 1,398,273; Nov. 29.
Graf, Henry G., Toledo, Ohio, assignor to American Can Company, New York, N. Y. Shipping-container. No. 1,398,686; Nov. 29.
Graham, Frank Lee, Jr., Seattle, Wash. Lock for mail-bags. No. 1,398,683; Nov. 29.
Graham, Joseph A., Alhaman, Iowa. Draft attachment. No. 1,398,547; Nov. 29.
Grant, John A. (See Clarke, William L., Jr., assignor.)
Gravell, James H., Elkins Park, Pa. Method of and composition for cleaning metals. No. 1,398,507; Nov. 29.
Gray & Davis Inc. (See Wackwitz, Ernest F., assignor.)

Gray, Budd D., Greenwich, Conn., assignor to American Thermophone Company, Boston, Mass. Thermophone. No. 1,398,697; Nov. 29.
Gray, Frank, Philadelphia, Pa. Damper-regulator. No. 1,398,695; Nov. 29.
Gray, James E., Newton, Iowa. Controlling device for automobile-headlights. No. 1,398,263; Nov. 29.
Gray, Robert E. (See Rogers, G. L., and Gray.)
Green, Ellyson, Winterset, Iowa. Chain tightening and releasing device. No. 1,398,548; Nov. 29.
Greenwald, Isidor, New York, N. Y. Escapement for time-pieces. No. 1,398,776; Nov. 29.
Grover, J. P., New York, and T. S. Fox, Brooklyn, N. Y. Film-holding device. No. 1,398,458; Nov. 29.
Grigsby, Bertram J., Chicago, Ill. Attachment plug. No. 1,398,228; Nov. 29.
Grosebi, Joseph A., New York, N. Y. Embroidering mechanism. No. 1,398,590; Nov. 29.
Grooms, John, Atlanta, Ga. Folding chair. No. 1,398,854; Nov. 29.
Grossenbacher, Ernest, Fajardo, Porto Rico. Automatic valve for oil-burners. No. 1,398,549; Nov. 29.
Gunther, George E., St. Paul, Minn. Garden-tractor. No. 1,398,777; Nov. 29.
Gustafson, Adolph P., assignor to M. Schuls Co., Chicago, Ill. Bellows for pneumatically-operated musical instruments. No. 1,398,730; Nov. 29.
Gustus, John A., Detroit, Mich. Latch. No. 1,398,374; Nov. 29.
Haddeid, Robert A., Westminster, and A. G. McK. Jack, Sheffield, England. Armor-piercing projectile. No. 1,398,229; Nov. 29.
Haeaner, Charles T., Cleveland, Ohio. Non-skid device. No. 1,398,719; Nov. 29.
Hale, Frederick F., Medford, Mass. Detachable valve-handle. No. 1,398,263; Nov. 29.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Rope-sheave and support. No. 1,398,855; Nov. 29.
Hale, William E., Fort Washington, assignor to R. H. Beaumont Company, Philadelphia, Pa. Drag-scraping apparatus. No. 1,398,627; Nov. 29.
Hall, Selden H., Poughkeepsie, assignor to The De Laval Separator Company, New York, N. Y. Milking machinery. No. 1,398,220; Nov. 29.
Halvorsen, Halbert E., Chicago, Ill., assignor to Sullivan Machinery Company. Air-lift booster. No. 1,398,550; Nov. 29.
Hamilton, Belton T., London, England. Gun mounting and sighting apparatus. No. 1,398,688; Nov. 29.
Hamilton, William H. W., Baker, Oreg. Check-book. No. 1,398,508; Nov. 29.
Hammond, John H., Jr., Gloucester, Mass. Range-finder. No. 1,398,509; Nov. 29.
Hammond, John H., Jr., Gloucester, Mass. Steering-control. No. 1,398,510; Nov. 29.
Hanrath, Theodore W., Chicago, Ill. Game device. No. 1,398,511; Nov. 29.
Hansen, Christian H., Norfolk, Va. Time-record folder. No. 1,398,231; Nov. 29.
Hanagirg, Fritz, Gratz, Austria. Fractionate distillation. No. 1,398,856; Nov. 29.
Hanson, Gustaf W., Wichita, Kans. Boring-drill. No. 1,398,551; Nov. 29.
Harradine, Robert W., Bondi, New South Wales, Australia. Fishing-reel. No. 1,398,429; Nov. 29.
Harris, Arthur W., Sleepy Eye, Minn. Clutch mechanism. No. 1,398,562; Nov. 29.
Harter, Augustus F., Oak Park, assignor to Cribben & Sexton Company, Chicago, Ill. Hot-air furnace. No. 1,398,264; Nov. 29.
Hart, Harry S., assignor to Rodger Ballast Car Company, Chicago, Ill. Dump-car. No. 1,398,375; Nov. 29.
Hart, Harry S., Chicago, Ill. Railway-car construction. No. 1,398,512; Nov. 29.
Hartog, Stephen D., St. Louis, Mo. Piston for reciprocatory engines. No. 1,398,689; Nov. 29.
Hartog, Stephen D., St. Louis, Mo. Piston. No. 1,398,690; Nov. 29.
Harvey, Alden W., et al. (See Erik, Emil, assignor.)
Haseltine, Stacy B., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. No. 1,398,691; Nov. 29.
Haseltine, Stacy B., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. No. 1,398,692; Nov. 29.
Hauck, Arthur E., deceased, New York, N. Y. Adolph H. Stein, executor. Suction-torch. No. 1,398,553; Nov. 29.
Hawkins, Thomas, Derry, assignor to W. B. Severance, Manchester, N. H. Setting-rack. No. 1,398,778; Nov. 29.
Hawley, William G., assignor to American La France Fire Engine Company, Inc., Elmira, N. Y. Friction-clutch. No. 1,398,554; Nov. 29.
Hayden, Louis S., Essex, assignor to The Connecticut Valley Manufacturing Company, Centerbrook, Conn. Tool for boring and counterboring wood. No. 1,398,779; Nov. 29.
Hayden, Louis S., Essex, assignor to The Connecticut Valley Manufacturing Company, Centerbrook, Conn. Extension boring-bit. No. 1,398,780; Nov. 29.
Healy, James A., Brooklyn, N. Y. Pneumatic-tire tread. No. 1,398,513; Nov. 29.
Healy, James A., Brooklyn, N. Y. Amusement apparatus. No. 1,398,514; Nov. 29.
Heintz, Ernest E., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Window-regulator. No. 1,398,693; Nov. 29.
Heinrich, Walter A. (See Matthews, C. L., and Heinrich.)
Hellmund, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company, Systems of control for induction-machines. No. 1,398,515; Nov. 29.
Hemenway, Walter G., Los Angeles, Calif. Carburetor. No. 1,398,459; Nov. 29.
Heuritzy, George S., Hazleton, Pa. Flag. No. 1,398,555; Nov. 29.
Hentschke, Paul, Los Angeles, Calif. Internal-combustion engine. No. 1,398,430; Nov. 29.
Henry, Robert G. (See Bayrer, William J., assignor.)
Herbener, John H., Norfolk, Va. Flag. No. 1,398,376; Nov. 29.
Hermann, Charles A., Milwaukee, Wis. Mattress or the like. No. 1,398,297; Nov. 29.
Hermansson, Aaron, Rockford, Ill. Easel. No. 1,398,516; Nov. 29.
Hershey, Madeline M., Los Angeles, Calif. Garment. No. 1,398,720; Nov. 29.
Hicks, Charles E. and W. G., Mechanicsville, N. Y. Flying-machine. No. 1,398,781; Nov. 29.
Hicks, William G. (See Hicks, Charles E. and W. G.)
Higbee, Glenn A., Detroit, Mich. Fishing-reel. No. 1,398,721; Nov. 29.
Himmelspach, John A., Saginaw, Mich. Detachable diaphragm for gas-meters. No. 1,398,722; Nov. 29.
Hindahl, David, assignor to Rodger Ballast Car Company, Chicago, Ill. Dump car. No. 1,398,517; Nov. 29.
Hineline, Edson S., Apponaug, assignor to Hineline Engineering Company, Providence, R. I. Stop-motion for knitting-machines. No. 1,398,694; Nov. 29.
Hineline Engineering Company. (See Hineline, Edson S., assignor.)
Hines, Ellen V. (See Hines, Warren H., assignor.)
Hines, Warren H., assignor of forty-nine one-hundredths to E. V. Hines, Flint, Mich. Vehicle-wheel. No. 1,398,265; Nov. 29.
Hipwell, Harry H., Pittsburgh, Pa. Flashlight-battery. No. 1,398,518; Nov. 29.
Hirtz, Edwin, Paris, France. Sample-card. No. 1,398,431; Nov. 29.
Hitchcock, Harry W., New York, N. Y., assignor to American Telephone and Telegraph Company. Electrical indicating and measuring device. No. 1,398,266; Nov. 29.
Hixon, Fred A., et al. (See Jones, Edward S., assignor.)
Hoenemann, Theodor E., assignor to Dura Construction Company, Boston, Mass. Machine for making concrete blocks. No. 1,398,898; Nov. 29.
Hoffenberg, Maurice J., New Haven, Conn. Skate-fastener. No. 1,398,857; Nov. 29.
Hoffmann, Loran L. (See Smith, Samuel C., assignor.)
Hogan, Thomas I. (See Reid, James H., assignor.)
Hohnsbeen, George H., assignor of three-fifths to J. D. Brown, Minneapolis, Minn. Memorandum-file. No. 1,398,501; Nov. 29.
Hohnsbeen, George H., assignor of three-fifths to J. D. Brown, Minneapolis, Minn. Memorandum-file. No. 1,398,502; Nov. 29.
Holding, Chester, New Richmond, Wis. Hog-holding device. No. 1,398,484; Nov. 29.
Holmes, Edward. (See Lightner, A. D., and Holmes.)
Holt, J. A. B. (See Matson, Edgar C., assignor.)
Hopkins, Mathew. (See Kirby, J., Hopkins, and Bernhart.)
Hopkins, Richard M., Rutherford, assignor to American District Telegraph Company, Jersey City, N. J. Alarm system. No. 1,398,593; Nov. 29.
Hopkins, Richard M., Rutherford, assignor to American District Telegraph Company, Jersey City, N. J. Transmitter. No. 1,398,594; Nov. 29.
Hopp, Hermann. (See Hopp, Leo and H.)
Hopp, Leo and H., New York, N. Y. Price-ticket holder. No. 1,398,782; Nov. 29.
Hornsey, John W., Summit, N. J. Leaching ores and the like. No. 1,398,728; Nov. 29.
Hosch, Greene C., St. Louis, Mo. Hanger. No. 1,398,519; Nov. 29.
Hose, Charles E. (See Gordon, John A., assignor.)
Hosmer, Ralph B., San Francisco, Calif. Sofa-bed. No. 1,398,524; Nov. 29.
House, Herbert B., Pasadena, assignor to C. S. Potter and W. T. Potter, Los Angeles, Calif., partners. Kaleidoscope. No. 1,398,858; Nov. 29.
Howe, Winthrop K., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Automatic train-control system. (Reissue.) No. 15,236; Nov. 29.
Howgate, Alfred, Riddlesden, Keighley, England. Apparatus for use in annealing or otherwise treating metals. No. 1,398,520; Nov. 29.
Hoyt, Adrian H., deceased, Penacook, N. H.; W. C. Hoyt, administrator. Means for calibrating ammeters. No. 1,398,505; Nov. 29.
Hoyt, Frederick A. (See Kliesrath, V. W., and Hoyt.)
Hoyt, Frederick A., assignor to The Simms Magneto Company, East Orange, N. J. Magneto. No. 1,398,485; Nov. 29.
Hoyt, Wallace C., administrator. (See Hoyt, Adrian H.)
Huart, Frank, et al. (See Becker, Hugo A., assignor.)
Hughes, Francis P., Atlanta, Ga. Fuel-mixer. No. 1,398,290; Nov. 29.
Hughes, Harry C., Cincinnati, Ohio. Valve-grinding tool. No. 1,398,577; Nov. 29.

Hughes, James T., et al. (See Anderson, Charles H., assignor.)
Hull, John W., assignor of one-fourth to H. D. Mantes, San Antonio, Tex. Wall-block. No. 1,398,695; Nov. 29.
Hunkins, William S., Los Angeles, Calif. Hose-supporter. No. 1,398,487; Nov. 29.
Hunkins, William S., Los Angeles, Calif. Hose-supporter. No. 1,398,488; Nov. 29.
Hunkins, William S., Los Angeles, Calif. Hose-supporter. No. 1,398,486; Nov. 29.
Hunter, Robert A. (See Carson, H. L., and Hunter.)
Hurtig, Paul H., and C. H. Menton, Katrineholm, Sweden. Motor plow or cultivator. No. 1,398,859; Nov. 29.
Hussey, John M., Wichita, Kans. Freezing and preserving eggs. No. 1,398,860; Nov. 29.
Hydraulic Pressed Steel Company, The. (See Tait, William S., assignor.)
Hynes, Lee P., assignor to Consolidating Car-Heating Company, Albany, N. Y. Electric car-heating system. No. 1,398,521; Nov. 29.
Hynes, Lee P., assignor to Consolidated Car Heating Company, Albany, N. Y. Electric car-heater. No. 1,398,522; Nov. 29.
Ingersoll, Howard L. (See Brown, Ray M., assignor.)
International Equipment Company. (See Kendrick, Arthur, assignor.)
Irvin, William C., San Francisco, Calif. Metallic shipping-barrel. No. 1,398,296; Nov. 29.
Ivory, James W., Philadelphia, Pa. Nut lock or fastener. No. 1,398,325; Nov. 29.
James Johnson Hodgkinson and Pearson Limited. (See Taylor, Percival, assignor.)
Jack, Alexander G. M. (See Hadfield, Robert A., assignor.)
Jacoby, Raymond W., Garnerville, N. Y., assignor to Rockland Finishing Co., Inc. Cotton product and making the same. No. 1,398,578; Nov. 29.
Jacobsky, Maxim, New York, N. Y. Locking device for operating handles. No. 1,398,232; Nov. 29.
Jagdmann, Karl E. W., Stockholm, Sweden. Building-blocks. (Reissue.) No. 15,237; Nov. 29.
Jardine, James L., Penicuik, Scotland, assignor to Bamboo Paper Company, Limited, London, England. Apparatus for preparing bamboo and kindred material for pulp extraction. No. 1,398,261; Nov. 29.
Jean, Wilfrid, Lowell, Mass. Valve. No. 1,398,482; Nov. 29.
Jeffrey Manufacturing Company, The. (See Richards, Ray S., assignor.)
John, Adam, Boston, Mass. Cushion-tire. No. 1,398,862; Nov. 29.
Johnson, Asa, Dayton, Tenn. Two-wheel road-grader and field-ditcher. No. 1,398,326; Nov. 29.
Johnson, Bradley S., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. No. 1,398,696; Nov. 29.
Johnson, Clyde A., San Diego, Calif. Gradometer. No. 1,398,433; Nov. 29.
Johnson, Frederick D., and H. Culleny, Baltimore, Md. Auxiliary automobile license-tag. No. 1,398,489; Nov. 29.
Johnson, George A., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Reinforced end for box-cars. No. 1,398,697; Nov. 29.
Johnston, William H., Lorain, Ohio, assignor to National Tube Company, Pittsburgh, Pa. Dumping-trough-cover-operating mechanism. No. 1,398,863; Nov. 29.
Jones, Coulter W., assignor to The Dow Chemical Company, Midland, Mich. Making hydrobromic acid and apparatus therefor. No. 1,398,556; Nov. 29.
Jones, Edward S., assignor of one-tenth to F. A. Hixon, one-tenth to G. Kilborn, and one-tenth to G. S. Bournous, Mobile, Ala. Automatic life-saving fender for automobiles. No. 1,398,434; Nov. 29.
Jordan, J. Eugene. (See Crawford, Edgar J., assignor.)
Kalbfleisch Corporation, The. (See Fredrickson, John, assignor.)
Kane, Robert, Humboldt, Ill. Hayrack-lifter. No. 1,398,490; Nov. 29.
Keller Pneumatic Tool Company. (See Keller, W. H., and Schinkes, assignors.)
Keller, William H., and A. Schinkes, assignor to Keller Pneumatic Tool Company, Grand Haven, Mich. Piston-rod toggle for fluid-pressure motors. No. 1,398,527; Nov. 29.
Keller, William H., and A. Schinkes, assignor to Keller Pneumatic Tool Company, Grand Haven, Mich. Piston-rod toggle for fluid-pressure motors. No. 1,398,528; Nov. 29.
Kelly, Martha E., Mill Hall, Pa. Scrub-brush. No. 1,398,865; Nov. 29.
Kendall, Carl W., Edgewater Heights, N. J., assignor to Columbia Machine & Stopper Co., Inc., New York, N. Y. Feeding device for sealing-disks. No. 1,398,724; Nov. 29.
Kendrick, Arthur, Newton, assignor to International Equipment Company, Boston, Mass. Laundry-drier. No. 1,398,480; Nov. 29.
Kennedy, Walter, Pittsburgh, Pa. Cover for soaking-pits and mechanism for shifting same. No. 1,398,900; Nov. 29.
Kenyon, C., Company Inc. (See Phelps, Harry B., assignor.)
Kerr, Charles V., assignor to The American Well Works, Aurora, Ill. Steam-turbine. No. 1,398,441; Nov. 29.
Kilmarth, Victor W., and F. A. Hoyt, assignors to The Simms Magneto Company, East Orange, N. J. Ignition apparatus for internal-combustion engines. No. 1,398,481; Nov. 29.
Kiewicz, John, assignor to The Reece Button Hole Machine Company, Boston, Mass. Guard for starting mechanism of sewing-machines. No. 1,398,823; Nov. 29.
Kilborn, George, et al. (See Jones, Edward S., assignor.)
Kinch, George E., Quirindi, New South Wales, Australia. Automatic opening mechanism for closet-seat lids. No. 1,398,556; Nov. 29.
King, John G., Pine Bluff, Ark. Stop or waste cock. No. 1,398,529; Nov. 29.
King, John L., assignor to Rotary King Safety Razor Company, New York, N. Y. Safety-razor. No. 1,398,579; Nov. 29.
Kirby, John, M. S. Hopkins, and C. B. Bernhart, Reading, Pa. Preparation of lead arsenate. No. 1,398,267; Nov. 29.
Kirkham, Charles B., Nassau Boulevard, assignor to Curtis Aeroplane and Motor Corporation, Buffalo, N. Y. Radiator for airplanes. No. 1,398,880; Nov. 29.
Knapp, Frederick H. (See Dewey, H. G., and Knapp.)
Knapp, Fred. H., Company. (See Dewey, H. G., and Knapp, assignors.)
Kneier, Joseph, assignor to H. J. Trenkamp, Cleveland, Ohio. Convertible stove-oven. No. 1,398,725; Nov. 29.
Knowles, Frank, West Englewood, N. J., assignor to William Fuld, Baltimore, Md. Fortune-telling device. No. 1,398,462; Nov. 29.
Koch, Otto L., Jr., Woodlynne, N. J. End-binder for the record-sheets of player-pianos. No. 1,398,901; Nov. 29.
Koehler, Carl W., assignor to Booth Fisheries Company, Chicago, Ill. Smokehouse. No. 1,398,726; Nov. 29.
Kohler, Ernest, Denver, Colo., assignor to The United Mines and Manufacturing Company. Amusement device (circling-whip). No. 1,398,880; Nov. 29.
Kolbe, Werner, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Printing device for registering cash and the like. No. 1,398,435; Nov. 29.
Kontosky, Robert, Rochester, N. Y. Work-support for shoe-milling machines. No. 1,398,557; Nov. 29.
Kosinsky, Theodore, Toledo, Ohio. Combination device. No. 1,398,727; Nov. 29.
Krueger, William F., Chicago, Ill. Pulley-casing. No. 1,398,783; Nov. 29.
Kuc, Wasyl, Winnipeg, assignor of one-half to J. Zarowsky, Fisher Branch, Manitoba, Canada. Padlock. No. 1,398,280; Nov. 29.
Kuhl, George H., assignor to Automatic Electric Company, Chicago, Ill. Voice-current telephone repeater. No. 1,398,728; Nov. 29.
Kulikoff, Andy, Pittsburgh, Pa. Padlock. No. 1,398,233; Nov. 29.
La Fleur, Benjamin S., Haverhill, assignor to The Reece Button Hole Machine Company, Boston, Mass. Machine for rough-rounding and lasting stitched-down shoes. No. 1,398,524; Nov. 29.
La Manufacture de Produits Chimiques du Nord Etablissements Kuhlmann. (See Pascal, Paul, assignor.)
La Pointe, William R., Columbus, assignor to H. E. Vance, Powell, Ohio. Electric fuse. No. 1,398,436; Nov. 29.
Leacht, Richard T., Milwaukee, Wis. Animal-cover. No. 1,398,881; Nov. 29.
Lachman, Laurence S. (See Lachman, Maurice and L. S.)
Lachman, Maurice and L. S., New York, N. Y., assignor to Bethlehem Steel Company, Bethlehem, Pa. Metal wheel. No. 1,398,558; Nov. 29.
Lackawanna Steel Company. (See Boardman, Charles S., assignor.)
Lambert, Alvin R. (See Lambert, John W. and A. R.)
Lambert, John W. and A. R., Anderson, Ind. Chain-tread tractor. No. 1,398,882; Nov. 29.
Lampessis, Gust, Milwaukee, Wis. Cigar and cigarette holder. No. 1,398,559; Nov. 29.
Lancaster, John B., Philadelphia, Pa. Tile. No. 1,398,698; Nov. 29.
Lance, Robert D., Livry, France, assignor of one-half to C. Shrager, London, England. Artificial silk. No. 1,398,525; Nov. 29.
Landis, Harry A., Red Lion, Pa. Combination angle-tool. No. 1,398,234; Nov. 29.
Landis, Paul, Zurich, Switzerland. Carbureter. No. 1,398,640; Nov. 29.
Larkin, Walter, assignor to Fidelity Machine & Manufacturing Co., Philadelphia, Pa. Knitting-machine construction. No. 1,398,865; Nov. 29.
Larson, Levi L., Los Angeles, Calif. Air-pump. No. 1,398,908; Nov. 29.
Lasar, Walter, Fort Wayne, Ind. Aeroplane. No. 1,398,729; Nov. 29.
Lauth, Clarence H., London, England. Electric cooking or heating vessel and apparatus. No. 1,398,906; Nov. 29.
Lauth, Clarence H., London, England. Electric cooking or heating vessel and apparatus. No. 1,398,907; Nov. 29.
Lauth, Clarence H., London, England. Electrically-heated liquid-heater. No. 1,398,903; Nov. 29.

Le Bar, William D. (See Cranston, J., and Le Bar.)
Le Roy, Gustave L., Kansas City, Mo. Screen. No. 1,398,869; Nov. 29.
Learmont, William H., Kala, Mich. Vehicle-signal. No. 1,398,441; Nov. 29.
Leddell, William A., assignor to The Mine and Smelter Supply Company, Denver, Colo. Making grate-bars. No. 1,398,492; Nov. 29.
Lee, Thomas L., assignor to North East Electrical Company, Rochester, N. Y. Electromagnetic instrument. No. 1,398,443; Nov. 29.
Lee, William B., Seattle, Wash. Nozzle. No. 1,398,868; Nov. 29.
Legendre, Ovide, assignor to T. C. Sheldon, Fitchburg, Mass. Shuttle-positioner. No. 1,398,699; Nov. 29.
Leighton, Fred W., Rockwood, Me. Revolving hay stower or slide. No. 1,398,437; Nov. 29.
Lewis, Lloyd V., Edgewood borough, assignor to Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. No. 1,398,388; Nov. 29.
Lewis, Rollin C., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Dial-lock. No. 1,398,642; Nov. 29.
Lightner, Arthur D., and B. Holmes, assignor to The Willys-Overland Company, Toledo, Ohio. Hoisting apparatus. No. 1,398,331; Nov. 29.
Linley, Archie J., Lodi, Calif. Railway-switch-throwing device. No. 1,398,332; Nov. 29.
Linscott, Otis K., Tekoa, Wash. Pocket check-protector. No. 1,398,235; Nov. 29.
Lipska, Edward, Fennimore, Wis. Gate. No. 1,398,870; Nov. 29.
Littleton, Clay, Hopewell, Va. Treating and recovery for resue oils, resins, gums, &c., which have been hardened. No. 1,398,438; Nov. 29.
Livingston, Robert L., Williamsport, Pa. Dividers. No. 1,398,871; Nov. 29.
Lloyd, Arthur H., Coventry, England. Lathe. No. 1,398,781; Nov. 29.
Lockett, George H. B., Gisborne, New Zealand. Artificial tooth. No. 1,398,560; Nov. 29.
Loeser, Leo, Buffalo, N. Y. Foot-warmer for car-platforms. No. 1,398,884; Nov. 29.
Loftus, Edward M., St. Paul, Minn. Pliers. No. 1,398,904; Nov. 29.
Loomis, Harold S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Interlocking apparatus for the control of railway-switches. No. 1,398,755; Nov. 29.
Lowndes, Loftus, Dublin, Ireland. Sash-cord fastener. No. 1,398,561; Nov. 29.
Lundgren, Jacob, Philadelphia, Pa., assignor to Carlson-Weastrom Co. Balancing-machine. No. 1,398,333; Nov. 29.
Lunken, Edmund H. (See Stickle, Frederick A., assignor.)
Luplow, Ronald, Phoenix, Ariz. Automobile-lock. No. 1,398,905; Nov. 29.
Lutsky, Harry, Stapleton, N. Y. Auxiliary fuel-tank for motor-vehicles. No. 1,398,334; Nov. 29.
Lux Clock Manufacturing Company. (See Lux, Paul, assignor.)
Lux, Paul, assignor to Lux Clock Manufacturing Company, Inc., Waterbury, Conn. Clock-frame. No. 1,398,597; Nov. 29.
Luzy, Antoine, Paris, France. Electromagnetic apparatus intended to magnetize permanent magnets. No. 1,398,526; Nov. 29.
Lynch Glass Machinery Company. (See Bridges, Edward G., assignor.)
Lynch, James B., Syracuse, N. Y. Non-collapsible tire. No. 1,398,700; Nov. 29.
L-W-F Engineering Company, Inc. (See Thomas, Stephen, assignor.)
Lyster, Herman S., Indianapolis, Ind. Tire-protecting antiskid appliance. No. 1,398,732; Nov. 29.
MacLachlan, John C., assignor to Standard Food Products Company, St. Paul, Minn. Desiccating fluid mixtures. No. 1,398,735; Nov. 29.
MacLachlan, John C., assignor to Standard Food Products Company, St. Paul, Minn. Powdered meat product. No. 1,398,464; Nov. 29.
MacPherson, Warren, Cambridge, Mass. Elastic step-mat. No. 1,398,701; Nov. 29.
Mader, Joseph, Philadelphia, Pa., assignor to S. L. Allen & Co., Inc. Support for tractor steering-handles. No. 1,398,301; Nov. 29.
Mader, Joseph, Philadelphia, Pa., assignor to S. L. Allen & Co., Inc. Tractor steering-gear. No. 1,398,302; Nov. 29.
Madsen, Rasmus H., Los Angeles, Calif. Lawn-mower grinder. No. 1,398,906; Nov. 29.
Mager, James, 2d. (See McCollum, Alfred F., assignor.)
Maggi, Desiderio, Philadelphia, Pa. Boat lifting and launching mechanism. No. 1,398,702; Nov. 29.
Maloney, Michael D., Hadlock, Wash. Mechanical brake. No. 1,398,875; Nov. 29.
Manning, Maxwell, & Moore. (See Graesser, C. H., and Crocker, assignors.)
Manton, Henry D. (See Hull, John W., assignor.)
Markkula, Matt, Fort Bragg, Calif. Stake for flat-cars. No. 1,398,441; Nov. 29.
Martin, Haakon A., Christiania, Norway, assignor to The National Cash Register Company, Dayton, Ohio. Railway-ticket-issuing machine. No. 1,398,562; Nov. 29.
Mathis, Henry, Virginia, Minn. Chain-repair tool. No. 1,398,676; Nov. 29.
Matson, Edgar C., Handley, assignor of one-half to J. A. B. Holt, Pratt, W. Va. Thread holder and tensioner. No. 1,398,877; Nov. 29.
Matthews, Claude L., and W. A. Heinrich, assignors to W. N. Matthews and Brother, Inc., St. Louis, Mo. Safety-fuse switch-box. No. 1,398,335; Nov. 29.
Matthews, W. N., and Brother. (See Matthews, C. L., and Heinrich, assignors.)
Mattson, Ivar, Fairfield, Iowa. Animal-feeding device. No. 1,398,238; Nov. 29.
Maunders, Charles, Chilco, British Columbia, Canada. Device for supporting washers while upsetting the operative bolts or rivets. No. 1,398,365; Nov. 29.
Mayer, Waldemar F., Philadelphia, Pa., assignor to Taylor-Wharton Iron and Steel Company, Highbridge, N. J. Rotary pump or motor. No. 1,398,788; Nov. 29.
Measuregraph Company, The. (See Pedersen, Johannes Th., assignor.)
Mecky, A., Company. (See Mottlau, August J., assignor.)
Menton, Christian H. (See Hurtig, P. H., and Menton.)
Metcalf, Benjamin A. (See Nelson, Leon J., assignor.)
Meyer, Frederick, East Northport, N. Y. Collapsible core. No. 1,398,236; Nov. 29.
Meyer, William H., St. Louis, Mo., assignor, by mesne assignments, to The Davis Sewing Machine Company. Drain-pan for clothes-wringer. No. 1,398,837; Nov. 29.
McCollum, Alfred F., assignor of three-fifths to James Magee, 2d, Bloomsburg, Pa. Shuttle for sewing-machines. No. 1,398,872; Nov. 29.
McConoughey, Oscar H., San Francisco, Calif. Railway-rail and tie fastener, bed-plate, and anticreeping device. No. 1,398,885; Nov. 29.
McDaniel, Newton M., Carlton, assignor of one-half to C. L. Starr, Portland, Oreg. Non-skid attachment for vehicles. No. 1,398,942; Nov. 29.
McDonald, Frank J., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Edge-turning machine. No. 1,398,786; Nov. 29.
McFillen, Harry H., Toledo, Ohio. Multiple stamp. No. 1,398,733; Nov. 29.
McGahan, Frederick L., deceased, Los Angeles, Calif.; V. K. Walker, administratrix. Treating and handling products of combustion. No. 1,398,734; Nov. 29.
McGill, George F., Chicago, Ill. Change-maker. No. 1,398,299; Nov. 29.
McKee, Arthur G., Cleveland, Ohio. Apparatus for cleaning gases. No. 1,398,598; Nov. 29.
McLean, Charles W., Shavertown, N. Y. Milk-cooler. No. 1,398,787; Nov. 29.
McMaster, Frederick K., Birriwa, near Mudgee, New South Wales, Australia. Piston-ring. No. 1,398,439; Nov. 29.
McNames, William, Aberdeen, S. D. Automobile-check. No. 1,398,440; Nov. 29.
McNally, Stanley L. and J. D. Wilson, Scranton, Pa. Expanding device for pistons and plungers. No. 1,398,873; Nov. 29.
McNally, Thomas and W. S. Orr, assignors to The Central Steel Company, Massillon, Ohio. Hot top for ingot-molds. No. 1,398,874; Nov. 29.
McRae, Finlay A., Montreal, Quebec, Canada. Railway-car. No. 1,398,886; Nov. 29.
McVeety, Charles, Cheltenham, Pa. Means for promoting combustion. No. 1,398,300; Nov. 29.
Michaels, John, Westmount, Quebec, Canada. Desk. No. 1,398,227; Nov. 29.
Micucci, Nicalo, Philadelphia, Pa. Rewinding mechanism for talking-machines. No. 1,398,879; Nov. 29.
Mikolasek, Venceslaus F., Lankin, N. D. Ignition control. No. 1,398,789; Nov. 29.
Miller, Charles F., Columbus, Ohio. Stool. No. 1,398,985; Nov. 29.
Miller, Lee A. (See Payne, L. M., Miller, and Douglas.)
Miller, Robert W., Wilmington, Del. Resilient wheel. No. 1,398,880; Nov. 29.
Miller Rubber Company, The. (See Brucker, Ferdinand F., assignor.)
Mine and Smelter Supply Company, The. (See Leddell, William A., assignor.)
Miner, William H. (See Haseltine, Stacy B., assignor.)
Miner, William H. (See Johnson, Bradley S., assignor.)
Miner, William H. (See Johnson, George A., assignor.)
Miner, William H. (See O'Connor, John F., assignor.)
Mirrielees, James F., assignor, by mesne assignments, to The Avey Drilling Machine Company, Cincinnati, Ohio. Lubricating device for drill-presses and the like. No. 1,398,888; Nov. 29.
Miscampbell, Hugh, Duluth, Minn. Mixing-machine. No. 1,398,238; Nov. 29.
Mitchell, Anthony G. M., Melbourne, Victoria, Australia. Method and apparatus for determining viscosity. No. 1,398,678; Nov. 29.
Mitchell, Lucien C., Chicago, Ill. Parachute and folding the same. No. 1,398,302; Nov. 29.
Mitchell, Rowland B., assignor to Athol Manufacturing Company, Athol, Mass. Solvent for pyroxylin bodies. No. 1,398,239; Nov. 29.
Mobley, George W., Waynesboro, Ga. Boll-weevil eradicator. No. 1,398,909; Nov. 29.
Moore, Alpha E., Thorntown, Ind. Wiggler. No. 1,398,681; Nov. 29.
Moore, Charles W. (See Ryder, P. H., and Moore.)

Moore, Walter M., Portsmouth, Va. Safety attachment for air-brake systems. No. 1,398,900; Nov. 29.
Montgomery, Henry M., Cedar Vale, Kans. Fur-stretcher. No. 1,398,907; Nov. 29.
Monti, Bodo, Turin, Italy. Making jams, jellies, and marmalades of fruit. No. 1,398,139; Nov. 29.
Morgan, George F., New York, N. Y. Axle. No. 1,398,240; Nov. 29.
Morgan, John S., assignor to Thermal Industrial and Chemical (T. I. C.) Research Company, Limited, London, England. Recovering gases which have been absorbed by solids. No. 1,398,852; Nov. 29.
Morgan, John W. (See Pimple, E. J., and Morgan.)
Morrell, Albert H. (See Wishart, W., and Morrell.)
Morris, Herbert M., San Francisco, Calif. Binder for sheets, leaves, and the like. No. 1,398,227; Nov. 29.
Morris, John M. (See Fogwell, H. H., and Morris.)
Mottinu, August J., assignor to A. Mecky Company, Philadelphia, Pa. Coaster-brake. No. 1,398,583; Nov. 29.
Multicolor Company. (See Walte, Edwin E., assignor.)
Murphy, Walter P., New York, N. Y. Corrugated-sheet-metal car end. No. 1,398,643; Nov. 29.
Murphy, Walter P., New York, N. Y. Corrugated-sheet-metal car end. No. 1 398,644; Nov. 29.
Murphy, Walter P., New York, N. Y. Vertically-reinforced-sheet-metal car end. No. 1,398,645; Nov. 29.
Murphy, William H., Independence, Mo. Loose-leaf binder. No. 1,398,898; Nov. 29.
Murray, Walter Z., Richmond, Va. Roll-holder. No. 1,398 646; Nov. 29.
Muspratt, Frederic J., township of Woombye, Queensland, Australia. Instrument for supplying comminuted gold by air-pressure. No. 1,398,527; Nov. 29.
Muther, Lorenz. (See Wales, Alfred B., assignor.)
Muths, Howard A., Mobile, Ala. Leather-preserver. No. 1,398 600; Nov. 29.
Naamloose Vennootschap Wilton's Maschinefabrieken Scheepswerf. (See Van Affaire, Pieter, assignor.)
Napier, D., & Son Limited. (See Rowledge, Arthur J., assignor.)
National Cash Register Company, The. (See Martin, Haaken A., assignor.)
National Cash Register Company, The. (See Shipley, Bermis M., assignor.)
National Tube Company. (See Johnston, William H. assignor.)
National Tube Company. (See Upp, Edwin L., assignor.)
Nelson, Albin W., assignor to Whitin Machine Works, Whitinsville, Mass. Roll-spreader. No. 1,398,269; Nov. 29.
Nelson Joseph E., & Sons. (See Tanner, Inos B., assignor.)
Nelson, Leon J., Los Angeles, Calif., assignor of one-half to Benjamin A. Metcalf, Denver, Colo. Shoe-buffer. No. 1,398,839; Nov. 29.
Nesbitt, James A. (See Turner, T. R., and Nesbitt.)
Neuteboom, Boudewijn B., Detroit Mich. Internal-combustion engine. No. 1,398,703; Nov. 29.
Newton, Richard T., New York, N. Y. Automobile-bumper. (Reissue.) No. 15,238; Nov. 29.
Ney, J. M. Company, The. (See Pfunder, Emil L., assignor.)
Nickum, Walter D. Glendale, Calif. Electrode for electrical water-level-indicating apparatus and other electrical apparatus. No. 1,398,270; Nov. 29.
Nixon, Moses C., Chicago, Ill. Bed or attachment therefor. No. 1,398,271; Nov. 29.
Nolan, William E., Tulsa, Okla. Sealing the walls of deep wells. No. 1,398,563; Nov. 29.
North East Electrical Company. (See Lee, Thomas L., assignor.)
North, John M., Sparta, Ill. Coal-mine curtain-rod. No. 1,398,900; Nov. 29.
Nordqvist, Per E., Dufbo, Sundbyberg, Sweden. Friction-clutch and the like. No. 1,398,564; Nov. 29.
O'Connor, John F., Chicago Ill., assignor to W. H. Miner, Chazy, N. Y. Friction draft-gear for railway-cars. No. 1,398,704; Nov. 29.
O'Connor, John F., Chicago Ill., assignor to W. H. Miner, Chazy, N. Y. Friction shock-absorbing mechanism. No. 1,398,705; Nov. 29.
Ogur, Eugene, Jersey City, N. J. Meter for measuring granular material. No. 1,398,790; Nov. 29.
Oomigraph Company, The. (See Strawn, Ervin E., assignor.)
Orr, William S. (See McNally, T., and Orr.)
O-So-Easy Products Company. (See Perusse, George L., assignor.)
Osterberg, Carl T., assignor to A. O. Smith Corporation, Milwaukee, Wis. Corrugated-metal end for railway-cars. No. 1,398,241; Nov. 29.
Osterhout, Ivan L., Colfax, Wash. Adjustable reading-rack. No. 1,398,601; Nov. 29.
Overbury, Frederick C., Hilldale, N. J., assignor, by mesne assignments, to The Flinthote Company, Boston, Mass. Producing ornamental roofing. No. 1,398,272; Nov. 29.
Owens, William J., Chippenham, England. Adjustable tire-lever. No. 1,398,602; Nov. 29.
Packard Motor Car Company. (See Church, Harold D., assignor.)
Pascal, Paul, assignor to La Manufacture De Produits Chimiques Du Nord, Etablissements Kuhlmann, Paris, France. Process and apparatus for the manufacture of liquid sulfurous acid from dilute sulfurous-acid gas. No. 1,398,791; Nov. 29.
Paine, Arthur P., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp. No. 1,398,756; Nov. 29.
Palmer, Charles W. (See Briggs, J. F., and Palmer.)
Parham Auto Patents Corporation. (See Parham, William H., assignor.)
Parham, William H., assignor to Parham Auto Patents Corporation, Knoxville, Tenn. Vehicle-tire fastener. No. 1,398,668; Nov. 29.
Parker Manufacturing Company. (See Brown, Carl E., assignor.)
Parmenter, Brady, assignor to A. L. Atwood, Birmingham, Ala. Chuck for taper and straight-shank drills. No. 1,398,904; Nov. 29.
Paterson, Robert D. Fort Dodge, Iowa. Auxiliary lock. No. 1,398,465; Nov. 29.
Paulin, Josua G. Stockholm, Sweden. Pressure-gage log. No. 1,398,792; Nov. 29.
Payne, Luther M., Bethany, Okla., L. A. Miller, Greenville, and J. J. Douglas, Dallas, Tex. Cycle-car. No. 1,398,493; Nov. 29.
Pearce, Edwin S. (See Downing, I. S., and Pearce.)
Pearson, James H., assignor to Concrete Silo Company, Bloomfield, Ind. Cement-block machine. No. 1,398,442; Nov. 29.
Pedersen, Johannes T., Flushing, N. Y., assignor, by mesne assignments, to The Measuregraph Company. Clothometer-gage. No. 1,398,565; Nov. 29.
Pendergrass, Walter L., Mobile, Ala. Union-suit. No. 1,398,443; Nov. 29.
Peplinski, Glen, Mohawk, N. Y. Induction-coil. No. 1,398,793; Nov. 29.
Pepper, Frederick V., Los Angeles, Calif. Alarm mechanism. No. 1,398,240; Nov. 29.
Perkins, Louis J., Lewiston, Idaho. Tire-mounting. No. 1,398,566; Nov. 29.
Perri, Angelo, Bellingham, assignor to Reece Shoe Machinery Company, Boston, Mass. Machine for lasting stitched-down shoes. No. 1,398,823; Nov. 29.
Perry, Hubert M., assignor to S. L. Woods, Chicago, Ill. Antifriction-bearing. No. 1,398,390; Nov. 29.
Perusse, George L., Chicago, Ill., assignor to O-So-Esy Products Company. Mop. No. 1,398,567; Nov. 29.
Pesetersak, Gustav, Trenton, N. J. Mirror and comb holder for hats. No. 1,398,273; Nov. 29.
Pesetersak, Gustav, Trenton, N. J. Wrench. No. 1,398,374; Nov. 29.
Peterson, Jonathan, Brooklyn, assignor to Combination Machine Company, New York, N. Y. Packing and preserving plug-tobacco. No. 1,398,568; Nov. 29.
Peterson, Jonathan, Brooklyn, assignor to Combination Machine Company, New York, N. Y. Packing and preserving plug-tobacco. No. 1,398,569; Nov. 29.
Petteys, Willard A., Wilcox, Nebr. Grain cleaner, separator, and drier. No. 1,398,275; Nov. 29.
Petrovics, Fred J. (See Deam, Henry D., assignor.)
Pfunder, Emil L., Windsor, assignor to The J. M. Ney Company, Hartford, Conn. Chuck. No. 1,398,241; Nov. 29.
Pfunder, Xaver, Wohlen, Switzerland. Braiding-machine. No. 1,398,444; Nov. 29.
Phelps, Harry E., assignor to C. Kenyon Company, Inc., Brooklyn, N. Y. Coupling. No. 1,398,276; Nov. 29.
Pieper, Henri, Liege, Belgium. Ignition and combustion of combustibles in internal-combustion engines. No. 1,398,944; Nov. 29.
Pierce, Robert A., Los Angeles, Calif. Slide-rule. No. 1,398,914; Nov. 29.
Pilnacek, Michael, New York, N. Y. Toy pistol. No. 1,398,277; Nov. 29.
Piper, Joseph W., Lowell, Mass. Boiler for steam and hot-water heating. No. 1,398,794; Nov. 29.
Pittenger, Jacob A., Millburn, N. J. Sash-retainer. No. 1,398,795; Nov. 29.
Pittman, Reinhart W., New York, N. Y. Shutter for motion-picture apparatus. No. 1,398,242; Nov. 29.
Pleasa, Chester W. Sands, Mich. Trapper's compound tool. No. 1,398,342; Nov. 29.
Pobe, Charles E. (See Flirt, Alexander, assignor.)
Podstad, Frank, Wyandotte, Mich. Barrel-assembling machine. No. 1,398,737; Nov. 29.
Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-building machine. No. 1,398,343; Nov. 29.
Porter, Charles S., Houston, Tex. Concrete-wall mold. No. 1,398,915; Nov. 29.
Post, Claude L., Chicago, Ill. Inking-roller. No. 1,398,910; Nov. 29.
Potter, Clarence S. and Warren T. (See House, Herbert E., assignor.)
Potter, Wilbur C., and E. H. Stines, New Brunswick, N. J. Attachment for knitting-machines. No. 1,398,570; Nov. 29.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. No. 1,398,801; Nov. 29.
Prisio, Martin J. (See Rosskopf, Fritz, assignor.)
Provost, James J. (See Goguen, C. J., and Provost.)
Prucessman, Albert, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Condenser and making the same. (Reissue.) No. 15,241; Nov. 29.
Pusning, Franz, Pittsburgh, Pa. Method of and apparatus for cracking hydrocarbons. (Reissue.) No. 15,239; Nov. 29.

Pullock, William J., Germiston, Transvaal, South Africa. Lighting-fitting. No. 1,398,276; Nov. 29.
Putnam, Alden L., Detroit, Mich., assignor, by mesne assignments, to Detroit Pressed Steel Company, Wilmington, Del. Metallic vehicle-wheel. No. 1,398,735; Nov. 29.
Putnam, Alden L., Detroit, Mich., assignor to Detroit Pressed Steel Company, Wilmington, Del. Vehicle-wheel. No. 1,398,736; Nov. 29.
Quick, Elroy I., et al. (See Erik, Emil, assignor.)
R. E. D. Engine Company. (See Ford, Eugene A., assignor.)
Radebaugh, Randolph F. (See Christensen, Mogens C., assignor.)
Raich, John B., Gary, assignor of one-half to J. A. Baumgartner, South Bend, Ind. Meat-cutting machine. No. 1,398,571; Nov. 29.
Rapson, Frederick L., Liverpool, England. Lifting-jack for motor and other vehicles. No. 1,398,279; Nov. 29.
Rapson, Frederick L., Liverpool, England. Self-starting device for internal-combustion engines. No. 1,398,796; Nov. 29.
Rapson, Frederick L., Liverpool, England. Ignition sparking plug for internal-combustion engines. No. 1,398,797; Nov. 29.
Raven, John, Deervale, via Armidale, New South Wales, Australia. Lifting-jack. No. 1,398,798; Nov. 29.
Raymond, Fred I., Two Buttes, Colo. Device for enabling an airplane-motor to develop its full power at high altitudes. No. 1,398,280; Nov. 29.
Reading, Harold C., Dewsbury, England. Internal-combustion engine. No. 1,398,647; Nov. 29.
Rea, Jonathan H., Omaha, Nebr. Aeroplane. No. 1,398,466; Nov. 29.
Rechnitzer, Alexander, Berlin, Germany, assignor to Autarit-Gesellschaft m. b. H., Vienna, Austria. Calculating-machine. No. 1,398,945; Nov. 29.
Recher, Adolph C., Oakville, assignor to The Chase Companies, Inc., Waterbury, Conn. Flashlight. No. 1,398,799; Nov. 29.
Red Cross Manufacturing Company. (See Bartlemay, Arlie, assignor.)
Regero, Frank, Macon, Ga. Fountain-pen. No. 1,398,800; Nov. 29.
Reece Button Hole Machine Company, The. (See Klewicz, John, assignor.)
Reece Button Hole Machine Company, The. (See La Fleur, Benjamin S., assignor.)
Reece Shoe Machinery Company. (See Perri, Angelo, assignor.)
Reed, Luke D., Burnham, Ill. Flying-boat. No. 1,398,467; Nov. 29.
Reid, James H., Readsboro, Vt., assignor to T. I. Hogan, Boston, Mass. Process of and material for reducing ore and making gas. No. 1,398,572; Nov. 29.
Reinl, William, Secaucus, N. J. Sash-fastener. No. 1,398,573; Nov. 29.
Remy Electric Company, The. (See Replogle, James B., assignor.)
Replogle, James B., Detroit, Mich., assignor to The Remy Electric Company. Regulating device. No. 1,398,648; Nov. 29.
Reuter, Fredereck J., Oakland, Calif. Toy vehicle. No. 1,398,392; Nov. 29.
Rice, Oliver M., Birmingham, Ala. Tool for demountable rims. No. 1,398,801; Nov. 29.
Rice, Stephen, Omaha, Nebr. Tire. No. 1,398,574; Nov. 29.
Richards, Ray S., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Charging device. No. 1,398,649; Nov. 29.
Richardson, John H., Melrose Highlands, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Last-pulling machine. No. 1,398,344; Nov. 29.
Riley, George W., assignor of one-fifth to J. J. Shipp, Foute, Ark. Flying-machine. No. 1,398,393; Nov. 29.
Rimple, E. J., and J. W. Morgan, San Jose, Calif. Power-lift for plows. No. 1,398,494; Nov. 29.
Rinehart, William L., St. Louis, Mo. Power-transmission device. No. 1,398,740; Nov. 29.
Roberts Brass Company. (See Zannoth, Robert C., assignor.)
Roberts, George S., Bend, Oreg. Steam-boiler and steam-power generation. No. 1,398,395; Nov. 29.
Robbins, Hallet R., Manchester, N. H. Concentration of ores. No. 1,398,294; Nov. 29.
Robinson, James. (See Erskine-Murray, J., and Robinson.)
Rockland Finishing Co. (See Jacoby, Raymond W., assignor.)
Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)
Roebling, Millard F., Cincinnati, Ohio. Time-actuated electrical switch mechanism. No. 1,398,916; Nov. 29.
Rodger Ballast Car Company. (See Hart, Harry S., assignor.)
Rodger Ballast Car Company. (See Hindahl, David, assignor.)
Rogers, G. L., and R. R. Gray, Snoqualamie Falls, Wash. Saw-controlling mechanism. No. 1,398,495; Nov. 29.
Rohrer, John M., Orwigsburg, Pa. Dirigible headlight. No. 1,398,802; Nov. 29.
Rose, John M., Philadelphia, Pa. Grinder or sharpener for knives, &c. No. 1,398,741; Nov. 29.
Rosenfeld, Harry. (See Rosenfeld, Joseph A. and H.)
Rosenfeld, Joseph A. and H., Cleveland, Ohio. Cloth-cutting and pattern-marking machine. No. 1,398,896; Nov. 29.
Rosskopf, Fritz, West Hoboken, N. J., assignor to M. J. Prisio, Kingston, Pa. Measuring and plotting instrument. No. 1,398,243; Nov. 29.
Rotary King Safety Razor Company. (See King, John L., assignor.)
Rothrock, William, South Allentown, Pa. Washboard. No. 1,398,445; Nov. 29.
Rothwell, Bertram S., Cleveland, Ohio. Oil-burner. No. 1,398,650; Nov. 29.
Rowledge, Arthur J., assignor to D. Napier & Son, Limited, London, England. Valve-gear for internal-combustion engines. No. 1,398,651; Nov. 29.
Rozanski, Walter J., Pittsburgh, Pa. Roundabout. No. 1,398,652; Nov. 29.
Rudin, Nathan. (See Snider, J. M. Segal, Chaitt, and Rudin.)
Ruediger, Ernest H., Bismarck, N. D. Electric thermo-regulator. No. 1,398,281; Nov. 29.
Ruggles, Horace F., West Englewood, N. J. Tractor-coupling for sugar-carts. No. 1,398,575; Nov. 29.
Rust, Robert R., New York, N. Y. Making cast chains. No. 1,398,700; Nov. 29.
Rutgerswerke Aktiengesellschaft. (See Szarvassy, I. and Benesi, assignors.)
Ryder, F. H., and C. W. Moore, Bucyrus, Ohio. Oil-burner. No. 1,398,397; Nov. 29.
Saltalamachia, Anthony F., Huntington Park, Calif. Table. No. 1,398,496; Nov. 29.
Salter, William A., Kansas City, Mo. Cylinder-lapping tool. No. 1,398,398; Nov. 29.
Safko, John A., Munson, Pa. Nut-lock. No. 1,398,446; Nov. 29.
San Diego Consolidated Gas and Electric Company. (See Watson, William V., assignor.)
Santin, J. J., and G. M. White, El Reno, Okla. Traffic-signal for motor-vehicles. No. 1,398,653; Nov. 29.
Sarup, Andrew J., assignor to A. M. Sarup, North Vancouver, British Columbia, Canada. Safety-hook. No. 1,398,654; Nov. 29.
Sarup, Annie M. (See Sarup, Andrew J., assignor.)
Scientific Specialty Company, The. (See Stewart, Alexander T., assignor.)
Schauman, Karl O., San Francisco, Calif. Bumper-actuated vehicle-control mechanism. No. 1,398,899; Nov. 29.
Schenck, Pierce D., Dayton, Ohio, assignor to The Duriron Company, Inc. Heat resisting iron. No. 1,398,917; Nov. 29.
Schenck, Pierce D., Dayton, Ohio, assignor to The Duriron Company. Acid-resisting iron. No. 1,398,918; Nov. 29.
Scherer, Adolph, Philadelphia, Pa. Lamp-shade. No. 1,398,305; Nov. 29.
Schiff, Henry T., Chicago, Ill., assignor to Vitanola Talking Machine Co. Sound-reproducing machine. No. 1,398,742; Nov. 29.
Schiff, Samuel L., assignor to Vitanola Talking Machine Company, Chicago, Ill. Brake or stop device for sound-reproducing machines. No. 1,398,743; Nov. 29.
Schinkes, Albert. (See Keller, W. H., and Schinkes.)
Schmidt, Wilhelm, Wilhelmshöhe, near Cassel, Germany, assignor, by mesne assignments, to Superheater Company. Power-engine plant. No. 1,398,946; Nov. 29.
Schneider, John J., Lathrop, Mo. Safety-chain. No. 1,398,803; Nov. 29.
Schnuck, Carl F. (See Bowen, D. R., and Schnuck.)
Schreiber, Walter T., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Motor-fuel for aeroplanes. No. 1,398,947; Nov. 29.
Schreiber, Walter T., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Motor-fuel. No. 1,398,948; Nov. 29.
Schreder, Nikolaus and S., Cleveland, Ohio. Combined coal and gas stove. No. 1,398,400; Nov. 29.
Schreder, Stefan. (See Schreder, Nikolaus and S.)
Schuls, M., Co. (See Gustafson, Adolp F., assignor.)
Schumacher, Albert J., San Francisco, Calif. Manufacture of hydrogen peroxid. No. 1,398,468; Nov. 29.
Schwarting, Hugo, Green Bay, Wis. Hand twine-cutter. No. 1,398,919; Nov. 29.
Schwarz, Albert. (See de Dragic, T., and Schwarz.)
Schwarz, Justin O., New York, N. Y., and G. Bjorklund, West New York, N. J. Pneumatic action. No. 1,398,469; Nov. 29.
Schwartz, Charles, Villeurbanne, assignor to Societe Gillet & fils, Lyon, Rhone, France. Treatment of vegetable fibers. No. 1,398,804; Nov. 29.
Schweinert, Maximilian C., West Hoboken, N. J. Rim-nut. No. 1,398,604; Nov. 29.
Schylander, John F., Chicago, Ill. Cabinet. No. 1,398,744; Nov. 29.
Scott, George. (See Chicken, C. B., and Scott.)
Seel, Paul C., assignor to Eastman Kodak Company, Rochester, N. Y. Dehydrating nitro-cellulose and reducing the fire risk thereof. No. 1,398,911; Nov. 29.
Segal, Nathan. (See Smiler, J. M., Segal, Chaitt, and Rudin.)
Selden, Arthur R., Rochester, N. Y. Loose-leaf binder. No. 1,398,306; Nov. 29.
Self Bailing Life Boat Company, The. (See Togersen, Bernt E., assignor.)

Seller, Arthur. (See Weber, A. Voorsanger, and Seller.)
Sentinel Alarm Co. (See Hatcher, James M., assignor.)
Severance, W. E. (See Hotchkiss, Thomas, assignor.)
Shaef, Charles B., Norristown, Pa. Auxiliary-air inlet. No. 1,398,469; Nov. 29.
Sharpe, George M., Steubenville, Ohio. Gas-burner. No. 1,398,470; Nov. 29.
Shaw, Ryland R., Decatur, Ill. Automobile-license fastener. No. 1,398,401; Nov. 29.
Shawnee Mower Company. (See Worthington, Charles C., assignor.)
Shelburne, Augustine, South Pasadena, Calif. Air-brush. No. 1,398,920; Nov. 29.
Sheldon, Thomas C. (See Legendre, Ovide, assignor.)
Shipper, Isaac D., assignor to The J. G. Brill Company, Philadelphia, Pa. Current-collector. No. 1,398,806; Nov. 29.
Shipley, Bernis M., assignor to The National Cash Register Company, Dayton, Ohio. Cash-register. No. 1,398,576; Nov. 29.
Schrager, Cecil. (See Lance, Robert R., assignor.)
Shipp, J. J. (See Riley, George W., assignor.)
Short, Fred H., Waterville, Me. Heating plant. No. 1,398,921; Nov. 29.
Skally, Bernard H., Bridgeport, Conn. Dust-cap for lubricating cups or nipples. No. 1,398,877; Nov. 29.
Silver, Bennett C., Chicago, Ill. Toy bed. No. 1,398,745; Nov. 29.
Simonds, Frank, Grand Haven, Mich. Wall construction. No. 1,398,402; Nov. 29.
Simms Magneto Company, The. (See Hoyt, Frederick A., assignor.)
Simms Magneto Company, The. (See Kliesrath, V. W., and Hoyt, assignors.)
Simmons, Ralph C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for arranging heel-blanks. No. 1,398,845; No. 29.
Smart, Joseph S., Detroit, Mich. Collapsible bench-leg. No. 1,398,471; Nov. 29.
Smiley, Jacob M. N. Segal, J. Chaitt, and N. Endin, Philadelphia, Pa. Phonograph-record album. No. 1,398,746; Nov. 29.
Smith, A. O., Corporation. (See Osterberg, Carl F., assignor.)
Smith, Jesse A., Des Moines, Iowa. Egg-turnover pan. No. 1,398,655; Nov. 29.
Smith, Rexford M., Washington, D. C., assignor, by mesne assignments, to Connecticut Aircraft Company, New Haven, Conn. Flying-machine. No. 1,398,922; Nov. 29.
Smith, Robert W., Redditch, England. Antivibration handle-bar for motorcycles, cycles, and the like. No. 1,398,447; Nov. 29.
Smith, Robert W., Redditch, assignor of one-half to The Enfield Cycle Company, Limited, Redditch, Worcester, England. Combined mudguard and carrier member for use on motor and other cycles. No. 1,398,448; Nov. 29.
Smith, Samuel C., assignor of one-half of L. L. Hoffmann, Chicago, Ill. Water-heater. No. 1,398,747; Nov. 29.
Smith, T. I. Company. (See Curtis, Theron S., assignor.)
Smith, William C., Robinson, Ill. Rim. No. 1,398,807; Nov. 29.
Smithfield, V. R. (See Combs, James M., assignor.)
Societe Gillet & Fils. (See Schwartz, Charles, assignor.)
Société Lyonnaise D'Industrie Mecanique. (See Adenot, Marius, assignor.)
Soule, Leslie W., Seattle, Wash. Automobile-signal. No. 1,398,922; Nov. 29.
Southern Agricultural Chemical Corporation. (See Tuttle, Arthur L., assignor.)
Sowers, George S., Spring Hill, Kans. Supporting means for hay-slings. No. 1,398,472; Nov. 29.
Spangler, Henry R., Pueblo, Colo. Tire-pressure indicator and alarm. No. 1,398,449; Nov. 29.
Spartan Needle Company. (See Taft, Sydney E., assignor.)
Spartan Needle Company. (See Wilcomb, J. Frank, assignor.)
Spiro, Charles, New York, N. Y. Margin-gage device. No. 1,398,252; Nov. 29.
Spooner, Thomas, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Compression-rheostat. No. 1,398,605; Nov. 29.
Srill, Edward A., Chicago, Ill. Wire-bound box. No. 1,398,606; Nov. 29.
St. Clair, William C. (See Buschino, Charles, assignor.)
Stahl, George W., Chicago, Ill. Paint-package and making it. No. 1,398,403; Nov. 29.
Standard Feed Products Company. (See MacLachlan, John C., assignor.)
Standard Rubber Company. (See Allyn, Harley H., assignor.)
Stanley, Conquest J. (See Wray, Charles, assignor.)
Starr, Charles L. (See McDaniel, Newton M., assignor.)
Steele, Herbert H., Brooklyn, assignor, by mesne assignments, to John H. Eggers Company, Inc., New York, N. Y. Coin-card and making the same. No. 1,398,607; Nov. 29.
Stein, Adolph H., executor. (See Hanek, Arthur B.)
Stent, Dudley H., Delhi, India. Means for securing rails or heavy bodies to concrete sleepers, walls, or floors. No. 1,398,749; Nov. 29.
Stephens, William E., Sunset, Tex. Burglar-alarm. No. 1,398,924; Nov. 29.
Stevens, William A., Maidstone, England. Power-transmitting mechanism. No. 1,398,608; Nov. 29.
Stevens, William C., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Method and apparatus for manufacturing tires. No. 1,398,749; Nov. 29.
Stewart, Alexander, Clintonville, Wis. Worm-driven four-wheel-drive tractor. No. 1,398,570; Nov. 29.
Stewart, Alexander T., Philadelphia, assignor to The Scientific Specialty Company, Pittsburgh, Pa. Fruit or vegetable washer. No. 1,398,473; Nov. 29.
Stewart, John H., Cincinnati, Ohio. Aeroplane. No. 1,398,750; Nov. 29.
Stewart, William C., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-feeding mechanism. No. 1,398,846; Nov. 29.
Stice, Fred W., and J. H. Stice, Tama, Iowa. Vending-machine. No. 1,398,283; Nov. 29.
Stice, Jesse H. (See Stice, Fred W., and J. H.)
Stickle, Frederick A., assignor to R. H. Loukes, Cincinnati, Ohio. Weatherstrip. No. 1,398,284; Nov. 29.
Stines, Edward H. (See Potter, W. C., and Stines.)
Stirling, Charles P., assignor to Cott-a-lap Co., Somerville, N. J. Continuous printing by lithography. No. 1,398,506; Nov. 29.
Stogner, John E., Lancaster, S. C. Ice-hook. No. 1,398,809; Nov. 29.
Story, Fred D., Center Point, Ark. Wagon-spring. No. 1,398,610; Nov. 29.
Stott, William J., Worcester, Mass. Twine-holder. No. 1,398,847; Nov. 29.
Straight, Merton T., Adel, Iowa. Phonograph-needle. No. 1,398,529; Nov. 29.
Straub, Oscar I. (See Wildrick, Meade, assignor.)
Strawn, Ervin E. assignor to The Omnigraph Company, Des Moines, Iowa. Paper-cutting device. No. 1,398,474; Nov. 29.
Strawn, Ervin E., assignor to The Omnigraph Company, Des Moines, Iowa. Printing and ruling machine. No. 1,398,475; Nov. 29.
Strawn, Ervin E., Des Moines, Iowa. Sales-book cover. No. 1,398,530; Nov. 29.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred F., assignor.)
Sührcke, Harry A., Hamburg, Germany. Film-cleaning machine. No. 1,398,811; Nov. 29.
Sullivan Machinery Company. (See Halvorsen, Halbert B., assignor.)
Sullivan Machinery Company. (See Wineman, Wade H., assignor.)
Sulzer, Albert F., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose-Acetate Composition. No. 1,398,949; Nov. 29.
Sundhausen, Hermann, Essen, assignor to Fried Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Disk-shaped commutator for gyroscope-motors. No. 1,398,404; Nov. 29.
Superheater Company. (See Schmidt, Wilhelm, assignor.)
Sykes, George, assignor to Sykes Standard Fruit Wrap Company, Fowryn, Calif. Packing device. No. 1,398,405; Nov. 29.
Sykes Standard Fruit Wrap Company. (See Sykes, George, assignor.)
Syler, Harry B., Norton, Kans. Spring suspension for automobiles and other vehicles. No. 1,398,812; Nov. 29.
Szarvassy, Imre, Budapest, Hungary, and F. H. Bensel, Ratibor, assignors to Rutgerswerke Aktiengesellschaft, Berlin, Germany. Production of soot-carbon, retort-graphite, and other carbon products from natural gas. No. 1,398,751; Nov. 29.
Taft, Sydney E., Framingham, Mass., assignor to Spartan Needle Company, Providence, R. I. Knitting-needle. No. 1,398,813; Nov. 29.
Tait, William S., assignor to Hydraulic Pressed Steel Company, Cleveland, Ohio. Joist-bracket. No. 1,398,579; Nov. 29.
Tanenbaum, Michael, Brooklyn, N. Y. Drill. No. 1,398,614; Nov. 29.
Tanner, Inos B., assignor to J. B. Nelson & Sons, Chicago, Ill. Filtering apparatus. No. 1,398,285; Nov. 29.
Tarkington, Harry K., assignor of one-half to H. L. Babcock, Chicago, Ill. Carbureter. No. 1,398,707; Nov. 29.
Taussig, Gottlieb, New York, N. Y. Coloring motion-picture films. No. 1,398,294; Nov. 29.
Taylor, Percival, Bolton, assignor of one-half to Jabez Johnson Hodgkinson and Pearson Limited, Manchester, Lancaster, England. Terry or looped fabric. No. 1,398,752; Nov. 29.
Taylor-Wharton Iron and Steel Company. (See Apgar, Stanley, assignor.)
Taylor-Wharton Iron and Steel Company. (See Mayer, Waldemar F., assignor.)
Ternstedt Manufacturing Company. (See Heintz, Ernest R., assignor.)
Tessier, Julien, assignor to Eastman Kodak Company, Rochester, N. Y. Camera-back. No. 1,398,950; Nov. 29.
Tessier, Julien, assignor to Eastman Kodak Company, Rochester, N. Y. Photographic plateholder. No. 1,398,951; Nov. 29.
Tessier, Julien, assignor to Eastman Kodak Company, Rochester, N. Y. Color-screen carrier. No. 1,398,952; Nov. 29.
Thermal Industrial and Chemical (T. I. C.) Research Company. (See Morgan, John S., assignor.)

Thermoheat Products Corporation. (See Willson, Walter W., assignor.)
Thomas Rubber Co., Long Island City, assignor, by mesne assignments, to L-W-P Engineering Company, Inc., College Point, Long Island, N. Y. Producing laminated constructions and apparatus for use in connection therewith. No. 1,398,244; Nov. 29.
Thompson, Albert B., assignor to Anderson-Barngrover Mfg. Co., San Jose, Calif. Pressure-cooker. No. 1,398,476; Nov. 29.
Thompson, Ella, Chicago, Ill. Corset. No. 1,398,657; Nov. 29.
Thompson, George K., Maplewood, N. J., assignor to American Telephone and Telegraph Company. Selective signaling system. No. 1,398,587; Nov. 29.
Thompson, Herbert S., Pendhill, N. Y. Curtain for locomotive-cabs. No. 1,398,907; Nov. 29.
Thring, Leonard G. P., Cambridge, England. Pressure indicator or recorder. No. 1,398,683; Nov. 29.
Thuman, Frederic, London, England. Gas-producer. No. 1,398,680; Nov. 29.
Tidmarsh, William R., assignor of one-half to Union Iron Works, Bangor, Me. Wood-pulp grinder. No. 1,398,753; Nov. 29.
Tibbels, Myron B., Fremont, Ohio. Gib-adjuster. No. 1,398,610; Nov. 29.
Tibbetts, Milton, Detroit, Mich., assignor, by mesne assignments, to J. E. Chilson, Trustee, Rochester, N. Y. Gear-cutting machine. No. 1,398,477; Nov. 29.
Timson, William, assignor to W. & T. Avery, Limited, Birmingham, England. Weighing scale. No. 1,398,708; Nov. 29.
Tinsley, James B., Phoenix, Ariz. Pump. No. 1,398,450; Nov. 29.
Tisch, George C. L., Elizabeth, N. J. Chenille untwisting and winding machine. No. 1,398,764; Nov. 29.
Togersen, Bernt E., Seattle, Wash., assignor to The Self Bailing Life Boat Company, Inc. Lifeboat. No. 1,398,451; Nov. 29.
Toombs, Claude H., assignor to The Toombs Manufacturing Company, Geneva, Ill. Water-heater. No. 1,398,755 Nov. 29.
Toombs Manufacturing Company, The. (See Toombs, Claude H., assignor.)
Toplitz, Samson L., New York, N. Y. Mop. No. 1,398,245; Nov. 29.
Trask, F. G., Reno, N. D. Apparatus for supplying air to the exterior of hulls of ships. No. 1,398,246; Nov. 29.
Trenkamp, Herman J. (See Kneier, Joseph, assignor.)
Trojan Powder Company. (See Brownstein, Jesse B., assignor.)
Troy Wagon Works Company, The. (See Eccard, John F., assignor.)
Trusty, James F., and D. O. Davison, Kansas City, Mo.; said Davison assignor to said Trusty. Machine for making and laying pipe. No. 1,398,816; Nov. 29.
Turner, Thomas R., Toronto, and J. A. Nesbitt, London, Ontario, Canada. Attachment for hydrocarbon-engines. No. 1,398,406; Nov. 29.
Tuttle, Arthur L., Atlanta, Ga., assignor to Southern Agricultural Chemical Corporation, New York, N. Y. Manufacture of superphosphate. No. 1,398,616; Nov. 29.
Tyler, Charley P., Sherman, Tex. Car-rail hose-bridge. No. 1,398,407; Nov. 29.
Tyler, Harry F., Redondo Beach, Calif. Furniture-bumper. No. 1,398,925; Nov. 29.
U. S. Armor Corporation. (See de Dragic, T., and Schwarz, assignors.)
U. S. Light & Heat Corporation. (See Biles, William L., assignor.)
U. S. Industrial Alcohol Co. (See Schreiber, Walter T., assignor.)
U. S. Light & Heat Corporation. (See Engel, Frank, assignor.)
Union Iron Works. (See Tidmarsh, William R., assignor.)
Union Switch & Signal Company. (See Lewis, Lloyd V., assignor.)
Union Switch & Signal Company, The. (See Loomis, Harold S., assignor.)
United Mines and Manufacturing Company, The. (See Kohler, Ernest, assignor.)
United Printing Machinery Company. (See Upham, B. F., and Belluche, assignors.)
United Shoe Machinery Corporation. (See Bates, Arthur, assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Pope, Joseph H., assignor.)
United Shoe Machinery Corporation. (See Richardson, John H., assignor.)
United Shoe Machinery Corporation. (See Simmons, Ralph C., assignor.)
United Shoe Machinery Corporation. (See Stewart, William C., assignor.)
United States Automotive Corporation. (See Arbuckle, Samuel F., assignor.)
United States Spray Company. (See Gerhart, Bayless W., assignor.)
Upham, Burt F., Brookline, and F. R. Belluche, Mansfield, Mass., assignors to United Printing Machinery Company, Boston, Mass. Bed-motion for sheet-printing presses. No. 1,398,817; Nov. 29.
Upp, Edwin L., Lorain, Ohio, assignor to National Tube Company, Pittsburgh, Pa. Automatic dump-trough-operating apparatus. No. 1,398,618; Nov. 29.
Van Affaire, Pieter, assignor to Naamloose Vennootschap Wilton's Maschinenfabrieken Schiedam, Rotterdam, Netherlands. Dock. No. 1,398,825; Nov. 29.
Van Alstyn, Albert T., Grand Rapids, Mich. Paper receptacle or tray. No. 1,398,611; Nov. 29.
Van Dresar, Elmer L., St. Paul, Minn. Tie-plate-rail anchor. No. 1,398,478; Nov. 29.
Van Guelpen, Louis J., Cincinnati, Ohio. Inking-machine. No. 1,398,627; Nov. 29.
Van Oesterwyck, Jean, Loncin Ans, Belgium. Water-tube boiler. No. 1,398,948; Nov. 29.
Vance, Herman B. (See La Pointe, William B., assignor.)
Venable, William M., Pittsburgh, Pa., assignor to Stewart-Knox Company. Excavating-bucket. No. 1,398,479; Nov. 29.
Victor, Joseph B., assignor to Victor Manufacturing & Gasket Co., Chicago, Ill. Gasket. No. 1,398,612; Nov. 29.
Victor Manufacturing & Gasket Co. (See Victor, Joseph B., assignor.)
Vincent, Frank S., Grand Rapids, Mich. Extracting gases from liquids. No. 1,398,658; Nov. 29.
Vitanola Talking Machine Company. (See Bachmert, Otto, assignor.)
Vitanola Talking Machine Co. (See Schiff, Henry T., assignor.)
Vitanola Talking Machine Company. (See Schiff, Samuel L., assignor.)
Voges, Anthony. (See Voges, August B. and A.)
Voges, August B. and A., Cincinnati, Ohio. Pump. No. 1,398,408; Nov. 29.
Vollmer, John, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Gun-barrel built of an A-tube and a breech-piece. No. 1,398,619; Nov. 29.
Von Appen, August, Kiel, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Apparatus for investigating an electrical gyroscopic aring-gear. No. 1,398,828; Nov. 29.
Voorsanger, Leon. (See Weber, A. Voorsanger, and Seller.)
Wackwitz, Ernest F., Arlington Heights, assignor to Gray & Davis Inc., Cambridge, Mass. Focusing apparatus for lamps. No. 1,398,531; Nov. 29.
Wagner, Edward H., Providence Forge, Va. Adjustable radius-rod. No. 1,398,820; Nov. 29.
Wagnon, Ira W., assignor of one-half to John F. Brown, Casa Grande, Ariz. Automatic rifle. No. 1,398,452; Nov. 29.
Waite, Edwin E., assignor, by mesne assignments, of one-half to Multicolor Company, Framingham, Mass. Bearing material. No. 1,398,926; Nov. 29.
Waite, Harry F., New York, N. Y. Electric switch. No. 1,398,560; Nov. 29.
Wales, Alfred B., Whitman, assignor to L. Muther, Newton, Mass. Web feeding and cutting apparatus. No. 1,398,581; Nov. 29.
Walker, Joah H., Woolwich, England. Lifting or hauling gear. No. 1,398,756; Nov. 29.
Wallace, Thomas B. S., Chicago, Ill. Appliance for holding films for dental radiographs. No. 1,398,247; Nov. 29.
Walker, Viola K., administratrix. (See McGahan, Frederick L., assignor.)
Waram, Charles E., Cincinnati, and D. H. Benjamin, Cleveland Heights, Ohio, assignors to The American Laundry Machinery Company, Norwood, Ohio. Ironing-machine. No. 1,398,248; Nov. 29.
Warmoth, George W., Indianapolis, Ind. Wood block paving. (Reissue.) No. 15,240; Nov. 29.
Washburn, Frank S., Rye, assignor to American Cyanimid Company, New York, N. Y. Producing ferrocyanids. No. 1,398,453; Nov. 29.
Watkins, Edmond M., Trenton, N. J. Fastener. No. 1,398,288; Nov. 29.
Watson, William V., assignor of one-half to San Diego Consolidated Gas and Electric Company, San Diego, Calif. Plastic composition and making the same. No. 1,398,613; Nov. 29.
Weber, Anton, Oakland, L. Voorsanger and A. Seller, San Francisco, Calif. Dispensing apparatus. No. 1,398,248; Nov. 29.
Weeks, Walter L., Patchogue, N. Y. Paper-holder. No. 1,398,308; Nov. 29.
Weinman, Milton, Chicago, Ill. Desk-pad. No. 1,398,249; Nov. 29.
Weisgarber, Kate A., Vibank, Saskatchewan, Canada. Cooking device. No. 1,398,757; Nov. 29.
Wells, Fred and M., Towanda, Pa. Split rim. No. 1,398,659; Nov. 29.
Wells, Martin. (See Wells, Fred and M.)
Wesdulin, Joseph T., New York, assignor to Columbia Machine Works & Malleable Iron Co., Brooklyn, N. Y. Oil-burner. No. 1,398,709; Nov. 29.
Westerbeck, Frederick, St. Louis, Mo. Sheet-metal box. No. 1,398,409; Nov. 29.
Western Electric Company, Inc. (See Arnold, Harold D., assignor.)
Western Electric Company. (See Fowler, Clarence B., assignor.)
Western Electric Company. (See Pruessman, Albert, assignor. (Reissue.)
Westinghouse Electric Products Company. (See Forshee, Frank F., assignor.)

Westinghouse Electric & Manufacturing Company. (See Hellmund, Rudolf H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Spooner, Thomas, assignor.)
Whalley, Thomas H., Blackburn, England. Loom-shuttle. No. 1,296,089; Nov. 29.
Wheeler, Robert B., New York, N. Y. Indicating attachment for sound-records. No. 1,296,289; Nov. 29.
White, George M. (See Smith, J. J., and White.)
Whiting Machine Works. (See Nelson, Albin W., assignor.)
Whitlock, Lester J., Pomona, Calif. Temperature-moderator for orchards and the like. No. 1,296,267; Nov. 29.
Whitmore, Horace G., and C. T. Glaeser, Minneapolis, Minn. Windshield-shade. No. 1,296,661; Nov. 29.
Wiegand, Edwin L., Pittsburgh Pa. Embedding process. No. 1,296,410; Nov. 29.
Wildrick, Meade, U. S. Army, assignor of one-half to O. I. Straub, Fort Howard, Md. Aerial torpedo or mine. No. 1,296,220; Nov. 29.
Wilcomb, J. Frank, Worcester, Mass., assignor to Spartan Needle Company, Providence, R. I. Knitting instrument. No. 1,296,221; Nov. 29.
Williams, Brice, Kokomo, Ind. Vending-machine. No. 1,296,351; Nov. 29.
Williams, Frederick W. B., London, England. Apparatus for use in the manufacture of superphosphate. No. 1,296,350; Nov. 29.
Williams, William E., Chicago, Ill. Plate-web wheel. No. 1,296,614; Nov. 29.
Williams, William E., Chicago, Ill. Tension-plate wheel. No. 1,296,615; Nov. 29.
Williamson, Romeo L., Mount Vernon, Ohio. Power-transmission mechanism. No. 1,296,028; Nov. 29.
Willison, Walter W., New York, N. Y., assignor to Thermokept Products Corporation. Peanut-butter. No. 1,296,352; Nov. 29.
Willys-Overland Company., The. (See Lightner, A. D., and Holmes, assignors.)
Wilson, John D. (See McNally, S. L., and Wilson.)
Wilson, John H., Burkburnett, Tex. Casing-pulling apparatus. No. 1,296,822; Nov. 29.
Wilson, Walter E., Doncaster, England. Gagging appliance. No. 296,616; Nov. 29.
Winchester Repeating Arms Company. (See de Olaneta, Harold, assignor.)
Winchester Repeating Arms Company. (See Paine, Arthur P., assignor.)
Winchenbach, Max, Kiel, Germany. Hydroplane. No. 1,296,353; Nov. 29.
Windsor, Ernest A., Port Huron, Mich. Interchangeable heel. No. 1,296,462; Nov. 29.
Wineman, Wade H., Chicago, Ill., assignor to Sullivan Machinery Company. Compressor-controlling mechanism. No. 1,296,512; Nov. 29.
Wineman, Wade H., Chicago, Ill., assignor to Sullivan Machinery Company. Compressor-controlling mechanism. No. 1,296,513; Nov. 29.
Windeld, Charles D., Brooklyn, N. Y. Folding cot. No. 1,296,755; Nov. 29.
Wishart, William, and Albert H. Morrell, assignors to Clinton Refrigerating Company, Clinton, Iowa. Compressor valve mechanism. No. 1,296,500; Nov. 29.
Wolter, Rodolphe, Buenos Aires, Argentina. Weighing-scale. No. 1,296,490; Nov. 29.
Wood, William H., Richmond, Calif. Lubricating composition. No. 1,296,756; Nov. 29.
Woods, Sophie L. (See Perry, Hubert M., assignor.)
Woolard, William F., Wauwatosa, Wis. Corrugated metal and fur railway-cars. No. 1,296,249; Nov. 29.
Worthington, Charles C., Dunfield, N. J., assignor to Shawnee Mower Company, New York, N. Y. Gang lawn-mower. No. 1,296,441; Nov. 29.
Wray, Charles, Croydon, assignor to himself and C. J. Stanley, London, England. Gas-fire, electric radiators, and the like. No. 1,296,623; Nov. 29.
Wright, Ernest N. (See Wright, Leon G., assignor.)
Wright, Henry, Fresno, Calif. Internal-combustion engine. No. 1,296,354; Nov. 29.
Wright, Leon G., Preston, assignor of one-half to E. N. Wright, Choptank, Md. Vehicle-headlight. No. 1,296,523; Nov. 29.
Yale & Towne Manufacturing Company, The. (See Lewis, Rollis C., assignor.)
Yates, John L., New York, N. Y. Lock. No. 1,296,617; Nov. 29.
Yetter, Edward J., Denver, Colo. Sheet-roofing. No. 1,296,250; Nov. 29.
Youngquist, Henry W., Manchester, N. H., assignor to Draper Corporation, Hopedale, Mass. Stop mechanism for looms. No. 1,296,552; Nov. 29.
Zannoth, Robert C., assignor to Roberts Brass Company, Milwaukee, Wis. Air-pump. No. 1,296,810; Nov. 29.
Zurewsky, Jack. (See Kuc, Wasyl, assignor.)

ALPHABETICAL LIST OF PATENTEES OF DESIGNS.

Adamec, C. George, Milwaukee, Wis. Toy. No. 59,805; Nov. 29.
Allen, Archibald K. and C. A., Seattle, Wash. Tire. No. 59,806; Nov. 29.
Allen, Clarence A. (See Allen, Archibald K. and C. A.)
Altruda, Pasquale, Providence, R. I. Rubber heel. No. 59,807; Nov. 29.
American Optical Company. (See Hill, Harry W., assignor.)
American Optical Company. (See Schumacher, E. L., and Boutelle, assignors.)
Arrow Electric Company, The. (See Harrington, William H., assignor.)
Batterton, Eva B., Springfield, Ill. Printed fabric. No. 59,808; Nov. 29.
Bay State Optical Company. (See Clulee, Stephen J., assignor.)
Benham, Milton C., Elkhart, Ind. Traffic-guard. No. 59,809; Nov. 29.
Benson, Flora, Angleton, Tex. Paper doll. No. 59,810; Nov. 29.
Boutelle, William H. (See Schumacher, E. L., and Boutelle.)
Braender, Walter P., Montclair, N. J. Automobile-tire. No. 59,811; Nov. 29.
Brendel, Samuel C., McKeesport, Pa. Direction-indicator for motor-vehicles. No. 59,812; Nov. 29.
Briscoe, Benjamin, & Stahl Engineering Co. (See Stahl, Rodolphe, assignor.)
Campbell, Charles A., New York, N. Y. Lampglobe. No. 59,813; Nov. 29.
Card, Edson B., White Plains, N. Y. Doll. No. 59,814; Nov. 29.
Casey, James D. (See Evenden, A. L., J. D. and J. A. Casey.)
Casey, Joseph. (See Evenden, A. L., and J. A. Casey.)
Christy, James, Cleveland, Ohio. Tire. No. 59,815; Nov. 29.
Clarke, Edward H., Peoria, Ill. Whistle. No. 59,816; Nov. 29.
Clulee, Stephen J., Attleboro, Mass., assignor to Bay State Optical Company. Spectacles. Nos. 59,817–18; Nov. 29.
Conner, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Sifter-top can or similar receptacle. No. 59,819; Nov. 29.
Cotter, Richard H., Brooklyn, N. Y. Game-board. No. 59,820; Nov. 29.
Crucet, Joseph M., New York, N. Y. Electric-lamp fixture. Nos. 59,821–2; Nov. 29.
Cummins, Samuel, New York, N. Y. Cake of soap. No. 59,823; Nov. 29.
Curtiss, George E., assignor to Landers, Frary & Clark, New Britain, Conn. Urn. No. 59,824; Nov. 29.
Dennis, Edward C., and R. M. Shipley, Wichita, Kans. Emblem, badge, ring, stickpin, brooch, watch-charm, lapel-button, or other article of similar nature. No. 59,825; Nov. 29.
Dynas, Mike, Chicago, Ill. Horse-collar. No. 59,826; Nov. 29.
Evenden, Alfred L., J. D. and J. A. Casey, Rome, N. Y. Pincers. No. 59,827; Nov. 29.
Finucane, John J., assignor to Washerette Corporation, Rochester, N. Y. Washing-machine. No. 59,828; Nov. 29.
Flauder, Alfred J., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Combined perfumer and disinfector. No. 59,829; Nov. 29.
Flauder, Alfred J., assignor to The Weidlich Bros. Mfg. Co., Bridgeport, Conn. Combined perfumer and disinfector. Nos. 59,830–31; Nov. 29.
Fletcher, Elmer, assignor to Fletcher-Wickes Co., Chicago, Ill. Tone-arm for phonographs. No. 59,832; Nov. 29.
Fletcher-Wickes Co. (See Fletcher, Elmer, assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 29TH DAY OF NOVEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acetylene-generator. J. W. Cain. No. 1,398,673; Nov. 29.
Acid, Producing highly-concentrated hydrochloric. J. Fredriksson. No. 1,398,224; Nov. 29.
Acid-resisting iron. P. D. Schenck. No. 1,398,918; Nov. 29.
Aerial torpedo or mine. M. Wildrick. No. 1,398,290; Nov. 29.
Aeroplane. W. Lamar. No. 1,398,729; Nov. 29.
Aeroplane. J. H. Rea. No. 1,398,484; Nov. 29.
Aeroplane. J. H. Stewart. No. 1,398,750; Nov. 29.
Aeroplanes, Motor-fuel for. W. T. Schreiber. No. 1,398,947; Nov. 29.
Air-brake systems, Safety attachment for. W. M. Moore. No. 1,398,906; Nov. 29.
Air-compressing apparatus. H. J. Appleton. No. 1,398,261; Nov. 29.
Air-filter. J. A. Gordon. No. 1,398,665; Nov. 29.
Air-lake, Auxiliary. C. B. Shaaf. No. 1,398,906; Nov. 29.
Air-lift booster. H. B. Halvorsen. No. 1,398,550; Nov. 29.
Aircraft-engines, Fuel supply and regulating system for. B. H. Cawthra. No. 1,398,215; Nov. 29.
Airplane-motor to develop its full power at high altitudes, Enabling an. F. I. Raymond. No. 1,398,280; Nov. 29.
Airplanes, Radiator for. C. B. Kirkham. No. 1,398,380; Nov. 29.
Alarm: *See*—
Burglar-alarm. Incubator-alarm.
Detonating-alarm.
Alarm. J. M. Butcher. No. 1,398,585; Nov. 29.
Alarm mechanism. F. V. Pepper. No. 1,398,840; Nov. 29.
Alarm system. R. M. Hopkins. No. 1,398,593; Nov. 29.
Ammeters, Means for calibrating. A. H. Hoyt. No. 1,398,595; Nov. 29.
Amusement apparatus. J. A. Healy. No. 1,398,514; Nov. 29.
Amusement device (circulating whip). E. Kohler. No. 1,398,639; Nov. 29.
Angle-tool, Combination. H. A. Landis. No. 1,398,234; Nov. 29.
Animal-cover. R. T. Lasche. No. 1,398,281; Nov. 29.
Animal-feeding device. I. Mattson. No. 1,398,336; Nov. 29.
Annealing or otherwise treating metals, Apparatus for use in. A. Howgate. No. 1,398,520; Nov. 29.
Antiskid device. S. Beker. No. 1,398,356; Nov. 29.
Armor, Bullet-proof. T. de Dragic and A. Schwarz. No. 1,398,682; Nov. 29.
Automobile-bumper. R. T. Newton. (Reissue.) No. 15,228; Nov. 29.
Automobile-check. W. McNamee. No. 1,398,440; Nov. 29.
Automobile-license fastener. E. B. Shaw. No. 1,398,401; Nov. 29.
Automobile license-tag, Auxiliary. F. D. Johnson and H. Cullaway. No. 1,398,492; Nov. 29.
Automobile-lock. E. Lupiow. No. 1,398,905; Nov. 29.
Automobile-radiator. A. Fürst. No. 1,398,774; Nov. 29.
Automobile-signal. L. W. Scala. No. 1,398,923; Nov. 29.
Automobile tool-box. H. W. Allis. No. 1,398,884; Nov. 29.
Automobiles and other vehicles, Spring-suspension for. H. E. Syler. No. 1,398,812; Nov. 29.
Automobiles, Automatic life-saving fender for. E. S. Jones. No. 1,398,434; Nov. 29.
Automobiles, Combined door-joint protector and name-plate for. P. Curry. No. 1,398,586; Nov. 29.
Automobiles, Signal device for. W. P. Carroll. No. 1,398,677; Nov. 29.
Auxiliary lock. R. D. Paterson. No. 1,398,465; Nov. 29.
Axle. G. F. Morgan. No. 1,398,240; Nov. 29.
Balancing-machine. J. Lundgren. No. 1,398,533; Nov. 29.
Barrel-assembling machine. F. Podsiad. No. 1,398,737; Nov. 29.
Barrel, Metallic shipping. W. C. Irvin. No. 1,398,298; Nov. 29.
Baskets, Corner-irons for. F. W. Goedeke. No. 1,398,371; Nov. 29.
Bath combination and nozzle. B. F. Gable. No. 1,398,941; Nov. 29.
Battery: *See*—
Flashlight-battery.
Battery-cell, Storage. F. Engel. No. 1,398,847; Nov. 29.
Battery-cover. G. J. Bundy. No. 1,398,358; Nov. 29.
Bearing. E. G. Acheson, Jr. Nos. 1,398,219–20; Nov. 29.
Bearing, Antifriction-. H. M. Perry. No. 1,398,390; Nov. 29.
Bearing material. R. H. Waite. No. 1,398,926; Nov. 29.
Bed or attachment therefor. M. C. Nixon. No. 1,398,271; Nov. 29.
Bed, Sofa-. R. B. Homer. No. 1,398,824; Nov. 29.
Bench-leg, Collapsible. J. S. Smart. No. 1,398,471; Nov. 29.
Binder for sheets, leaves, &c. H. M. Morris. No. 1,398,387; Nov. 29.
Binder, Loose-leaf. S. E. Day. No. 1,398,540; Nov. 29.
Binder, Loose-leaf. W. F. Dunning. No. 1,398,422; Nov. 29.
Binder, Loose-leaf. W. H. Murphy. No. 1,398,388; Nov. 29.
Binder, Loose-leaf. A. R. Selden. No. 1,398,806; Nov. 29.
Bit: *See*—
Extension boring-bit.
Block: *See*—
Building-block. Wall-block.
Boat, Flying-. L. D. Reed. No. 1,398,467; Nov. 29.
Boat lifting and launching mechanism. D. Maggi. No. 1,398,702; Nov. 29.
Boiler: *See*—
Water-tube boiler.
Boll-weevil eradicator. G. W. Mobley. No. 1,398,589; Nov. 29.
Bolts or rivets, Device for supporting washers while upsetting the coöperating. C. Maunders. No. 1,398,268; Nov. 29.
Book cover, Sales-. E. E. Strawn. No. 1,398,530; Nov. 29.
Boring-bit, Extension. L. S. Hayden. No. 1,398,780; Nov. 29.
Boring-drill. G. W. Hanson. No. 1,398,551; Nov. 29.
Box: *See*—
Automobile tool-box. Sheet-metal box.
Fuse switch-box. Wire-bound box.
Bracket: *See*—
Joist-bracket.
Braiding-machine. X. Pfrunder. No. 1,398,444; Nov. 29.
Brake: *See*—
Coaster-brake.
Brake, Mechanical. M. D. Maloney. No. 1,398,876; Nov. 29.
Brush, Air-. A. Shelburne. No. 1,398,920; Nov. 29.
Brush, Polishing. C. H. Anderson. No. 1,398,772; Nov. 29.
Brush, Scrub-. M. E. Kelly. No. 1,398,864; Nov. 29.
Brushes, Drip-guard for. F. Gaede. No. 1,398,894; Nov. 29.
Bucket, Cableway excavating-. E. H. Fallenstein. No. 1,398,425; Nov. 29.
Bucket, Excavating-. W. M. Venable. No. 1,398,479; Nov. 29.
Buckle, Apparel-belt. K. Dougan. Nos. 1,398,632–3; Nov. 29.
Building-block. K. E. W. Jagdmann. (Reissue.) No. 15,227; Nov. 29.
Burglar-alarm. W. B. Stephens. No. 1,398,924; Nov. 29.
Burner: *See*—
Gas-burner. Oil-burner.
Burner. J. Clary. No. 1,398,839; Nov. 29.
Cabinet. J. F. Schylander. No. 1,398,744; Nov. 29.
Caissons, cofferdams, and the like. Construction of. C. S. Boardman. No. 1,398,221; Nov. 29.
Calculating-machine. A. Rechnitzer. No. 1,398,945; Nov. 29.
Camera-back. J. Tessier. No. 1,398,950; Nov. 29.
Cans and other containers, Apparatus for and method of sterilizing milk-. A. L. Dunham. No. 1,398,508; Nov. 29.
Car construction, Railway-. H. S. Hart. No. 1,398,512; Nov. 29.
Car-controlling mechanism, Mine-. G. Foster. No. 1,398,896; Nov. 29.
Car, Convertible box-. A. Campbell. No. 1,398,675; Nov. 29.
Car end, Corrugated sheet-metal. W. P. Murphy. Nos. 1,398,643–4; Nov. 29.
Car, Cycle-. L. M. Payne, L. A. Miller, and J. J. Douglas. No. 1,398,498; Nov. 29.
Car, Dump-. H. S. Hart. No. 1,398,375; Nov. 29.
Car, Dump-. D. Hindahl. No. 1,398,517; Nov. 29.
Car end, Vertically-reinforced sheet-metal. W. P. Murphy. No. 1,398,645; Nov. 29.
Car-heater, Electric. L. P. Hynes. No. 1,398,522; Nov. 29.

Car-heating system, Electric. L. P. Hynes. No. 1,398,521; Nov. 29.
Car-platforms, Foot-warmer for. L. Loeser. No. 1,398,884; Nov. 29.
Car-rail hose-bridge. C. P. Tyler. No. 1,398,497; Nov. 29.
Car, Railway-. F. A. Miller. No. 1,398,550; Nov. 29.
Cars, &c., Compressed-air mechanism for motor-. M. Adenot. No. 1,398,255; Nov. 29.
Cars, Corrugated metal end for railway-. C. T. Osterberg. No. 1,398,241; Nov. 29.
Cars, Corrugated metal end for railway-. W. F. Woolard. No. 1,398,249; Nov. 29.
Cars, Dome-cover for oil-. W. K. Bonham. No. 1,398,832; Nov. 29.
Cars, Friction draft-gear for railway-. J. F. O'Connor. No. 1,398,704; Nov. 29.
Cars, Reinforced end for box-. G. A. Johnson. No. 1,398,697; Nov. 29.
Cars, Stake for flat-. M. Markhuis. No. 1,398,441; Nov. 29.
Carbureter. W. G. Hemenway. No. 1,398,459; Nov. 29.
Carbureter. P. Landis. No. 1,398,640; Nov. 29.
Card and making same, Coin-. H. H. Steele. No. 1,398,607; Nov. 29.
Card, Sample-. E. Hirtz. No. 1,398,421; Nov. 29.
Carrier: *See*—
Color-screen carrier.
Carts, Tractor-coupling for sugar-. H. F. Baggies. No. 1,398,575; Nov. 29.
Casement-holder. W. L. Burtis. No. 1,398,768; Nov. 29.
Cash, Printing device for registering. W. Kolbe. No. 1,398,435; Nov. 29.
Cash-register. B. M. Shipley. No. 1,398,576; Nov. 29.
Casing-pulling apparatus. J. H. Wilson. No. 1,398,822; Nov. 29.
Cell, Dry. H. de Olaneta. No. 1,398,366; Nov. 29.
Cell, Electrolytic. J. Cranston and W. D. Le Bar. No. 1,398,784; Nov. 29.
Cellulose-acetate composition. A. F. Sulzer. No. 1,398,949; Nov. 29.
Cellulose-ester composition. H. T. Clarke. No. 1,398,989; Nov. 29.
Cement-block machine. J. H. Pearson. No. 1,398,442; Nov. 29.
Chain-repair tool. H. Mathis. No. 1,398,876; Nov. 29.
Chain, Safety-. J. J. Schneider. No. 1,398,803; Nov. 29.
Chain tightening and releasing device. E. Green. No. 1,398,548; Nov. 29.
Chains, Making cast. R. R. Rust. No. 1,398,706; Nov. 29.
Chair: *See*—
Folding chair.
Chair and bed, Folding. F. Blando. No. 1,398,253; Nov. 29.
Change-maker. G. F. McGill. No. 1,398,299; Nov. 29.
Charging device. R. S. Richards. No. 1,398,649; Nov. 29.
Check-book. W. H. W. Hamilton. No. 1,398,508; Nov. 29.
Check-protector, Pocket. O. K. Linscott. No. 1,398,235; Nov. 29.
Chuck. E. L. Pfunder. No. 1,398,341; Nov. 29.
Cider-press. A. Bartlemay. No. 1,398,252; Nov. 29.
Cigar and cigarette holder. G. Lampessas. No. 1,398,560; Nov. 29.
Cleaner: *See*—
Dish-cleaner.
Cleaning metals, Method of and composition for. J. H. Gravell. No. 1,398,507; Nov. 29.
Clock-frame. P. Lux. No. 1,398,597; Nov. 29.
Closet-seat lids, Automatic opening mechanism for. G. E. Kinch. No. 1,398,556; Nov. 29.
Cloth-cutting and pattern-marking machine. J. A. and H. Rosenfeld. No. 1,398,396; Nov. 29.
Clothes-wringers, Drain-pan for. W. H. Meyer. No. 1,398,337; Nov. 29.
Clothometer-gage. J. Th. Pedersen. No. 1,398,565; Nov. 29.
Clutch, &c., Friction-. P. E. Nordquist. No. 1,398,564; Nov. 29.
Clutch, Friction-. W. G. Hawley. No. 1,398,554; Nov. 29
Clutch mechanism. A. W. Harris. No. 1,398,552; Nov. 29.
Coal-mine curtain-rod. J. M. North. No. 1,398,909; Nov. 29.
Coaster-brake. A. J. Mottleu. No. 1,398,883; Nov. 29.
Cock, Stop or waste. J. G. King. No. 1,398,329; Nov. 29.
Coil-mounting. E. F. Gowen. No. 1,398,372; Nov. 29.
Coin-feed delivery apparatus. H. Brooker. No. 1,398,766; Nov. 29.
Collars, Pin for holding soft. I. S. Curtis. No. 1,398,483; Nov. 29.
Combination device. T. Kozlosky. No. 1,398,727; Nov. 29.
Combination-lock. C. H. and W. E. Gourlay. No. 1,398,506; Nov. 29.
Combustion, Means for promoting. C. McVeety. No. 1,398,300; Nov. 29.
Combustion, Treating and handling products of. F. L. McGahan. No. 1,398,734; Nov. 29.
Compressor-controlling mechanism. W. H. Wineman. Nos. 1,398,912–3; Nov. 29.
Concrete blocks, Machine for making. T. E. Hesselmann. No. 1,398,898; Nov. 29.
Concrete-wall mold. C. S. Porter. No. 1,398,915; Nov. 29.
Condenser and making same. A. Pruessman. (Reissue.) No. 15,241; Nov. 29.
Connecting-rod aliner. S. M. Campbell. No. 1,398,359; Nov. 29.
Cooker, Pressure-. A. R. Thompson. No. 1,398,476; Nov. 29.
Cooking device. E. A. Weingarten. No. 1,398,757; Nov. 29.
Cooking or heating vessel and apparatus, Electric. C. H. Lauth. Nos. 1,398,966–7; Nov. 29.
Core, Collapsible. F. Meyer. No. 1,398,236; Nov. 29.
Corset. S. Thomas. No. 1,398,607; Nov. 29.
Cot, Folding. C. D. Winfield. No. 1,398,753; Nov. 29.
Cotter-pin extractor. E. R. Galebach. No. 1,398,543; Nov. 29.
Cotton-picker's sack. S. N. Aker. No. 1,398,826; Nov. 29.
Cotton picking and cleaning. G. E. Bennett. No. 1,398,930; Nov. 29.
Cotton product and making same. R. W. Jacoby. No. 1,398,278; Nov. 29.
Coupling. H. E. Phelps. No. 1,398,276; Nov. 29.
Cover-lock. G. A. Burnham. No. 1,398,409; Nov. 29.
Current apparatus, Protecting device for multiphase alternating. J. R. Beard. No. 1,398,620; Nov. 29.
Current-collector. I. D. Shipper. No. 1,398,800; Nov. 29.
Curtain-rod. J. B. Akers. No. 1,398,411; Nov. 29.
Cutter: *See*—
Hand twine-cutter. Paper-cutter.
Cylinder-lapping tool. W. A. Salter. No. 1,398,393; Nov. 29.
Cylinders and pistons, Treating. O. W. Gerleman. No. 1,398,775; Nov. 29.
Damper-regulator. F. Gray. No. 1,398,895; Nov. 29.
Dental radiographs, Appliance for holding films for. T. B. S. Wallace. No. 1,398,247; Nov. 29.
Desk. J. Milchasis. No. 1,398,237; Nov. 29.
Desk-pad. M. Weinman. No. 1,398,340; Nov. 29.
Detonating-alarm. W. H. Cook. No. 1,398,382; Nov. 29.
Dial-lock. E. C. Lewis. No. 1,398,642; Nov. 29.
Die-casting machine. G. W. Bungay. No. 1,398,314; Nov. 29.
Direction-indicator. J. Cuper. No. 1,398,715; Nov. 29.
Dish-cleaner. C. D. Armstrong. No. 1,398,664; Nov. 29.
Disk records, Indicator or measuring-gage for. O. Boehnert. No. 1,398,710; Nov. 29.
Disks, Feeding device for sealing-. C. W. Kendall. No. 1,398,724; Nov. 29.
Dispensing apparatus. A. Weber, L. Vooresanger, and A. Keller. No. 1,398,348; Nov. 29.
Display apparatus, Luminous. L. B. Buchner. No. 1,398,835; Nov. 29.
Display device, Sample-. J. Davidson. No. 1,398,364; Nov. 29.
Distillation, Fractionate. F. Hansgirg. No. 1,398,856; Nov. 29.
Dividers. R. L. Livingston. No. 1,398,871; Nov. 29.
Dock. P. van Affaire. No. 1,398,825; Nov. 29.
Door-closer. T. E. Collins. No. 1,398,317; Nov. 29.
Door closer and check. C. Enache. No. 1,398,504; Nov. 29.
Door-lock. G. Erne. No. 1,398,369; Nov. 29.
Doors, Releasing device for poultry-house. R. L. Bennington. No. 1,398,629; Nov. 29.
Dough-roll and rolling-pin. B. L. Braddick. No. 1,398,621; Nov. 29.
Draft attachment. J. A. Graham. No 1,398,547; Nov 29.
Drag scraping apparatus. W. E. Hale. No. 1,398,897; Nov. 29.
Drier: *See*—
Laundry-drier.
Drill: *See*—
Boring-drill.
Drill M. Tanenbaum. No. 1,398,814; Nov. 29.
Drills, Chuck for taper and straight shank. B. Parmenter. No. 1,398,304; Nov. 29.
Dump-trough-operating apparatus, Automatic. E. L. Upp. No. 1,398,818; Nov. 29.
Dumping-trough-cover-operating mechanism. W. H. Johnston. No. 1,398,863; Nov. 29.
Dyeing fibers, threads, or fabrics. J. F. Briggs and C. W. Palmer. No. 1,398,557; Nov. 29.
Easel. A. Hermansson. No. 1,398,516; Nov. 29.
Eaves-trough. T. Byrd. No. 1,398,415; Nov. 29.
Edge-turning machine. F. J. McDonald. No. 1,398,786; Nov. 29.
Egg-turnover pan. J. A. Smith. No. 1,398,655; Nov. 29.
Eggs, Freezing and preserving. J. M. Hussey. No. 1,398,560; Nov. 29.
Elastic step-mat. W. MacPherson. No. 1,398,701; Nov. 29.
Electric switch. H. F. Waite. No. 1,398,580; Nov. 29.
Electric thermo-regulator. E. H. Ruediger. No. 1,398,281; Nov. 29.
Electrical indicating and measuring device. H. W. Hitchcock. No. 1,398,266; Nov. 29.
Electrical resistance apparatus. P. H. Dawe. No. 1,398,630; Nov. 29.
Electrical water-level-indicating apparatus and other electrical apparatus, Electrode for. W. D. Mickum. No. 1,398,270; Nov. 29.
Electromagnetic instrument. T. L. Lee. No. 1,398,463; Nov. 29.
Elevators, Car-stopping attachment for. W. S. Allyn. No. 1,398,619; Nov. 29.

Embedding process. E. L. Wiegand. No. 1,398,610; Nov. 29.
Embroidering mechanism. J. A. Grosbil. No. 1,398,590; Nov. 29.
Engine: *See*—
Drive-engine. Internal-combustion engine.
Engine-drive. E. A. Ford. No. 1,398,266; Nov. 29.
Engines, Attachment for hydrocarbon-. T. R. Turner and J. A. Nesbitt. No. 1,398,406; Nov. 29.
Engines, Cylinder for internal-combustion. A. H. R. Fedden and L. F. G. Butler. No. 1,398,849; Nov. 29.
Engines, Hand and foot accelerator for carburetors of automobile. W. E. Clough. No. 1,398,625; Nov. 29.
Engines, Ignition and combustion of combustibles in internal-combustion. H. Pieper. No. 1,398,944; Nov. 29.
Engines, Ignition apparatus for internal-combustion. V. W. Ellsworth and F. A. Hoyt. No. 1,398,491; Nov. 29.
Engines, Ignition sparking-plug for internal-combustion. F. L. Rapson. No. 1,398,797; Nov. 29.
Engines, Piston for reciprocatory. S. D. Hartog. No. 1,398,669; Nov. 29.
Engines, Self-starting device for internal-combustion. F. L. Rapson. No. 1,398,796; Nov. 29.
Engines, Valve-gear for internal-combustion. A. J. Rowledge. No. 1,398,851; Nov. 29.
Excavating-bucket and operating means therefor. F. W. Bond. No. 1,398,222; Nov. 29.
Explosives, Manufacture of nitrostarch. J. B. Bronstein. No. 1,398,931; Nov. 29.
Fabric, Terry or looped. P. Taylor. No. 1,398,702; Nov. 29.
Fastener. E. M. Watkins. No. 1,398,288; Nov. 29.
Fastening, Machine for inserting. A. Bates. No. 1,398,265; Nov. 29.
Faucet and attaching-bracket. O. S. Burman. No. 1,398,767; Nov. 29.
Fastener-feeding mechanism. W. C. Stewart. No. 1,398,540; Nov. 29.
Ferro-cyanids, Producing. F. S. Washburn. No. 1,398,453; Nov. 29.
Fibers, Treatment of vegetable. C. Schwartz. No. 1,398,864; Nov. 29.
File, Memorandum-. G. H. Hohnsbeen. Nos. 1,398,591–2; Nov. 29.
Film-cleaning machine. H. A. Sührcke. No. 1,398,811; Nov. 29.
Film-clip and order-tab holder. G. M. Dye. No. 1,398,423; Nov. 29.
Film-holder. A. E. Chapman. No. 1,398,988; Nov. 29.
Film-holding device. J. F. Grever and T. S. Fox. No. 1,398,458; Nov. 29.
Filtering apparatus. I. B. Tanner. No. 1,398,285; Nov. 29.
Fishing appliance. E. R. Gillette. No. 1,398,717; Nov. 29.
Fishing-reel. R. W. Harradine. No. 1,398,429; Nov. 29.

Adhesion of Finland to the International Convention for the Protection of Industrial Property.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., November 23, 1921.

The following communications, referred to this Office by the Secretary of the Interior, is published for the information of those concerned.

THOMAS E. ROBERTSON,
Commissioner.

(Translation.)

LEGATION OF SWITZERLAND,
Washington, D. C., September 23, 1921.

Mr. SECRETARY OF STATE:

By my Government's direction, I have the honor to inform your excellency that by a note dated August 2, 1921, the Government of the Republic of Finland notified the Swiss Federal Council of its decision to adhere, with the consent of the Parliament of the Republic to the International Convention of Paris of March 20, 1883, for the Protection of Industrial Property revised at Brussels, December 14, 1900, and at Washington, June 2, 1911, with its final protocol (see article 18 of the Convention).

In accordance with article 16, paragraph 3, of the Revised Union Convention of Paris the adhesion will take effect one month after the sending of the notice to the other countries in the Union by the Swiss Government, that is to say, on September 20, 1921.

I beg your excellency kindly to take formal note of that adhesion.

In the name of the Federal Council.

MARC PETER,
Minister of Switzerland.

Interference Notices.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., November 21, 1921.

Julius Medvecsky, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the patent of Francis W. Borton, 1055 East 27th street, Cleveland, Ohio, granted Nov. 2, 1915, No. 1,120,125, and application for patent of Julius Medvecsky, 95 Wilbur avenue, Long Island City, N. Y., and a notice of such declaration sent by registered mail to Medvecsky at the said address having been returned by the postmaster undeliverable, notice is hereby given that unless said Medvecsky, his assigns or legal representatives, shall enter an appearance thereto within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

KARL FENNING,
Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., November 23, 1921.

Travers Bros. Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Columbian Rope Company, Auburn, N. Y., for registration of a trade-mark and trade-mark registered Mar. 13, 1901, No. 34,084 to Travers Bros. Co., 107 Duane street, New York, N. Y., and a notice of such declaration sent by registered mail to Travers Bros. Co. at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Travers Bros. Co., its assigns or legal representatives, shall enter an appearance thereto within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Asst. Commissioner.

NOTICE—DESIGN PATENTS.

When an application for a design patent is found allowable, the patent will be granted for the term asked in the application papers unless specific request has been made for notice prior to allowance so that the term may be extended. Hereafter the Office will delay allowance and notify the applicant ONLY in cases where a specific request is filed.

4706

Condition of Applications Under Examination at Close of Business November 26, 1921.

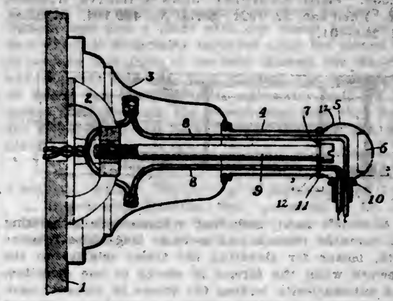
PATENTS

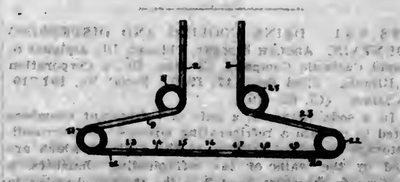
GRANTED DECEMBER 6, 1921.

1,398,954. CUFF-BUTTON. ROBERT B. B. ALLEN, Pensacola, Fla. Filed Mar. 7, 1921. Serial No. 450,201. 9 Claims. (Cl. 24—102.)



9. In a device of the class described, a button member, a shank member comprising two loops secured to said button member and having closed ends, said loops having outwardly bent sections between their ends to provide laterally enlarged passages; a button bar having an enlarged section between its ends sliding freely lengthwise of said loops and removable laterally through said enlarged passages, a spring housed between said loops normally to maintain said button bar out of line with said laterally enlarged passages, and a follower plate having portions extending outside of said loops to compress said spring.

1,398,955. PENCIL. EDWARD L. ANDERSON and LOUIS A. ANDERSON, Attleboro, Mass., assignors to R. & G. Company, Attleboro, Mass. Filed Jan. 17, 1921. Serial No. 437,759. 5 Claims. (Cl. 120—18.)

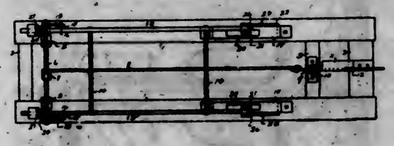


1. In a pencil, a case having a tapered end, a disk frictionally engaged within the case and with the tapered end so as to be held by the latter against sliding, an inner tube in the case having an enlarged outer end rotatably engaged with the case and having a reduced inner end forming an abutment, a washer engaging the abutment and frictionally fitted over the reduced end of the tube, a second washer frictionally fitted in the case and rotatably receiving the reduced end of the tube, a third washer frictionally fitted on the tube and projecting beyond same, an apertured disk engaged within the third washer and with the terminal of the reduced end of the tube, a lead guiding tube received at its upper end in the disk aperture, and lead feeding means including a thread member engaged at one end with the first named disk and at its opposite end being received in an opening provided therefor in the second named disk.

1,398,956. ELECTRIC FIXTURE. ARTHUR B. ALLWORTH, Meriden, Conn., assignor to Edward Miller & Company, Meriden, Conn., a Corporation of Connecticut. Filed Oct. 29, 1920. Serial No. 420,388. 1 Claim. (Cl. 240—78.)

In an electric fixture, a tubular extension having a hollow head portion at its outer end, the outer side of said head portion having an opening, an internal supporting shoulder on said tubular extension, an internal abutment supported on said shoulder, said abutment having a wire-clearance passage and a screw passage for a screw fastening, a screw fastening arranged to be passed into the open end of said head and through said abutment and tubular extension, a shoulder on said screw for engaging the holding shoulder of said abutment to hold the fixture in place, and a cover for the opening in said head.

1,398,957. AUTOMOBILE-FENDER. EDWARD V. ALLEN, Waukegan, Ill. Filed Apr. 21, 1921. Serial No. 463,170. 5 Claims. (Cl. 293—55.)

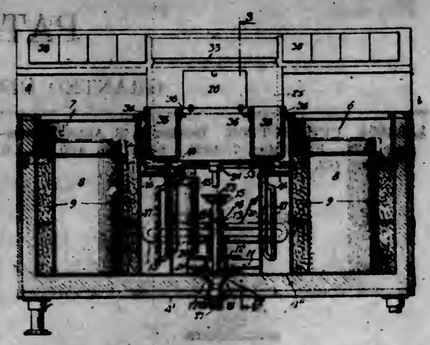


5. A fender having a front or impact portion formed with end coils, upward and downward turns between said coils, rear spring portions and attaching arms.

1,398,958. EAR-MUFF. DAVID BASCH, New York, N. Y. Filed Feb. 4, 1918. Serial No. 215,261. 5 Claims. (Cl. 2—121.)

3. An ear muff comprising a pair of ear covers, an adjustable support therefor comprising a pair of overlapping flat springs arranged to press the rear edges of the covers toward each other, means for preventing the separation of said flat springs, a pivotal connection intermediate an edge of each cover and one of said flat springs, means for holding the flat springs in adjusted position and springs at said pivotal connections arranged to swing the forward edges of the ear covers inwardly.

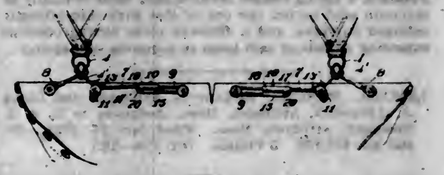
1,398,959. VEHICLE-HOIST. JOHN G. BOUTTE, Houston, Tex. Filed Jan. 22, 1921. Serial No. 439,104. 4 Claims. (Cl. 254—91.)



1. A vehicle hoist, including a framework, a hoisting frame mounted thereon and movable lengthwise relative thereto, means for elevating the frame relative to the framework when the former is moved in one direction, means automatically locking the frame in elevated position, said means including a rack, a manual lever pivoted to the framework one end of which is in coöperative relation with said rack, a link pivoted at one end to the other end of said lever and at its other end pivotally connected to the elevating means, said elevating means being formed to permit the lowering of the frame by gravity when the locking means are released.

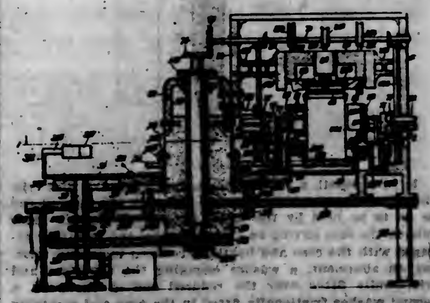
1,398,960. DISTILLATION OF SULFUR. HAROLD SIMMONDS DAVIS, Pittsburgh, and WILLIAM ALLEN HAMOR, New Kensington, Pa., assignors to Texas Gulf Sulphur Company, Bay City, Tex., a Corporation of Texas. Filed Apr. 27, 1921. Serial No. 465,064. 6 Claims. (Cl. 23—176.)

6. A retort for distilling sulfur having such parts thereof as are in contact during the distillation with molten sulfur protected against corrosion by a corrosion-resistant medium containing iron and aluminum.



1,398,961. DRINK COOLING AND DISPENSING FOUNTAIN. ADOLPH ECKERT, Chicago, Ill., assignor to Liquid Carbonic Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 17, 1917. Serial No. 191,719. 4 Claims. (Cl. 62—79.)

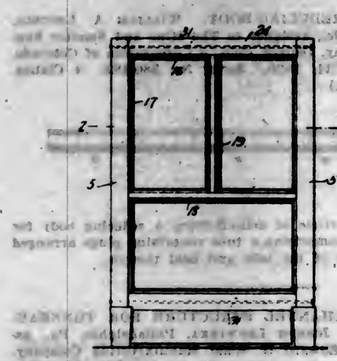
1. In a soda fountain, a pair of refrigerant chambers adapted to contain a refrigerating mixture, an intermediate storage chamber, portions of the walls of which are formed by the walls of the refrigerating chambers, a pair of water chambers located in the storage chamber in heat-conductive relation with the respective refrigerant chambers, a two-compartment reservoir in the intermediate chamber, connections from the respective water chambers to a compartment of said reservoir, circulating coils in the respective water chambers adapted to receive and to cool charged water, connections from said circulating



coils to the other said compartment of the reservoir, and means for drawing off the charged water from said reservoir.

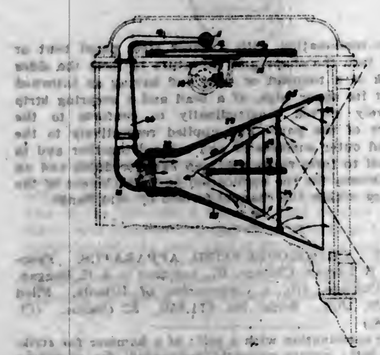
1,398,962. CONCEALED SUSPENDERS. ALBERT H. GRAVES, Evanston, Ill.; Emma L. Graves executrix of the Estate of said Albert H. Graves, deceased. Filed June 7, 1917, Serial No. 173,287. Renewed July 29, 1921. Serial No. 488,451. 9 Claims. (Cl. 241—25.)

3. In suspenders, the combination of shoulder straps adapted to be worn under the shirt and provided with cast-off hangers located approximately above the hips, of a waistband attachment consisting of a strand adapted to be buttoned to the waistband at the front and rear regions thereof, and means for detachably coupling the intermediate part of said strand to the corresponding cast-off hanger, through the shirt.



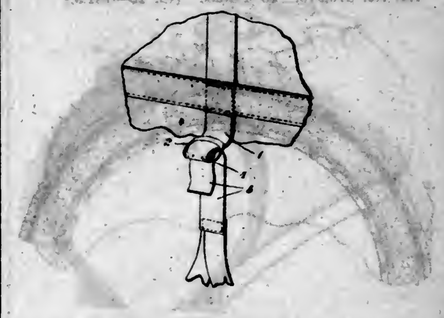
1,398,963. APPARATUS FOR APPLYING CLOSURES. EUGENE L. GREENEWALD, Washington, D. C. Filed June 30, 1915. Serial No. 37,282. 51 Claims. (Cl. 13—14.)

1. Apparatus for attaching a cover part to a tubular body part which comprises the combination of, means for



assembling a body part and a cover part, and means for corrugating the two parts at their edges and bending the same so that the edges will define an edge of a lesser length than they had before the corrugating and bending operations.

1,398,964. REFRIGERATOR CONSTRUCTION. HERBERT JUDE GWYNE, Yonkers, N. Y. Filed Aug. 11, 1920. Serial No. 402,807. 8 Claims. (Cl. 45—102.)

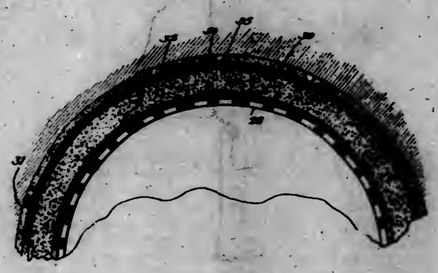


1. In a device of the character described, two opposed side panel units including corner posts, top and bottom framing pieces secured to said corner posts, two side panel units and top and bottom panel units, engaging said first mentioned side units and rods passing transversely through said first mentioned side units and through said top and bottom units for securing the parts together in cabinet formation.

1,398,965. AMPLIFYING SYSTEM FOR A COMPLEX SOUND-VIBRATION SOURCE. LORREN M. HART, New York, N. Y. Filed June 10, 1919. Serial No. 303,041. 6 Claims. (Cl. 181—27.)

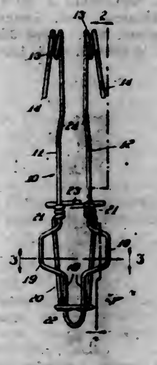
6. A combined means for mounting a sound deflector and for retaining the walls of a sound amplifier comprising a spider forming a central mounting and having outwardly extending posts and wedge-shaped bosses at the ends of said posts for engaging the flaring walls of said amplifier.

1,398,966. ADJUSTABLE STRAP-FASTENING. FRED HEMMI, New York, N. Y. Filed July 22, 1920. Serial No. 398,176. 2 Claims. (Cl. 24—198.)



1. An adjustable fastening device comprising, in combination, two straps or sections of strap one of which is folded back upon and secured to itself to form a permanent loop and a plate with one closed and one open slot which is detachably mounted upon the looped strap by passing both folds of the loop through the closed slot and the rear fold only back through the open slot and in which the other strap is adjustably held by being passed first through the closed slot and then behind the closed strap and back through the open slot of the plate.

1,398,967. PUMP. GRANVILLE A. HUMASON and JULIUS A. BUETSCHEL, Houston, Tex., assignors to Dr. A. L. Miller, Harris county, Tex. Filed June 21, 1920. Serial No. 390,514. 4 Claims. (Cl. 103—63.)

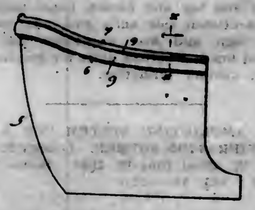


1. In a pump, a plunger including an elongated nipple, expansible sectional packing rings surrounding the nipple, resilient members interposed between the sections, and also between said sections and the nipple, spacer rings between said sectional rings and means for confining said rings on the nipple.

1,396,968. SUPPORTING-FORM FOR CONCRETE AND MASONRY STRUCTURES. GEORGE W. JACKSON, Evanston, Ill., assignor, by mesne assignments, to George W. Jackson & Fitzpatrick Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 2, 1920. Serial No. 370,978. 13 Claims. (Cl. 25—181.5.)

1. An individual, portable lagging unit for supporting forms comprising a skeleton frame, and separately formed fillers partially occupying the openings therein and of less thickness than the depth of the frame, and permanently fastened to the frame, to provide attaching ribs or flanges for the lagging units.

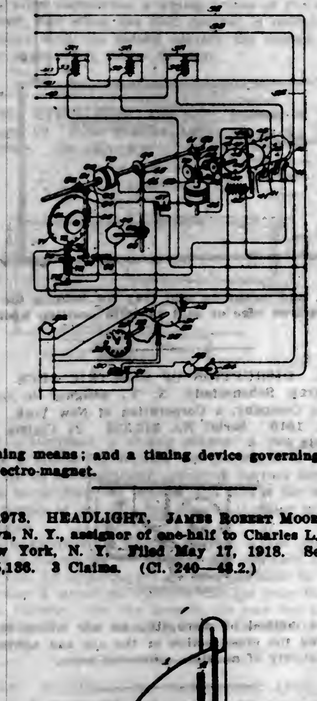
1,396,969. CLOTHESPIN. FRED M. KILPOYLE, Storrs, Utah. Filed May 20, 1920. Serial No. 382,511. 2 Claims. (Cl. 24—247.)



1. A clothes pin, comprising a main member composed of a single piece of non-rusting wire bent to provide two parallelly arranged strands or portions, with the ends of the strands or portions curled upon themselves to provide resiliency and terminating in downwardly presented portions disposed toward one side of a longitudinal axis of the main portion and normally tending to move toward a plane substantially parallel with the main portion, said downwardly presented portions constituting line gripping portions, while at the intermediate or closed end of the member the strands are disposed in parallel relation for a predetermined distance and then bent laterally in opposite directions to provide an enlarged space therebetween terminating in a restricted elongated gripping loop, and a second member composed of a single piece of wire bent into loop form to provide similarly disposed strands or portions whose ends are formed to slide on the strands of the main member above said enlarged space, the ends of the second member being bent to provide a finger-engaging portion while the intermediate closed end of the second member is bent at right angles to the main part thereof and formed to provide a head of dimensions greater than the transverse dimensions of the elongated gripping loop of the main member, said head being provided with a reduced neck adapted to slide between the strands of the main member.

1,396,970. REDUCING-BODY. WILLIAM A. LESCHELL, Denver, Colo., assignor to The Mine and Smelter Supply Company, Denver, Colo., a Corporation of Colorado. Filed May 11, 1920. Serial No. 380,462. 4 Claims. (Cl. 83—9.)

1. As an article of manufacture, a reducing body for use in mills comprising a tube containing plugs arranged longitudinally of the tube and held therein.



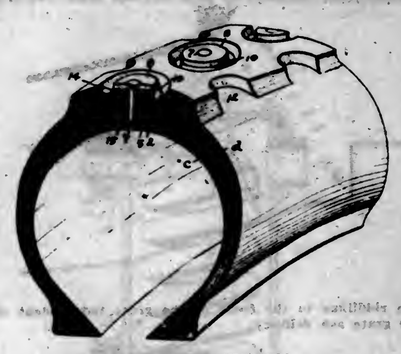
1,396,971. CHANNEL STRUCTURE FOR TONNEAU-PANELS. JOSEPH LEDWINKA, Philadelphia, Pa., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Feb. 27, 1919. Serial No. 279,589. 3 Claims. (Cl. 296—30)

1. The combination with a sheet steel panel bent or stamped into the shape and curvature to form the sides and back of a tonneau or seat, and having an inturned flange at its upper edge, of a bead and a securing strip respectively curved longitudinally to conform to the curvature of the panel and applied respectively to the inner and outer surfaces of and secured together and to said panel to form respectively an exterior finish and an interior means for the application and attachment of the upholstery within the channel formed by said flange.

1,396,972. CHIME-OPERATING APPARATUS. FREDERICK B. LITTLE, Chicago, Ill., assignor to J. C. Deagan, Inc., Chicago, Ill., a Corporation of Illinois. Filed May 23, 1921. Serial No. 471,850. 32 Claims. (Cl. 58—38.)

1. The combination with a bell; of a hammer for striking the bell; electro-magnetic mechanism for operating the hammer; a switching device controlling said electro-magnetic mechanism; actuating mechanism for operating the switching device and provided with means that take part in varying the extent of operation of such actuating mechanism to vary the number of times of operation of the switching device according to the hour which is sounded; detaining means coöperating with the aforesaid means to define the extent of each operation of the switch actuating mechanism; an electromagnet governing said

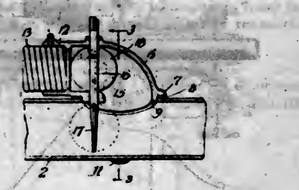
detaining means; and a timing device governing the latter electro-magnet.



1,396,973. HEADLIGHT. JAMES ROBERT MOORE, Tarrytown, N. Y., assignor of one-half to Charles L. Cassidy, New York, N. Y. Filed May 17, 1918. Serial No. 235,136. 3 Claims. (Cl. 240—42.2.)

1. A headlight comprising a casing having a parabolic inner, reflecting surface, a front for the casing, a lamp within the casing, said lamp being located in the focal axis of the reflector, a trough-shaped member below the lamp, said member having sides extending upward to approximately the focal axis of the reflector and on either side of the lamp, a screen in front of the lamp, and means for supporting the member within the casing, said means engaging the casing in proximity to the front.

1,396,974. [WITHDRAWN.]

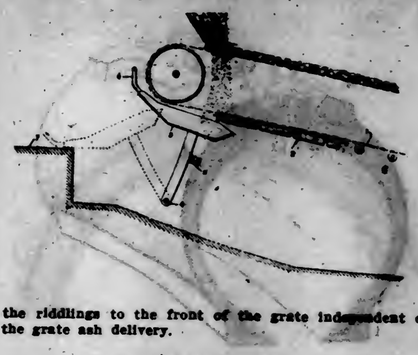


1,396,975. TIRE-CASING. FRANK G. REMOS, Akron, Ohio. Filed Aug. 24, 1920. Serial No. 405,635. 1 Claim. (Cl. 152—16.)

A tire casing having successive bosses developed in its periphery with depressions about the same and traction means built in and upon said bosses comprising headed rivet spindles extending diametrically through said bosses

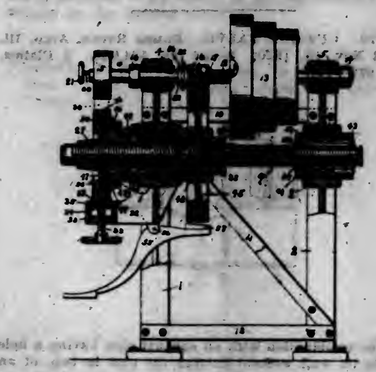
and anchored on the inner side of the casing and washers on said spindles resting on said bosses.

1,396,976. CUT-OUT VALVE. ELMER RYDER, Argo, Ill. Filed Nov. 15, 1920. Serial No. 424,068. 2 Claims. (Cl. 277—19.)



1. The combination with an exhaust pipe having a hole made in its wall without cutting the pipe in two, of an elbow shaped casing applied against said pipe about said hole and having but one passage extending therethrough and opening into said exhaust pipe through said hole, said casing having a portion projecting into said passage adjacent said hole, a single valve stem extending across said passage and journaled in said projection and the outer wall of said casing and terminating short of the wall of the exhaust pipe, and two disk shaped valve members on said stem, one in the exhaust pipe and the other in the passage in said casing and arranged at such an angle to each other that when the stem is turned to move one disk open the other will be moved closed.

1,396,977. CHAIN-GRATE STOKER. FRANCIS CHARLES SELLENS, London, England, assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Mar. 12, 1918. Serial No. 221,979. 3 Claims. (Cl. 110—40.)

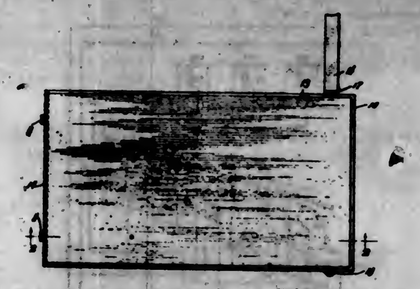


1. The combination with a chain grate stoker arranged to permit fine riddlings to fall through the upper and the lower runs of the grate, of a plate beneath the forward end only of the lower run of the grate and closely adjacent thereto, said plate being adapted to receive the riddlings or small falling through the upper run of the grate and hold them in position to be moved toward the

front of the grate by the lever rod of the grate, the grate being arranged to cooperate with the plate to carry

the riddlings to the front of the grate independent of the grate ash delivery.

1,398,978. TOOL-DRIVING MACHINE. HENRY COLLINS SHAVER, St. Marys, Ohio. Filed Nov. 17, 1919. Serial No. 338,632. 4 Claims. (Cl. 74—89.)



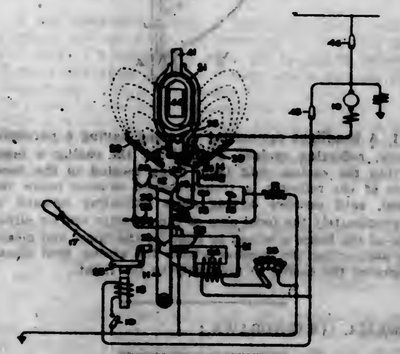
1. The combination of a threaded spindle, bearings in which the spindle is rotatable and slidable, means to rotate the spindle, means to prevent the rotation of the spindle, a nut on said spindle, means to prevent the nut from turning, means to rotate the nut on the spindle, and means to prevent the nut from moving longitudinally of the axis of the spindle, so as to cause longitudinal movement of the spindle.

1,398,979. COMPOSITION OF MATTER. JAMES H. SMITH, Jr., Rutherford, and CLARENCE A. WILSON, Passaic, N. J. Filed Nov. 8, 1919. Serial No. 336,697. 8 Claims. (Cl. 87—17.)

1. A composition of matter comprising non-vulcanized rubber, a solvent of rubber, and a small amount of acetone.

1,398,980. STENCIL PRINTING APPARATUS. HENRY B. TAMARKIN, New York, N. Y. Filed Mar. 3, 1921. Serial No. 449,866. 1 Claim. (Cl. 101—126.)

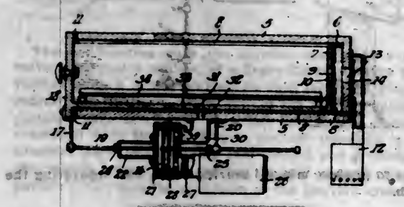
A stencil printing apparatus comprising a tray, an ink containing printing bed therein, the exposed face of said bed being flush with the open top of said tray, a stencil sheet on top of said bed, a gate attached to one of the transverse edges of said stencil sheet having perforations, studs on said tray extending through said per-



forations, and means on said tray for holding the opposite transverse edge of said sheet in position upon said bed.

1,398,981. DISRUPTION OF ELECTRIC ARCS. JOHN F. TAITLE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 4, 1919. Serial No. 342,826. 27 Claims. (Cl. 200—144.)

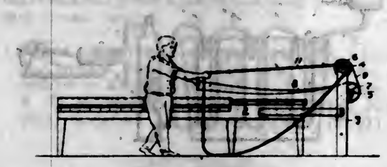
25. The method of disrupting an arc which consists in reducing the cross-section of the arc and splitting it into a plurality of multiple connected parts.



1,398,982. CIRCUIT-INTERRUPTER. JOHN F. TAITLE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 15, 1919. Serial No. 345,003. 4 Claims. (Cl. 200—147.)

1. The combination in an electric switch, of a pair of relatively movable cooperating circuit interrupting contacts, the first contact being biased away from the second and having a relatively small moment of inertia, the second contact being biased toward the first and

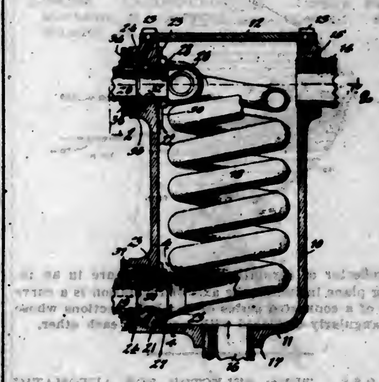
having a relatively large moment of inertia, the second contact being carried in a support so as to permit of a longitudinal and tilting movement when the first contact makes engagement therewith, whereby the contacts accurately aline themselves, a wiping action of the contacts is secured, and when the first contact is moved out of engagement with the second contact the second contact will not immediately follow the first.



1,398,983. STERILIZING DEVICE. EDWARD R. ULRICH, Chicago, Ill. Filed Feb. 18, 1921. Serial No. 445,981. 7 Claims. (Cl. 167—3.)

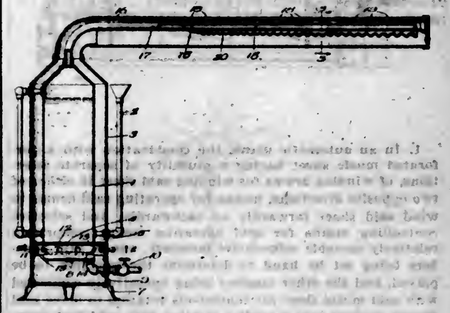
1. In a sterilizer, a sliding drawer, a gas generating chamber, a means for drawing the gas contents from the drawer by an automatically operating suction mechanism incident to opening the drawer and means for injecting a new supply of gas into the drawer incident to closing the drawer.

2. In a sterilizer, a sliding drawer, a gas generating chamber, a means for ejecting the gas contents from the drawer into an intermediate chamber incident to opening the drawer, a means for ejecting the gas from the intermediate chamber into the outside air and for injecting a new supply of gas into the drawer incident to closing the drawer.



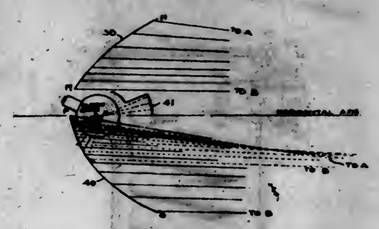
1,398,984. WINDING AND UNWINDING APPARATUS. WALTER P. VOTH, Willoughby, Ohio. Filed Oct. 18, 1920. Serial No. 417,668. 5 Claims. (Cl. 242—55.)

4. A table having a pair of rollers transversely thereof, one of said rollers having a strip of stock material wound within the folds of a strip of protecting material connected with and adapted to wind upon the other roller, and a horizontally traveling connection for said winding roller extending lengthwise of said table.



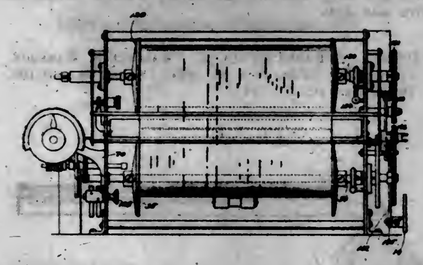
1,398,985. COUPLING DEVICE FOR WATER-HEATERS, &c. CALVIN P. WIEBER, Buffalo, N. Y. Filed Mar. 27, 1920. Serial No. 369,176. 8 Claims. (Cl. 285—90.)

8. A chamber having an inlet and an outlet, upper and lower openings in the upper and lower parts of its side wall and seats around the outer side of said openings, a cock arranged in said chamber and provided with upper and lower coupling heads arranged opposite said openings, respectively, a coupling sleeve arranged in each of said openings and having its inner end connected by a swivel joint with the adjacent head of the cock and adapted to be connected at its outer end with a pipe, and its intermediate part being provided with an inwardly facing enlar-



nal shoulder engaging said seat and with an outwardly facing shoulder and a clamping ring engaging its inner end with said outer shoulder and having a screw connection with said wall.

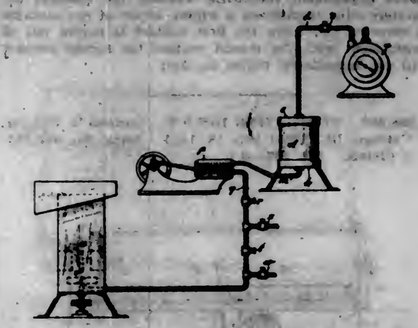
1,398,986. STEAM-PRODUCER. WALLACE S. WARNOCK, Chicago, Ill. Filed Dec. 16, 1920. Serial No. 431,109. 10 Claims. (Cl. 91—44.)



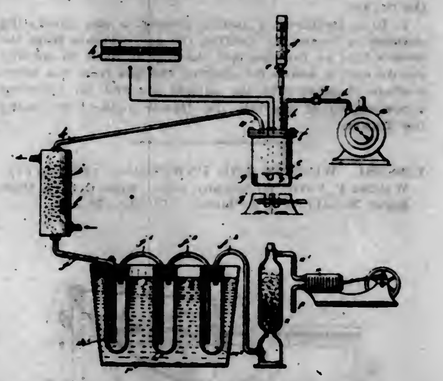
10. In a steam producer, the combination with a water container; of means for heating the water in the container to produce steam; two communicating nested spaced apart pipes through one of which the steam is conveyed to the other from the container; means for effecting the flow of gas through the other pipe and into the steam conveyed to this pipe by the first pipe; and means for heating said gas.

1,398,967. REFLECTOR FOR HEADLAMPS. Clemens N. Wemme, Lebanon, Pa. Original application filed June 10, 1919, Serial No. 303,292. Divided and this application filed Mar. 25, 1920. Serial No. 368,460. 12 Claims. (Cl. 240—41.)

1. A reflector of revolution whose curvature in an intersecting plane including the axis of revolution is a curve made up of a connected series of parabolic sections whose axis are angularly displaced with respect to each other.



1,398,988. TUNE-SELECTOR FOR AUTOMATIC PIANOS. Russell I. Wilcox, Chicago, Ill., assignor to The Marquette Piano Company, Chicago, Ill., a Corporation of Michigan. Filed July 31, 1918. Serial No. 247,520. 24 Claims. (Cl. 84—122.)

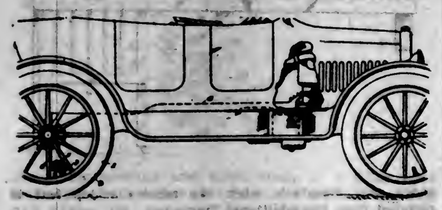


1. In an automatic piano, the combination with a perforated music sheet having a plurality of separate selections, of winding drums for winding said sheet in either of two opposite directions, means for operating said drums to wind said sheet forwardly or backwardly, and selective controlling means for said operating means comprising relatively movable coöperative members, one of said members being set by hand to determine the selection to be played, and the other member being operatively connected with said music sheet for continuous rotation to move said second member into operative relation with said first member to permit the desired selection to be played.

1,398,989. ORE CONCENTRATION. Elfoft Wray Wilkinson, San Francisco, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y., a Corporation of Maryland. Filed Dec. 31, 1918. Serial No. 269,107. 18 Claims. (Cl. 23—85.)

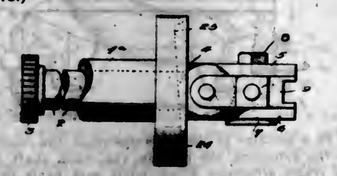
1. The process of concentrating ores which consists in subjecting an organic substance to partial decomposition in the presence of free oxygen and flowing the mixed volatilized products of such operation into and mixing them with an ore pulp and also mixing a gas with the ore pulp so as to produce mineral-bearing froth, and separating the froth.

1,398,990. ORE CONCENTRATION. Elfoft Wray Wilkinson, San Francisco, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y., a Corporation of Maryland. Filed Dec. 31, 1918. Serial No. 269,108. 12 Claims. (Cl. 23—85.)



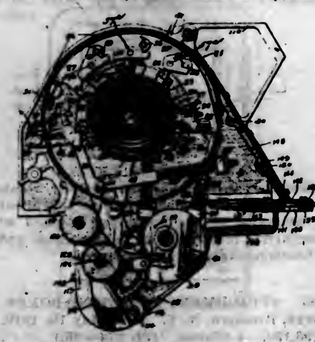
1. The process of concentrating ores which consists in mixing with an ore pulp a mineral frothing agent obtained by subjecting a frothing agent to partial decomposition in the presence of oxygen with the production of substantial amounts of easily condensable material other than water and also bringing gaseous bubbles into contact with the solid particles in the ore pulp so as to produce mineral-bearing froth, and separating the froth.

1,398,991. FIRE-RESISTING ASPHALT OR LIKE HYDROCARBONACEOUS MATERIAL. James Howard Young, Pittsburgh, Pa., assignor to H. H. Robertson Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Apr. 16, 1920. Serial No. 347,884. 8 Claims. (Cl. 23—5.)



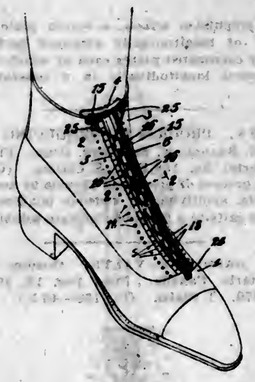
1. A new composition of matter consisting of bituminous material having incorporated therewith chloro-naphthalene products.

1,398,992. TIRE-DEFLATION INDICATOR. Clarence W. Zimmerman, Venango, Nebr., assignor of one-half to James M. Fulton, Holyoke, Colo. Filed Mar. 9, 1920. Serial No. 364,473. 1 Claim. (Cl. 180—82.)



The combination with the ignition system of a pneumatic tired motor vehicle, of a brake drum carrying an insulated ring, a brush bearing on said insulated ring and connected with the primary wire of the ignition system, a pressure gage carried by each tire and having a contact connected with the said ring, a pointer embodied in said pressure gage for traversing said contact and grounded on the vehicle whereby traversing of said contact by such pointer interrupts the operation of the ignition system.

1,398,993. EDGE SETTER AND BURNISHER. Otis R. Angell, Haverhill, Mass., assignor to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed Nov. 12, 1917. Serial No. 201,521. 38 Claims. (Cl. 12—78.)

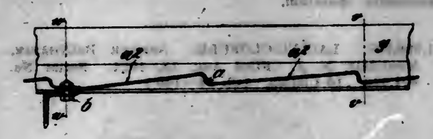


1. In an edge setting machine, in combination, an actuating shaft, a tool holding head, pivotal means supporting said head constructed and arranged to constrain said head to move normally in a plane passing through the axis of the shaft, and means actuated by said shaft for imparting to said tool holder a simple oscillatory movement about said pivotal support.

1,398,994. DELIVERY MECHANISM FOR VENDING-MACHINES. George H. Armitage, Woonsocket, R. I., assignor to Kelley Ticket Machine Company, New York, N. Y., a Corporation of New York. Filed July 26, 1918. Serial No. 781,304. 77 Claims. (Cl. 211—33.)

1. A vending apparatus having, in combination, means for delivering articles therefrom; means by which the delivery means may be set in action; a motor; a single revolution clutch; means connecting the motor with the single revolution clutch for actuating the latter; and connecting means between the single revolution clutch and the delivery means whereby to reset the latter for a successive operation.

1,398,995. LACING-CLOSURE. Arthur Balthasar, Montclair, N. J. Filed Aug. 13, 1921. Serial No. 491,920. 16 Claims. (Cl. 24—140.)

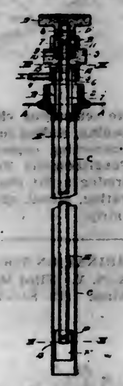


1. A slidable closure comprising channel strips on opposite sides of the opening, sliding lugs in both channels and tension means connecting opposite lugs; each said strip comprising a longitudinally flexible, edgewise inflexible body strip forming a flat channel member and a multiplicity of coöperating, alined, channel forming members secured to said strip.

1,398,996. COMBINATION-TOOL. Jose Martinez Barbera, New York, N. Y. Filed May 17, 1920. Serial No. 381,928. 2 Claims. (Cl. 81—119.)

1. A device of the class described comprising a handle shank, a cross-head carried by said shank, said cross-head having a series of recesses cut partway down therethrough adjacent to each of the sides and intermediate the ends thereof, a longitudinally disposed partition joining the end portions of said head and disposed midway between the sides of said head for forming the side walls of said recesses, and a transversely disposed reinforcing partition arranged on each side of said longitudinally disposed partition and disposed midway between the ends of said cross-head for forming the inner walls of said recesses.

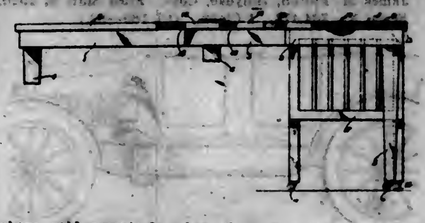
1,398,997. PROPULSION-SCREEN. Rosmus Symonds Bawden, Middleton St. George, England. Filed Sept. 20, 1916. Serial No. 251,078. 4 Claims. (Cl. 85—36.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. In a propulsion screen, a screen plate comprising a plurality of longitudinally arranged perforated and transversely corrugated plates each of which is independently cambered longitudinally in a constant state of flexure.

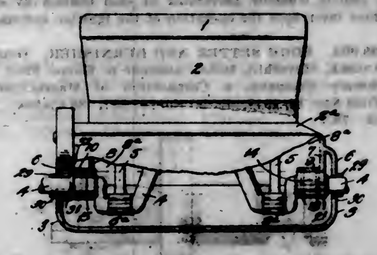
1,398,998. PROCESS OF PRODUCING PHENOLS. George B. Bradshaw, Stamford, Conn. Filed Oct. 23, 1917. Serial No. 198,167. 8 Claims. (Cl. 23—24.)

1. In the process of producing phenols by means of their calcium salts, acidifying an aqueous mixture containing said calcium salts to a point of complete solubility thereof.



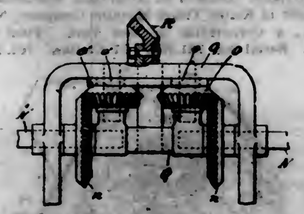
1,398,999. GASOLENE-VALVE. Gordon C. Bredin, Galt, Ontario, Canada. Filed Dec. 13, 1920. Serial No. 430,570. 1 Claim. (Cl. 158—46.5.)

In a device of the class described, the combination with a fuel tank, of a tube extending into the depth of the tank and communicating above the tank with a fuel feed pipe, said tube having an opening at its lower end for reception of fuel and having a port at a distance above the opening, a resilient radially expandible split ring formed of a portion of tubing having a longitudinal section removed, rotatable within said tube, adapted to seal said port therein and to open it by rotation of the ring to a point where the split therein registers with said port, and means for rotating said ring from without the tank.



1,399,000. EFFICIENCY-TABLE. William F. Brennan, Collinsville, Ill. Filed Apr. 15, 1921. Serial No. 461,733. 3 Claims. (Cl. 45—8.)

1. An extension table for household use, comprising a supporting frame, a top leaf rigid on the supporting frame, an additional frame connected with the supporting frame and movable toward and away from the supporting frame, a top leaf removably supported by the additional frame in alinement with the top leaf on the supporting frame, a receptacle within the additional frame below the plane of said removable top leaf, and a guard adapted to be positioned at the side edge of the rigid top leaf



above said receptacle when the removable top leaf is removed from the additional frame.

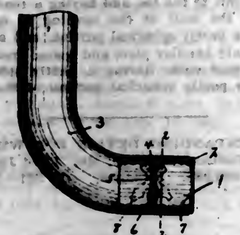
1,399,001. INTERNAL-COMBUSTION ENGINE. Harry Lowe Brownback, Norristown, Pa., assignor to The Premier Motor Corporation of America, Philadelphia, Pa., a Corporation of Delaware. Filed Jan. 22, 1921. Serial No. 439,231. 5 Claims. (Cl. 64—10.)

1. In a machine of the class described, the combination with the cylinders, the pistons, the crank shaft and the main frame structure which holds said parts in proper relations, of two bearings for the shaft and a supplemental frame or carrier for said bearings.

1,399,002. DIFFERENTIAL GEAR. Edwin de Haven Caldwell, Dunkirk, N. Y. Original application filed July 14, 1917, Serial No. 180,528. Divided and this application filed May 20, 1918. Serial No. 235,434. 1 Claim. (Cl. 74—99.)

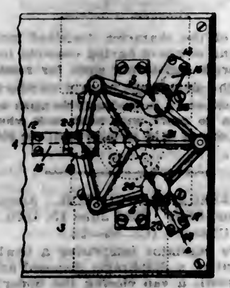
A differential gearing having relatively rotatable coaxial gears, a frame rotatable about the axis of said gears, pinions, journaled on the frame and engaged with said gears, eccentrics rotatable with said pinions, and a link having bearings engaging said eccentrics.

1,399,003. ATTACHMENT FOR SOUND-BOXES. Frank L. Capps, Brooklyn, N. Y. Filed May 10, 1919. Serial No. 296,134. 4 Claims. (Cl. 274—35.)



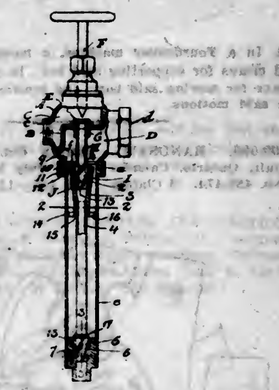
1. The combination of a sound-box having an offset extension, and the diaphragm thereof provided at its

center with a member affording a lever-connection such as an overhang, a block carrying two lugs and provided with a groove adapted to fit snugly upon said extension,



means for securing said block firmly in position upon said extension, a stylus-lever fulcrumed between said lugs and having its inner end disengageably engaging said lever-connection.

1,399,004. AUTOMATIC AIR-VALVE. Edward R. Case, Oneida, N. Y. Filed Aug. 19, 1919. Serial No. 318,567. 2 Claims. (Cl. 251—126.)

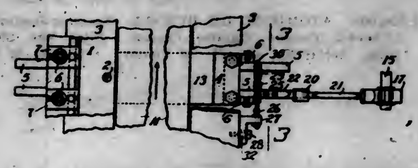


1. In an air-regulating device for carbureters, a tubular member of substantially circular cross section, and unobstructed throughout its length, a circular floating disk valve substantially filling the tube, and extending transversely of the same, means for supporting the valve for free swinging movement in both directions from closed position about a substantially horisontal axis off-set from the horisontal diameter of the valve so that the surface area of the valve below said axis is greater than the surface area of the valve above said axis, said valve being actuated solely by gravity, and the suction produced in the carbureter.

1,399,005. SPARK-GAP. George B. Crouse, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed June 14, 1918. Serial No. 239,913. 8 Claims. (Cl. 250—38.)

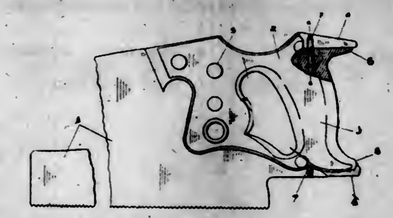
1. A spark gap for radio transmission, comprising a vibratory electrode substantially entirely of magnetic material, electromagnetic means for vibrating said electrode and a plurality of insulated electrodes normally bridged by said vibratory electrode.

1,399,006. ATOMIZING OIL-BURNER. Terence Joseph Cunnett, Toronto, Ontario, Canada. Filed Nov. 20, 1920. Serial No. 425,477. 4 Claims. (Cl. 158—75.)



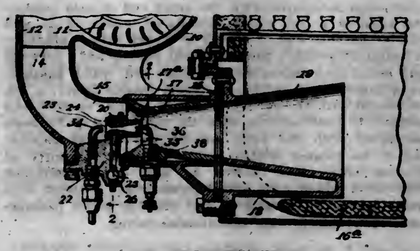
2. An oil-burner comprising a head having a dividing wall separating the same into oil and steam compartments, each having an inlet, and the steam compartment being further provided with an outlet; a conduit mounted in said dividing wall and communicating with said oil compartment; a tubular member having a flared inner end, through which oil and steam passes; a tubular casing adapted to be coupled to the outlet of said steam compartment and to incase said tubular member, the external diameter of said flared end being less than the internal diameter of the bore of said tubular casing to provide a passageway for steam between these parts; a mixer-head associated with the outer end of said conduit and adapted to set within said flared inner end of said tubular member and exteriorly provided with a plurality of spiral ribs which provide spiral passageways between said mixer-head and said flared inner end, which passageways communicate with said steam compartment; a tip associated with the outer end of said tubular member and adapted to communicate with the oil-line; a mixer-head associated with the outer end of said tubular member and to be located within said tip, and a plurality of exterior spiral ribs carried by said second-mentioned mixer-head which form spiral passageways between said second-mentioned mixer-head and said tip, which passageways communicate with said tubular casing.

1,399,007. ANTISEPTIC-SOLUTION. Alleston S. Cushman, Washington, D. C. Filed June 13, 1917. Serial No. 174,573. 1 Claim. (Cl. 167—3.)



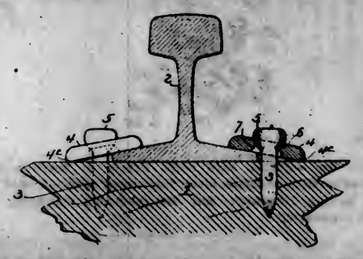
A composition of matter comprising the product of reaction of sulfur dioxid upon formaldehyde in the presence of water, said product being a liquid having sufficient stability to permit transportation and a specific gravity approximating 1.4.

1,399,008. FOURDRINIER MACHINE. ALBERT JOHN DAVIES, Kenogami, Canada. Filed June 24, 1919. Serial No. 306,248. 3 Claims. (Cl. 92—51.)



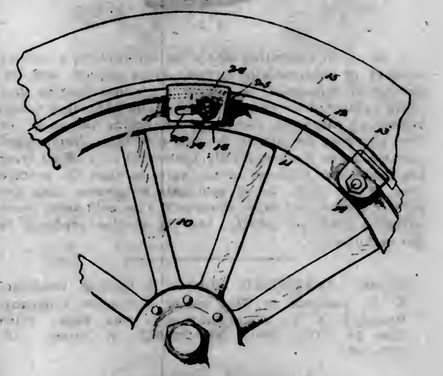
1. In a Fourdrinier machine, a movable suction-box; and means for supporting said box; in combination with means for moving said box; and tensile means for guiding said motions.

1,399,009. HANDSAW. JEROME COLWELL DIETRICH, Galt, Ontario, Canada. Filed July 29, 1921. Serial No. 488,474. 3 Claims. (Cl. 145—113.)



1. In a hand saw, the combination of a blade provided with two rearwardly extending tangs; a handle having its upper and lower edges grooved to receive said tangs; and a reinforcing rod extending through the handle in the same plane as the blade and having notches formed in its ends through which the tangs extend.

1,399,010. MEANS FOR ATOMIZING AND IGNITING LIQUID FUEL. ARNER DOBLE, Detroit, Mich. Filed Feb. 28, 1918. Serial No. 219,671. 3 Claims. (Cl. 158—31.)

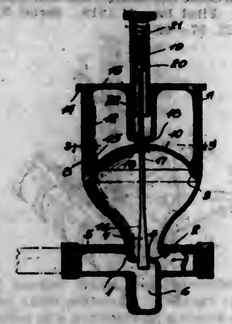


1. The combination of a main Venturi tube, an auxiliary venturi including a fuel nozzle, in said main venturi, a supplemental nozzle arranged to project a jet of high pressure air in said auxiliary venturi, an ignition device for igniting the spray formed by said supplemental nozzle, means for supplying air under pressure to said supplemental nozzle, and an air blower for supplying air to said main venturi to atomize the fuel in said auxiliary venturi.

1,399,011. RAIL-FASTENING MEANS. BYRAM I. DOWNS, Pittsburgh, Pa., assignor to Flannery Bolt Company, Pittsburgh, Pa. Filed Apr. 8, 1920. Serial No. 372,152. 3 Claims. (Cl. 238—338.)

3. In rail fastening means, the combination with a railway rail and a tie, of an annular plate bridging from a flange of the rail to the tie, and having a rounded peripheral portion, the wall of the opening in said annular plate having a partly spherical portion, and a spike passing through said annular plate and spaced from the flange of the rail, said spike having a partly spherical head seated on the partly spherical portion of the plate.

1,399,012. EXPANDING DEVICE FOR WHEEL-RIMS. JAMES F. ENGLAND, Lebanon, Mo. Filed July 30, 1920. Serial No. 399,988. 5 Claims. (Cl. 301—20.)

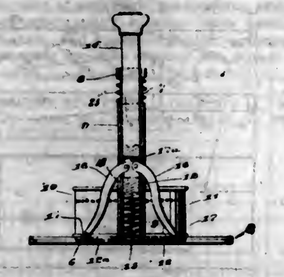


1. A device of the character described including companion expanding members having coacting inclined faces and provided with registering slots for receiving a bolt therethrough, the slot of one of said members being provided with a rack, and a nut adjustable upon said bolt and having a pinion to coact with said rack whereby as the nut is rotated, one of said members will be elevated upon the other.

1,399,013. PRESSURE-REGULATOR. AUSTIN E. FLESNER, Columbus, Ohio. Filed June 15, 1920. Serial No. 389,221. 2 Claims. (Cl. 50—23.)

2. A pressure regulator comprising a bowl having an inlet and an outlet, a diaphragm disposed across the interior of the bowl, a cap closing the upper end of the bowl, a valve consisting of a rod extending through and secured to said diaphragm and having its lower end playing through the outlet of the pressure chamber and its

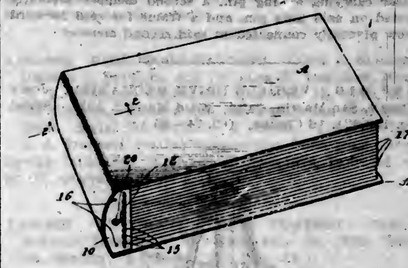
upper end provided with an abutment, an adjusting sleeve fitted in the cap around the upper end of the valve and the



abutment thereon, and a tension spring disposed within the adjusting sleeve between said abutment and the upper end of the sleeve.

1,399,014. DYESTUFF AND MODE OF PRODUCING IT. EADY HART, Ballarat East, Victoria, Australia, assignor of one-half to Isabella Jessie Stewart, Ballarat West, Victoria, Australia. Filed Feb. 16, 1920. Serial No. 359,105. 7 Claims. (Cl. 8—6.)

2. Improved dye-stuff consisting of the product obtained by immersing a chromogenic vegetable substance divided into small parts in a solution containing sodium carbonate and lime, boiling the mixture and filtering the resultant liquor.

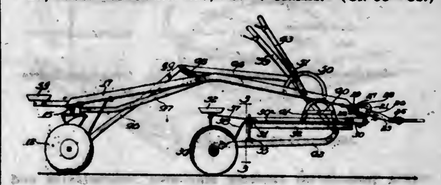


1,399,015. EGG-POACHING APPARATUS. FREDERICK E. HUMMEL and JOHN J. NOETH, Chicago, Ill. Filed Dec. 10, 1920. Serial No. 429,747. 5 Claims. (Cl. 53—1.)

3. An egg-poaching apparatus comprising an egg cup composed of a side wall, and a bottom separate from said side wall and composed of a pair of plates which are slidable transversely beneath the side wall to come together at their opposite edges, and also to spread, said edges having notches which match to form drain openings, a support for said plates, and a slidable support for the side wall carried by said support for permitting said wall to be elevated relative to the plates.

1,399,016. LOOSE-LEAF BINDER. OAKEY E. JONES, Los Angeles, Calif. Filed Dec. 29, 1920. Serial No. 433,842. 6 Claims. (Cl. 129—38.)

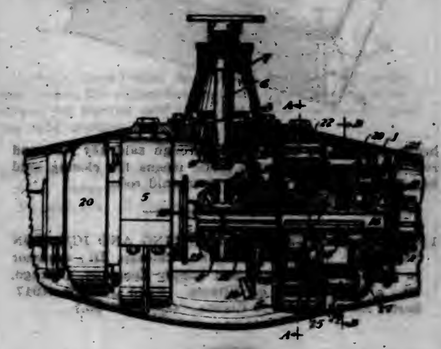
1. A loose leaf binder comprising covers and a back to which the same are secured, plates mounted upon opposite ends of said back, each having an elongated slot therein and a key slot offset therefrom, rods extending between said plates and through said elongated slots and having



heads adapted to be inserted through said key slot and retained in said elongated slots, means for closing said key slot, and leaves mounted upon said rods.

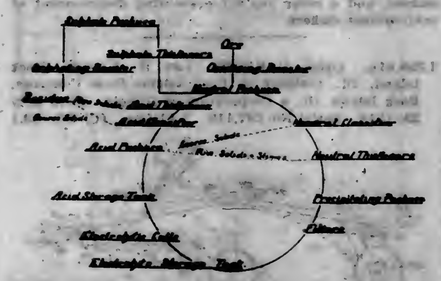
1,399,017. COMBINATION LIGHTING AND IGNITION SWITCH. WILLIAM KAISLING, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed June 6, 1917. Serial No. 173,084. 29 Claims. (Cl. 200—45.)

1. A switch device including a light switch and an ignition switch, a mounting plate provided with a pair of firmly secured studs, a movable contact maker for said light switch supported by one of said studs, a movable contact member for said ignition switch supported by the other of said studs, a slidable lock plate for locking said switches, slots for said lock plate through which said studs project, collars adapted to fit over said studs into the slots of said lock plate, said collars forming guides for said plate and bearings for said rotatable contact makers, and a cover cap for preventing displacement of said contact makers.



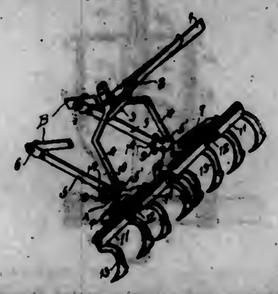
1,399,018. DISK HARROW. LEE H. KAUPER, Rock Island, Ill., assignor to Rock Island Plow Company, Rock Island, Ill., a Corporation of Illinois. Filed July 29, 1918. Serial No. 247,119. 7 Claims. (Cl. 55—83.)

1. In an implement of the class described, a rear harrow and a front harrow arranged in tandem relationship, each of said harrows consisting of two sets of disk gangs, a frame for said rear harrow extending forwardly and over



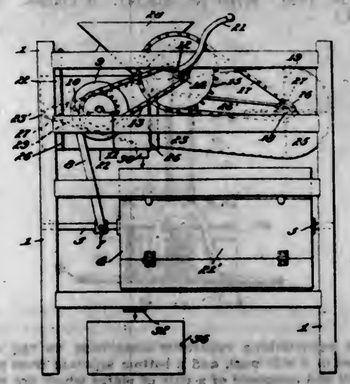
said front harrow, a member attached to the front end of said frame, a pair of draft links carried by said member extending forwardly thereof, and a bearing socket in said member carrying a king pin, a second member pivotally mounted on said king pin, and a frame for said forward harrow pivotally connected to said second member.

1,399,019. VEHICLE DRIVE MECHANISM. JOHN KNOHN, San Martin, Calif. Filed Mar. 22, 1917. Serial No. 156,621. 6 Claims. (Cl. 74—35.)



1. A drive mechanism of the class described, comprising intermeshing internal and external gears, means for imparting an eccentric motion to one of said gears whereby it is caused to roll on the remaining gear, a driven member, connections between said driven member and the gear which is given the eccentric motion, said connections comprising a plurality of links which are pivoted to said gear, and a plurality of links which are pivoted to said driven member, and a plate pivotally connecting the opposite ends of all the links.

1,399,020. PROCESS FOR THE EXTRACTION OF ZINC. FREDERICK ERIC LEE, ARTHUR LIONEL MCCALLUM, and SELWYN GWILLYM BLAYLOCK, Trail, British Columbia, Canada, assignors to The Consolidated Mining & Smelting Company of Canada, Limited, Montreal, Quebec, Canada, a Corporation of Canada. Filed Apr. 30, 1920, Serial No. 377,935. Renewed July 22, 1921. Serial No. 486,803. 7 Claims. (Cl. 75—18.)



1. A process for treating zinc ores, concentrates and residues, which consists of oxidising the zinc values, extracting the soluble zinc, and then heating the residue containing zinc values in insoluble combinations in a sulfating atmosphere to convert the zinc values into soluble zinc compounds.

1,399,021. CULTIVATOR. CHARLES S. MCGAHEY, Jr., Sandusky, Ohio, assignor, by mesne assignments, to The Moto Motor Macultivator Company, Toledo, Ohio, a Corporation of Ohio. Filed Dec. 9, 1919. Serial No. 343,089. 3 Claims. (Cl. 97—42.)

3. In a cultivator, the combination with a frame and drag bar, of a transverse supporting bracket carried by the drag bar and mounted to be swung about a horizontal axis into different angular positions, said supporting bracket having two spaced points of connection, a pair of substantially horizontally disposed tool holding bars pivotally connected to each other at their adjacent ends, and pivot bolts at the two points of connection of the transverse bracket, said pivot bolts having both a pivotal and sliding connection with the respective tool supporting members whereby the latter can be secured in position at different angles to themselves and to the supporting bracket.

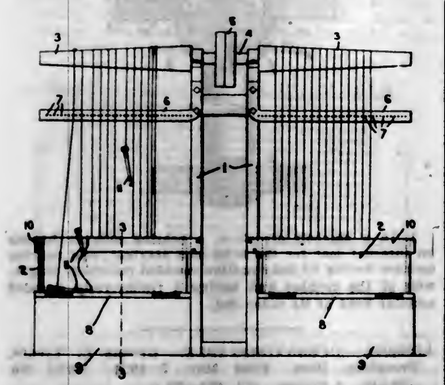
1,399,022. GRADING OR SEPARATING MACHINE. SYLVESTER MARSHALL, Athens, Ohio. Filed Mar. 9, 1921. Serial No. 451,067. 5 Claims. (Cl. 130—15.)

2. The combination with a suitable support, of a laterally rocking longitudinally inclined screen suspended at its ends therein and having plates along its side edges to prevent material from falling through at such points; the mesh of the screen being larger than the greatest transverse diameter of the grains to be graded or separated, and means for rocking the screen.

1,399,023. BUILDING BLOCK OR SLAB. RICHARD MURRAY, New York, N. Y. Filed Mar. 10, 1920. Serial No. 364,777. 2 Claims. (Cl. 72—99.)

1. A block or slab of cementitious material, comprising a rectangular frame embedded in said block or slab, for

reinforcing the same, said frame being made of a piece of heavy wire, bent to form a hook-shaped member which projects beyond one side face of the block or slab, the said

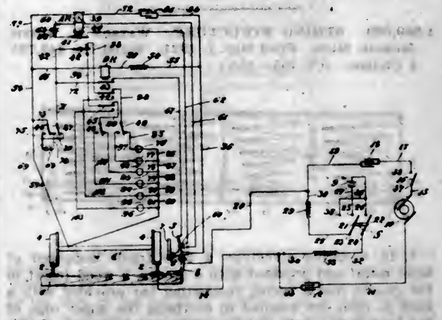


hook-shaped member being bent outwardly, downwardly, inwardly and again outwardly to engage the upper, inner and under sides of a horizontally disposed support, whereby said block or slab is held and locked to said support.

1,399,024. METHOD OF CHANNELING SHOE-SOLES. GEORGE M. PETTENGILL, Haverhill, Mass., assignor to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed Apr. 8, 1919. Serial No. 288,666. 9 Claims. (Cl. 12—146.)

1. The method of operating a tool in a channel about an angle which consists in imparting to the tool a partial turning movement in such manner as to change the angle of presentation of its cutting edge to the work while operating upon one side of said angle, maintaining said angle of presentation substantially constant while passing the apex of such angle, and completing such turning movement while operating upon the opposite side of said angle.

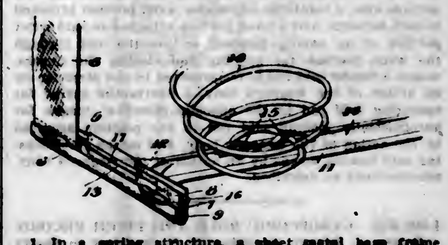
1,399,025. BOBBIN-STRIPPER. CLARENCE A. PIERCE, Lowell, Mass. Filed May 16, 1921. Serial No. 470,183. 2 Claims. (Cl. 19—15.)



1. In a bobbin stripping machine, the combination with a receptacle to contain bobbins to be stripped, of a rota-

table spindle above the receptacle and adapted to have the yarn ends from the bobbins wound thereon, and a device interposed between the spindle and receptacle to prevent any bobbins which may be lifted from the receptacle from being wound on the spindle.

1,399,026. FIREPROOF VARNISH. CECIL L. DAUMONT, GEORGE C. STANLEY, and CHARLES W. BENNETT, Ithaca, N. Y. Original application filed Oct. 18, 1919, Serial No. 330,384. Divided and this application filed Nov. 3, 1920. Serial No. 421,525. 3 Claims. (Cl. 23—5.)

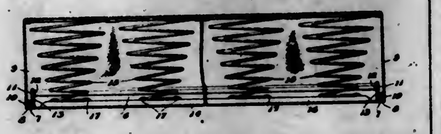


1. A fireproof coating composition comprising varnish having intimately incorporated therein a hydrated oxid of tin, substantially as described.

1,399,027. AUTOMATIC TRAIN CONTROL. PAUL J. SIMMEN, Buffalo, N. Y. Filed Mar. 26, 1920. Serial No. 369,131. 5 Claims. (Cl. 246—71.)

4. In an automatic train control, in combination: a roadway; a source of electric current of one characteristic on the roadway; a source of electric current of another characteristic on the roadway and having at least two variations of that characteristic; an electrical device on the car; a second electrical device on the car including an armature differently operated by the said variations; means for energizing the first mentioned electrical device by current of one characteristic; means for energizing the second mentioned electrical device by the variations of the current of the other characteristic and means controlled jointly by the first mentioned electrical device and the armature of the second mentioned electrical device for train control.

1,399,028. SPRING STRUCTURE. WATSON R. SMITH, Jackson, Mich. Filed Feb. 16, 1921. Serial No. 445,518. 7 Claims. (Cl. 155—180.)



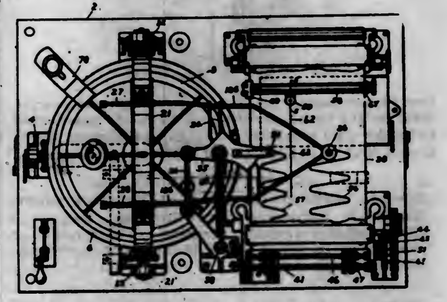
1. In a spring structure, a sheet metal base frame strip provided with an external groove, and a spring supporting bar provided with a hook at each end adapted to detachably overhang the upper edge of the base frame strip, each hook being provided with a bump adapted to spring into said external groove.

1,399,029. SPRING STRUCTURE. WATSON R. SMITH, Jackson, Mich. Filed Feb. 23, 1921. Serial No. 447,180. 8 Claims. (Cl. 155—180.)

1. In a spring structure, a base frame strip provided at its lower edge with an external upwardly opening groove and having a longitudinal rib in its outer face intermediate its edges overhanging said external upwardly opening groove, and a spring supporting member provided with a hook adapted to be snapped into engagement with the rib on the base frame strip.

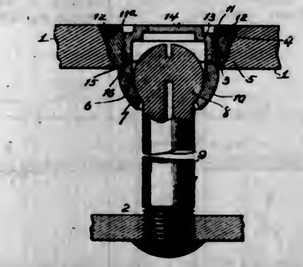
1,399,030. SPRING STRUCTURE. WATSON R. SMITH, Jackson, Mich. Filed Mar. 1, 1921. Serial No. 448,791. 4 Claims. (Cl. 155—180.)

3. In a spring structure, a base frame composed of sheet metal and provided with a groove, a wood insert in the groove, and a spring supporting bar provided with a hook at each end adapted to overhang the upper edge of the base frame strip, the base frame strip and the hooks of said bar being provided with interlocking connections whereby to effect a snapping connection between the same and permit of detachable relation.



1,399,031. ARTIFICIAL ARM. WILLIAM SOUREK, Elmer, Minn., and JOSEPH KOPFHAMER, Casenovia, Wis. Filed May 31, 1921. Serial No. 474,045. 2 Claims. (Cl. 3—12.)

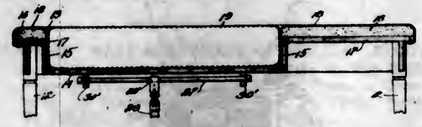
1. The combination with an artificial arm comprising a forearm having means for attaching same to a stump of a natural arm, a rotatable adjustable wrist portion attached to said forearm, and a hand portion attached to said wrist portion, of an axially disposed reciprocable rod through the wrist portion for opening and closing the fingers, means whereby said rod is reciprocated in one direction by an action of the wearer's body, a contractile spring for operating said rod in the opposite direction, means for automatically locking said rod in the position acquired by the action of the wearer's body, and means for releasing said locking means by an action of the wearer's body, substantially as described.



1,399,032. GYROSCOPIC ROLL AND PITCH RECORD. ELMER A. SPERRY, Brooklyn, N. Y., assignor to Sperry Gyroscope Company, a Corporation of New York. Filed Nov. 24, 1916. Serial No. 133,230. 4 Claims. (Cl. 234—26.)

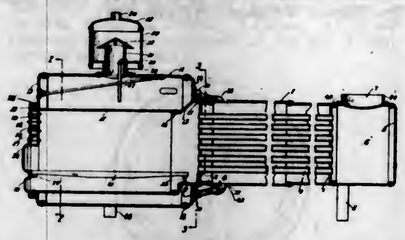
1. In a motion recorder for oscillating bodies, a gyroscope, means including a gimbal ring for mounting the same for oscillation about two horizontal axes and for spinning about a third axis, a loop pivotally mounted adjacent said gyroscope on an axis substantially in line with one of said horizontal axes, a slidable connection between said gyroscope and loop permitting free oscillation of the former about the other horizontal axis without turning said loop, a traveling chart, means connected to said gimbal ring to be moved by apparent oscillation of the gyroscope about said last named axis for producing a record on said chart, and a second means connected to said loop to be moved by apparent oscillation of the gyroscope about the axis of the loop, for producing a second record on said chart.

4. Means for recording the motions of an oscillating body comprising a gyroscope, means for mounting the same for oscillation about two horizontal axes, a traveling surface mounted adjacent thereto, a marker mounted for movement across said surface, an inclined guideway connected to said marker, means for mounting the same for movement at an angle to the direction or travel of said surface, a member engaging said guideway and secured to said gyroscope so that when it is moved about an axis of said gyroscope in the direction of travel of said surface, said marker will be moved across said surface.



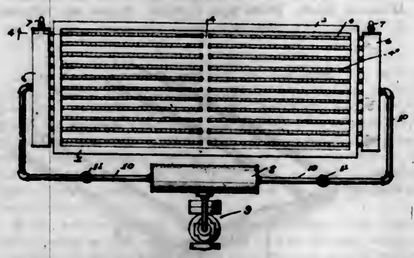
1,399,033. STAYBOLT STRUCTURE. BENJAMIN E. D. STAFFORD and ETHAN I. DODDS, Pittsburgh, Pa., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Sept. 12, 1919. Serial No. 323,361. 5 Claims. (Cl. 85—1.5.)

1. In a staybolt structure, a bearing member having an internal seat for the head of a staybolt, said bearing member having its body portion rounded exteriorly lengthwise of the member and having a transversely rounded annular head at its outer end.



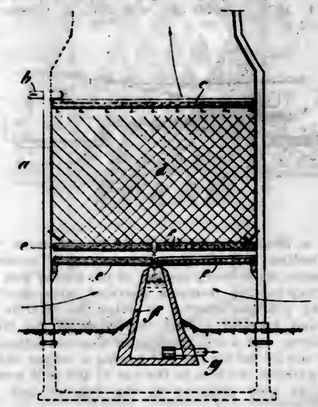
1,399,034. OPERATING-TABLE. GEORGE C. TAPLIN, Brookline, Mass. Filed Mar. 7, 1921. Serial No. 450,340. 8 Claims. (Cl. 128—72.)

1. An operating table having an opening in its top, a rigid supporting bottom below the opening; a rigid confining curb between the bottom and the opening, and a pneumatic mattress having a bottom wall bearing separably on the said bottom, a marginal wall bearing separably on the curb, and a top wall yieldingly supported



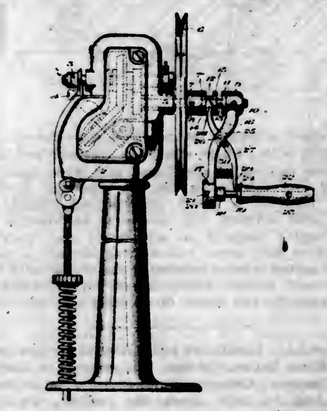
in the opening by the charge of air in the mattress, the separability of the said marginal wall from the curb permitting uniformly free downward, upward, and edgewise movements of all portions of said top wall.

1,399,035. SECTIONAL BOILER. HARRY G. THAYER and SAMUEL T. MCLELLAN, Charleston, W. Va., assignors of one-third to Lewis D. Truslow, Charleston, W. Va. Filed July 17, 1920. Serial No. 396,980. 5 Claims. (Cl. 122—136.)



1. In a steam boiler, the combination with a cylindrical barrel; of a furnace comprising a cylindrical shell, an off-center cylindrical fire box therein, a crescent plate connecting the front ends of said shell and box, an annular plate secured to the rear end of the shell, and a plate connected at one end to the box and having its body deflected and its other end flanged and connected with said annular plate; means for connecting the barrel to the furnace with its end engaged with said flange, and a front plate closing the other end of the fire box and having doors.

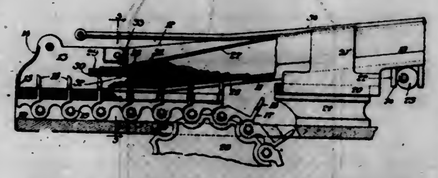
1,399,036. APPARATUS FOR PREVENTING SPONTANEOUS COMBUSTION IN COAL PILES. JOHN A. THOMAS, Columbus, Ohio. Filed Oct. 12, 1918. Serial No. 257,913. 6 Claims. (Cl. 98—26.)



3. An apparatus for storing coal, comprising a receptacle including a base and substantially perpendicular side walls, the upper surface of said base being provided with grooves, pipe members disposed to occupy said grooves, said pipe members being formed with rows of outwardly opening apertures, means for supplying air under pressure to said pipe members, and the upper surface of said base being longitudinally and transversely inclined to provide a discharging medium for accumulated water within said receptacle.

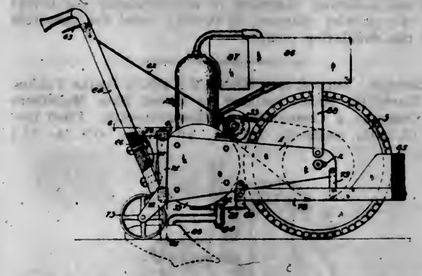
1,399,037. COOLING-TOWER. FRITZ UHDE, Breslau, Germany. Filed Oct. 19, 1915. Serial No. 56,731. 2 Claims. (Cl. 261—108.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a cooling tower, the combination of a trickling chamber and collecting troughs arranged substantially horizontally at the lower end thereof, an air-inlet chamber at the base of the trickling chamber, under said troughs, and a collecting receptacle projecting above the ground level to a point closely adjacent the troughs to thereby produce, without impeding the air-supply, a head of water in the collecting receptacle of approximately the height of the air-inlet chamber, to thereby assist the operation of the circulating pump.



1,399,038. DRIVE MECHANISM. FÉLIX EMILE VALOIS, Haverhill, Mass., assignor to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed Dec. 17, 1918. Serial No. 267,111. 10 Claims. (Cl. 74—33.)

1. In a device of the class described, in combination, a part to be driven, a freely rotatable crank arm for driving



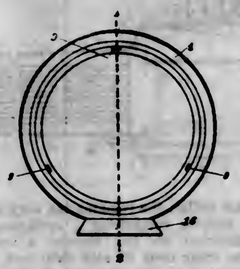
the same and provided with a clutch element, a complemental clutch element slidably keyed to the part to be driven by said crank arm, a crank pin carried by said arm and slidable thereon, and means for transmitting sliding movement of said crank pin to said slidable clutch element for actuating the latter.

1,399,039. BOX-FILLING MACHINE. JACOB P. WRIGHT, Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 4, 1921. Serial No. 458,255. 5 Claims. (Cl. 226—12.)

1. In a box-filling machine, the combination with a splint feeding hopper, of a tray-conveyer mounted to travel under the delivery portion of the hopper and having spaced tray-holding members provided with up-standing measuring portions adapted to enter the interior of the hopper and transfer splints therefrom to the trays on the conveyer, and a cut-off member mounted adjacent the delivery end of the hopper and having a tongue extending in close parallel relation to the top of the said measuring portions as they progress to the delivery end of the hopper.

1,399,040. SELF-PROPELLED AGRICULTURAL IMPLEMENT. HENRY C. BAINES, Cleveland, Ohio, assignor to The Baines Engineering Company, Canal Dover, Ohio, a Corporation of Ohio. Filed May 21, 1920. Serial No. 383,069. 9 Claims. (Cl. 180—19.)

1. In a self propelled vehicle of the class described, the combination with a frame, of a single tractor wheel mounted adjacent one end of said frame, said wheel being composed of two interfitting traction members yieldingly clamped together, a power transmitting element frictionally held between said members, an internal combustion engine mounted on said frame and operatively connected to said power transmitting element, a pair of laterally spaced wheels supporting the end of said frame opposite said tractor wheel, means for adjusting said wheels laterally, and means for steering said vehicle.



1,399,041. DEMOUNTABLE-RIM CONSTRUCTION. EARL KING BAKER, Chicago, Ill., assignor to Universal Rim Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 14, 1916. Serial No. 114,799. 10 Claims. (Cl. 301—19.)

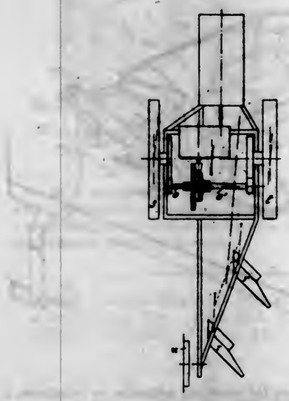
1. A demountable rim construction comprising a fixed rim having a conical, circumferential rim seat on its periphery, in combination with an integrally flanged demountable tire carrying rim having a complementary rim seat, said demountable rim having a plurality of integral

projections on its inner periphery near its outer edge, said projections presenting oblique outer shoulders, pressure lugs complementing respective projections, and screw means for actuating said lugs.

1,399,042. LAMP GLOBE OR SHADE. ROSCOE H. BERMAN, Albany, N. Y. Filed July 22, 1919. Serial No. 312,604. 2 Claims. (Cl. 240—100.)

1. A lamp globe comprising two ring shaped parts, each formed of sheet metal, one edge of each being permanently secured to an edge of the other, and the outer edge of each being bent toward the center, then inward, and then again toward the center to provide a lens seat the casing having an opening at one side arranged symmetrically with reference to the lens seat, and means for securing a lens to the outer face of the seat.

1,399,043. VEHICLE ROAD-TRACK. JOEL R. BELKNAP, Midland, Mich. Filed Apr. 4, 1919. Serial No. 287,404. 3 Claims. (Cl. 238—4.)

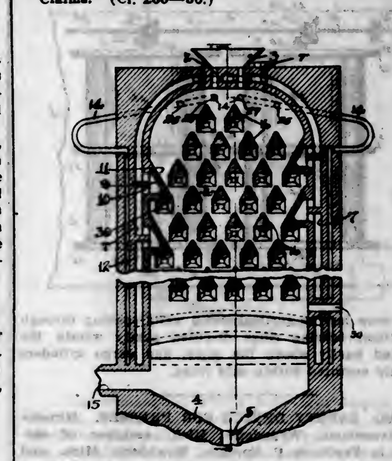


2. In a vehicle track, a track member transversely concave at its middle portion and having downwardly

arched and diverging lateral lip portions adapted to be embedded in the material of a roadway, the outer lip portion being of greater depth than the inner lip portion for bracing said track member against transverse displacement under lateral stress.

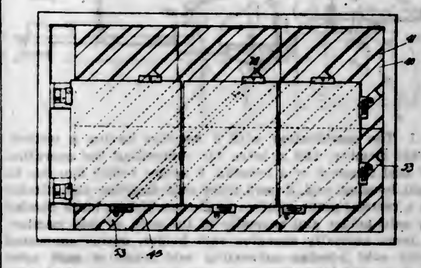
1,399,044. HEAT TREATMENT OF METALS. ARTHUR E. BELLIS, Springfield, Mass., assignor to The Bellis Heat Treating Company, New Haven, Conn., a Corporation of Connecticut. Filed Nov. 26, 1920. Serial No. 426,620. 3 Claims. (Cl. 148—15.)

1. In the art of heat treating metals to be forged, stamped, rolled or otherwise mechanically operated upon while in the hot state, first heating the metal piece to the requisite temperature by immersion in a bath of metal salt components in the form of a single liquid, then withdrawing the metal piece from the bath with a film of the bath material thereon and subjecting the piece without removing the bath film therefrom to the mechanical shaping operation.



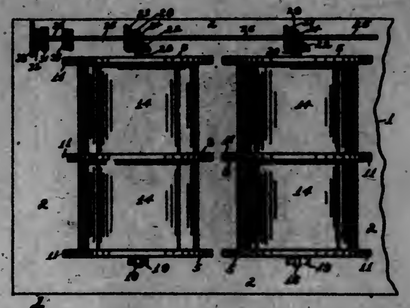
1,399,045. AGRICULTURAL MACHINE. RUDOLF BERNSTEIN, Halle-on-the-Saale, Germany. Filed Dec. 14, 1916. Serial No. 137,052. 3 Claims. (Cl. 97—30.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In an automobile agricultural machine, the combination with a soil working device of two driving wheels, arranged on either side of the machine and one of which is located nearer to the center of the resistance offered to the soil working device than the other, and means for unequally distributing the driving power to the driving wheels, so as to impart a greater driving force to the wheel, which is nearer to said center of resistance.



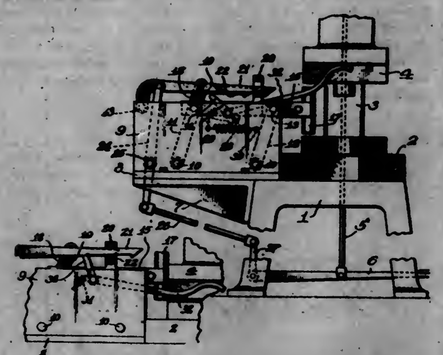
2. In an automobile agricultural machine, the combination with a soil working device of two driving wheels, arranged on either side of the machine and one of which is located nearer to the center of the resistance offered to the soil working device than the other, and unsymmetric differential mechanism adapted to unequally distribute the driving power to the driving wheels, so as to impart a greater power to the wheel, which is nearer to said center of resistance.

1,399,046. ORE-TREATING FURNACE. FREDERICK J. BOWMAN, Cleveland, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 29, 1917. Serial No. 209,410. 6 Claims. (Cl. 263—30.)



1. In an ore roasting furnace, the combination of a roasting chamber, a plurality of triangular heated elements disposed in transverse rows with their apices uppermost, the elements in each row being arranged to lie between the elements of the next adjacent rows, means for introducing finely divided ore at one end of said chamber, and other means adapted to supply heated oxygen at the same end.

1,399,047. PRINTING-PLATE MOUNTING. WILLIAM F. BROWMANN, Evanston, Ill., assignor to Printing Utilities Company, a Corporation of Delaware. Filed July 19, 1915. Serial No. 40,640. 18 Claims. (Cl. 101—388.)



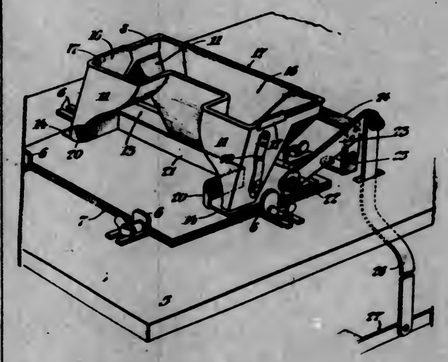
1. In a printing plate mounting, the combination of a foundation having an undercut groove in its upper surface, a plate-clamping catch having a body insertible in, and slidable along, said groove, means carried by, and movably mounted on, said body for locking said body against movement out of said groove and engageable with the under-cut surfaces of said groove at points spaced longitudinally of said groove, a member carried by said body for controlling said locking means and means in the groove and on the block meshing together, when the block is locked in the groove, to hold the plate clamping catch against longitudinal movement in the groove.

1,399,048. DUMP-SCOW. HUGH V. BUTT, Norfolk, Va. Filed Mar. 2, 1921. Serial No. 449,449. 2 Claims. (Cl. 114—27.)

1. A scow having vertical dump wells opening through the bottom, bearing rings disposed partly within the wells and partly above the same, and cargo cylinders rotatively mounted within said rings.

1,399,049. SAFETY DEVICE FOR PRESSES. HUDSON A. DAVENPORT, Wyandotte, Mich., assignor of one-third to Frederick P. Sprague, Wyandotte, Mich., and one-third to Harry G. Morrison, Trenton, Mich. Filed Oct. 30, 1919. Serial No. 334,560. 4 Claims. (Cl. 192—116.)

1. The combination with a machine having a reciprocable member, and a lever for controlling the operation of said member, of a housing, a holder bodily movable in said housing and to and from said machine and tiltable in a vertical plane relative to the machine, a block carried by said holder and normally in the path of said member, a latch normally engaging said holder, means supported from said housing connecting said latch to said lever so that said latch may be operated to retract said holder when said lever is depressed, and means parallel to said latch and supported from said housing adapted to temporarily hold said holder until said member is in the path of said block.

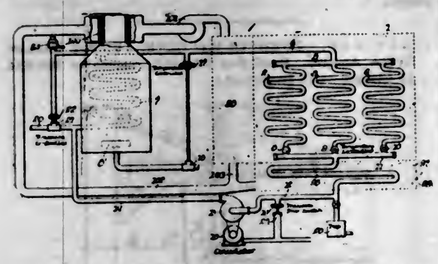


1,399,050. CROSSBAR FOR TRAMWAY-TRACKS. ARTHUR DEVAIN, Jemeppe-Liége, Belgium. Filed Nov. 1, 1916. Serial No. 126,886. 3 Claims. (Cl. 238—80.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. The combination with a rail-way rail having a slot formed in the web thereof, of a fastening device therefor comprising a rod formed with a reduced portion and a head adapted to have locking engagement within said

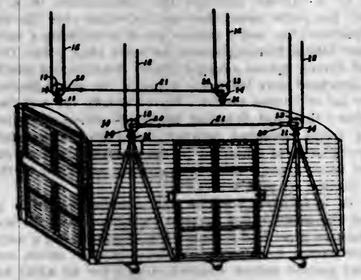
slot, and a device fitting in the slot against said reduced rod portion and holding said rod from displacement, substantially as set forth.

1,399,051. APPARATUS FOR APPLYING ADHESIVE TO WRAPPING-PAPER. WILLIAM J. ELDER and CHARLES N. MOSHEROSS, Oswego, N. Y., assignors to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 2, 1920. Serial No. 370,630. 5 Claims. (Cl. 93—68.)



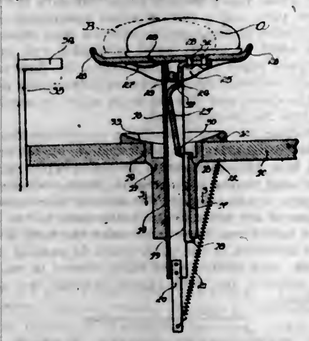
1. In an apparatus for applying adhesive to wrappers, a wrapper support, a unitary paste receptacle comprising a main upper chamber and a series of depending feed chambers integral with and supplied from said upper chamber, said feed chambers terminating at their lower ends in contracted discharge openings which overhang the adjacent rear and side edges of the wrapper and afford a space to receive the packages to be wrapped, and connections permitting bodily vertical reciprocation of said receptacle above the wrapper support.

1,399,052. HEATING SYSTEM. LEWIS M. ELLIS, Chicago, Ill., assignor to Winslow Safety High Pressure Boiler Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 23, 1920. Serial No. 432,702. 17 Claims. (Cl. 237—67.)



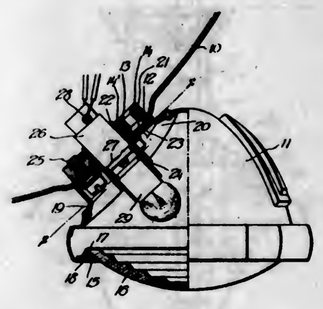
1. A heating system comprising a closed vapor circuit, said circuit including a heater for superheating the vapor to a temperature above the temperature corresponding to the saturated vapor at the pressure prevailing in the system, a coil for giving off heat from the vapor and reducing the temperature of the vapor to a point above the

corresponding temperature of saturated vapor at the same pressure and a circulator for moving the vapor from the



coil back to the superheater while the vapor is still uncondensed.

1,399,053. RETAINING DEVICE FOR ELEVATING-CABLES. BENJAMIN F. FITCH, Evanston, Ill. Filed June 30, 1920. Serial No. 392,966. 10 Claims. (Cl. 254—89.)



1. In a device of the class described, the combination with a plurality of hoisting sheaves, of means comprising a movable tension device for limiting the distance separating the said hoisting sheaves.

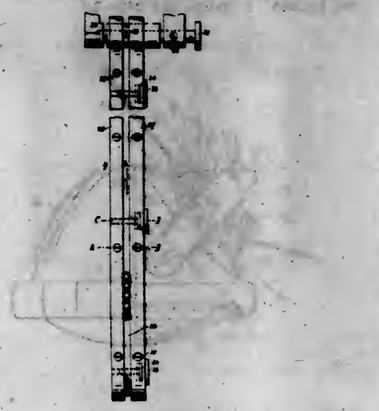
1,399,054. ACCELERATOR-PEDAL. WILLIAM C. GEWALT, Racine, Wis. Filed Nov. 11, 1920. Serial No. 423,251. 9 Claims. (Cl. 74—81.)

1. A motion imparting device comprising a stem and a head, a guide for the stem, and means carried on and operable by the head for engagement with the guide for locking the stem.

1,399,055. LAMP-SUPPORTING MEANS FOR MOTOR-VEHICLES. GEORGE E. GODDARD, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed June 10, 1916. Serial No. 102,945. 2 Claims. (Cl. 240—7.)

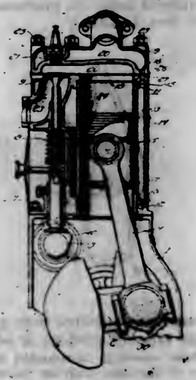
1. The combination with a lamp body having a front opening, a detachable lens for said opening, and a boss extending diagonally both inwardly and outwardly from the wall of said lamp body, of a support surrounding the outwardly extending part of said boss, a lamp bulb in the inwardly extending part of said boss, and detachable securing means for said lamp body to said support accessible through said front opening.

1,399,056. SHUTTLE FOR EMBROIDERING-MACHINES. PAUL RICHARD HAUSSLER, Plauen, Germany. Filed Feb. 1, 1916. Serial No. 75,555. 2 Claims. (Cl. 112—234.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



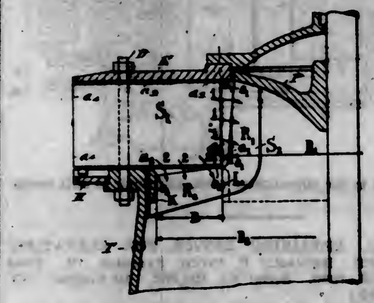
1. A shuttle comprising a shuttle body provided with a continuous guiding face, all portions of which lie in the same plane, an inlet opening surrounded by said guiding face, and a bulge in the side wall of the shuttle beneath the guiding face portion of such side wall, said bulge being curved both lengthwise of the shuttle and transversely thereof.

1,399,057. EYELET AND HOOK-SETTING MACHINE. DITMAR HEINSOHN, Oberursel on Taunus, Germany. Filed June 30, 1915. Serial No. 37,254. 1 Claim. (Cl. 218—15.1.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



In an eyelet and hook setting machine having a die and punch, an adjustable race way comprising a casting, two vertically yieldable guide bars, springs between said casting and said guide bars, holding-screws for regulating the

distance between said guide bars and said casting, the screw holes in one of the guide bars through which the



holding screws pass being slotted for allowing a lateral displacement of the corresponding guide bar, and set-screws to bring about this lateral displacement.

1,399,058. CYLINDER CONSTRUCTION. JOHN O. HEINEN, Boyne City, Mich., assignor to Traction Engine Company, Boyne City, Mich., a Corporation of Michigan. Filed Aug. 4, 1919. Serial No. 315,329. 8 Claims. (Cl. 123—173.)

1. In a gas engine, the combination of a cylinder frame adapted to serve as the outer wall of an annular cavity containing water for cooling purposes, said frame having at one end a head inclosing the compression end of the cylinder, a sealing seat being provided at the inner or compression end of the frame, a sleeve having its inner end engaging said seat and its outer end provided with means coöperating with the outer end of the frame for sealing the lower end of the water cavity and for forcing the inner end of the sleeve into said seat, thereby sealing the upper end of the water cavity, the sleeve constituting the inner wall of the cavity, and a piston reciprocable within said sleeve, all said parts constituting a unitary structure and a crank case on which said structure is detachably supported.

1,399,059. TURBINE-MACHINE. VICTOR KAPLAN, Brünn, Austria. Filed Nov. 20, 1913. Serial No. 803,384. 15 Claims. (Cl. 253—122.)

1. In a turbine machine the combination of a guide wheel, the guide vanes thereon projecting over the wall of the suction pipe, and a runner wheel comprising a series of runner blades forming spaces between each other, the one set of runner spaces adapted chiefly for an axial admission and arranged near the lower edges of the guide blades, the other set of runner blades adapted chiefly for a radial admission; the fluid entering the guide wheel centripetally being freely deflected between the guide vanes, and the quantity of fluid admitted to the axial portion of runner wheel being greater than the quantity admitted to the radial portion of said wheel.

2. In a turbine machine the combination of a guide wheel, the guide vanes thereon projecting over the wall of the suction pipe, and a runner wheel comprising a series of runner blades, forming spaces between each other, one set of said runner spaces adapted chiefly for an axial admission and arranged near the lower edges of the guide vanes, another set of axial flow runner spaces arranged near the upper edges of said guide vanes and a third set of runner spaces adapted chiefly for a radial admission, the fluid entering centripetally between the guide vanes being freely deflected in the guide spaces and the quantity of fluid admitted to the axial portion of the runner being greater than the quantity admitted to the radial portion of said wheel.

3. In a turbine machine, the combination of a guide wheel, the guide vanes thereon projecting over the wall of the suction pipe, and a runner wheel comprising a series of runner blades forming spaces between each other adapted for an axial or nearly axial admission and arranged near the lower edges of the guide vanes, the fluid entering centripetally between the guide vanes being freely deflected in the guide spaces and flowing in an axial or nearly axial direction into the runner wheel.

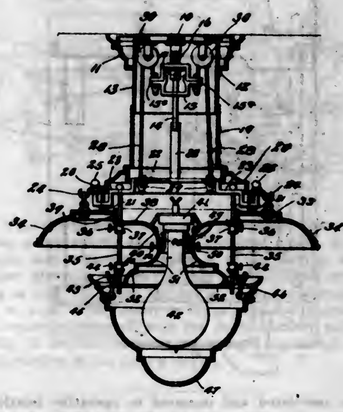
14. A turbine machine comprising in combination a runner provided with axial flow blades, guide blades arranged to extend in a generally radial direction with respect to the axis of said runner and extending from the outer edges of the runner blades toward the axis of the runner, the radial edges of the guide blades being open to the runner blades and contiguous thereto whereby the fluid is free to change its direction in the guide space in passing through the machine, said guide blades being curved in the radial direction whereby the fluid passes through the machine without shock.

1,399,060. PISTON-PACKING DISKS. JAMES W. KELLY, Chicago, Ill. Filed July 30, 1920. Serial No. 400,040. 2 Claims. (Cl. 74—109.)

1. The combination with a piston having a boss formed thereon, of a packing member on said piston comprising a

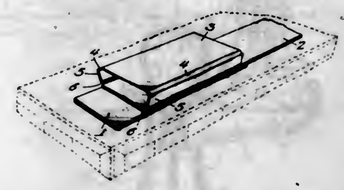
flat ring portion seated on said boss, a downwardly inclined portion integral therewith and resting against the

head of said piston, and a circumferential flange integral with said inclined portion.



1,399,061. TIN-OPENER. GUSTAV KRACHT, Solingen, Germany. Filed Jan. 17, 1913. Serial No. 742,553. 1 Claim. (Cl. 30—8.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

In a tin-opener, the combination of a forked handle, having a butt-bearing, an arm pivoted to said handle, a cutting blade carried by said arm, a spring to turn said blade into the forked handle when not in use, and a button on said arm to turn the blade into its operative position, substantially as and for the purpose set forth.

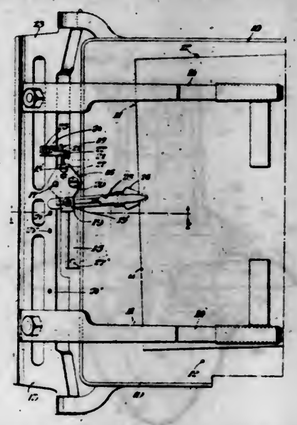


1,399,062. LIGHTING-FIXTURE. CHARLES R. LEIMECKE, Detroit, Mich.; Blanche C. Leimecke, widow of said Charles R. Leimecke, deceased. Filed May 27, 1920. Serial No. 384,000. 13 Claims. (Cl. 240—78.)

1. In a lighting fixture, the combination of a vertically adjustable outer reflector having a reflecting surface, an extension forming a secondary or inner reflector also having a reflecting surface and which is arranged for vertical adjustment independently of said outer reflector, a bowl suspended beneath said inner reflector, a source of light

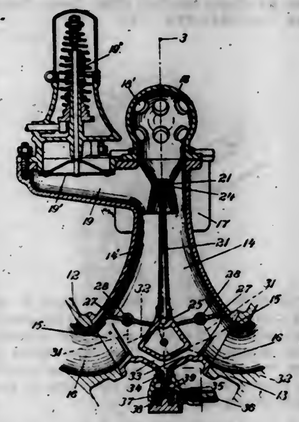
within said bowl, and a semi-focusing reflector arranged between said source of light and said outer reflector.

1,399,063. REINFORCING-GIRTH. JOHN W. LESLIE, Evanston, Ill. Filed Mar. 15, 1920. Serial No. 365,953. 7 Claims. (Cl. 24—28.)



1. A reinforcing girth for box strapping or the like, comprising a back piece, a pair of flanges arranged at the longitudinal edges of the back piece, and extending outwardly and downwardly and then downwardly and inwardly, the free edges of the flanges being spaced apart a distance substantially equal to the width of the corresponding box strapping.

1,399,064. SHEET-REGISTERING DEVICE. EDWARD R. LINEBAUGH, Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 17, 1921. Serial No. 445,596. 3 Claims. (Cl. 101—414.)

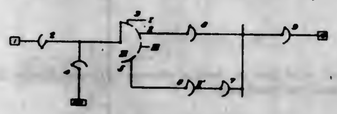


1. In a printing press having a platen and sheet stops thereon and having a vibratory gripper bar coöperating with said platen, a unitary reversible sheet registering device comprising an oscillatory member having spaced-apart portions for interchangeable pivotal mounting adjacent the platen, a sheet receiving and registering arm detachably secured to one end of said member, and means providing a freely movable connection for the opposite end of said member and either of two locations on the

bar as required by the pivotal mounting of the said member, whereby the said member, arm and connecting means

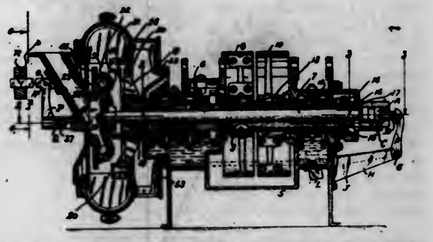
can be associated and mounted in operative relation to each other to effect either right or left hand registry movement of the said arm.

1,399,065. CARBURETER. ALLEN LOOMIS, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 13, 1915. Serial No. 61,282. 3 Claims. (Cl. 261—1.)



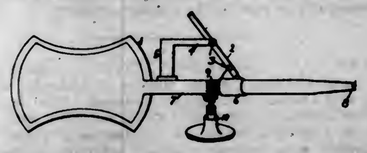
1. In a carbureter the combination of an air inlet, two mixture outlets below said inlet, a Venturi tube extending downwardly from said inlet, a cross member between said outlets and a gasolene nozzle mounted on and extending upwardly from said cross member into said Venturi tube.

2. In a carbureter, the combination of an air inlet, two mixture outlets below said inlet, a Venturi tube extending downwardly from said inlet, a cross member between said outlets, a gasolene nozzle mounted on and extending upwardly from said cross member into said Venturi tube, and a drain for condensed gasolene between said outlets and below said cross member.



3. In a carbureter, the combination of an air inlet, two mixture outlets below said inlet, a Venturi tube extending downwardly from said inlet, a cross member between said outlets, a gasolene nozzle mounted on and extending upwardly from said cross member into said Venturi tube, a drain for condensed gasolene between said outlets and below said cross member and throttle valves for each outlet at either side of said cross member.

1,399,066. TELEPHONE-EXCHANGE SYSTEM. FRITZ LUBBERGER, Berlin-Halensee, and WALTER PINELL, Siemensstadt, near Berlin, Germany, assignors, by mesne assignments, to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 20, 1915. Serial No. 51,719. 12 Claims. (Cl. 179—18.)



1. In a telephone exchange system, a calling and a called line, means including a plurality of groups of selectively operable switching devices and trunk lines for establishing a connecting path between said lines, and means operable upon the failure of a switching device of one group to find an available switching device of the next succeeding group of switching devices to extend the connecting path around the group of unavailable switching devices to an idle trunk normally accessible through the switching devices of said latter group.

1,399,067. PULVERIZING-MILL. EDWARD F. MCCOOL, Cleveland, Ohio. Filed June 4, 1918, Serial No. 238,094. Renewed Mar. 8, 1920. Serial No. 364,249. 7 Claims. (Cl. 83—10.)

1. A pulverizing mill including two coöperating grinding members, one being movable toward and away from the other, one of the said members carrying at its outer edge a ring, and means for automatically adjusting the said ring to regulate the discharge space and to compensate for the wear of the grinding members, said means including a bell crank lever having one arm weighted while the other arm serves to yieldingly maintain the ring in the desired position of adjustment.
